

---

**SECTION D – WEPCO RATE ZONE  
RATE SCHEDULES**

**GENERAL TERMS AND CONDITIONS OF THE RATE SCHEDULES**

- A. The Company will advise the customer in the selection of the applicable rate which will provide the lowest cost of service, based on the information at hand, but the responsibility for selection rests with the customer. After a customer has selected a rate, he is not permitted to change to another rate until 12 months have elapsed. A customer will not be permitted to evade this rule by temporarily terminating his service.
- B. Bills for service will be due 21 days after the date of issuance of the bill, except for those customers receiving summary billing service. Those summary bills must be paid in full within 15 calendar days after their rendition. Bills unpaid after the last due date will be handled in accordance with the Electric Service Rules and Regulations of the Company
- C. The Company is operating under franchises granted by various municipalities in which it is furnishing electric service. No special rates are contemplated in any of these franchises.
- D. The Company is not obliged to provide service facilities for any customer which are substantially in excess of those required for the customer's regular use of service.
- E. The terms and conditions under which electric service will be provided by the Company are set forth in the Electric Service Rules of Upper Michigan Energy Resources Corporation as filed with the Michigan Public Service Commission.

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.010391 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 54.95 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh or 57.10 mills per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power. An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg1, Rg2, Rg-1M and Rg-OTOU-1M   |
| General Secondary                          | Cg1, Cg2, Cg3, Cg3C, Cg5, TssM, TssU, Cg-1M, Cg-3M, Cg-OTOU-1M, Mp-1M  |
| General Primary                            | Cp1, Cp2, Cp3, Cp4, Schedule A, CpLC and Cp-1M   |
| Lighting                                   | Ms2, Ms3, GL1, LED1, Ls-1M   |
| Other                                      | Mg1, Ds1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas and DG-1  |

Effective for bills rendered for the 2025 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21600

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.010391 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 54.95 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh or 57.10 mills per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power. An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg1, Rg2, Rg-1M and Rg-OTOU-1M   |

Effective for bills rendered for the 2025 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21600

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.010391 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 54.95 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh or 57.10 mills per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power. An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg1, Rg2, Rg-1M and Rg-OTOU-1M   |
| General Secondary                          | Cg1, Cg2, Cg3, Cg3C, Cg5, TssM, TssU, Cg-1M, Cg-3M, Cg-OTOU-1M, Mp-1M  |
| General Primary                            | Cp1, Cp2, Cp3, Cp4, Schedule A, CpLC and Cp-1M   |
| Lighting                                   | Ms2, Ms3, GL1, LED1, Ls-1M   |
| Other                                      | Mg1, Ds1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas and DG-1  |

Effective for bills rendered for the 2025 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21600

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of **0.010391** mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of **54.95** mills per kWh, rounded to the nearest one-hundredth of a mill per kWh **or 57.10 mills per kWh**. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power. An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg1, Rg2, <b>Rg-1M and Rg-OTOU-1M</b>  |
| General Secondary                          | Cg1, Cg2, Cg3, Cg3C, Cg5, TssM, TssU, <b>Cg-1M, Cg-3M, Cg-OTOU-1M, Mp-1M</b>                                       |
| General Primary                            | Cp1, Cp2, Cp3, Cp4, Schedule A, CpLC <b>and Cp-1M</b>  |
| Lighting                                   | Ms2, Ms3, GL1, LED1, <b>Ls-1M</b>  |
| Other                                      | Mg1, Ds1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |

Effective for bills rendered for  
the 2025 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated October 10, 2024  
in Case No. U-21541

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission  
Dated February 8, 2024  
in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission  
Dated February 8, 2024  
in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |

Effective for bills rendered for  
the 2024 Plan year

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-21431

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The Maximum PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2023 Plan year

Issued under authority of the Michigan Public Service Commission dated July 27, 2023 in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the **Adjusted Maximum** Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The **Maximum** PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the **Adjusted Maximum** PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2023 Plan year

Issued under authority of the Michigan Public Service Commission dated July 27, 2023 in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |

Effective for bills rendered for  
the 2023 Plan year

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |

Effective for bills rendered for the 2023 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

For self-implementing  
in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |

Effective for bills rendered for the 2023 Plan year  
Issued under authority of the Section 6j(9) of 1982 PA304  
For self-implementing in Case No. U-21265

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2022 Plan year

Issued under authority of the Michigan Public Service Commission dated April 14, 2022 and July 27, 2022 in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for  
the 2022 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 14, 2022 and July 27, 2022  
in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for  
the 2022 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 14, 2022 and July 27, 2022  
in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2022 Plan year

Issued under authority of the Michigan Public Service Commission dated April 14, 2022 in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |

Effective for bills rendered for the 2022 Plan year

Issued under authority of the Michigan Public Service Commission dated April 14, 2022 in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2022 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |

