PLEASE THOROUGHLY READ ALL SECTIONS OF THIS DOCUMENT TO INSURE ADHERANCE TO THE COMPETITION GUIDELINES. RULES AND SPECIFICATIONS CHANGE EACH YEAR. A SAMPLE PORTFOLIO FOR GUIDEANCE CAN BE FOUND AT THE WEBSITE https://tracrides.transportation.org/national-trac-bridge-challenge/

COMPETITION FOR GRADES 7 and 8

The Competition:

The bridge competition is designed to be an extended activity created from the TRAC PAC 2 Bridge Builder module. This event is designed to allow students the opportunity to develop a Truss Bridge that will be tested for strength-to-weight ratio. Student teams from grades seven and eight will be competing against other TRAC student teams from across the country. Interested teams should fill out the attached application and submit it prior to the deadline of November 5, 2018. Please note there is a maximum limit of five competition entries per school. TRAC Headquarters will send a TRAC Challenge Entry Kit to each team to begin their project. Only materials included in the kit supplied by TRAC Headquarters can be used in the construction of the bridge. The kit will be shipped by November 30, 2018 and will include Balsa Wood and Glue. Other materials needed not provided in kit:

- Bentley PowerDraft Student Software (download link below)
  - http://apps.bentley.com/studentserver/home/index
  - If the PowerDraft software cannot be downloaded, contact Program Manager Linda Clifton (lclifton@aashto.org)
- School Supplies

After completing the project, each team is required to submit a digital copy as a single file in PDF or DOC format to Linda Clifton, the National TRAC Program Manager. You must include pictures of the bridge (prototype or final). The proposal must be received no later than February 19, 2019. Winners will be notified by March 18, 2019. From those proposals entered, six teams from this grade division will be chosen to attend the National TRAC Challenge Competition Finals at the AASHTO Spring Meeting, May 20 – 22, 2017 in Park City, Utah. At the Finals, teams will present a 10 minute PowerPoint presentation and structurally test their bridges against teams from other states to determine the winning bridge.
Who Can Enter?

- Only schools involved in the TRAC program can enter the competition.
- Students must be in grades 7th or 8th.
- Teams shall be composed of three (3) members.

The Problem:

The goal of this competition is to develop a Truss Bridge that will carry as much weight as possible while weighing as little as possible (strength-to-weight ratio). Each team is to research the bridge type, design and conduct experiments to test for strength-to-weight ratio, and then design a bridge resulting from those experiments. The teams are to construct a bridge made only with the materials provided in the TRAC Challenge Entry Kit. As a part of the Design Competition, the team is required to develop a report portfolio describing the design and testing of the bridge and create design drawings using Bentley PowerDraft CAD software.

Each bridge will be checked for design according to the rules. The bridges will be weighed and strength tested during the competition to calculate strength-to-weight ratio.

The Challenge:

An engineer’s job is to not only design a safe bridge to carry required loads, but also to make sure that it is cost effective (least amount of materials used to achieve the desired load). To simulate this process, teams will use the following strength-to-weight ratio calculation to develop a bridge that carries a high load relative to the bridge weight. Strength to weight ratio is determined by dividing the maximum load carried by the weight of bridge.

Example: Maximum load = 120.0 pounds
Bridge weight = 20.0 grams
Ratio = 2724.0
[(120 pounds x 454g/pound) / 20 g]
Specifications for Truss Bridge:

- The materials provided in the kit are the ONLY materials to be used when building the bridge structure. Any modifications to the structural properties of the balsa wood or using different glue than provided will result in judges recording zero weight held.
- The instrument used for testing will be the Pitsco Structures Testing Instrument as seen on the right.
- Lamination shall be permitted one layer thick as shown in the picture on the right. Joints less than ½ inch in length are excluded from lamination constraints.
- End to end, the length of the entire bridge must be 14 inches.
- The minimum width of the bridge shall be no less than 2.5 inches and the maximum width of the bridge shall be no more than 4.5 inches.
- A block of wood that is 12 inches long by 2 inches wide by 1 inch high must be able to be laid across the bridge deck as shown in the picture to the right and diagram below. The deck is considered the horizontal portion of the bridge that sits on and between the testing supports. The deck does not have to be solid.
- Testing block will not be allowed to be placed on top of truss for testing and shall be placed as shown in the picture to the right and the diagram below.
- Tester supports will be placed at 14 inches on center. Support dimensions are shown below.
- The bridge shall only touch the top of the Pitsco Tester Supports as seen in the diagram below. If the bridge touches any other part of the tester body, judges will record zero weight held.
- The bridge must allow a 5/8 inch testing rod to pass through in mid-span and attach to a 12 inch block of wood for strength testing. The rod must be able to pass through the full height of the bridge as shown in the diagram below.
PROPOSAL FORMAT:

The information below gives an indication of what the judges are looking for in each section. The proposal must contain all of the sections outlined below to be considered for the competition.

I. BRIDGE PROPOSAL (See Page 5 for Assessment)

A. Proposal Format: The written proposal should be typed, double-spaced using a size 12 font of either Arial or Times New Roman on 8.5 x 11 paper with all pages numbered, 1” borders all around. Sections must be in order of the outline below:

B. Timeliness: Proposals received after the deadline will not be accepted.

C. Proposal Presentation: Portfolio MUST contain all the sections outlined below:

   I. Title Page. Include name of challenge, team name, and logo, name of school or organization, names of students, name of teacher or advisor.

   II. Table of Contents.

   III. Summary (abstract). Clearly and concisely stated. (At least ½ page, no more than two pages)

   IV. Introduction. Indicate the team name, team members as well as the background of each member.

   V. Body. The main part of the report. This may be divided into several sections (such as Design, Development, etc.). In general, this part should:
      a) Explain the scientific principles behind your design.
      b) Describe the challenges you encountered in designing your bridge
      c) Include Data Tables, Graphic Representation of Tests, and supporting Calculations page.
      d) Include scaled drawings of preliminary and final bridge designs.
      e) Include at least five pictures of team work during bridge design and construction, along with a picture of the constructed bridge (prototype or final).
      f) Explain how you tested your design, and the improvements this led you to make.
      g) Describe the challenges that you encountered in building your bridge and how you solved these problems. Include safety precautions, building methods, etc.

   VI. Conclusions (and Recommendations). How successful is your project? What did you learn by taking part?

   VII. Acknowledgments. List the names of the adults who assisted you in the project with a brief description of what they did. Include a certification, signed by all student team members and adults assisting, stating that: “We hereby certify that the majority of the ideas, design, and work was originated and performed by the students, with limited assistance by adults, as described above.”

   VIII. Bibliography. List all references used, including Internet, books and magazines.

   IX. Appendices. They must include:
      A. Scheduling and Accomplishments. Show on a time line, or similar method, how you scheduled your project. Include brief records of meetings.
      B. Daily Journal. Progress reports of day-to-day work on the project, including date, performance and comments from each team member.
PROPOSAL ASSESSMENT
2019 TRAC BRIDGE COMPETITION PROPOSAL FORMAT
Grades 7 and 8

Proposal Format
☐ Typed (1 point)
☐ Double Spaced (1 point)
☐ 12 Point Font (Arial or Times New Roman) (1 point)
☐ All pages on 8.5 x 11 paper (1 point)
☐ Information is in the proper order (2 point)
☐ All pages are numbered (1 point)
☐ Style and presentation (1 points)
☐ Mechanics (1 points)
☐ Visuals (1 points) Score _______/ 10 points

