

MDSS Searching and Exporting Tip Sheet

Important Tips for Searching During COVID-19 Pandemic!

It has been found that certain search parameters may result in unusually long searches or unusually large result sets that would be returned. Before the pandemic, these searches would have slowed the system some and taken a long time to return for the user but would not have crashed the system. However, with the extra workload presented by COVID-19, both in user activity and in data flowing into the system, some of these larger searches have contributed to a tipping point. Because of these issues, some changes have been made to the Search page.

Search Changes:

1. The search button will be grayed out until a search parameter has been chosen

2. If no date criteria are specified, the search will default to searching cases with referral dates in the last month. *NOTE - the referral date limitation does NOT apply to searches that include Investigation ID, Patient ID, or First and/or Last names.*

Search Considerations:

Please try to make searches as specific as possible when looking for cases.

Best practices:

- Include date, jurisdiction and status criteria that would keep expected search results under 100,000 cases.
- Use the overnight batch exports (if possible). The export report will generate during non-peak periods and the user will receive an e-mail from mdhhs_mdss@michigan.gov when the export is ready. The export will typically be available the following day.
- If immediate data is needed, multiple smaller reports (fewer than 1,000 lines) may still be run sequentially.

If you would like any additional information or if you need step-by-step instructions for using basic or disease specific searches, please contact your [regional epidemiologist](#).

SEARCH TIPS

- Wild card searches allow the user to perform searches when the complete term is not known by using the asterisk (*). For example, L* gives all entries that start with L
 - Using the wild card search can be especially helpful when searching name fields or the outbreak ID field. Use the asterisk at the beginning and end of your parameter to include the most variations
 - For example, in the outbreak ID field, *facility name* will give results for cases with [VARB117 facility name] or [facility name FULLVAC] or [FULLVAC facility name month_year] in that field
- Use the CTRL key to select or de-select multiple options within a field
- Aggregate cases can be included in your default individual case list. ***This is beneficial if you use the aggregate case report form to report clusters or outbreaks to MDHHS***
 1. Click on 'Searches' in the Case Investigation Tab
 2. Click 'Edit' for your default search (the one designated with 'X')
 3. Click 'Advanced' at the bottom of the screen
 4. Check the box next to 'Include Aggregates'
 5. Click 'Save & Finish'

BASIC SEARCH

Name of Saved Search <input type="text"/>		Default Search <input type="checkbox"/>	
Investigation ID : <input type="text"/>	Case Status : Confirmed Confirmed-Non Resident	Investigation Status : Active Canceled	
Patient First Name : <input type="text"/>	Patient Last Name : <input type="text"/>	Patient ID : <input type="text"/>	
Investigator First Name : <input type="text"/>	Investigator Last Name : <input type="text"/>	Investigator Userid : <input type="text"/>	
Reportable Condition : Acute Flaccid Myelitis (AFM) Amebiasis Anthrax Babesiosis	Disease Group : AIDS/HIV COVID19/MIS Foodborne Influenza	Outbreak : <input type="text"/>	
<input type="radio"/> AND <input checked="" type="radio"/> OR			
Case Notes Search : <input type="text"/>			
Date Criteria			
Onset Date (mm/dd/yyyy): <input type="text"/> to <input type="text"/>	Referral Date (mm/dd/yyyy): <input type="text"/> to <input type="text"/>		
Entry Date (mm/dd/yyyy): <input type="text"/> to <input type="text"/>	Birth Date (mm/dd/yyyy): <input type="text"/> to <input type="text"/>		
MMWR Week (ww-yyyy): <input type="text"/> to <input type="text"/>			
Geographic Criteria			
Primary Jurisdiction <input type="checkbox"/>			
Local Health Jurisdiction : Allegan County Barry-Eaton Bay County Benzie-Leelanau	County : Alcona Alger Allegan Alpena	Region : 1 2 North 2 South 3	Facility : ACA_INTERNS ADVOCATE AURORA ALLEGAN GENERAL HOSP ALPENA GENERAL HOSP
<input type="button" value="Search"/> <input type="button" value="Save & Finish"/> <input type="button" value="Advanced"/> <input type="button" value="Batch Update"/> <input type="button" value="Cancel"/> <input type="button" value="Help"/>			

