

# Hepatitis C Virus Monthly Surveillance Report (June 2016)

(Data extracted 8/24/2016; Report released 8/25/2016)

This monthly report is designed to inform local health departments of Hepatitis C Virus (HCV) cases reported to the Michigan Disease Surveillance System (MDSS) that may be related to injection drug use. These cases include all acute HCV cases and chronic HCV cases among persons aged 18 to 29. Also included are the number of ED visits related to injection drug use that were reported to the Michigan Syndromic Surveillance System (MSSS). The purpose of the report is to highlight areas where transmission of HCV may be occurring among people who inject drugs. The goal is that, when warranted, this information will lead to more timely and effective public health intervention. Below are State-wide data trends. LHD-specific numbers can be found in the table that follows.

Please see our separate document on **Technical Notes** for how these data are obtained and defined and limitations to the data.

County	LHJ	Region	Acute HCV Cases (Current Month)	Acute HCV Cases (this month 2015)	Acute HCV Cases (YTD)	Acute HCV Cases (2015 YTD)