Effective for bills rendered for  
the 2022 Plan year

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-21056

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

Effective for bills rendered for the 2021 Plan year

Issued under authority of the Michigan Public Service Commission Dated March 19, 2021 & July 27, 2021 in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU  |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC   |
| Lighting                                   | Ms2, Ms3, GL1, LED1  |
| Other                                      | Mg 1, DS 1   |
| ERER 1, ERER 3                             |  |
| 100% Renewable power                       | No adjustment for PSCR   |
| 50% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 50% of the kWh for the billing period. |
| 25% Renewable power                        | PSCR factor applicable to rate schedule customer is served under applied to 75% of the kWh for the billing period. |
| ERER 2                                     |  |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.  |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas   |

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>   |
|--|--|
| Residential                                | Rg 1 and Rg 2  |

Effective for bills rendered for the 2021 Plan year

Issued under authority of the Michigan Public Service Commission Dated March 19, 2021 in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for  
the 2021 Plan year

Issued under authority of the  
Michigan Public Service Commission  
Dated March 19, 2021  
in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

Effective for bills rendered for the 2021 Plan year

Issued under authority of the Michigan Public Service Commission Dated March 19, 2021 in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |

Effective for bills rendered for the 2021 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for the 2021 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-20808

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power. An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Michigan Public Service Commission dated April 15, 2020 in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

Effective for bills rendered for  
the 2020 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 15, 2020  
in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for  
the 2020 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 15, 2020  
in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Michigan Public Service Commission dated April 15, 2020 in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-20533

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

Issued under authority of the  
Michigan Public Service Commission  
dated March 21, 2019  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |

Issued under authority of the  
Michigan Public Service Commission  
dated March 21, 2019  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |

Effective for bills rendered for  
the 2019 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated March 21, 2019  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |

Filed DBR

Effective for bills rendered for  
the 2019 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated March 21, 2019  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |

Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-20227

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |

Issued under authority of the  
Michigan Public Service Commission  
dated August 18, 2018  
in Case No. U-18408

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-18408

**POWER SUPPLY COST RECOVERY**

PSCR FACTORS

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-18408

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |
| ERER 2                                     |   |
| Kilowatt-hour in excess of nominated block | PSCR factor applicable to rate schedule customer is served under.   |
| Customer Generating System                 | CGS Category 1, CGS Category 2, CGS Biogas  |

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

the 2017 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 13, 2017  
in Case No. U-18149

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

**POWER SUPPLY COST RECOVERY**

**PSCR FACTORS**

All rates for metered electric service shall include an amount up to the Power Supply Cost Recovery (PSCR) Factor for the specified billing period as set forth below. The PSCR Factor includes an increase or decrease of 0.0104 mills per kWh for each full 0.01 mill increase or decrease in the projected annual power supply costs above or below a cost base of 45.47 mills per kWh, rounded to the nearest one-hundredth of a mill per kWh. The projected power supply costs per kWh shall equal the total projected annual net power cost divided by the projected annual net system energy requirements. Net system energy requirements shall be the sum of net generation and net purchased and interchange power.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that month and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative.

The PSCR Factor shall be applicable to all Power Supply charges for the following Rate Schedules:

| <u>Class of Service</u>                    | <u>Rate Schedule No.</u>  |
|--|---|
| Residential                                | Rg 1 and Rg 2   |
| General Secondary                          | Cg 1, Cg 2, Cg 3, Cg3C, Cg 5, TssM and TssU   |
| General Primary                            | Cp 1, Cp 2, Cp 3, Cp 4, Schedule A & Cp LC  |
| Lighting                                   | Ms2, Ms3, GL1, LED1   |
| Other                                      | Mg 1, DS 1  |
| ERER 1, ERER 3                             |   |
| 100% Renewable power                       | No adjustment for PSCR  |
| 50% Renewable power                        | (1-.50) x PSCR factor applicable to rate schedule customer is served under. Customer pays 50% of PSCR factor. |
| 25% Renewable power                        | (1-.25) x PSCR factor applicable to rate schedule customer is served under. Customer pays 75% of PSCR factor. |

**POWER SUPPLY COST RECOVERY**  
(Continued from Sheet No. D-3.00)

ADJUSTED MAXIMUM PSCR FACTORS

The Maximum PSCR Factor is subject to adjustment. The Adjusted Maximum PSCR Factor is calculated based upon changes to the PSCR Plan’s forecasted NYMEX Price for the specified billing period as set forth in the table below. The Adjusted Maximum PSCR Factors are the maximum PSCR Factors the Company may charge. The actual PSCR factor charged in any month may be less than the Adjusted Maximum PSCR Factor.

No less than fifteen days before the beginning of each month, the Company shall file with the Michigan Public Service Commission a worksheet reflective of the calculation below and an updated tariff sheet reflecting the adjustment.

