MDOT Survey Software Prequalification Transition

The Michigan Department of Transportation (MDOT) Survey Support Unit has selected Bentley PowerGEOPAK/PowerCIVIL as its standard automated mapping software. In order to completely facilitate the transition from CAiCE, prequalification requirements for survey categories must be modified.

To set a timeframe for mandating this prequalification change, MDOT asks that you please consider the impact of adaptation to the new software on your firm, including time to acquire the software and to train staff. The department is proceeding with implementation of PowerGEOPAK/PowerCIVIL on individual projects. However, we request your input specifically on the transition period for adaptation with respect to prequalification requirements.

Please provide written comment responses to Dan Belcher, MDOT Design Services Manager, no later than February 21, 2012. Mr. Belcher can be reached at BelcherD@Michigan.gov or at:
