

M-96 (I-94 BL, Michigan Ave.) HMA Overlay Design Build Information Sheet

The Michigan Department of Transportation (MDOT) intends on using a Design/Build procurement method to deliver a road rehabilitation and bridge repair project in the Southwest Region. This will be a single step low bid Design/Build project. MDOT plans to advertise the project in early October 2014 and have a bid letting in mid-December 2014. It is anticipated that construction will take place between April 2015 and November 2015.

The project is located in the city of Marshall, Calhoun County. The project runs from west of the I-69 southbound ramps to just east of Sycamore Street. The project will include a two-course HMA overlay, new curb and gutter (removed and raised 4”), miscellaneous sidewalk, ADA ramps, drainage improvements (new structures, adjusting existing structures, and potential upsizing a section of storm sewer), permanent signing and pavement markings. The bridge work includes repairing some spalls under the beams on the abutments of EB Michigan Ave. over I-69 (S16 of 13073) and some steel beam repairs on EB and WB Michigan Ave over I-69. (S08 & S16 of 13073)

Design-Builder Prequalification Requirements

- 2700 Cb

In addition to the above minimum prequalification requirement for prime contractors, this project also anticipates a sub classifications of J.

Lead Engineering Design Firms Prequalification Requirements are anticipated to be:

- Road Rehabilitation and Rural Freeways
- Maintaining Traffic Plans and Provisions
- Pavement Marking Plans
- Permanent Non-Freeway Traffic Signing Plans
- Construction Staking
- Hydraulics
- Short and Medium Span Bridge

Please direct comments or questions to the project manager for this project.
