

**SCOPE OF SERVICES
CONSTRUCTION SERVICES – QUESTIONS & ANSWERS**

As-Needed Inspection and Testing

Question 1: In the RFP it mentions “These services may be expanded to include contractor staking services for various projects as determined by the PEM. The Consultant shall discuss the need for the Contractor Staking full-time survey with the PEM during price proposal negotiations.” The following questions are with respect to the project “Understanding of Service”. What extent, if any, will both types of staking services be needed for this project? If Full staking services are needed, do you have any specific projects or project types (ex. ADA ramp projects) that will be emphasized for this work?

Answer 1: **The majority of the staking services shall be the pre-staking and verification staking. The Contractor staking services may be used on one or two projects, though there are no project types identified at this time.**
