Michigan Department of Health and Human Services
Diabetes Self-Management Education and Support Standards

Standard 1:
Internal Structure

The provider(s) of DSMES services will define and document a mission statement and goals. The DSMES services are incorporated within the organization – large, small, or independently operated.

Review Criteria

1.1 A mission statement encompassing the purpose(s) of the DSMES services is required.

1.2 There must be annual evidence of the organization’s support and commitment to the DSMES services. Support needs to be demonstrated from hospital/local health department administrative personnel.

1.3 The program goal(s) and/or objectives established for the DSMEP will be reviewed at least annually. There is evidence of annual review by the quality coordinator. A minimum of one goal will be in SMART format (specific, measurable, attainable, realistic/relevant, and timely).

1.4 An organizational chart is required.

Interpretive Guidelines

The organizational chart(s) will include:

- Placement of the DSMES services within the organization
- Specific structure of the DSMEP services staff
- DSMES services link to stakeholder input (Advisory Group)
Michigan Department of Health and Human Services
Diabetes Self-Management Education and Support Standards

Standard 2: Stakeholder Input

The providers of DSMES will seek ongoing input from valued stakeholders and experts to promote quality and enhance participant utilization.

Review Criteria

2.1 An Advisory Group is in place and represents stakeholders in the service area.

Interpretive Guidelines

There is evidence of a system for seeking input from stakeholders outside of the DSMES services. Stakeholders should be representative of the community served.

2.2 Single discipline programs must have a healthcare professional(s) of a different discipline other than that of the single discipline provider. There must be documented input from the other discipline in the records.

2.3 Advisory Group activity will be documented at least annually and demonstrate its input in quality improvement of the program.

There will be evidence that external input was sought and documented at least annually. The documentation can be in the form of meeting minutes, emails, and/or phone calls.
**Michigan Department of Health and Human Services**

**Diabetes Self-Management Education and Support Standards**

**Standard 3:** Evaluation of Population Served

The provider(s) of DSMES services will evaluate the communities they serve to determine the resources, design, and delivery methods that will align with the population’s need for DSMES services.

<table>
<thead>
<tr>
<th>Review Criteria</th>
<th>Interpretive Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 The DSMES service will identify the demographics of the population in the service area.</td>
<td>Examples of where this information may be located: US Census Data, Robert Wood Johnson Foundation, the hospital’s Community Health Needs Assessment, the CDC, the USDA.</td>
</tr>
<tr>
<td>3.2 There is documentation that demonstrates the population served and the population the DSMES services wish to serve.</td>
<td>Gaps in the two populations are documented along with a plan to address the gaps. Stakeholders should be utilized to address the gaps.</td>
</tr>
<tr>
<td>3.3 There is evidence of ongoing evaluation of resources to determine adequacy to meet the needs of the population.</td>
<td>Examples - budget, staffing, location of services, hours of operation, culturally appropriate materials.</td>
</tr>
</tbody>
</table>
Michigan Department of Health and Human Services
Diabetes Self-Management Education and Support Standards

Standard 4:
Quality Coordinator Overseeing DSMES Services

A quality coordinator will be designated to ensure implementation of the Standards and oversee the DSMES services. The quality coordinator is responsible for all components of DSMES, including evidence-based practice, service design, evaluation, and continuous quality improvement.

Review Criteria

4.1 The DSMES service has a designated coordinator.

4.2 The quality coordinator is academically or experientially prepared in areas of chronic disease care, patient education and/or program management.

The coordinator will meet one of the following requirements:

Certified Diabetes Educators (CDE) OR
Board Certification in Advanced Diabetes Management BC-ADM OR
Annually accrues 15 hours of approved continuing education (CE)

Interpretive Guidelines

There is a written job description for the quality coordinator role which includes the responsibilities of evidence-based practice, service design, evaluation, and continuous quality improvement.

In the absence of a designated DSMES Quality Coordinator role description, consideration will be given to other documents accounting for the role responsibilities.

Documents verifying the designated coordinator meets the role requirements will be available for review and will include the following:

- Resume/CV
- Discipline specific license and/or registration
- Credentials as CDE or BC-ADM or 15 CEs

CE documentation must be an official transcript or copies of CE certificates. Printouts of logs are not acceptable.

CE is based on the DSMES program anniversary month or calendar year but must be consistent throughout the certification period.
4.3 MDHHS will be notified within 30 days of a change in coordinator.

