

Hello mom- to-be!

If you have Michigan Medicaid, you have better access and more choices of dental providers through your health plan!

1

Let your caseworker know you are pregnant.

2

Contact your health plan or visit to find a nearby dentist.

3

Make and keep your appointment with a dentist.

4

Enjoy a healthier mouth for you and your baby.

Did you Know?

- It's not only **safe**, but **important** to see the dentist during your pregnancy.
- The germs that cause cavities can be passed to your child after they're born.
- Studies have shown that poor oral health may lead to preterm birth.
