

# Maintenance Memorandum

**Date:** March 8, 2000

**Subject:** **Emergency Procedures for Road Closures - Section 5**

In December, you were sent the MDOT Emergency Management Manual. Attached is an updated and signed "Emergency Procedures for Road Closures." Please place the signed copy in Section 5 of your manual and recycle the draft version. Thank you for your assistance.

If you have any questions, please contact me at (517) 322-3301 or [Phifere@mi.gov](mailto:Phifere@mi.gov).

Eileen Phifer  
Emergency Management Coordinator

# PROCEDURES FOR CLOSURE OF STATE HIGHWAYS

## **I. PURPOSE**

To provide guidance to department personnel, police agencies, and road agencies to follow when closing state highways. The general nature of state highway closures require prompt coordinated response and effective action.

## **II. AUTHORITY**

- A. The State Constitution and statutes establish the Michigan Department of Transportation (MDOT) as the owner and operator of state highways. This primary responsibility is not preempted by emergency/disaster conditions.

When an emergency is declared by proper authorities, the Michigan Emergency Management Plan provides for emergency/disaster response operations within the state and includes the following responsibilities and functions of MDOT.

1. Provide equipment and personnel for clearance of debris, heavy rescue, and traffic control/barricading.
2. Coordinate emergency traffic control measures on state highways including road closures, in cooperation with the Michigan Department of State Police (MSP).
3. Repair roads, bridges, drains, and traffic control signs/devices on the state highway system.
4. Coordinate emergency responses with the U.S. Department of Transportation for activities involving all modes of transportation including, limiting or restricting air, rail, water, and vehicular traffic affected by the hazard area.
5. Provide supplemental communications capability.

- B. State of Michigan Constitution of 1963, Section 28

"...There is hereby established a state highway commission, which shall administer the state highway department and have jurisdiction and control over all state trunkline and appurtenant facilities, and such other public works of the state, as provided by law..."

- C. Official Highway Closures

The legal authority and responsibility of the State Transportation Commission for officially closing trunklines is found in Section 497 of the Penal Code, MCLA 750.497, which authorizes the closure of highways to ensure the public safety.

#### D. Police Agencies

The authority cited in the Michigan Vehicle Code, Section 257.602, provides that a person shall not refuse to comply with a lawful order or direction of a police officer when that officer, for public interest and safety, is guiding, directing, controlling, or regulating traffic on the highways of this state. This includes the control of traffic when conditions exist that are hazardous to the traveling public, i.e., dangerous conditions requiring immediate actions for public safety, scenes of serious accidents, severely reduced visibility, extensive damage to roadways or flooding, etc. The "Fire Prevention Act," Act 207 Public Acts of 1941, Sections 29.1 to 29.25 of the "Michigan Compiled Laws" as amended by Act 3 of the Public Acts of 1978, requires all accidents or incidents involving hazardous materials to be reported to the State Fire Marshal. Actions taken will be determined by the State Fire Marshal in coordination with the responding fire or police department.

1. Incident management plans will be put into effect (if available) whenever a closure is required.
2. Temporary closures will be provided under police authority. If a closure is expected to last four or more hours, assistance may be requested from the MDOT Region Associate Engineer or representative.
3. Closures should be reported to the MDOT Region Associate Engineer or representative as soon as possible.

### **III. EMERGENCY/DISASTER IDENTIFICATION**

The need for complete, temporary, or partial closure of state highways may be necessary under any of the following conditions:

#### A. Natural Disasters

- Flooding
- Tornadoes and/or wind storms
- Ice and/or snow storms
- Earthquakes
- Forest Fires

#### B. Nuclear Incidents

- Nuclear power plant incidents

#### C. Technological Incidents

- Explosions
- Hazardous materials
- Fires
- Transportation facility failures

#### D. National Security

- Civil defense
- Military action

- E. Major Traffic Incidents
  - Traffic Accidents
  - Unusual Congestion

#### **IV. ORGANIZATION**

##### **A. State Police Districts**

The MSP is organized into seven geographic districts (Attachment I). The following state police divisions are represented in each district.

<u>State Police Divisions</u>	<u>Types of Emergencies/Disasters</u>
Fire Marshal	Hazardous material incidents
Emergency Management	Natural disasters Nuclear power plant incidents National defense
Motor Carrier	Major truck-transportation accidents
Uniform	Police Response

MSP districts have duty officers available after normal working hours through regional dispatch centers (See Attachment II).

##### **B. MDOT Regions**

MDOT administers its programs through seven region offices located throughout the state (Attachment III). The Region Associate Engineer or representative coordinate MDOT's response to all emergencies/disasters in their respective districts. MDOT's Emergency Response Call List is maintained at MSP district offices, county road commission offices and MDOT contract agencies so appropriate staff can be notified. Affected Region Associate Engineers or representatives coordinate region emergency management activities with bridge personnel at the Mackinac, International and Blue Water Bridges.