In addition to a change form, new coordinators need to submit:

- resume/CV
- copy of professional license
- copy of CDE certificate OR 15 hours of CE in diabetes
- Training plan
Michigan Department of Health and Human Services
Diabetes Self-Management Education and Support Standards

Standard 5:
DSMES Team

At least one of the team members responsible for facilitating DSMES services will be a registered nurse, registered dietitian nutritionist, or pharmacist with training and experience pertinent to DSMES, or be another health care professional holding certification as a diabetes educator (CDE) or Board Certification in Advanced Diabetes Management (BC-ADM). Other health care workers or diabetes paraprofessionals may contribute to DSMES services with appropriate training in DSMES and with supervision and support by at least one of the team members listed above.

Review Criteria

5.1 The DSMES team must include at least one RN or one RD or one pharmacist. Evidence supports an inter-professional approach to diabetes care, education, and support therefore a multidisciplinary approach is recommended but not required.

At least one RN or one RD or one pharmacist is part of the DSMES team and is involved in the education of participants.

5.2 All instructional staff will meet one of the following requirements:

Certified Diabetes Educator or 15 hours of approved continuing education accrued annually

New instructional staff will have 15 hours of approved continuing education within 4 months of date of start date of joining the DSMES team (includes contractors and paraprofessionals).

Interpretive Guidelines

Documents verifying the instructors meet requirements will be available for review and will include:

- resume/CV
- copy of professional license
- specialized pump training document

Documents necessary for review include:

- copy of CDE certificate or 15 hours of CE in diabetes

CE topic need to reflect content included on the NCBDE examination content outline. CE is based on the DSMES program anniversary month or calendar year but must be consistent placeholder for all team members throughout the certification period.
5.3 Paraprofessional DSMES team members must be qualified and provide diabetes education within each discipline’s scope of practice.

Paraprofessional team members must demonstrate previous experience or training in diabetes, chronic disease, health and wellness, healthcare, community health, community support, and/or educational methods as evidenced by resume or certificate.

Paraprofessional DSMES team members must have supervision by the quality coordinator or healthcare professional DSMES team member. Supervision can be demonstrated by position description or performance appraisal tool.

Paraprofessional team members must have documentation of 15 hours of training in diabetes or diabetes related topics (as outlined above) upon joining the DSMES team prior to instructing participants and annually. CE is based on the DSMES program anniversary month or calendar year but must be consistent for all team members throughout the certification period. CE must reflect the area/s of DSMES they instruct.
Michigan Department of Health and Human Services

Diabetes Self-Management Education and Support Standards

Standard 6:

Curriculum reflecting current evidence and practice guidelines, with criteria for evaluating outcomes, will serve as the framework for the provision of DSMES. The needs of the individual participant will determine which elements of the curriculum are required.

Review Criteria

6.1 There is a written curriculum which is the framework for DSMES and includes:

- Measurable learning objectives
- Detailed content outlines
- Instructional methods (specified methods of delivery)
- A means of evaluating if participants achieved their learning objectives

Interpretive Guidelines

Evidence validating the education process is guided by a reference curriculum is present.

The curriculum must be appropriate for and inclusive of the population served (i.e., adapted for age, developmental stages, type of diabetes, cultural factors, health literacy and numeracy, and comorbidities).

The following eight content areas will be included:

- Diabetes pathophysiology and treatment options
- Healthy eating
- Physical activity
- Medication usage
- Monitoring and using patient-generated health data (PGHD)
- Preventing, detecting and treating acute and chronic complications*
- Healthy coping with psychosocial issues and concerns
- Problem solving

*including disaster preparedness
The following content areas are encouraged:

- Navigating the healthcare system
- Learning self-advocacy
- E-health education

6.2 There is periodic review with revisions of the curriculum and/or course materials to reflect current evidence.

There is documentation of the curriculum review and revisions by the DSMES instructor(s) at least annually. There is evidence of the curriculum being tailored to the DSMES population. Note: For audit purposes, all curriculum changes made during the certification period will be maintained.

6.3 The curriculum will include content on influenza, pneumococcal, and hepatitis vaccines.

Michigan Department of Health and Human Services

Diabetes Self-Management Education and Support Standards

**Standard 7:**

**Individualization**

The DSMES needs will be identified and led by the participant with assessments and support by one or more DSMES team members. Together, the participant and DSMES team member(s) will develop an individualized DSMES plan.

**Review Criteria**

7.1 An individualized, initial assessment will be completed with each participant prior to beginning DSMES.

7.2 The assessment should incorporate information about the participants:

- Medical history, age, cultural influences, health beliefs and attitudes, diabetes knowledge, diabetes self-management skills and behaviors, emotional response to diabetes, diabetes burden, readiness to learn, literacy level (including health literacy and numeracy), physical limitations, family and peer support, financial status, other barriers

**Interpretive Guidelines**

- The assessment does not have to occur in a 1:1 setting, however, it is preferred.

