

**RFQ for the US-131 over Muskegon River project
Grand Region, Mecosta County**

**Q&A #1
3/5/2014**

JN 115159

Question 1: Attachment A (map of structure location) referenced in section 1.0 of the RFQ, project plans and project proposal are not included. Are these available?

Draft plans and proposal are posted at the following location and now included in the 2014 *Innovative Contracting Projects/US-131 over Muskegon River* link on the website. A map to the structure is included in the plans.

[ftp://ftpmdot.state.mi.us/US-131%20over%20Muskegon%20River%20\(JN%20115159A\)/](ftp://ftpmdot.state.mi.us/US-131%20over%20Muskegon%20River%20(JN%20115159A)/)

Question 2: Part of the RFQ requires information regarding subcontractors. Are we required to commit to subcontractors prior to the bid to complete the RFQ?

MDOT understands that multiple subcontractors may be under consideration for the specialty work such as flat jack installation and post tensioning prior to the bid letting. If a commitment has not been made, and multiple subcontractors are under consideration at the due date of the RFQ, this must be explained in the applicable section(s) within the RFQ. Descriptions of each subcontractor's approach to the work should be included, as well as, other information required per section 3.0 of the RFQ for all subcontractors being considered.