#### **V. POLICE RESPONSE PROCEDURES**

When an incident occurs, police and/or fire services are normally the first to respond. They initially assess the situation and its scope, and determine whether additional assistance is needed. Other agencies may become involved depending on the nature of the incident. The police response procedures listed below should be followed:

- A. Incidents affecting highways should be reported to the appropriate MDOT region office.
- B. Assistance may be requested under the following conditions:

1. The road closure will be for an extended period of time, generally four hours or more.
2. The incident requires a detour of traffic from the state highway system, and an incident management plan is not available for that area, the local road agency may assist with selecting appropriate alternate routes by considering load limits, bridges, overpasses, or other limiting factors. Documentation of the detour from the local road agency is necessary.
3. State highway closure is due to severe weather conditions.

All closures of state highways are basically the same in procedure and responsibilities; however, severe weather conditions can involve a much larger closure area. These conditions require a greater degree of coordination between involved agencies and the public.

During major incidents, the decision to completely close state highways, the general area affected, and the anticipated length of time will be made jointly by the involved District State Police Commander and MDOT Region Associate Engineer or representative.

If an incident allows for a decision concerning timing of state highways closures, it is best to postpone the closure during peak hours. This closure postponement can only be considered if vehicles have been adequately removed from the traveled portion of the roadway and are not interfering with safe traffic flow.

An official bulletin will be prepared jointly by the involved District State Police Commander and MDOT Region Associate Engineer or representative and released immediately to the news media. This announcement will state as precisely as possible the travel restrictions and area affected by the restriction.

## **VI. TASKS**

### **A. Road Agencies will:**

1. Maintain an updated Emergency Management Response Call List for law enforcement agencies.
2. Report emergency related road and bridge closure information to the appropriate police agency.
3. Respond with available resources from support organizations when required.
4. Maintain close communications and coordination with all responding agencies during the emergency.
5. Provide emergency traffic control using available signs, signals, barricades, and/or vehicles.

### **B. Local Police Agencies will:**

1. Report emergency related highway conditions to affected agencies.

2. Immediately provide information to the appropriate MSP post and other responding police agencies to ensure coordination.

C. MSP Posts will:

Continuously inform the MPS District Headquarters and the MSP Operations Center, via telephone, radio, or Law Enforcement Information Network (LEIN) of local hazardous or restrictive road conditions for immediate release to the news media.

1. Post Commanders or their representative(s) will maintain coordination with road agencies and other police agencies within the affected area. Alert and work with county/city emergency management coordinators concerning the possible need for shelters and rescue operations within the affected area.
2. District Headquarters will alert the district commander, emergency management coordinator, and traffic services officer.
3. District Commander or their representative will coordinate efforts with the MDOT Region Associate Engineer or representative concerning road closures within the district. If adjoining districts are involved, coordination will be through the MSP Operations Center in East Lansing.
4. District Emergency Management Coordinator will assist post commanders in the coordination of rescue operations and sheltering of stranded persons.
5. District Traffic Services Officers will assist the MDOT Region Traffic and Safety Engineer, regarding safety requirements and plans for alternate routes within the district.
6. MSP Operations Center will notify MDOT's Emergency Management Coordinator for coordination of highway operations. MSP Operations Center will also compile updated road data to be distributed to news media via National Oceanic and Atmospheric Association (NOAA) weather wire. The information may also be broadcasted to all affected police agencies via LEIN. The MSP Operations Center will also alert MSP Emergency Management Division duty officer.

D. MDOT Personnel will:

Follow applicable procedures as provided in the Emergency Management Response Call List (red book). The following list of activities will assist MDOT personnel:

