

Providers Enhanced Rates Report

(FY2017 Appropriation Act - Public Act 268 of 2016)

March 1, 2017

Sec. 1801. (1) From the funds appropriated in part 1 for physician services and health plan services, the department shall continue the increase to Medicaid rates for primary care services provided only by primary care providers. For the purpose of this section, a primary care provider is a physician, or a practitioner working under the personal supervision of a physician, who is board-eligible or certified with a specialty designation of family medicine, general internal medicine, or pediatric medicine, or a provider who provides the department with documentation of equivalency. Providers performing a service and whose primary practice is as a non-primary-care subspecialty is not eligible for the increase. The department shall establish policies that most effectively limit the increase to primary care providers for primary care services only.

(2) The department shall report by March 1 of the current fiscal year to the senate and house subcommittees on the department budget, the senate and house fiscal agencies, the senate and house policy offices, and the state budget office the following:

(a) A list of medical specialties and licensed providers that were paid enhanced primary care rates in fiscal year 2014-2015.

(b) Information on the geographic distribution of specialists who received enhanced rates in fiscal year 2014-2015.

Michigan Department of
Health & Human Services

RICK SNYDER, GOVERNOR
NICK LYON, DIRECTOR

**Michigan Department of Health and Human Services
Boilerplate Report
2016 PA 268
Section 1801**

1801(2) The department shall report by March 1 of the current fiscal year to the senate and house subcommittees on the department budget, the senate and house fiscal agencies, the senate and house policy offices, and the state budget office the following:

- (a) A list of medical specialties and licensed providers that were paid enhanced primary care rates in fiscal year 2014-15.**
- (b) Information on the geographic distribution of specialists who received enhanced rates in fiscal year 2014-2015.**

(a) See Appendix A.

(b) Michigan Department of Health and Human Services (MDHHS) Medicaid claims payment data does not allow for statistically reliable information to determine the geographic distribution of the licensed providers who receive enhanced primary care rates. The corresponding geographic data collected by MDHHS is impacted by the following limitations: physician payments are generally made to registered billing entities rather than individual physicians; individual provider enrollment data does not conclusively reflect addresses where a provider may have rendered the primary care service; and standardized Medicaid professional claim formats utilized for payment of services do not capture address information that identifies the location where the service was rendered.

While individual beneficiary claims data includes the National Provider Identifier (NPI) number of the rendering physician, payments are generally made to the address of the rendering physician's registered billing group NPI or fiscal agent. As an example, billing entities of several large statewide health systems and large physician group entities (e.g., Spectrum Health and University of Michigan) submit claims and receive reimbursement on behalf of thousands of physicians across the state. The geographic distribution of licensed physicians that were paid enhanced primary care rates cannot be directly associated with the address of their billing entity.

As a component of the provider screening process, the Medicaid program collects comprehensive professional and personal information on all physicians who enroll in the program. The individual physician information obtained at the time of program enrollment, such as home address, may not be directly correlated to the potentially multiple geographic locations where a provider renders services.

Standardized claim formats utilized by the program for physician reimbursement do not include the address of the distinct location of where the services were rendered. The claim formats, however, capture a host of other valuable payment related information related to the beneficiary, the provider, and the services provided.

In conclusion, the Medicaid program collects comprehensive payment-related data on individually enrolled physician providers and the beneficiaries they serve. Due to provider enrollment and claims-related system operations, however, the program is not able to definitively report the geographic distribution of individual physicians who receive enhanced payments in a way that directly links to the geographic location of where the services were delivered.

Appendix A

Fiscal Year 2014-2015

Number of Providers Paid Enhanced Primary Care Rates

Specialty	Total
All Provider Specialties	4399
Internal Medicine	2004
Family Medicine	1511
Pediatric Medicine	884
