

2018 Michigan Trauma System Development Project Announcement

The Bureau of EMS, Trauma & Preparedness (BETP), Trauma Section, is committed to supporting partners and stakeholders in the trauma system to enhance their efforts in system building. BETP has approved a one-time funding amount of \$8,000 for facilities who are verified, designated or in process of becoming trauma facilities. These monies will be used to fund projects in the following categories: **Injury Prevention, Trauma Education, Performance Improvement, and Trauma Infrastructure**. The projects may begin January 12, 2018 and must be completed by September 15, 2018. The Regional Medical Control Authority Networks will be the program fiduciaries responsible for program monitoring and fund disbursement. To get started see the Trauma Section website, www.michigan.gov/traumasystem, for participation and project paperwork.

Project Categories

|| INJURY PREVENTION

- Region/geographic specific injury prevention (e.g. recreation related, seasonal)
- Demographic related injury prevention (e.g. elderly falls, driving, post fall follow-up)
- Pedestrian-texting, bike, or motorcycle safety
- Teen driving
- Special needs or second language populations
- Provider safety (e.g. ED staff, prehospital including Medical First Responders)
- Sport injuries

|| TRAUMA EDUCATION

- Advanced Trauma Life Support (ATLS)
- Trauma Nurse Core Curriculum (TNCC)
- Advanced Trauma Care for Nurses (ATCN)
- Rural Trauma Team Development Course (RTTDC)
- Pre-hospital trauma education (e.g. PHTLS, ITLS, TFR)
- Trauma Outcomes & Performance Improvement Course (TOPIC)
- Abbreviated Injury Scaling (AIS)
- Trauma registry software training
- Trauma Program Manager training
- Regional, agency, facility identified education

|| PERFORMANCE IMPROVEMENT

- Data quality/data cleaning
- Benchmarking
- Supporting facility, agency, region, system performance improvement

|| TRAUMA INFRASTRUCTURE

- Region/geographic specific trauma infrastructure
- Registry support
- Special needs populations
- Trauma related equipment
- Enhancing interface with rehabilitation services

The above lists are not all inclusive. Additional topics meeting project requirements will be considered.
