^One-half of County Allocation to Local Program

Counties highlighted remain designated as non-attainment (2015 Ozone Standard) and remaining allocation will be redistributed to non-attainment areas based on population.

CMAQ funding is intended to help improve air quality in counties designated as non-attainment. In August of 2018, the Environmental Protection Agency and Federal Highway Administration will recognize the 2015 Ozone Standards, thus reducing the number of non-attainment counties in Michigan from 25 to 10. MDOT is aware that FHWA continues to allow former non-attainment counties to utilize CMAQ funding. In Michigan, this includes 15 counties that are former non-attainment and 10 counties that remain non-attainment. As such, MDOT is reducing CMAQ funding to the former non-attainment counties by half of their prior annual allocation and increasing in formula distribution to counties that remain non-attainment. These changes do not occur until 2021, however, if the former non-attainment counties continue to program CMAQ funded projects and FHWA changes their position regarding their eligibility to utilize CMAQ funding, it will be at their own risk. MDOT will make corresponding trunkline CMAQ program changes in alignment with local program changes to ensure consistency in application across jurisdictions.
