

## ENGINEERING OPERATIONS COMMITTEE MEETING MINUTES DECEMBER 1, 2016 – 9:00 A.M. MULTI-MODAL CONFERENCE ROOM

| Present: | M. Van Port Fleet<br>B. Wieferich<br>K. Schuster<br>T. Marshall (FHWA) |                | R. Ran<br>M. Gei<br>M. Sw | ck<br>ib<br>eeney | J. Gutting<br>S. Bower<br>H. Zweng |
|----------|--|----------------|---------------------------|-------------------|------------------------------------|
| Absent:  | M. Bott  | R. VanPortflie | et                        | C. Rogers         |                                    |
| Guests:  | B. Krom  | L. Strzalka    |                           | M. Shulick        |                                    |

## OLD BUSINESS

1. Approval of the November 3, 2016 Meeting Minutes - M. Van Port Fleet

ACTION: Approved

## NEW BUSINESS

1. Pavement Selection US-10 – B. Krom

Route/Location: US-10: US-127 to east/Leaton Road, Clare & Gladwin County Job Number: 123643 Control Section: 18023, 37031, 37032 Letting Date: 12/2017 Rehabilitate US-10: CS 18023: BMP 0.000 to MP 1.297 CS 37032: MP 0.000 to EMP 1.630 Reconstruct US-10 BR ramps: CS 37031: BMP 1.444 to EMP 2.116

Department policy requires that Life Cycle Cost Analysis (LCCA) be used to determine the lowest cost pavement design alternative following the procedures outlined in the MDOT Pavement Design and Selection Manual. Final pavement selection requires approval by the Engineering Operations Committee.

The US-10 rehabilitation (rehab) alternatives being considered are a Hot Mix Asphalt Pavement over Rubblized Concrete (HMA Alt #1a) and an Unbonded Jointed Plain Concrete Pavement Overlay (JPCP Alt #2a). The US-10 reconstruction alternatives being considered are a Hot Mix Asphalt Pavement (HMA Alt #1b) and a Jointed Plain Concrete Pavement (JPCP Alt #2b).

The US-10 BR reconstruction (reconst) alternatives being considered are a Hot Mix Asphalt Pavement (HMA Alt #1c) and a Jointed Plain Concrete Pavement (JPCP Alt #2c). The pavement designs being considered are as follows:

Alternative #1a: Rehab US-10 with HMA Pavt over Rubblized Concrete (~70% of project)

- 1.5" HMA, 5E10, Top Course (mainline & inside shoulder)
- 2" HMA, 4E10, Leveling Course (mainline & inside shoulder)
- 3" HMA, 3E10, Base Course (mainline & inside shoulder)
- 9" Rubblized Concrete (mainline) Existing Aggregate Base & Sand Subbase
- 1.5" HMA, 5E03, Top Course (outside shoulder)
- 2" HMA, 4E03, Leveling Course (outside shoulder)
- 3" HMA, 3E03, Base Course (outside shoulder)
- 6" Aggregate Base (outside & inside shoulders) PDS Underdrain System
- 15.5" Total Section Thickness

| Present Value Initial Construction Cost       | \$294,564/lane-mile |
|---|---------------------|
| Present Value Initial User Cost               | \$16,162/lane-mile  |
| Present Value Maintenance Cost                | \$117,400/lane-mile |
| Alt #1a Equivalent Uniform Annual Cost (EUAC) | \$20,007/lane-mile  |

## Alternative #1b: Reconst US-10 with HMA Pavement (~23% of project)

| 1.5" | HMA, | 5E10, | Тор | Cours | se (mai | nline | & i | nside | e sh | oul | der) |   |
|------|------|-------|-----|-------|---------|-------|-----|-------|------|-----|------|---|
| 211  |      | 1010  | т   | 1. /  | a       |       | 1.  | · ·   |      | 1   | 1    | 1 |

- 3" HMA, 3E10, Leveling Course (mainline & inside shoulder)
- 3" HMA, 3E10, Base Course (mainline & inside shoulder)
- 1.5" HMA, 5E03, Top Course (outside shoulder)
- 3" HMA, 3E03, Leveling Course (outside shoulder)
- 3" HMA, 3E03, Base Course (outside shoulder)
- 6" Aggregate Base
- 18" Sand Subbase
- 6" dia. Subbase Underdrain System
- 31.5" Total Section Thickness

Alternative #1c: Reconst US-10 BR Ramps with HMA Pavement (~7% of project)

- 1.5" HMA, 5E03, Top Course
- 2" HMA, 4E03, Leveling Course
- 3" HMA, 3E03, Base Course
- 6" Aggregate Base
- 18" Sand Subbase
- 6" dia. Subbase Underdrain System
- 30.5" Total Section Thickness

| Present Value Initial Construction Cost | \$461,959/lane-mile |
|---|---------------------|
| Present Value Initial User Cost         | \$59,273/lane-mile  |
| Present Value Maintenance Cost          | \$113,379/lane-mile |