ADJUSTMENT MECHANISM (SAMPLE)

|   |           |
|---|-----------|
| Base PSCR Factor from Plan (WEPCO Rate Zone) \$/MWh         | \$7.55    |
| Jan-Dec NYMEX Average Forecast \$/Dth (X)                   | \$3.70    |
| Jan-Dec NYMEX Average from Plan \$/Dth (X <sub>plan</sub> ) | \$3.80    |
| Difference  | (\$0.10)  |
| Adjusted Maximum PSCR Factor \$/kWh                         | \$0.00755 |

DEFINITIONS:

NYMEX Increase = (X – X<sub>plan</sub>)

X = the average NYMEX price (\$/Dth) for the remaining months of the PSCR plan year averaged over the first five trading days of the month prior to implementation of the proposed PSCR factor.

X<sub>plan</sub> = NYMEX average price for the remaining months of the PSCR plan as incorporated into the current year PSCR Plan.

**POWER SUPPLY COST RECOVERY**  
 (Continued from Sheet No. D-3.00)

ADJUSTED MAXIMUM PSCR FACTORS

The Maximum PSCR Factor is subject to adjustment. The Adjusted Maximum PSCR Factor is calculated based upon changes to the PSCR Plan’s forecasted NYMEX Price for the specified billing period as set forth in the table below. The Adjusted Maximum PSCR Factors are the maximum PSCR Factors the Company may charge. The actual PSCR factor charged in any month may be less than the Adjusted Maximum PSCR Factor.

No less than fifteen days before the beginning of each month, the Company shall file with the Michigan Public Service Commission a worksheet reflective of the calculation below and an updated tariff sheet reflecting the adjustment.

ADJUSTMENT MECHANISM (SAMPLE)

|   |                  |

**POWER SUPPLY COST RECOVERY**  
 (Continued From Sheet No. **D-3.01**)

ANNUAL RECONCILIATION

All power supply revenues received by the Company, whether included in base rates or collected pursuant to a PSCR clause, shall be subject to annual reconciliation with the cost of power supply. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j(12) to (18) of 1939 PA 304, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any PSCR clause in existence during the period being reconciled.

MONTHLY REPORTS

Not more than 45 days following the last day of each month in which a PSCR Factor has been applied to customer's bills, the Company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the Company and the cost of power supply.

ANNUAL RECONCILIATION

All power supply revenues received by the Company, whether included in base rates or collected pursuant to a PSCR clause, shall be subject to annual reconciliation with the cost of power supply. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j(12) to (18) of 1939 PA 304, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any PSCR clause in existence during the period being reconciled.

MONTHLY REPORTS

Not more than 45 days following the last day of each month in which a PSCR Factor has been applied to customer's bills, the Company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the Company and the cost of power supply.

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Michigan Public Service Commission dated April 15, 2020 in Case No. U-20533

**POWER SUPPLY COST RECOVERY**  
**(Continued From Sheet No. D-3.00)**

ANNUAL RECONCILIATION

All power supply revenues received by the Company, whether included in base rates or collected pursuant to a PSCR clause, shall be subject to annual reconciliation with the cost of power supply. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j(12) to (18) of 1939 PA 304, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any PSCR clause in existence during the period being reconciled.

MONTHLY REPORTS

Not more than 45 days following the last day of each month in which a PSCR Factor has been applied to customer's bills, the Company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the Company and the cost of power supply.

**POWER SUPPLY COST RECOVERY**  
**(Continued From Sheet No. D-3.00)**

ANNUAL RECONCILIATION

All power supply revenues received by the Company, whether included in base rates or collected pursuant to a PSCR clause, shall be subject to annual reconciliation with the cost of power supply. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j(12) to (18) of 1939 PA 304, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any PSCR clause in existence during the period being reconciled.

MONTHLY REPORTS

Not more than 45 days following the last day of each month in which a PSCR Factor has been applied to customer's bills, the Company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the Company and the cost of power supply.

VOLUNTARY GREEN PRICING RATE SCHEDULES

A customer electing a participation level of 50% or 100% under the ERER1 or ERER3 rate schedules is exempt from the Power Supply Renewable Energy Surcharge. A customer electing a participation level of 25% under the ERER1 or ERER3 rate schedules is subject to the Power Supply Renewable Energy Surcharge above, not prorated, consistent with the rate schedule under which the customer is served. A customer participating on the ERER2 rate schedule is exempt from the Power Supply Renewable Energy Surcharge for each billing period in which the customer's nominated block represents at least 50% of the customer's total kWh consumption for the billing period. If a customer's nominated block represents less than 50% of the customer's total kWh consumption for the billing period, the customer is subject to the Power Supply Renewable Energy Surcharge above, not prorated, consistent with the rate schedule under which the customer is served.

Issued under authority of the  
Michigan Public Service Commission  
dated May 30, 2018  
in Case No. U-20110

**RESIDENTIAL FULL REQUIREMENTS OR RETAIL ACCESS SERVICE RATE Rg1**

AVAILABILITY

To customers contracting for residential full requirements or retail access service for periods of one year or more for separately metered residential dwelling units including those in residences, summer cottages, and apartment buildings.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase or combination single and three-phase service.

