

I-69 Reconstruction in Calhoun and Eaton Counties (Design-Build)

Questions & Answers #2

Question: This project is on a similar schedule as another MDOT Design-Build freeway project in Southwest Region, and the letting for the other project will not be complete prior to the SOQ due date for the I-69 reconstruction. If a team submits on both projects, and the same organizational structure is proposed on both SOQ's, will this negatively affect the SOQ scoring for the I-69 project?

Answer: SOQ's will be evaluated based on the requirements in this RFQ. Changes in Key Personnel from a Submitter's SOQ to the Submitter's Proposal in response to the RFP will be evaluated according to Section 2.8 of the RFQ (Changes to Organizational Structure).
