

## **Asset Management of Retaining Walls**

**OR15-114**

**Requisition #1959**

**March 9, 2016**

Q: Under the wind pressure and different weather conditions the failure of noise barrier walls have similar consequences associated with the failure of retaining walls, such as the potential safety hazards, and roadway closures. Should study consider the Noise barrier walls in addition to regular retaining walls?

A: Noise barrier walls are not included in the scope of this research project and should not be considered or included while developing a proposal for this requisition.