RATE

Power Supply Charges: These charges are applicable to Full Requirements service.

|                    | <u>Capacity</u> | <u>Non-Capacity</u> | <u>Total</u>      |
|--------------------|-----------------|---------------------|-------------------|
| Non-Space heating: | \$0.04251       | \$0.04748           | \$0.08999 per kWh |

For customers with permanently installed electric space heating equipment which is the primary source of space heating, the following rate shall apply during the billing months of November through June:

|                | <u>Capacity</u> | <u>Non-Capacity</u> | <u>Total</u>                                  |
|----------------|-----------------|---------------------|---|
| Space heating: | \$0.04251       | \$0.04748           | \$0.08999 per kWh first 500 kWh per month     |
|                | \$0.04251       | \$0.04498           | \$0.08749 per kWh excess of 500 kWh per month |

Delivery Charges: These charges are applicable to Full Requirements and Retail Access service.

|                      |   |
|----------------------|---|
| Facilities Charge:   | per day per standard meter or service connection      |
|                      | \$0.31582 single-phase                                |
|                      | \$0.47373 three-phase                                 |
| Distribution Charge: | \$0.04772 per kWh                                     |
| Excess Meter Charge: | \$0.03288 per day per standard meter in excess of one |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, and the Excess Meter Charge, if applicable.

PAYMENT: This rate is net.

LATE PAYMENT CHARGE

The late payment charge is 1.5%, not compounded, of the portion of the bill, net of taxes, that is delinquent. The late payment charge shall not apply to customers whose payments are made by the Department of Human Services or who are participating in a shut off protection program as described in the Consumer Standards and Billing Practices for Electric Residential Service (R460.101-460.169).

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the Rg1 rate schedule may contract for residential retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Additionally, retail access customers shall pay the Capacity Power Supply Charges above, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer. There is a \$2.79452 per day charge for an interval demand meter or service connection if applicable. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

**RESIDENTIAL FULL REQUIREMENTS SERVICE TIME-OF-USE RATE Rg2**

AVAILABILITY

To residential customers contracting for full requirements service on a voluntary basis for electric service for domestic purposes for a period of one year or more. Customers are required to remain on the selected on-peak period for at least one year.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 Hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Delivery and Power Supply Charges:

|  |  |           |   |
|--|--|-----------|---|
| Facilities Charge:                     | per day per standard meter or service connection |           |   |
|  |  | \$0.31582 | single-phase                                |
|  |  | \$0.47373 | three-phase                                 |
| Distribution and Power Supply Charges: |  | \$0.27710 | per kWh On-peak (a)                         |
|  |  | \$0.05818 | per kWh Off-peak (b)                        |
| Excess Meter Charge:                   |  | \$0.03288 | per day per standard meter in excess of one |

Delivery and Power Supply Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

- (a) Residential on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The four on-peak periods available are: 7:00 a.m. to 7:00 p.m., 8:00 a.m. to 8:00 p.m., 9:00 a.m. to 9:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (b) Residential off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, and the Excess Meter Charge, if applicable.

PAYMENT: This rate is net.

LATE PAYMENT CHARGE

The late payment charge is 1.5%, not compounded, of the portion of the bill, net of taxes, that is delinquent. The late payment charge shall not apply to customers whose payments are made by the Department of Human Services or who are participating in a shut off protection program as described in the Consumer Standards and Billing Practices for Electric Residential Service (R460.101-460.169).

**RESIDENTIAL SERVICE TIME-OF-USE RATES Rg1 & Rg2**  
**(Continued from Sheet No. D-8.00)**

CONDITIONS OF DELIVERY (Cont.)

10. Temporary service is available under this rate upon the payment in advance of the Company's estimated cost of providing and installing all facilities required especially for such service, plus the estimated cost of removing such facilities, less the estimated salvage value of the property removed. In no case shall the net payment by the customer be less than \$25.00.
11. Energy furnished under rates for residential service shall not be resold.
12. The Company shall not be required to provide service as standby for other types of energy or fuel.
13. Renewable energy systems under schedule Rg2 shall utilize electricity as the sole supplemental source of energy. The installation must be approved by the local code authority.
14. Energy storage systems under schedule Rg2 must be adequate to supply all the energy requirements for the purpose intended and shall utilize electricity as the sole source of energy. The installation must be approved by the local code authority.
15. Customers who wish to operate electric generation equipment in parallel with the Company's system shall abide by the conditions of purchase for rate schedules Cgs Category 1, Cgs Category 2, Cgs Large, Cgs Biogas and CGS-PV.