Advanced Variables: The ‘Advanced’ option (available at bottom of basic search) provides additional fields to search, including demographics, patient outcome, hospitalization status, referring criteria (hospital affiliation, laboratory name, or physician), or geographic extent (X,Y coordinates).

The screenshot shows a search interface with the following sections:

- Name of Saved Search:** A text input field and a 'Default Search' checkbox.
- NETSS ID:** A text input field.
- Age:** Two text input fields for 'to' and 'from', and a dropdown for 'Age Unit' (Days, Months).
- Zip:** A text input field.
- Include Aggregates:** A checkbox.
- City:** A text input field.
- Sex:** A dropdown menu (Female, Male).
- Race:** A dropdown menu (American Indian or Alaska Native, Asian).
- Ethnic Group:** A dropdown menu (Hispanic or Latino, Not Hispanic or Latino).
- Arab Ethnic Group:** A dropdown menu (Arab, Non-Arab).
- Investigation Closure Date (mm/dd/yyyy):** Two date pickers with a 'to' label between them.
- Case Update Date (mm/dd/yyyy):** Two date pickers with a 'to' label between them.
- Outcome:** A dropdown menu (Died, Survived).
- Hospitalized:** A dropdown menu (Yes, No).
- Travel History:** A text input field.
- Specimen ID:** A text input field.
- Electronic Laboratory Results:** Three radio buttons: 'Search Electronic Laboratory Reporting cases only', 'Search Non Electronic Laboratory Reporting cases only', and 'Search both ELR and non ELR cases'.
- Referring Criteria:** Four text input fields for 'Affiliation', 'Laboratory Name', 'Physician First Name', and 'Physician Last Name'.
- Michigan Department Of Corrections:** A text input field for 'MDOC ID' and three radio buttons: 'Exclude MDOC cases', 'Include MDOC cases', and 'Only MDOC cases'.
- Geographic Criteria:** A 'Geographic Extent' section with a map icon and four text input fields for 'x' and 'y' coordinates, with 'to' labels between them.
- Buttons:** 'Search', 'Save & Finish', 'Basic', 'Cancel', and 'Help'.

Once all variables are selected, click ‘Search’ and a case list will generate. To create a saved search, first complete the ‘Name of Saved Search’ field at the top of the page the select ‘Save & Finish’ – the search will be available for future searches under the ‘Searches’ in the Case Investigation tab.

Exporting Cases from a Basic Search

The case listings from the search can be exported into Excel. Click on the ‘Export’ button and if prompted, select where you would like the file saved. Laboratory information can be exported with the cases using the drop-down menu shown below. Please note this is one of the few ways sensitive protected public health information can be extracted from MDSS so make sure that the location of the saved file is secure.

The screenshot shows the 'Case Listings' table with the following elements:

- Displaying results 1-10 of 38 found** with navigation links: [[<](#) [First](#)] 1 2 3 4 [[Next](#) >>] [[Last](#) >]
- Data may also be exported with lab information using this drop down** (with a red arrow pointing to the dropdown menu).
- Case Listings** table with columns: Investigation Status, Case Status, Investigation ID, Referral Date, Patient Name, Date of Birth, Disease, Investigator, County.
- Export Options:** A dropdown menu set to 'Standard Export without Labs' and an 'Export' button.
- Temporary:** A dropdown menu and 'Search' and 'Help' buttons.

