Training Wheels: On-road Bicycle Facilities Courses 2019

If your agency or community is interested in improving mobility for bicyclists and other road users, consider sending one to two key people to MDOT’s Training Wheels V 2.0 or our new Advanced Training Wheels course. Space is limited. Details and registration information will be shared as soon as it is available.

These courses focus on the NACTO Urban Bikeway and Street Design Guides.
  • Six Training Wheels V 2.0 classes
  • Two new Advanced Training Wheels classes
  • Locations to be determined
  • Locations will be selected to showcase newer bicycle facility designs:
    o Separated bike lanes
    o Buffered bike lanes
    o Intersection design challenges

These courses will be a practical resource for local or MDOT managers, staff, engineers, planners and community leaders.
  • National experts teach the course
  • A field exercise element will be a part of these courses
  • Classes may be eligible for 6.5 professional engineer continuing education unit credits and American Institute of Certified Planners self-reported maintenance hours

If you have questions, thoughts for the advanced training or are interested in training, e-mail MDOT-TrainingWheels@Michigan.gov.
