

Training Wheels on-Road Bicycle Facility Design Training

Training Wheels is an educational course on the planning and design of on-road bicycle facilities. It will consist of two hours of classroom instruction on the AASHTO Guide for the Development of Bicycle Facilities, followed by an on-road, *on bike portion*. During this portion we will casually ride through the community, analyzing types of on-road facilities available. There will be many stops to point out potential facility types, followed by a group exercise and discussion, questions from participants and a brief wrap-up.

Class is intended to accommodate all levels of users. Please dress appropriately as we will bike, rain or shine.

Class Size: Maximum of 25

Continuing Education Credits: This course is eligible for 5 Professional Development hours for PE's. (Certificate of maintenance for planners must be self reported by attendees).

Instructors: Nathan Roseberry, P.E., Senior Transportation Planning Engineer of T.Y. LIN International. He brings more than nine years of experience in engineering with a focus on bicycle facility implementation. Mr. Roseberry was responsible for the recently completed CDOT Bicycle Program Design Guidelines.

Mike Amsden, AICP, is a Senior Transportation Planner with T.Y. LIN International and project coordinator for the CDOT Complete Streets Division. Mr. Amsden has taught Training Wheels in more than 15 Michigan cities and is responsible for leading a team in the planning, design, implementation, and program management for the CDOT Bicycle Program as well as assisting in the development of the CDOT Bicycle Program Design Guidelines.

Required Materials: A bicycle and helmet are required. Please let host know if you need assistance in obtaining these for the class.