Proposal Presentation
☐ Title page (1 point)
☐ Table of Contents (1 point)
☐ Summary (no more than 2 pages) (5 points)
☐ Introduction (1 points)
☐ Body
  ○ Sections identified (3 points)
  ○ Scientific principles of the design (5 points)
  ○ Design challenges (5 points)
  ○ Tables, Graphs, Calculations (10 points)
  ○ Detailed scaled drawings (5 points)
  ○ Photos during and after construction (5 points)
  ○ Testing and improvements (5 points)
☐ Conclusion
  ○ Recommendations (5 points)
  ○ Success of the project (5 points)
  ○ What was learned by taking part (5 points)
☐ Acknowledgements
  ○ Adults involved (1 points)
  ○ Description of what the adults did (1 points)
  ○ Certification and signatures (1 points)
☐ Bibliography (1 points)
☐ Appendices
  ○ Schedule on a timeline or similar (5 points)
  ○ Daily Journals (must be legible) (20 points) Score _______/ 90 Points

TOTAL SCORE: _______/100 Points
BRIDGE COMPETITION FINALS

Teams will be chosen to attend the 2019 TRAC Bridge Finals by a panel of judges that score the portfolios. Winning teams will present at the AASHTO Spring Meeting to a panel of judges comprised of various AASHTO members and sponsors. Each team will be expected to make a PowerPoint presentation and be able to answer questions from the panel of judges about their entry. Supporting materials may be presented to the judges. All CAD drawings must be created using the Bentley PowerDraft CAD Software. Judges will examine each entry to make sure it fits the specifications given in the rules. The bridge brought to competition must be similar to the bridge submitted in the portfolio. The criteria below outlines the competition fundamentals:

A. SPECIFICATIONS: Prior to testing, the bridge will be checked by the judges for adherence to the specifications on page three of this document. Specification violations will be discussed with the team prior to testing. Any bridge not meeting the specifications on page three will result in judges recording zero weight held.

B. ORAL PESENTATION (50% of the total score): Teams will present a 10 minute PowerPoint presentation (a deduction is assessed for every minute under or over 10 minutes). A rubric on page 11 has been provided for the presentation as a guide.

C. PERFORMANCE (50% of the total score): Bridges will be weighed and then tested on the Pitsco structural tester. Results will be used to calculate strength-to-weight ratio.

Awards:

Teams chosen to attend the AASHTO Bridge Competition will compete for awards of:

**First Place Team:** Three $400 gift cards and Placement Award Metals  
**Second Place Team:** Three $300 gift cards and Placement Award Metals  
**Third Place Team:** Three $200 gift cards and Placement Award Metals  
**Fourth, Fifth, and Sixth Place Team:** Placement Award Metals
PREPARING FOR COMPETITION

Form a team of interested students or friends. Discuss the challenges and design specifications. Teams shall consist of three students. Each team must have at least one teacher or other adult to help and advise, though a single adult may be advisor to more than one team.

Study the rules. The individual challenge documents and the grading criteria will give important information, which must be followed if your team is to achieve the best results. Failure to adhere to the rules could lead to penalties, or even disqualification. If any of the information is not clear, please call for additional help.

Plan the timing of the project. Ensure that everyone in the team knows the date for submission of the written report, and recognizes that this means that all major development work should be finished before this date.

Keep records of meetings and working drawings carefully, and give members of the team responsibility for different sections of the final report.

Notes to Adults: TRAC would like to stress that the work on all phases of the project is to be done by the students. Adult assistance is to be limited to:

- Mentoring
- Basic guidance of the students
- Teaching engineering, mathematical and scientific principles applicable to the project
- Guiding students in research
- Assisting in the production of the report and preparation of the drawings
- Overseeing the manufacturing stages of the project

Guidance should be in the form of asking questions, (leading questions if necessary) to promote creative thinking by the students to identify the scientific and engineering principles involved.

Encourage students to consult creditable web sites and other resources to help with the project.

Encourage students to test and improve their designs. A good way to begin is for each student to design and/or construct a rough prototype. Test it and make improvements.
BRIDGE COMPETITION SCHEDULE

1) Applications due **November 5, 2018.**

2) Packets will be shipped to teams by the TRAC office by **November 30, 2018.**
   Packets will include:
   - Balsa Wood
   - Wood Glue
   - Information packet

3) Proposals are due **February 19, 2019** (do not include the Bridge).

