\*Latest Population Data Available (U.S. Census Bureau)

Counties highlighted are designated as non-attainment or maintenance for the 2015 Ozone Standard. One-half of former non-attainment or maintenance area's allocation are redistributed based on population.

CMAQ funding is intended to help improve air quality in counties designated as non-attainment or maintenance for Ozone (NOx and VOC), CO, and PM 2.5. In August of 2018, the Environmental Protection Agency and Federal Highway Administration recognized the 2015 Ozone Standards, thus reducing the number of non-attainment counties for Ozone in Michigan from 25 to 10. If former non-attainment counties continue to program CMAQ funded projects and FHWA changes their position regarding their eligibility to utilize CMAQ funding, it will be at their own risk. Local allocations may be modified in the case where the Federal formula for State CMAQ apportionment change.
