

Michigan State Health Assessment 2019

Health Status Assessment – Meeting 2

11/7/2019

9:30-11:00 am

Zoom – Virtual meeting

Welcome and Introductions

- Welcome message from Jessie Jones

Health Status Assessment Review

- Brief overview of SHA and this assessment

Indicator Selection

- Participants worked as a group to discuss indicators. At this meeting the participants were able to discuss indicators falling under the following categories:
 - Morbidity and Mortality
 - Injury and Violence Prevention
 - Communicable disease
 - Chronic Disease
 - Mental and Child Health
- For each category, the group reviewed the draft list of indicators, provided suggestions to fill any identified gaps, and then virtually sticker voted to prioritize which of the listed indicators to include in this assessment.

Next Steps and Wrap-Up

- MPHI will work with MDHHS Epidemiologists and explore other existing data sources to gather available data.
- MPHI will organize the data and reconvene this group; at that time, this group will review data to define findings that should be elevated to the larger partnership group for purposes of prioritization.