Possible uses of exported data:

- View provider or referral information
- Assess completeness of basic fields like demographics or worksite/school
- Make a case cluster map of your cases with the Epi Info Template (available from your regional epidemiologist)
- Assess timeliness by calculating time from referral date to completion date (Note: this can also be auto-calculated in the administrative report)
- Rapidly assess case or investigation statuses on a list of cases
- Create initial line list of reported cases meeting defined criteria (for example, all cases with a certain outbreak identifier)

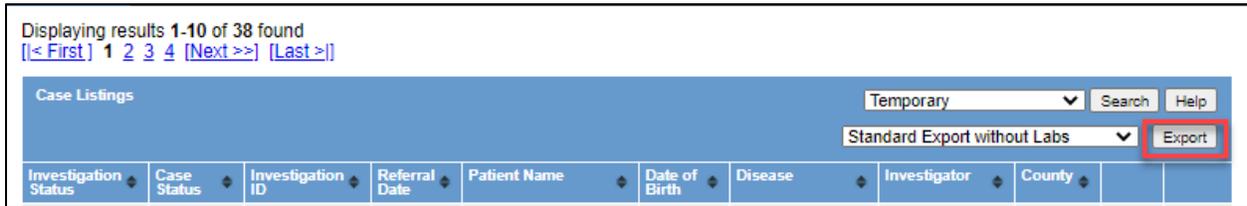

DISEASE SPECIFIC SEARCH

The disease specific search allows the user to search and export all data fields that are part of the Case Report Form for a particular condition. Epidemiological data for each disease can be searched and exported. For example, food histories for foodborne illnesses, contact information for vaccine preventable diseases, or travel histories for certain diseases can be searched. Only one condition can be searched at a time.

High Risk Food Exposure			
<i>Ask about the following specific food exposures for the 7 days prior to onset. If multiple exposures are identified, list additional details in other food history or comments sections.</i>			
Any ground meats (turkey, chicken, beef, pork) <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Typically eats		If Yes, Was the ground meat eaten raw, bloody, or pink? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Typically Eats	
If Yes, Product details (type, bulk/patties, package size, grind) <input type="text"/>	If Yes, Where purchased: <input type="text"/>	If Yes, Date purchased: <input type="text"/>	If Yes, Date consumed: <input type="text"/>
Any home-prepared chicken? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Typically eats		If Yes, Describe (brand, type, etc): <input type="text"/>	If Yes, Where and when purchased: <input type="text"/>
Any frozen chicken items? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Typically eats		If Yes, Product details (breaded, pre-browned, stuffed, etc): <input type="text"/>	If Yes, Where and when purchased: <input type="text"/>
Any raw sprouts (alfalfa, bean, etc)? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown <input type="checkbox"/> Typically eats		If Yes, Describe (brand, type, etc): <input type="text"/>	If Yes, Where and when purchased: <input type="text"/>
Vaccine Information			
*Did patient have a history of prior varicella vaccination? <input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Unknown			
If No, reason: <input type="checkbox"/> Born outside of U.S. <input type="checkbox"/> Lab evidence of previous disease <input type="checkbox"/> MD diagnosis of previous disease <input type="checkbox"/> Medical contraindication <input type="checkbox"/> Never offered vaccine <input type="checkbox"/> Parent/patient forgot to vaccinate <input type="checkbox"/> Parental/patient refusal <input type="checkbox"/> Parent/patient report of previous disease <input type="checkbox"/> Philosophical objection <input type="checkbox"/> Religious exemption <input type="checkbox"/> Under age for vaccination <input type="checkbox"/> Other <input type="checkbox"/> Unknown			
If Yes, <input type="text"/>			
Number of doses received on or after first birthday: (doses) <input type="text"/> to <input type="text"/>			
If patient is >= 13 years old AND received one dose on or after 13th birthday but never received second dose, what is the reason? <input type="checkbox"/> ... <input type="checkbox"/> ...			

Exporting Cases from a Disease Specific Search

- Click 'Export' at the top of the list of cases.

