

# US-23 Improvements

Silver Lake Road to M-14, Livingston and Washtenaw counties

## Project Overview

The Michigan Department of Transportation (MDOT) is proposing to make the following improvements along a busy corridor in the Ann Arbor/Brighton area:

- Repair pavement along US-23 between Silver Lake Road and M-14, as well as upgrading the median shoulder on US-23 between M-14 and M-36 (9 Mile Road);
- Replace bridges at 6 Mile Road, 8 Mile Road and N. Territorial Road;
- Widen bridges at Barker Road and the railroad bridge;
- Repair bridges at Joy Road and Warren Road;
- Upgrade ramps at N. Territorial Road, 6 Mile Road, 8 Mile Road and M-36; and
- Install additional Intelligent Transportation System (ITS) hardware, including cameras and electronic message boards.

Also as part of the project, MDOT is considering installing an active traffic management system along US-23 between M-14 and M-36 using innovative technology to help manage peak-hour congestion. This system would use the upgraded median shoulders on US-23 to help improve traffic flow and increase safety along the corridor. Overhead lane control signs will let drivers know when the system is active. The system would be monitored by MDOT's Statewide Transportation Operations Center (STOC), through the use of expanded ITS technology, with assistance from the Freeway Courtesy Patrol (FCP).

## Next Steps

Based on input from previous public meetings, MDOT is preparing an Environmental Assessment for the proposed improvements to US-23. View study details and comment on the proposed improvements at: [www.michigan.gov/mdotstudies](http://www.michigan.gov/mdotstudies).
