

As needed inspection and testing including steel painting QA1  
Requisition 828  
1/23/2012

**Q:**

For the PWL HMA inspection, sampling and testing RFP, can you provide an estimate of the total man hours expected or number of lead inspectors anticipated? Are the structural steel painting inspection man hours expected to be 40% or less of the total hours?

**A:**

**Estimated inspectors are 3 to 4 starting in May climbing up to 6 to 7 in July/August. Total hours are estimated to be in the 5000 to 6000 hour range. These are estimates and all depends on contractor schedules and projects. Steel painting inspection will be less than 40% of the total hours.**
