

**Specialty Services for evaluation of bridge decks using Infrared Thermography
Requisition 1581 QA2
8/26/2014**

Q - The allowable time for data collection is somewhat restrictive since thermal characteristics may not become apparent until the late morning hours. Is it permitted to scan the decks between the hours of 7 p.m. and 6 a.m. to allow for additional data collection?

A – Yes, Monday – Thursday only. Note that no overtime will be paid for work after normal business hours. A shadow vehicle should still be made available in the event that traffic is still heavy at that time. That decision will be made by the MDOT PM on a case by case basis.
