MDOT Value Engineering (VE) Thresholds

This Design Advisory serves as notification that the MDOT VE project cost thresholds have been revised to match federal threshold values. Per MDOT Road Design Manual Section 14.27, VE studies are required on all Federal Aid Projects with an estimated total project (corridor) cost of \$50 million or greater for road projects or \$40 million or greater for bridge projects. When it is determined that it may be beneficial for a unique and/or complex project, VE studies may be considered for federal aid projects that are below the required project cost threshold, or for projects that are 100% state funded. Please consider during project development.

Implementation is effective immediately.
