

## STRUCTURAL FABRICATION INSPECTION SERVICES QA2

REQ 937

6/14/2012

Q1: How are we to detail the Testing Services Prices? There is one line item on the bid sheet, but various prices will need to be shown, including regular and expedited turnaround time prices for each service. Please advise.

**A1: Please provide a list of all testing services the Vendor provides, including a complete description and prices for regular and expedited turnaround for each test on a separate sheet of paper.**

Q2: RFP states "Testing... *may* consist of the following: a. Shop and field welder qualification; b. Weld procedure qualification; c. Metal testing including tensile and Charpy V-Notch impact." Are we to limit our prices to these tests only? Are there any other tests we should provide prices for?

**A2: No. Please provide a list of all testing services the Vendor provides.**

Q3: Do sub-consultants need to complete form 5100J?

**A3: Yes.**

Q4: In the event that the Prime and Sub-consultant are performing the same services, can two bid sheets be submitted, or must both firms work under the same rate structure?

**A4: There should only be one unit price for each of the pay items listed on the Consultant Bid Sheet.**
