

TRAFFIC AND SAFETY SPECIAL PROVISIONS

The Traffic and Safety Special Provision checklist for assembling proposal packages will not exist for the 2012 Specifications. These Special Provisions will either be deleted, become Frequently Used Special Provisions (FUSP) or Previously Approved Special Provisions (PASP). Attached is a chart listing current Special Provisions on the Traffic and Safety Checklist and how it will be treated with the 2012 Specifications.

If the Special Provision is becoming a FUSP or PASP, they do not need to be submitted to the Specifications Engineer for approval. These Special Provisions are currently being reviewed.

Many of the deleted Special Provisions are not needed since the item is covered in the 2012 Specifications for Construction.