**GENERAL SECONDARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE RATE Cg1**

AVAILABILITY

To customers contracting for secondary full requirements or retail access service for one year or more for general commercial, industrial, or governmental purposes.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges: These charges are applicable to Full Requirements service.

| <u>Capacity</u> | <u>Non-Capacity</u> | <u>Total</u>      |
|-----------------|---------------------|-------------------|
| \$0.04173       | \$0.04798           | \$0.08971 per kWh |

Delivery Charges: These charges are applicable to Full Requirements and Retail Access service.

|                      |   |
|----------------------|---|
| Facilities Charge:   | per day per standard meter or service connection      |
|                      | \$0.49315 single-phase                                |
|                      | \$0.96986 three-phase                                 |
| Distribution Charge: | \$0.05443 per kWh                                     |
| Excess Meter Charge: | \$0.03288 per day per standard meter in excess of one |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

For regular service the monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge, if applicable. For auxiliary service the monthly minimum charge shall be as provided in conditions of delivery. See paragraph 6, Conditions of Delivery.

LATE PAYMENT CHARGE

A 1.5% per month late charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the Cg1 rate schedule may contract for secondary retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Additionally, retail access customers shall pay the Capacity Power Supply Charge above, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer. There is a \$2.79452 per day charge for an interval demand meter or service connection if applicable. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

CONDITIONS OF DELIVERY

See Sheet No. D-22.00. In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

|----------------------|---|
| Facilities Charge:   | per day per standard meter or service connection      |
|                      | \$0.49315 single-phase                                |
|                      | \$0.96986 three-phase                                 |
| Distribution Charge: | \$0.05443 per kWh                                     |
| Excess Meter Charge: | \$0.03288 per day per standard meter in excess of one |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge, if applicable.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will generally furnish single-phase, 60 hertz service at 120/240 volts. Three-phase or combination single-phase and three-phase service will be furnished in accordance with the Electric Service Rules and Regulations of the Company.
2. When lighting service is furnished through one meter and power service through another, the registrations of the two meters will be added for billing purposes if the meters are installed at the same location. Where separately metered service is furnished for emergency exit lighting, fire alarm system or fire pump purposes the energy used will be accumulated and billed with the regular service, provided that it is furnished from the service connection which supplies regular service.
3. Service under this rate is for general use in commercial, industrial, and governmental establishments, including any group of three or more dwelling units which are served through one meter and comply with the Electric Service Rules and Regulations governing resale. When farming and commercial or industrial operations are combined, the applicable rate shall be determined by the predominant use of service.
4. At the request of a customer, service will be furnished under this rate at the available primary voltage by special arrangement under which the customer will agree to furnish, own and maintain at his expense all apparatus and material necessary for proper utilization of service at such voltage. In such cases the service will be metered at the supply voltage and kilowatt-hours registered will be reduced by 3%.

2. When lighting service is furnished through one meter and power service through another, the registrations of the two meters will be added for billing purposes if the meters are installed at the same location. Where separately metered service is furnished for emergency exit lighting, fire alarm system or fire pump purposes the energy used will be accumulated and billed with the regular service, provided that it is furnished from the service connection which supplies regular service.
3. Service under this rate is for general use in commercial, industrial, and governmental establishments, including any group of three or more dwelling units which are served through one meter and comply with the Electric Service Rules and Regulations governing resale. When farming and commercial or industrial operations are combined, the applicable rate shall be determined by the predominant use of service.
4. At the request of a customer, service will be furnished under this rate at the available primary voltage by special arrangement under which the customer will agree to furnish, own and maintain at his expense all apparatus and material necessary for proper utilization of service at such voltage. In such cases the service will be metered at the supply voltage and kilowatt-hours registered will be reduced by 3%.

**GENERAL SECONDARY TOTAL ELECTRIC FULL REQUIREMENTS SERVICE Cg2**

AVAILABILITY

To customers contracting for secondary full requirements service for one year or more for general commercial, industrial, or governmental purposes where electricity is used as the sole source of energy for space heating, water heating and all other uses. Service under this schedule is only available to premises currently served under this schedule. This schedule has been closed to new installations since February 5, 1985.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges: \$0.08121 per kWh

Delivery Charges:

Facilities Charge: per day per standard meter or service connection  
\$0.49315 single-phase  
\$0.96986 three-phase  
Distribution Charge: \$0.05443 per kWh  
Excess Meter Charge: \$0.03288 per day per standard meter in excess of one

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy *Waste Reduction* Surcharge, and the Excess Meter Charge, if applicable.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will generally furnish single-phase, 60 hertz service at 120/240 volts. Three-phase or combination single-phase and three-phase service will be furnished in accordance with the Electric Service Rules and Regulations of the Company.
2. When lighting service is furnished through one meter and power service through another, the registrations of the two meters will be added for billing purposes if the meters are installed at the same location. Where separately metered service is furnished for emergency exit lighting, fire alarm system or fire pump purposes the energy used will be accumulated and billed with the regular service, provided that it is furnished from the service connection which supplies regular service.
3. Service under this rate is for general use in commercial, industrial, and governmental establishments, including any group of three or more dwelling units which are served through one meter and comply with the Electric Service Rules and Regulations governing resale. When farming and commercial or industrial operations are combined, the applicable rate shall be determined by the predominant use of service.
4. At the request of a customer, service will be furnished under this rate at the available primary voltage by special arrangement under which the customer will agree to furnish, own and maintain at his expense all apparatus and material necessary for proper utilization of service at such voltage. In such cases the service will be metered at the supply voltage and kilowatthours registered will be reduced by 3%.