- A self-assessment or knowledge pre-test should not serve as the sole means of assessing and documenting the participant’s knowledge, skill level and behaviors.

- When applicable, the assessment should include a participant caretaker’s ability to assist with or assume diabetes management.

7.3 An *individualized* education plan is developed using the information gathered in the comprehensive assessment.

7.4 The education plan is implemented.

- There is evidence of ongoing education planning and behavioral goal setting (in SMART format) based on the assessed and/or re-assessed participant’s individualized needs.

- Education is provided based on participant needs and education plan. Adjustments following re-assessment are evident.
7.5 The education process is documented in the permanent record.

Documentation in the participant’s health record should include: DSMES professional team member’s assessment/re-assessment of the participant’s service needs, education plan, intervention, and outcomes of provided education.
Michigan Department of Health and Human Services

Diabetes Self-Management Education and Support Standards

**Standard 8:**

**Ongoing Support**

The participant will be made aware of options and resources available for ongoing support of their initial education, and will select the option(s) that will best maintain their self-management needs.

<table>

Michigan Department of Health and Human Services

Diabetes Self-Management Education and Support Standards

Standard 9:

Participant Progress

The provider(s) of DSMES services will monitor and communicate whether participants are achieving their personal diabetes self-management goals and other outcome(s) to evaluate the effectiveness of the educational interventions(s), using appropriate measurement techniques.

Review Criteria

9.1 Attainment of goals/outcomes shall be measured regularly in order to evaluate the effectiveness of the educational intervention.

Interpretive Guidelines

A process is in place for the systematic collection and summary of participant behavior goal(s) achievement.

Achievement of participant goals and other outcomes will be evaluated as a way to measure the effectiveness of the DSMES services and will be used for ongoing program evaluation and planning.

There is evidence that education planned or provided and participant outcomes were communicated back to the referring provider.

9.2 A summary of goals, using a systematic approach (e.g. AADE 7) will be included in the annual report to the MDHHS (see Standard #10 for more details).

9.3 At least one program outcome will be addressed annually.

There is evidence of a collection and summary of other program outcomes to evaluate DSMES effectiveness. Examples include (but are not limited to): patient satisfaction, provider satisfaction, staff satisfaction, quality of life, A1c, BMI, dilated eye exams, etc.
Michigan Department of Health and Human Services
Diabetes Self-Management Education and Support Standards

Standard 10: Quality Improvement

The DSMES services quality coordinator will measure the impact and effectiveness of the DSMES services and identify areas for improvement by conducting a systematic evaluation of process and outcome data.

Review Criteria

10.1 The DSMES services has a quality improvement process to evaluate the education, program processes and program outcomes.

Interpretive Guidelines

There is written documentation of an identified CQI plan/process used. This may include a written policy, template used to identify a needed improvement, etc.

There is documentation of a Continuous Quality Improvement (CQI) project which will include:

a. Opportunities for DSMES service improvement or change (what are you trying to improve, fix, or accomplish).
b. Baseline project achievement
c. Project target outcome
d. Outcome assessment and evaluation schedule

10.2 Quality improvement projects are developed and implemented based on regular aggregation of DSMES outcomes data.

There is evidence of documentation of ongoing quality improvement project and implementation of a new project when applicable.

a. Documented quality improvement project outcomes will be present
b. Quality improvement outcomes will be measured annually at a minimum
c. DSMES services will have documented plans and actions based on project outcomes.
CQI projects do not have to be year-long in duration. Some projects can be wrapped up much more quickly however, each component of a CQI project must be documented (baseline, target, outcome assessment, etc).

10.3 There will be an annual report submitted to the MDHHS. The annual report, based on the findings of an annual program review and focused on quality processes, will define and guide activities of the DSMES services for the next year.

A report template will be created each year by the MDHHS. Reports must be submitted electronically in this template as statewide data is aggregated from the reports.

The default due date for the report is January 31. Contact the MDHHS DSMT Program Coordinator if a different time frame is desired (e.g. coordinated with the program’s annual review for ADA/AADE).

10.4 The DSMES service will provide a Statistical Report annually to the MDHHS.

A report template will be created each year by the MDHHS. Reports must be submitted electronically in this template as statewide data is aggregated from the reports.

The statistical report is due from both MDHHS certified and non-MDHHS certified programs.

The statistical report is due November 30th. The statistical reporting period is October 1 – September 30, aligning with the State fiscal year.
