

**Full CE Services for the Installation of ITS Conduit and Fiber Optic
REQ #1101
QA2
1/14/2013**

Q1. In regards to the bid #113027A (Full CE for the Installation of ITS Conduit and Fiber Optic Cable), is this for the Construction or just the Engineering/Inspection ? With the Engineers estimate being \$7.3 Mil, that seems to be quite high for just engineering, but I find no construction specs in the bid documents.

A1. The RFP that is posted is for Construction Engineering services which include inspection by a consultant. The construction costs are estimated to be \$7.3 million not the construction engineering costs. The RFP does not include the construction specifications. Those will be included in the letting documents for construction of the project to be bid on by contractors.