**GENERAL SECONDARY TOTAL ELECTRIC FULL REQUIREMENTS SERVICE Cg2**  
**(Continued From Sheet No. D-13.00)**

CONDITIONS OF DELIVERY (Cont.)

5. Energy furnished under this rate shall not be resold except as provided in the Electric Service Rules and Regulations of the Company.
6. This rate applies when the Company furnishes the entire electric service requirements of a customer. The Company will, however, furnish auxiliary service hereunder to a customer who operates his power plant. If the power plant is so operated that all or any portion of the customer's load can be served either from the power plant or from the Company's system, the customer shall contract for a demand mutually agreed upon, but in no case less than 5 kW. The customer's demand shall be metered, and his net monthly bill for auxiliary service shall not be less than \$2.50 per kW of the highest measured demand in the twelve-month period ending with the current month, or the minimum demand specified in the contract, whichever is the greater.
7. Customers who wish to operate electric generation equipment in parallel with the Company's system shall abide by the conditions of purchase for rate schedules Cgs Category 1, Cgs Category 2, Cgs Large, Cgs Biogas and CGS-PV.
8. The Company shall not be required to provide service facilities except as specified in paragraph 6 for any customer which are substantially in excess of that required for the customer's regular use.
9. Except as provided by contract entered into pursuant to paragraph 6 of these conditions, the Company shall not be required to provide service as standby for other types of energy or fuel.
10. A customer who regularly uses service for periods of less than one year may pay the monthly minimum charge during the months in which he does not require service or, upon his request, service will be disconnected and the customer will pay a disconnection and reconnection charge of \$25.00 if the Company's service facilities are not removed.

**GENERAL SECONDARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE TIME-OF-USE RATE Cg3**

AVAILABILITY

For customers contracting for secondary full requirements or retail access electric service for one year or more for general commercial, industrial or governmental purposes, and whose energy consumption is equal to or greater than 30,000 kWh per month, for three consecutive months. The customer must remain on this rate classification for 12 months before becoming eligible to transfer to a different general secondary rate. If the customer transfers from the Cg3 rate to a different rate, the customer must wait 12 months before they can transfer back to the Cg3 rate. This rate is available to customers previously served under the Cg3 rate schedule only after they have taken service for at least a 12-month period under another of the Company’s rate schedules.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges: These charges are applicable to Full Requirements service.

Capacity Demand Charge: \$16.564 per kW Measured On-peak Demand  
Non-Capacity Energy Charge:

\$0.05833 per kWh On-Peak (a)  
\$0.03807 per kWh Off-peak (b)

Delivery Charges: These charges are applicable to Full Requirements and Retail Access service.

Facilities Charge: \$2.79452 per day per standard meter or service connection  
Demand Charge: \$5.592 per kW of Customer Maximum Demand  
Distribution Charge: \$0.01221 per kWh On-peak (a)  
\$0.01221 per kWh Off-peak (b)  
Excess Meter Charge: \$0.13151 per day per standard meter in excess of one

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

- (a) General Secondary on-peak usage is the energy in kilowatt-hours delivered between 9:00 a.m. and 9:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Years’ Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (b) General Secondary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, the Excess Meter Charge, and the Customer Maximum Demand Charge. Auxiliary service shall be as provided in Paragraph 6, Conditions of Delivery, Sheet D-22.00.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the Cg3 rate schedule may contract for secondary retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Additionally, retail access customers shall pay the Power Supply Capacity Demand Charge above, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

CONDITIONS OF DELIVERY

See Sheet No. D-22.00. In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

in Case No. U-18061

**GENERAL SECONDARY FULL REQUIREMENTS SERVICE – EXPERIMENTAL CURTAILABLE RATE Cg3C**

AVAILABILITY

To customers who would otherwise qualify for General Secondary Service – Time-of-Use Rate Schedule Cg3, and contract for a minimum of 100 kilowatts of curtailable load. The Company reserves the right to limit participation to 10 customers.

RATE

Power Supply Charges:

|                             |           |                                |
|-----------------------------|-----------|--------------------------------|
| Capacity Demand Charge:     | \$16.564  | per kW Measured On-peak Demand |
| Curtailable Demand Credit   | \$0.02020 | per kW per on-peak hour of use |
| Non-Capacity Energy Charge: |           |                                |
|                             | \$0.05833 | per kWh On-Peak (a)            |
|                             | \$0.03807 | per kWh Off-peak (b)           |

The curtailable credit per kilowatt of curtailable demand for the billing period shall be determined by application of the following formula:

$$(A*B)*\frac{C}{D} \text{ where}$$

- A = credit per kW of curtailable demand per on-peak hour-of-use
- B = actual on-peak hours-of-use, determined by dividing the on-peak kWh for the billing period by the measured demand
- C = 255 hours
- D = on-peak hours in the billing period minus actual hours of capacity curtailment in the billing period

If the curtailable load is on isolated and separately metered circuits, it will be treated as a separate service to the customer.

