% of children experiencing food insecurity (lack of access, at times, to enough food)

15.7% COUNTY

15.9%

# **EXISTING HOME VISITING PROGRAMS**

Home visiting programs sit at the intersection of families and communities. They provide critical linkages between families and community service systems. Houghton County identified the reach and quality of services for families that partner with home visiting and identified strengths and gaps in the service network. Some patterns of reach and quality for home visiting clients and the service delivery network were noted during the assessment, and ideas for strengthening the service delivery network are described below.

HOUGHTON COUNTY
ARE RECEIVING
HOME VISITING
SERVICES

The number of home visiting programs and families enrolled were gathered through a home visiting program survey. The estimate of need was a highly conservative estimate calculated at the federal level. Also, while every county in the Upper Peninsula has access to at least one home visitor, some home visitors cover multiple counties, which means fewer families are served due to driving time.

#### WELL CONNECTED SERVICES

MOST OF THE YEAR

There are a small group of programs for families in Houghton County that know each other well and are willing to work together.

#### **MEETING NEEDS OF CLIENTS**

Based on the results of the home visiting program survey, home visiting programs in this area of the UP refer families to at least 18 other programs. Two thirds of these programs usually or always have the capacity to meet family needs.

#### **GAPS IN THE SERVICE NETWORK**

The variety of programs available is limited, as is service capacity.

Additionally, referrals between agencies are lower than they could be.

#### **QUALITY OF SERVICES PROVIDED**

Based on the results of the home visiting program survey, 86% of the 18 programs that home visiting programs in this area of the UP refer families to provide high quality services.

#### STRENGTHENING THE SERVICE DELIVERY NETWORK

Service delivery could be strengthened by hiring additional home visitors. Each home visitor could cover a smaller geographic area, allowing for building stronger communication connections with families and being able to serve more families by spending less time driving between counties.

## **FAMILY PERSPECTIVES ON HOME VISITING**

The Upper Peninsula engaged parents across the region who had participated in a Home Visiting program to take part in a focus group to share their experiences with home visiting and other community services. Focus group participants were asked to describe the risks and opportunities families face in their communities; the outcomes they're concerned about and what facilitates wellbeing; strengths and opportunities to improve home visiting programs; and strengths and opportunities to improve the service delivery system. These results are not specific to this county but represent the experiences of 7 parents from across the Upper Peninsula.

### **STRENGTHS**

Parents who participated in the focus group expressed that they enjoyed home visiting as a service and their home visitor. They described their home visitors as accessible, responsive, accepting, supportive, and understanding. They noted the value of the educational materials provided, as well as the linkages to services. They also described how much they appreciated having someone to connect with openly and honestly about needs and challenges who could provide both a listening ear and helpful guidance. For example, one parent noted that, as a first-time mom, her home visitor helped her learn how to care for her baby, as well as what to expect as a parent. Another parent described how the activities she learned through home visits have helped her find ways to interact more with her children.

### **OPPORTUNITIES TO IMPROVE**

Parents who participated in the focus group highlighted the need to improve awareness of home visiting. They suggested stronger connections with health care providers and school systems as sources of referrals into home visiting, as well as having a greater presence at community events such as resource fairs. Parents also noted the need to address sigma and misperceptions of home visiting. In addition, parents noted that home visiting programs could facilitate more social interactions by occasionally meeting in locations where children gather and play, like a playground or library.

# **OUTCOMES OF HOME VISITING**

Focus group participants noted that home visiting has had a variety of important outcomes for themselves and their families. They indicated that home visiting has helped them build coping strategies and learn to ask for help. They also described how, as a whole family service, home visiting has strengthened family bonds and improved sibling relationships. Parents also noted positive outcomes in the area of school readiness for their children. One parent described how a referral from her home visitor helped her get a good job, supporting her economic self sufficiency.

# FAMILY PERSPECTIVES ON HOME VISITING (CONTINUED)

#### OTHER KEY TAKEAWAYS

Virtual visits during the COVID-19 pandemic worked well for some parents who participated in the focus group; however, internet issues and access to technology made this option very difficult for other families. Also, some families were not offered virtual visits, and wished that option had been available.

When asked about other services needed by families in the UP, focus group participants highlighted needs related to transportation and childcare. They also spoke to the social isolation experienced by families in rural areas and noted that this has been exacerbated by the COVID-19 pandemic.

## **NEED & CAPACITY TO EXPAND HOME VISITING**

Houghton County has the need to expand evidence-based home visiting. The community is committed to evidence-based home visiting but needs additional staff and supervision capacity in order to serve more families.

This process engaged families to participate as partners and leaders by providing barrier reduction (mileage, lodging, meal reimbursement, childcare, etc.) and stipends for participating in events/meetings. LMAS District Health Department/UPHVN currently has a policy in place supporting authentic family involvement through the Local Leadership Group.

Thank you to the parents and community partners who engaged in the assessment process.
