What Is Being Done?

Reconstructing and expanding the I-96/112th Avenue interchange in Crockery Township, Ottawa County.

Work includes replacing the 112th Avenue bridge over I-96 and widening it to four lanes, reconstructing the existing ramps, reconfiguring the Cleveland Street/Apple Drive intersection, and adding a new westbound I-96 on ramp. A new eastbound I-96 off ramp is planned for 2013.

This project is being done in coordination with the reconstruction and widening of M-104 (Cleveland Street) from west of 124th Avenue east to I-96 in Crockery Township, less than a mile to the west.

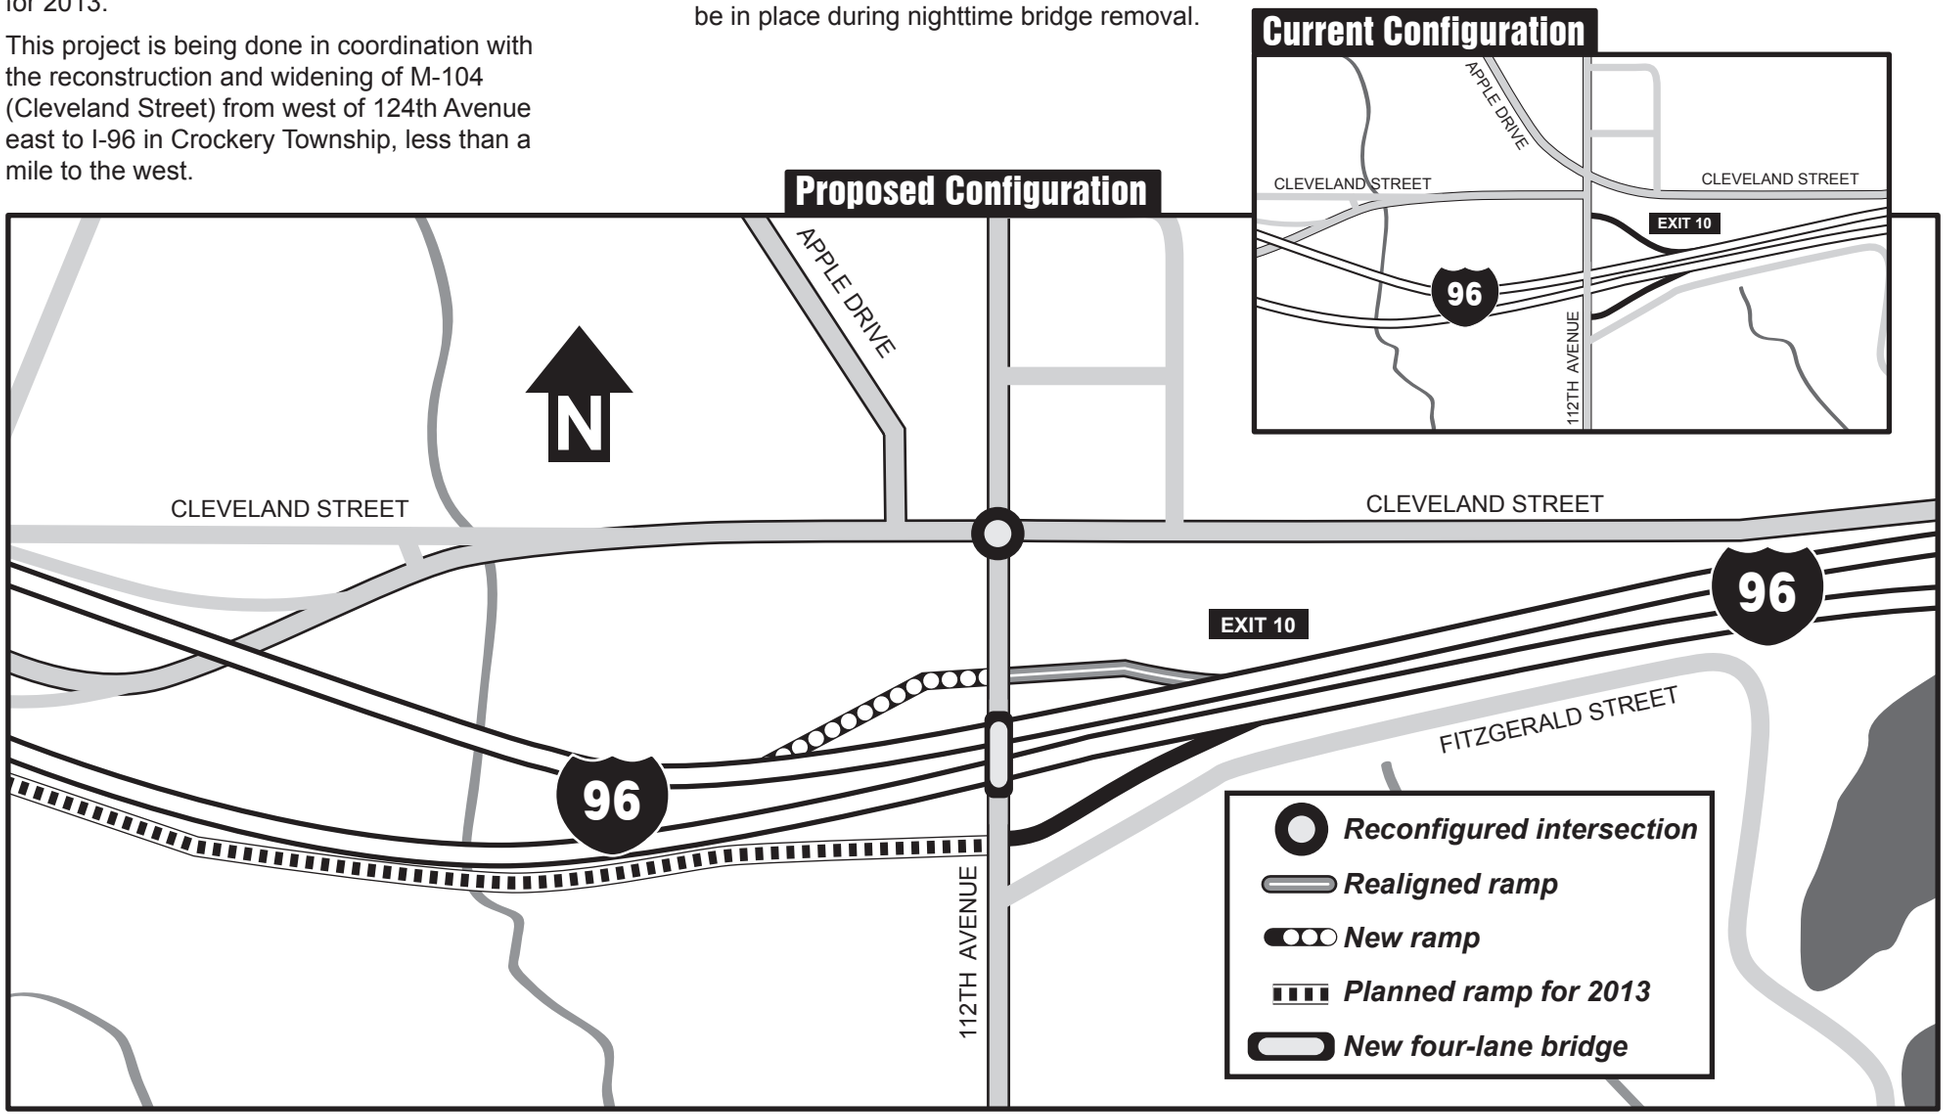
When Will This Be Done?

Work will begin in March. The 112th Avenue bridge will reopen to traffic in late August with the overall project scheduled to be finished in late October.

How Will Traffic Be Affected?

Traffic will be maintained on I-96 using single-lane closures; 112th Avenue will be closed and detoured. Short-term freeway closures will be in place during nighttime bridge removal.

Long-term Benefits

The interchange expansion and new, wider bridge will increase capacity, improve traffic flow and extend the service life of the I-96/112th Avenue interchange.


MDOT's 2012 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