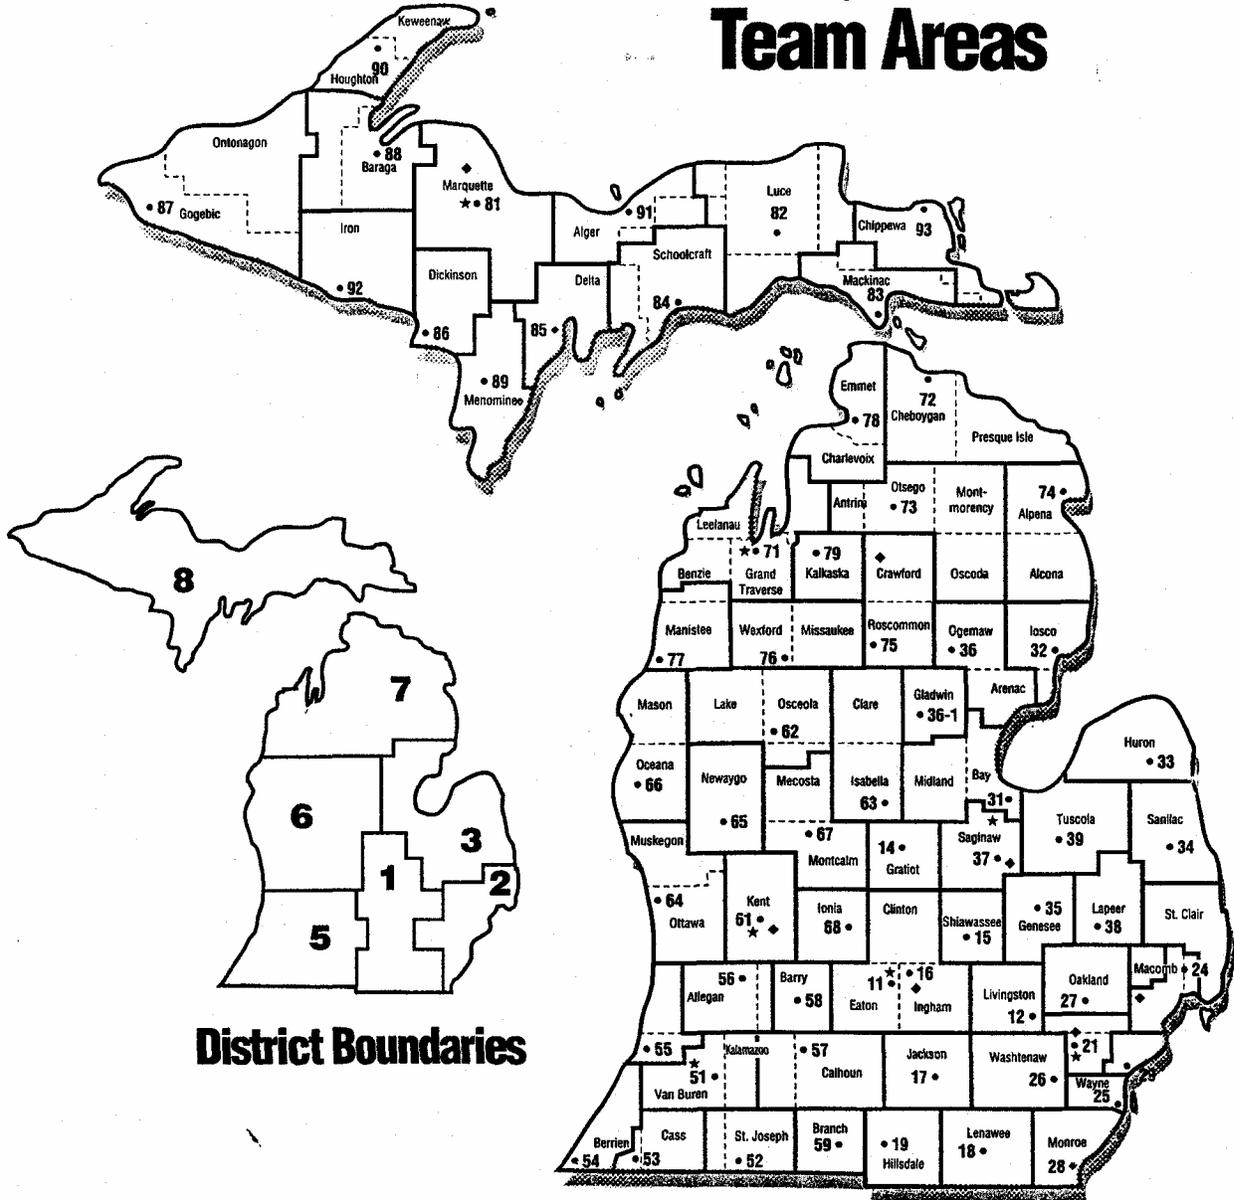

1. Coordinate activities with the MSP District Commander.
2. Maintain communication with affected highway superintendents and contract county superintendents for up-to-date road condition assessments (see Attachment IV & V).
3. Deploy region equipment and request additional equipment from other MDOT regions when required.
4. When appropriate, coordinate emergency efforts with MSP District Commander on state highway closures.

5. When incident management plans are not available, assist MSP in determining road closure terminals for affected highways within the MDOT region and coordinate closures with adjacent MDOT regions when required.
6. Contact other MDOT regions outside the emergency area of the possible need for their assistance to the affected area.
7. Contact and work with personnel, as necessary, from the Mackinac, Blue Water and International Bridges.
8. Notify and continuously update the MDOT Region Engineer, Chief Operations Officer, and the Department Emergency Management Coordinator.
9. MDOT Emergency Management Coordinator will coordinate with the State Police Special Operations Division and affected MDOT districts to ensure an overall coordinated effort.

## **VII. RE-OPENING CLOSED HIGHWAYS (SEVERE WEATHER)**

- A. Affected road agencies and MDOT personnel will report information to the MDOT Associate Region Engineer or their representative when a major highway can be re-opened.
- B. Affected MSP posts will immediately report road conditions to their district headquarters and MSP Operations Center.
- C. MSP and MDOT officials will coordinate re-opening of highways with MSP Operations Center and affected road agencies or MDOT personnel.
- D. MSP Operations Center will compile information on travel restrictions and re-opening of highways. Data will be submitted to the news media via NOAA Weather Wire and LEIN, and broadcast to affected police agencies.