Delivery Charge:

|                      |           |  |
|----------------------|-----------|--|
| Facilities Charge:   | \$2.79452 | per day per standard meter or service connection |
| Demand Charge:       | \$5.592   | per kW of customer maximum demand                |
| Distribution Charge: | \$0.01221 | per kWh On-peak (a)                              |
|                      | \$0.01221 | per kWh Off-peak (b)                             |
| Excess Meter Charge: | \$0.13151 | per day per standard meter in excess of one      |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

- (a) General Secondary on-peak energy usage is the energy in kilowatt-hours delivered between 9:00 a.m. and 9:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Years' Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (b) General Secondary off-peak energy usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, the Excess Meter Charge, and the Customer Maximum Demand Charge. Auxiliary service shall be as provided in Paragraph 6, Conditions of Delivery, Sheet D-22.00.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

**GENERAL SECONDARY FULL REQUIREMENTS SERVICE – EXPERIMENTAL CURTAILABLE RATE Cg3C  
(Continued from Sheet No. D-17.00)**

**DETERMINATION OF DEMAND**

1. Measured demand shall be the average rate at which energy is used for any period of fifteen consecutive minutes as ascertained by a wattmeter and an associated tape recorder or other standard measuring device.
2. Measured on-peak demand shall be the maximum measured demand established during on-peak hours within the billing period. Unless specified to the contrary in writing by six months prior written notice to the customer, provided the on-peak period does not exceed twelve hours per day, on-peak hours shall be from 9:00 a.m. to 9:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
3. Customer maximum demand shall be the maximum measured demand, which occurs during either the on or off-peak period, in the current or preceding 11 billing periods.
4. Contract Firm Demand. Customers served under this rate must enter into a contract that specifies a contract firm demand level. The customer may renominate a contract firm demand once during a calendar year subject to approval by the Company. In the event of a capacity curtailment, as defined in paragraph (9) of the Conditions of Delivery, within an hour of being notified to curtail by the Company, the customer must curtail demand to the contract firm demand level, and remain at or below the contract firm demand until the customer is notified that the curtailment period has ended. The customer shall not be required to curtail its demand to its contract firm demand level for a curtailment period for system energy economy reasons as described in paragraph (9) of the Conditions of Delivery.
5. Curtailable Demand. If the measured on-peak demand is greater than the contract firm demand, then the curtailable demand is equal to the difference between the measured on-peak demand and the contract firm demand. If the measured on-peak demand is less than or equal to the contract firm demand, then the curtailable demand is zero.

**CONDITIONS OF DELIVERY**

1. General Secondary – Time-of-Use, Rate Schedule No. Cg 3, Conditions of Delivery apply.
2. A customer may make a one-time election to take service under this rate schedule for a trial period of twelve consecutive months. The customer must execute a contract which specifies that the customer will notify the Company at least 30 days before trial period ends of whether the customer will continue the curtailable service contract for a minimum of three more years. The curtailable service contract will contain a provision which, absent notice, will automatically extend the contract for one year from each anniversary date.
3. If the customer terminates the contract described above prior to the date of termination as set forth in said contract, the customer will pay to the Company a cancellation charge equal to the sum of the curtailable credits as shown on the customer's bills for the most recent 12 month period. The cancellation charge will not apply if the customer executes a contract to take service, effective the day following termination of their existing non-firm contract, under another of the Company's non-firm rate schedules which has a 3 year rolling contract term, provided that there is no increase in on-peak firm demand for the duration of the current contract term which is defined as the remaining term as of the next anniversary date of the contract. For example, if the contract has a three year term with an anniversary date of April 30, 2006, and the change is requested prior to April 30, 2006, then no additional firm load may be added until May 1, 2009. After that date, changes may be made only in accordance with tariff requirements. At the sole discretion of the Company, other customer requests to waive this cancellation fee may be considered and granted, but only under extraordinary circumstances such as a systemic and sustained change in customer production levels.
4. If the customer's curtailment demand is less than 100 kW for any three months of a consecutive twelve month period, the Company may suspend service under this rate and thereafter serve the customer under the appropriate rate.

dated December 9, 2016  
in Case No. U-18061

**GENERAL SECONDARY FULL REQUIREMENTS SERVICE – EXPERIMENTAL CURTAILABLE RATE Cg3C  
(Continued from Sheet No. D-18.00)**

CONDITIONS OF DELIVERY (Cont.)