Alt #1b/1c Equivalent Uniform Annual Cost (EUAC) \$24,522/lane-mile

Alternative 1

| Equivalent Uniform $\Delta$ nnual Cost (EU $\Delta$ C) | \$21 379/lane-mile              |
|--|---------------------------------|
| Equivalent Onnorm Annual Cost (LOAC)                   | $\psi_2$ 1, $j \neq j$ function |
|  |                                 |

| Alternativ   | ve #2a: Rehab US-10 w/ Unbonded Jointed Pla                           | ain Conc. Overlay (~70% of project)    |  |  |  |
|--|---|--|--|--|--|
| 6"   | Non-Reinforced Concrete Payement, P1 Modified, with 12' joint spacing |  |  |  |  |
| 1"   | HMA Separator Laver (mainline)  |  |  |  |  |
| 9"   | Repaired JRCP (mainline)  | Renaired JRCP (mainline)               |  |  |  |
| -  | Existing Base & Subbase   |  |  |  |  |
| 6"   | Open Graded Drainage Course (outside & inside shoulders)              |  |  |  |  |
|  | Geotextile Separator (outside & inside sho                            | ulders)                                |  |  |  |
| 6" dia.  | Open-Graded Underdrain System   |  |  |  |  |
| 16"  | Total Thickness   |  |  |  |  |
| Present V  | alue Initial Construction Cost  | \$379,854/lane-mile                    |  |  |  |
| Present V  | alue Initial User Cost  | \$18,978/lane-mile                     |  |  |  |
| Present Value Maintenance Cost \$50.607/lane-mile  |   |  |  |  |  |
| Alt #2a E  | quivalent Uniform Annual Cost (EUAC)                                  | \$21,691/lane-mile                     |  |  |  |
| Alternativ   | ve #2b: Reconst US-10 w/ Jointed Plain Concr                          | tete Pavement ( $\sim$ 23% of project) |  |  |  |
| 9"   | Non-Reinforced Concrete Pavement P1 M                                 | odified with 14' joint spacing         |  |  |  |
| 6"   | Open Graded Drainage Course   |  |  |  |  |
| 0  | Geotextile Separator  |  |  |  |  |
| 10"  | Sand Subbase  |  |  |  |  |
| 6" dia.  | Open-Graded Underdrain System   |  |  |  |  |
| 25"  | Total Thickness   |  |  |  |  |
| Alternativ   | e #2c: Reconst US-10 BR Ramps w/ Jointed F                            | Plain Conc. Pavement (~7% of project)  |  |  |  |
| 8"   | Non-Reinforced Concrete Pavement. P1 M                                | odified, with 14' joint spacing        |  |  |  |
| 6"   | Open Graded Drainage Course   |  |  |  |  |
|  | Geotextile Separator  |  |  |  |  |
| 10"  | Sand Subbase  |  |  |  |  |
| 6" dia.  | Open-Graded Underdrain System   |  |  |  |  |
| 24"  | Total Thickness   |  |  |  |  |
| Present Va   | alue Initial Construction Cost  | \$559.785/lane-mile                    |  |  |  |
| Present Value Initial User Cost \$59.916/Jane-mile |   |  |  |  |  |
| Present V  | alue Maintenance Cost   | \$111.887/lane-mile                    |  |  |  |
| Alt #2b/20   | Alt #2b/2c Equivalent Uniform Annual Cost (EUAC) \$27,626/lane-mile   |  |  |  |  |
| Alternativ   | e #2  |  |  |  |  |
| Equivalen  | Equivalent Uniform Annual Cost (EUAC) \$23,495/lane-mile              |  |  |  |  |
| -  | × /   |  |  |  |  |

Pavement designs are based on the 1993 AASHTO "Guide for Design of Pavement Structures" and the AASHTO pavement design software, DARWin Version 3.1, 2004.

The Equivalent Uniform Annual Cost calculation is based on the pavement selection process as approved by the EOC on June 3, 1999. Construction costs are derived from historical

averages on similar projects while user costs are calculated using the MDOT Construction Congestion Cost model.

- 4 -

ACTION: EOC approves the selection of Alternative #1, Reconstruct and Rehabilitate with Hot Mix Asphalt Pavement, which has the lowest life cycle cost.

2. Trunk Line/Local Funding Participation Technical Agenda - L. Strzalka, M. Shulick

EOC, at the April, 2016 meeting, approved the formation of a technical agenda team to develop and recommend protocols and procedures for the delivery of projects that utilize a combination of state trunk line funds with local agency infrastructure funds. The team provided an update and EOC provided comments on the proposed draft documents.

ACTION: EOC directs the Technical Agenda Team to revise the draft documents, as directed, and provide a formal recommendation to EOC at a future meeting.
