Final Inspection/Acceptance and Certification Report (MDOT Form 1120) Submission to FHWA

This construction advisory serves as a reminder to the construction project staff to submit MDOT Form 1120, Final Inspection/Acceptance and Certification Report, to FHWA in a timely manner.

Per the FHWA requirement, you must submit a Final Inspection/Acceptance and Certification Report if the project is a participating (non-exempt) federal project on an NHS route only.

A recent review of construction project files revealed an issue with timely submittal of the Final Inspection/Acceptance and Certification Report to the FHWA. It is important that you send a copy to the FHWA region engineer for their project files as soon as you obtain all the signatures.

Please share this information with consultants and local agencies in your area.
