US 31/M-37 (Division St.) PEL

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

In order to address the concerns and make improvements to this section of Division St a way MUST be found to reduce the volume of traffic. Simply slowing traffic just increases the frustration of drivers and cause them to try to beat the traffic light changes. Long lines already exist on many streets including traffic turning left on to Division from Bramblewood Parkway. Traffic not intending to stop in Traverse City should be routed around the city. The longer this is delayed the harder it will be to obtain ROW.

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

What MDOT cannot control is speed. We have issues with Speeders in our town. There is very little interest in enforcement even though studies and neighborhood observations identify it as a problem. MDOT can give us tools like round abouts, medians and crosswalks, stop-lights and signs but they can't write speeding tickets...

Other comments relating to the US 31/M-37 (Division Street) PEL area:

Every person living in the vicinity of Division needs to think of the greater good w/ traffic flow. One way streets & cul-de-sacs do not move traffic more efficiently. Please consider that when listening to special interests.

Please place this form in a comment box, or see reverse side for other options.

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Please create a safe cross way (crosswalk light, elevated bridge) to the beautiful and highly used GT Commons and hiking trails. This needs to be located at or near 11th St. Families cross Division at that location from the Central neighborhoods. Athletes also need a way to connect these two (city & Commons) assets for activity.

We need a place to cross at 10th-11th St!

Thank you.

Other comments relating to the US 31/M-37 (Division Street) PEL area:

Better lighting along Division would be welcomed. ☺

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Division St. is a city street 1st! Methods for slowing traffic (roundabouts + treed medians, etc) should be used. There should be other ways to get from TC to commercial areas on 31 & on 37. Front – Long Lake – Silver Lake Bypass. Widening of Division would not help + just bring more traffic. Bike + Pedestrian Lanes would be better. More crosswalks + Lower ~~Speed~~ Speed Limits.

With

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

We should make a sidewalk on the right side of West 12th Division Street. I also want to walk or bike to my middle school. Pav the trail from Division Street to Buffalo Ridge trail. Stop the cars to turning right at the tart trail and grandview.

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

I am happy to see the need for complete streets and non-motorized use as a goal/purpose. To accomplish this, safe crossings with refuge islands are needed often on the corridor - along with traffic calming to increase the safety of those crossings. A sidewalk along the entire east side of the road, plus a wide landscaped buffer between the sidewalk and the road is also necessary. Connecting the "Mall Trail" with the "Buffalo Ridge Trail" would be a big improvement for a more comprehensive bicycle route system as well. A safer crossing at Division and Grand View is also needed for bicycles + pedestrians.

Other comments relating to the US 31/M-37 (Division Street) PEL area:

It might be wishful thinking but I would love to curve Division St away from Central Neighborhood between 14th + 8th as much as possible to give lots of space on the east side of the road for a sidewalk and traffic buffer - and probably calming traffic a bit with that curve.

Please place this form in a comment box, or see reverse side for other options.

P.S. 45 mph is crazy. 35 mph is still too fast, but alas, more realistic for the design speeds I anticipate. mDOT and 25-30 mph is preferred. :) Thanks!

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Would like to see the designated truck route away from the central city where they will create less noise nuisance and less road destruction.

It's crazy bring in trucks thorugh the densest neighborhood in northern michigan.

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Need a pedestrian bridge near 10th or 11th street for walkers & bikers to safely cross Division and enjoy the State Hospital grounds and businesses.

Please build a bridge to walk above 11th st to cross it, Same as the bridge to cross from the State Park to the bay.

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Thank you for providing the posters at Munson Hospital. The posters provide good questions + issues.

It is not possible to give substantive input without any alternatives to review.

I have the 10/31/14 email from Patti stating "this is not an MDOT project". I made my comments in a 10/30/14 email to Patti.

Other comments relating to the US 31/M-37 (Division Street) PEL area:

1. I have not seen safe pedestrian crossings yet.
2. I oppose an 8½ St. alternative as damaging the Commons.
3. I have not seen planning to prevent Central Neighborhood traffic from Division.
4. I have not heard a striping plan and speed calming plan.

Please place this form in a comment box, or see reverse side for other options.

5. Munson and the Command have to face the idea of having their main entrances not on Division St.

MDOT
Michigan Department of Transportation

US 31/M-37 (Division St.) PEL

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

First off- THE STATE HIGHWAY - NEEDS TO BE MOVED. SO ALL TRAFFIC IS NOT FORCED TO GO THROUGH THE CITY. However - Till this happens - ROUND ABOUTS ARE A JOKE - DOUBLE BOTTOM SEMIS. GO THROUGH THIS ROUTE. THEY WOULD SQUISH SMALL CARS. A COUPLE UNDER GROUND TUNNELS FOR PEDESTRAINS - BIKES WOULD BE NICE.

Other comments relating to the US 31/M-37 (Division Street) PEL area:

ADDING MORE TRAFFIC LIGHTS - WOULD ENCOURAGE ~ MORE SIDE STREET CUT THROUGH.
NO BIKE LANES - ON - STATE HIGHWAY

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Purpose/needs statement is GOOD!

My concerns:

(1) 7th/Division intersection is confusing. Needs to get down to 1 lane going straight or right

(2) 7th/8th Streets approaching 2000 VPD. Losing residential character. DANGEROUS for Central Grade School students.

~~Other comments relating to the US 31/M-37 (Division Street) PEL area:~~

(3) 8½ St. would take traffic off of all residential streets & and give Munson the main entrance they have long advocated for!

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

Move traffic smoothly so that there is no reason to cut through the neighborhood.
Side walks on both sides of Division for pedestrians.
Boulevard Division so pedestrians can safely cross

Other comments relating to the US 31/M-37 (Division Street) PEL area:

Protect 11th St. from traffic using 11th to cross Division.
No traffic light at 11th & Division because it will become a major east/west street.

Please place this form in a comment box, or see reverse side for other options.

Public Information Session 2

What comments do you have related to the Purpose and Need Statement or the current constraints shown for the project?

NEED TO CREATE "ENTRY" INTO MUNSON
(1) MEDICAL DRIVE
(2) SILVER LAKE (ELMWOOD)
(3) ON DIVISION ?
REDUCE TRAFFIC ON DIVISION - BY BIKES ETC.
(GET TRUCK TRAFFIC OFF BAY AND THROUGH TOWN
INCENTIVIZE MUNSON EMPLOYEES TO USE BAYA ETC.
