

I-94 Road and Bridge Reconstruction

Jackson County

2018-2019

What Is Being Done?

Starting in summer 2018, the Michigan Department of Transportation (MDOT) began making improvements to I-94 in Jackson County, including:

- Reconstructing 1.4 miles of freeway between Lansing Avenue and Elm Road.
- Resurfacing 3.5 miles between Lansing Avenue and M-60, and resurfacing 4 miles between Elm Road and Sargent Road.
- Rebuilding the I-94/Cooper Street interchange, including the addition of new roundabouts on each side of the new bridge and reconstructing each of the ramps.
- Replacing the bridge over the Grand River.

As part of the project, I-94 will be shifted approximately 60 feet south of its current location. The widening of Cooper Street and the bridge reconstruction over the Grand River will require right-of-way acquisition, primarily on the south side of I-94.

Construction started in summer 2018 and will last through spring 2020.

How Will Traffic Be Affected?

Construction will take place in stages to minimize the disruption to motorists and residents.

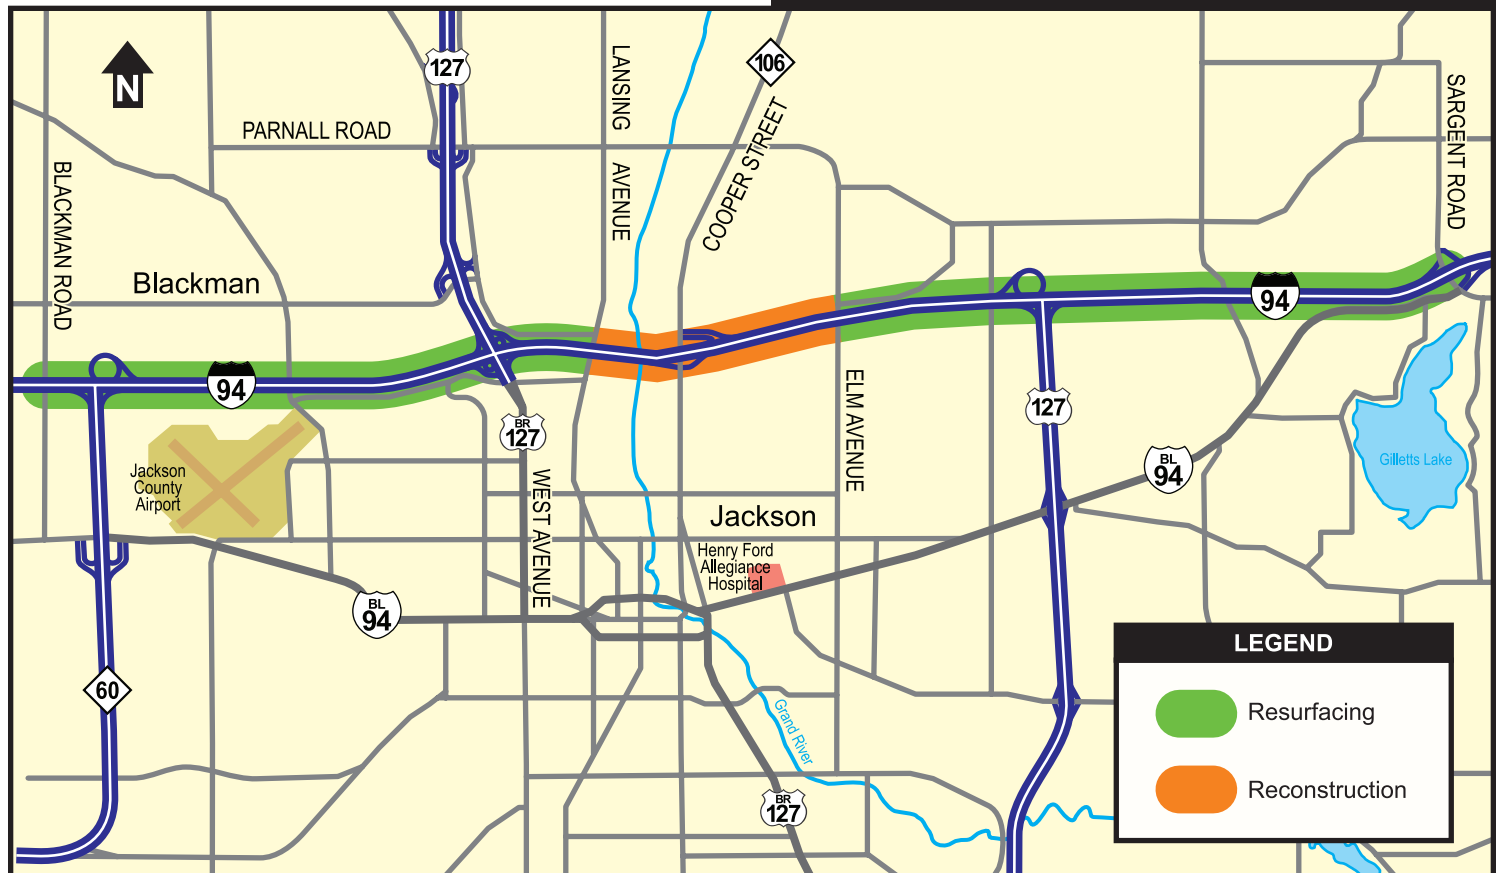

During I-94 construction, two lanes will be open in each direction the majority of the time, with single-lane closures at off-peak times.

Northbound I-94/West Avenue/US-127 ramp closures will require detours in fall 2019. Circle ramp traffic will be detoured on US-127, Parnall Road, and Cooper Street. The ramp closures are expected to last until the end of the 2019 construction season.

The Cooper Street bridge is expected to be closed and detoured March-October 2019. Information will be shared in advance of this work.
