## Work Plan Objective Progress and Highlights:

*complete sections that have progress within the quarter*

### Injury Prevention

**Indicator(s):** 203.5 The RTN has developed a written injury prevention plan. The injury prevention plan is data driven and targeted programs are developed based upon high injury risk areas. Specific goals with measurable objectives are incorporated into the injury prevention plan.

**Progress:** The Regional Injury Prevention Plan will still be discussed at the September RTAC meeting, however, many of the IP coordinators are still not yet in their positions and due to Covid-19 many IP initiatives have been placed on hold.

### Communications

**Indicator(s):** 105.7 An assessment of the needs of the general medical community, including physicians, nurses, pre-hospital care providers, and others, concerning trauma system information, has been conducted.

**Progress:** As this is the lowest scoring indicator in the plan under communication, the ongoing discussion with MTC and the department regarding a trauma media campaign will help advance progress. An internal work group is looking into a Trauma newsletter similar to what EMS provides.

### Infrastructure

**Indicator(s):** 303.4 When injured patients arrive at a medical facility that cannot provide the appropriate level of definitive care, there is an organized and regularly monitored system to ensure the patients are expeditiously transferred to the appropriate, system defined trauma facility.

This indicator is directed at the process for interfacility transfers of a trauma patient

**Progress:** This is the regions lowest scoring indicator within Infrastructure, a high priority has been placed on developing an evaluation tool to see how well EMS is doing in their field triage decision making and getting the patient to the right facility the first time. Once the analysis of the field triage is complete, gaps relating to interfacility transfers will become more evident. An internal work group is focusing on field triage currently.

### Regional Performance Improvement

**Indicator(s):** 206.1 The RTN uses data reports to evaluate and improve system performance. This refers to any data reports and the RPSRO inventory

**Progress:** The first RPSRO Inventory was completed and is being reviewed by the chair of the RPSRO and the RTC. This is the first regional data report generated in 2 years and will inform decision making and system evaluation.

**Continuum of Care**

<b>Indicator(s):</b> Not currently worked on this quarter
<b>Progress:</b> N/A

**Trauma Education**

<b>Indicator(s):</b> Not currently worked on this quarter
<b>Progress:</b> N/A

**Other relevant activities information:**

Huron Valley Sinai hospital was granted provisional to receive EMS trauma traffic by the Oakland County MCA. Their TPM has been in constant communication with the RTC (regarding program development). As of June 29, they have a new Trauma Medical Director (Dr Ryan Shelden) who replaced Dr Joseph. An informal survey conducted by the RTC indicated that, as of June 15, 7/18 (38%) of the trauma programs in 2N are not back to full staff.

**Administrative Rule Requirements:**

- Yes - Quarterly meeting minutes on shared drive.
- Yes - All MCA's participating in the RTN.
- Yes - Performance improvement ongoing.
