Temporary Sign Supports

The System Operations Section has created a Special Provision (SP) addressing temporary signs installed on temporary supports. This SP will be a frequently used special provision.

The SP ([12SP812L](#)) increases the length of time stationary temporary signs can be on temporary supports to 14 days.

Any issues with temporary signs remaining on temporary supports for longer than 14 days, or temporary signs not being properly maintained (i.e. insufficient ballast, signs being blown over, etc.) during the 14 day timeframe should be reported to the Traffic Incident and Work Zone Management unit.
