Common Hospital Claim Denials

Policy: Medicaid Provider Manual (MPM), Billing and Reimbursement for Institutional Providers Chapter, Section 12- Remittance Advice

In the event MDHHS denies a claim there are claim adjustment reason codes (CARC) and remittance advice remark codes (RARC) appended that explain why the claim was denied. These codes can be located on the weekly paper remittance advice (RA) or electronically within the CHAMPS system by doing a claim inquiry. For providers that have elected to receive the 835 Electronic Remittance Advice (835 ERA) claim denial information can also be found within this report. Definitions for the CARC and RARC codes can be found on the Washington Publishing Company website (WPC).

Providers are expected to review the editing on each claim to determine why a claim was denied, making the necessary corrections and resubmitting as a new claim or adjusting the original.

Top Denials:

**CARC 22 and RARC N598:** Beneficiary has other insurance listed in CHAMPS that was not reported on the claim. Medicaid is the payer of last resort and all identifiable payers must be reported on the claim. It is suggested that providers review the TPL coverage file in CHAMPS for accuracy. If changes need to be made then the online DCH 0078 request to add/change/update other insurance should be completed.

Online DCH 0078

Other Insurance Reporting Requirements Tip

**CARC 23:** The other insurance information reported on the claim includes a CARC that is considered a denial, suspend, or otherwise not reimbursable. It is suggested that providers report the other insurance processing information on the service line to prevent the entire claim from being denied.

BBA posted June 13, 2017

**CARC A8 and RARC N657:** Un-groupable DRG. Reporting invalid information can cause claims to be denied as ungroupable IE: procedure code, diagnosis, patient gender, missing or invalid modifiers can cause claims to be denied.

A8 Outpatient Hospital Claims Denials Provider TIP
CARC 97 and RARC M86: Split billing. There is a previously paid claim in the system with the same dates of service and the services being billed are not allowed for repetitive billing as defined by CMS. Providers can use the claim limit list function in CHAMPS to view the previously paid claim.
