

**Requisition Number: 1794**

**As-needed small business design for 8 bridges within the limits of the I-94 Modernization Project in Detroit.**

**QA6**

**7/6/2015**

**Question:** If a firm is prequalified to perform certain services for which they were selected under this RFP and has significant experience in these areas, would they still be required to be present 100% of the time, or would this be reduced to the 60% requirement to be consistent with the other RFPs? We are wondering if the intent is to have non-prequalified firms be present 100% of the time to be mentored in technical and business related matters. If a firm is already prequalified and experienced in MDOT work, the additional effort/cost to be present in the project office beyond 60% of the time may not be beneficial to the project, the firm or MDOT.

**Answer:** MDOT will evaluate the qualifications of the selected consultants and *may* adjust the requirement that “at least one key design personnel present in the I-94 Project Office 100% of the time”. Keep in mind that the standard rule of whoever is performing prequalified work must be prequalified is still applicable.
