

Acknowledgements

An acknowledgment and special thank you to everyone who helped prepare and finalize the Michigan Department of Transportation's (MDOT's) Research and Implementation Manual. Without the support and guidance of the Executive Team, this revision would not have been possible. I extend my gratitude to Larry Tibbits, our Chief Operations Officer, for his guidance throughout this endeavor and Randy Van Portfliet, our Superior Region Engineer, for his timely review and expert advice. I would also like to extend a special thank you to the members of the Research Administration Manual Panel: Paul Ajegba, Metro Region; Donald Cameron, Federal Highway Administration; Joanie Pereida, Financial Operations; Dorothy Iredu, Civil Service; Anu Taneja, Contract Services; Roger Till, Construction and Technology; Andre Clover, Sudhaker Kulkarni, and Angela Nelson from the Office of Research and Best Practices (ORBP) who began this work in the fall of 2006, for their dedication and investment into MDOT's research program.

I would also like to thank everyone who attended, asked questions, and provided input during the Project Managers' Meeting that was held on November 14, 2007, and the University Partners' Meeting held February 21, 2008. I extend special appreciation to Mike Blackledge, Mike Smith, Kelly Villarreal, and Kathy Popoff from Contract Services who helped us hone and communicate the contract related portions of our manual.

A special thank you to Kim Henderson, Brian Whitfield and the staff from Graphic Design and Mapping Services for transforming our documents into the professional manual you see now. In addition, a sincere thank you to Pat Casey, Kim Linsenmayer and Brian Hirt from CTC & Associates, L.L.C., of Madison, Wisconsin, and Angela Nelson who kept us on target and did a wonderful job getting our manual to its final stages.

Most importantly, I would like to thank the entire ORBP staff who painstakingly mapped the processes and procedures ensuring the accuracy of this manual to the best of our ability. The staff who participated, but have not yet been mentioned, include Trisha Aper (retired); Alexandra Briseno, Librarian; Nancy Crider, Research Analyst; Wen-hou Kuo, Statistician; and Homer Sprague, Statistician. Mark Becker from the Performance Excellence Division expertly guided us through these months of analysis and became a cohesive member of the team in the process.

I would also like to thank the two newest members of our team who will be instrumental during the implementation of the contents of the following pages; Aubrey Marron, Departmental Analyst, and Annette Nealey, Research Administrative Assistant.

We look forward to further developing and refining MDOT's research programs to best utilize all of our associated resources in achieving relevant research results. This will maximize our investment opportunities with every research project. The Research and Implementation Manual will guide MDOT in cooperatively developing strategic problem statements that will expertly frame research to achieve targeted, implementable results. This will lay the foundation for MDOT to reach the goals and vision described in the "MI Transportation Plan, Moving Michigan Forward."

Calvin Roberts, P.E.
Engineer of Research and Best Practices
