

Bridge Load Rating Services for Complex or Unique Structures for the Sault Ste. Marie
International Bridge – Requisition #956

QA2 07/11/12

Q: I am with a Canadian engineering firm interested in providing these services. Can you please confirm if this is open to Canadian companies and since qualification seems to be required through MDOT what is the process and timeline for approval for an out of state/country company?

A: The opportunity is open to any firm than can meet the prequalification requirements as stated in the RFP. Follow the Consultant Prequalification Application Instructions listed at the following link: http://www.michigan.gov/mdot/0,4616,7-151-9625_21540---,00.html . However, please note that any interested firm must meet the requirements on or before the proposal due date.
