## What Is Being Done?

Concrete pavement repairs along US-31 Business Route (Polk Road and State Street), including resurfacing Polk Road from State Street east to Oceana Drive and reconstructing the Polk Road/State Street intersection.

## When Will This Be Done?

Work will begin in May and is expected to be finished in late June.

## How Will Traffic Be Affected?

Traffic will be maintained with single- and double-lane closures, under flag control when necessary.

During the Polk Road/State Street intersection reconstruction, State Street traffic will be detoured onto Wood Street and Griswold Street.

## Long-term Benefits

This project will extend the service life of the roadway and provide a smoother driving surface.

MDOT's 2012 road and bridge program supports the creation of jobs, growth of the economy, preservation of the environment and the safety and security of the transportation system.