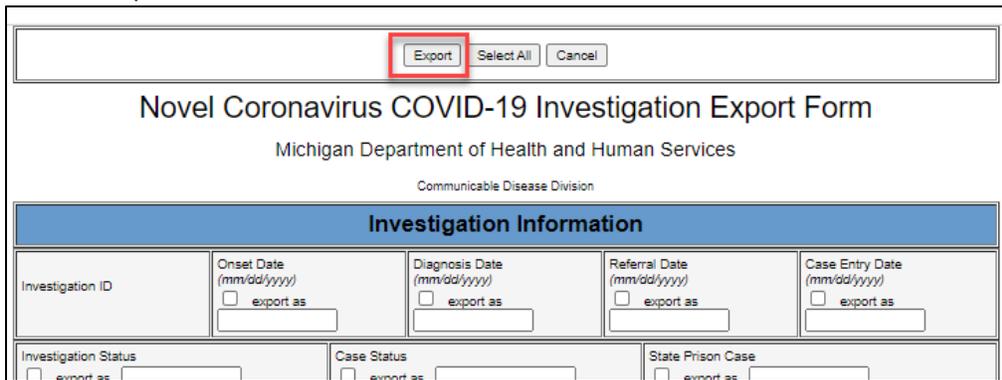

Displaying results 1-10 of 38 found
 [< First] 1 2 3 4 [Next >>] [Last >]

Novel Coronavirus COVID-19 Investigation Export Form

Michigan Department of Health and Human Services
 Communicable Disease Division

Investigation Information

Investigation ID	Onset Date (mm/dd/yyyy) <input type="checkbox"/> export as	Diagnosis Date (mm/dd/yyyy) <input type="checkbox"/> export as	Referral Date (mm/dd/yyyy) <input type="checkbox"/> export as	Case Entry Date (mm/dd/yyyy) <input type="checkbox"/> export as
Investigation Status <input type="checkbox"/> export as	Case Status <input type="checkbox"/> export as	State Prison Case <input type="checkbox"/> export as		

- A pop up will appear asking if you would like to postpone the export (default for large searches) or Continue to export now.

Disease Specific Export

This export can be run now or postponed as part of a batch to be done overnight. If batched, an email will be sent when the export is ready for download. Would you like to Continue the export now or Postpone for later?

Postpone Continue

Possible uses of exported data:

