

**Grand Region – Wetland Design in Ottawa County**

**Req # 1550**

**QA 1**

**07-09-2014**

Q1. Is there a specific program for the proposed site that targets a breakdown by wetland type?

A1. The intent is to maximize the amount of forested wetland creation. Due to the site conditions however, there will most likely be some scrub shrub and emergent/open water wetland creation as well.

Q2. Please clarify if this is a wetland mitigation project or a wetland bank.

A2. This site will primarily serve as a corrective action site in the Grand River Watershed. However, Any excess acreage will be banked for future credit.
