

US-10BR Reconstruction; Midland Design Build Information Sheet

The Michigan Department of Transportation (MDOT) intends on using a Design/Build procurement method to deliver a road reconstruction and rehabilitation project in the Bay Region. This will be a single step low bid Design/Build project. MDOT plans to advertise the project in mid September 2014 and have a bid letting in mid to late October 2014. It is anticipated that construction will take place between April 2015 and November 2015.

The project is located in the city of Midland, Midland County. The project on US-10BR runs from M-20 northerly to approximately 500 feet north of Saginaw Road. The project work is divided into two segments: (1) from M-20 to 1300 feet south of Saginaw Road and (2) from 1300 feet south of Saginaw Road to 500 feet north of Saginaw Road. Segment (1) will include the reconstruction of the existing concrete and composite pavement with HMA pavement, curb & gutter, driveways, sidewalk, ADA ramps, storm sewer and drainage structures, and some sanitary sewer and water main. Segment (2) will include cold milling, HMA overlay, and detail 7 & 8 joint repairs.

Design-Builder Prequalification Requirements

- Comb/Jt 5920 Cb, Ea

Lead Engineering Design Firms Prequalification Requirements are anticipated to be:

- Road Rehabilitation and Rural Freeways (Designated Classification)
- Maintaining Traffic Plans and Provisions
- Construction Staking
- Road Design Surveys
- Pavement Marking Plans
- Municipal Utilities
- Hydraulics