4) Notification of finalists by **March 18, 2019.**

5) Finals will be held at the AASHTO Spring Meeting in **Park City, Utah** on **May 20-22 2019.**
APPLICATION
2019 TRAC TRUSS BRIDGE COMPETITION
Grades 7 and 8

Return to Linda Clifton by November 5, 2018

We have read the challenge documents and the guide to entry, and we want to register.

Name of Adult Advisor____________________________________________________________

Team Name______________________________________________________________

School or Group______________________________________________________________

Address______________________________________________________________________

Work Phone_________________________ Home Phone___________________________

Cell Phone___________________________ Fax Phone_______________________________

E-mail address (required)________________________________________________________________

NOTE: Each leader working with different teams at the same school should send a separate application form for each team. Teams shall have three members. Copy this form as necessary.

Return completed form to:

GUIDELINES
2019 TRAC BRIDGE COMPETITION
Oral PowerPoint Presentation: Bridge Competition

Team Name __________________________

NOTE: This is a rubric for to help for the preparation of the presentation. Oral presentation has a possible score of 100 points. Each category will be judged on a scale from 1 to 20 points.

<table>
<thead>
<tr>
<th>CATEGORY</th>
<th>20</th>
<th>15</th>
<th>10</th>
<th>5</th>
<th>0</th>
<th>Sub-Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Content</td>
<td>Covers topic in-depth with details and examples. Subject knowledge is excellent.</td>
<td>Includes essential knowledge about the topic. Subject knowledge appears to be good.</td>
<td>Includes essential information about the topic but there are 1-2 factual errors.</td>
<td>Content is minimal OR there are several factual errors</td>
<td>Did not fulfill requirements</td>
<td>_____/20</td>
</tr>
<tr>
<td>Mechanics</td>
<td>No misspellings or grammatical errors.</td>
<td>Three or fewer misspellings and/or mechanical errors</td>
<td>Four misspellings and/or grammatical errors.</td>
<td>More than 4 errors in spelling or grammar.</td>
<td>Did not fulfill requirements</td>
<td>_____/20</td>
</tr>
<tr>
<td>Organization</td>
<td>Content is well organized using headings or bulleted lists to group related material.</td>
<td>Uses headings or bulleted lists to organize, but the overall organization of topics appears flawed.</td>
<td>Content is logically organized for the most part.</td>
<td>There was no clear or logical organizational structure, just lots of facts.</td>
<td>Did not fulfill requirements</td>
<td>_____/20</td>
</tr>
<tr>
<td>Presentation</td>
<td>Interesting, well-rehearsed with smooth delivery that holds audience attention.</td>
<td>Relatively interesting, rehearsed with a fairly smooth delivery that usually holds audience attention.</td>
<td>Delivery not smooth, but able to hold audience attention most of the time.</td>
<td>Delivery not smooth and audience attention lost.</td>
<td>Did not fulfill requirements</td>
<td>_____/20</td>

Total Sub-Score _____/100

Each Minute Under/Over 10 Minutes: (-10) _____

TOTAL SCORE _____
1. Students should be prepared for questions at the end of the presentation. These questions may be concentrated in the following topics. However, note that the judges are free to ask any question about any topic. Therefore, each team should be prepared.
   a) Choice of design
   b) Civil engineering careers related to bridges
   c) Safety
   d) Impacts of bridges
   e) Lessons learned

2. Stay organized and keep track of time limits.

3. If you have a question, ASK. You can contact Linda Clifton at lclifton@aashto.org.

4. Contact your DOT engineers. They will answer many of your questions.

5. Check out other bridges in your area or around the world

6. Include detailed information in the team portfolio. Remember, your portfolio is what determines if your team is selected to come to national competition.

7. RESEARCH