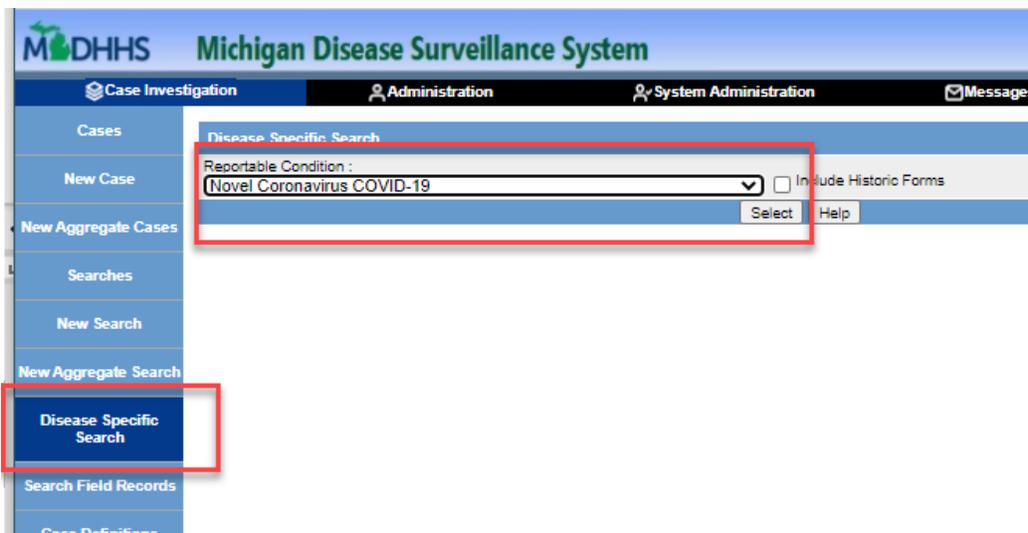

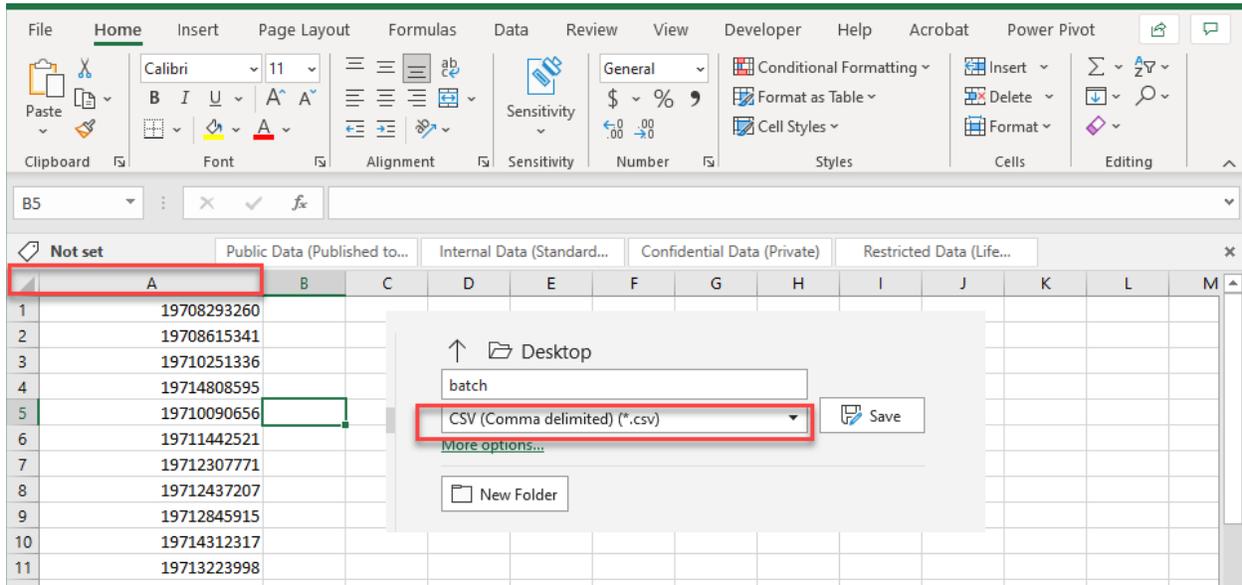

- Compare food items or restaurants in foodborne illnesses
- Assess completeness of STD treatment data, epidemiological variables and other fields
- Review vaccine coverage for vaccine preventable diseases
- Analyze high risk factors for hepatitis
- Identify patterns of exposures (e.g., travel history, animal contact)

Batch Investigation ID Upload using Disease Specific Search and Export

A CSV file (comma-separated values file) can be uploaded to the Disease Specific Search so that a user can obtain variables for a selected batch of Investigation IDs for a reportable condition. *Note: only up to 1000 Investigation IDs can be searched via this 'batch upload' at a time. If you have more than 1000 cases, you'll need to split the CSV files into lists with less than 1000 cases each and search and export separately.*

Instructions:

1. Copy needed Investigation IDs into column A in Excel with no header. Save the file

3. In the blank case report form, at the bottom of the Investigation Information section there is a Batch IDs field and an option to Choose file. Select 'Choose File' and browse to where you saved your file. When the file is opened the Batch IDs field will populate with the IDs in the file. *Alternatively, investigation IDs can be manually entered into the Batch IDs field separated by a comma.*

<input type="button" value="Submit Query"/> <input type="button" value="Cancel"/>
