Ishpeming, MI 49849

What Is Being Done?

The Michigan Department of Transportation (MDOT) is reconstructing about a mile of US-41 in Hancock from the Portage Lake Lift Bridge to Lincoln Drive. Work includes removing and replacing the existing roadway, with drainage improvements. Streetscape work includes decorative street lighting, curb bump-outs and landscape plantings. The City of Hancock will be performing water main and sanitary sewer improvement in addition to the project.

When Will This Be Done?

The project is scheduled to begin in April 2016 and be completed in July 2017.

How Will Traffic Be Affected?

The project will require a detour, with two-way traffic on Hancock Street. Construction will proceed from east to west during stages 2-5 of the project. To maintain access to businesses, local traffic will be permitted on US-41 (Quincy Street) in the areas outside the active stage, with total closures in the work area. Pedestrian access will be maintained throughout the project.

Long-term Benefits

The project will improve pavement condition and address historic concerns with nonmotorized traffic in downtown Hancock. The project has an anticipated fix life of 20 years.

MDOT reminds motorists to drive like you want to make it home tonight.

How Will We Keep Motorists Informed?

For up-to-date information on this project, go to www.michigan.gov/drive or download the free Mi Drive app from iTunes and Google Play.
