

**I-75 Modernization Project Segment Three: Questions & Answers  
November 27, 2017**

**Q98** Can the Tunnel Project experience definition (on RFQ Part A-Page 6): “A project that includes the design or construction of tunnels with a minimum of 10-foot diameter and 10,000-feet in length.” be revised to: “A project that includes the design or construction of tunnels with a minimum of 9-foot diameter and 5,000-feet in length.”

This change in the required tunnel experience will provide additional opportunity for Michigan based tunnel contractors and increase overall competition on the project.

**A98 The definition of Tunneling Project has been updated, please refer to Part A, Page 6 of Addendum 4 of the RFQ posted on November 22, 2017.**
