

# FieldManager 5.1a to 5.2a Enhancements and Changes

February 22, 2016

## The following enhancements and changes are included in FieldManager release 5.2a:

- Added the Item Postings by Item Grouped by Estimate inquiry that shows a list of postings and the Estimate Number on the posting that was first considered for payment.
- Cancelling the import of a working contract via FieldNet does not leave the FN message as 'processed' – the user is able to process and import the contract at a later time.
- Importing multi-contract data into FieldBook or FieldManager no longer results in IDR Attachments sporadically being lost.
- Advanced Field information is available for all fields in the contract Administration tab in FieldManager.
- Item posting quantity field now shows three decimals of precision on the IDR report and on the IDR posting form.
- In the Comments column on the IDR list, filtering now works correctly.
- An application crash that might occur when either FieldManager or FieldBook is closed has been fixed.
- FieldManager 5.2a is now compatible with Windows 8.
- All enhancements and changes listed above also apply to FieldBook when applicable.
- Many small enhancements have been added to the software and various software errors have been fixed which are not listed in this document. If you would like a complete list of all enhancements and error fixes, you may request a copy of the Summary of Changes document by calling MDOT's FieldManager Help Desk at 517-322-1556 or by sending an email to [fieldmanager-admin@michigan.gov](mailto:fieldmanager-admin@michigan.gov).
