

## Power GEOPAK Webinar Data Set Information

---

This document contains instructions for using the MDOT Power GEOPAK webinar data set with the MDOT\_01 workspace. This data is intended to allow staff to follow along the Roadway Designer Webinar Series.

### **MDOT Power GEOPAK Data Set**

The Power GEOPAK Roadway Designer webinar data set should be extracted in the C:\Temp folder. The settings and file definitions will not work without a lot of rework if the ZIP file extracted anywhere else.

The data set includes, the topo, GEOPAK plan file, template library, RDP, PRJ, TIN, DTM, ALG, XIN, IRD and GPK files. These files should be everything needed to follow along with the Roadway Designer webinar series.

### **Technical Support**

Please email any questions, issues or problems associated with this data set or document to:

[MDOT-PowerGEOPAKSupport@michigan.gov](mailto:MDOT-PowerGEOPAKSupport@michigan.gov)

Support is also accessible through Power GEOPAK while in the MDOT\_01 workspace through the “Help\MDOT Support” menu for any of the following topics.