5. For purposes of determining the customer’s eligibility for this rate, the customer’s curtailable demand will be the difference between the customer’s maximum measured on-peak demand during the last consecutive twelve month period and the customer’s proposed contract firm demand. Curtailable service under this rate may be refused if the Company believes the load to be curtailed will not provide adequate load reduction when the Company desires curtailment. The Company will notify the customer of the Company’s refusal to provide service under this rate and the Company will inform the customer of the customer’s right to ask for a commission review of the Company’s refusal of service.
6. Where needed, the customer shall supply a source of electric service at 120 volts with sufficient capacity to operate the curtailable rate metering system.
7. The Company will install all apparatus and materials necessary for the measurement of the curtailment of load. The customer’s circuits are to be arranged so that none of the curtailable load can be transferred to service furnished under any other rate.
8. Service under this rate shall be subject to curtailment at the sole discretion of the Company. The sum of capacity curtailments and system energy economy constraints will not exceed 300 hours of curtailment in any calendar year. The Company will limit the duration of any one curtailment to eight hours between the hours of 8:00 a.m. and 10:00 p.m. prevailing time. Brief periods of curtailment (periods that are less than four hours duration) shall be regarded as having lasted four hours, for purposes of limiting the total annual hours to 300. Interruptions due to lightning, wind, and other physical causes other than intentional curtailment by the Company shall not be considered in determining the hours of curtailment.
9. Service under this rate shall be subject to: a) curtailments due to capacity constraints, during which the customer must curtail load or be charged a penalty, and b) system energy economy constraints, during which the customer may elect to either drop load or pay the additional charge for energy use.

Capacity Curtailments: The customer shall receive a one hour notice of capacity curtailments. The customer shall be charged a penalty for each occurrence in which the customer fails to curtail load to or below the contract firm demand level during the entire period of a capacity curtailment. During the twelve month trial period, the penalty shall be fifteen dollars (\$15) per kilowatt of maximum measured demand above the contract firm demand recorded during a capacity curtailment period, for up to two failures to curtail within said trial period. Beginning with the third failure to curtail during the trial period, and for all failures to curtail which occur after the expiration of the trial period, the penalty shall be thirty-five dollars (\$35) per kilowatt of maximum measured demand recorded during a capacity curtailment period which is above the customer’s contract firm demand level. The Company may suspend service under this rate and thereafter serve the customer under the appropriate rate if the customer fails to curtail service twice in any consecutive twelve month period.

System Energy Economy Constraints: The customer shall receive one hour notice of a system energy economy constraint which will include the projected system avoided costs for power plus 10% for the economy constraint period for all energy used above the contract firm demand level. An example of determination of the additional charge is shown below:

|   |          |
|---|----------|
| System Avoided Cost of Power Plus 10% per kWh | \$0.1200 |
| On-Peak Energy per kWh at Existing Rate       | \$0.0800 |
| Additional Charge per kWh                     | \$0.0400 |

dated December 9, 2016  
in Case No. U-18061

**SMALL SECONDARY FULL REQUIREMENTS SERVICE TIME-OF-USE RATE Cg5**

AVAILABILITY

Available, on a voluntary basis, for a period of one year or more, to customers contracting for secondary full requirements electric service for general commercial, industrial, governmental or farm purposes.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Delivery and Power Supply Charges:

|  |  |   |                                |
|--|--|---|--------------------------------|
| Facilities Charge:                     | per day per standard meter or service connection |   |                                |
|  | \$0.49315  | single-phase                                |                                |
|  | \$0.96986  | three-phase                                 |                                |
| Distribution and Power Supply Charges: |  |   |                                |
|  | <u>Capacity</u>                                  | <u>Non-Capacity</u>                         | <u>Total</u>                   |
|  | \$0.12278  | \$0.15282                                   | \$0.27560 per kWh On-peak (a)  |
|  |  |   | \$0.06887 per kWh Off-peak (b) |
| Excess Meter Charge:                   | \$0.03288  | per day per standard meter in excess of one |                                |

Delivery and Power Supply Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

- (a) Small secondary on-peak energy usage is the energy in kilowatt-hours delivered between 9:00 a.m. and 9:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Years' Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (b) Small Secondary off-peak energy usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge. Auxiliary service shall be as provided in Paragraph 6, Conditions of Delivery, Sheet D-22.00.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

See Sheet No. D-22.00.

Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**GENERAL SECONDARY SERVICE RATES Cg 1, Cg 3, Cg 3C and Cg 5**

**CONDITIONS OF DELIVERY**

1. The Company will generally furnish single-phase, 60 hertz service at 120/240 volts. Three-phase or combination single-phase and three-phase service will be furnished in accordance with the Electric Service Rules and Regulations of the Company.
2. When lighting service is furnished through one meter and power service through another, the registrations of the two meters will be added for billing purposes if the meters are installed at the same location. Where separately metered service is furnished for emergency exit lighting, fire alarm system or fire pump purposes, the energy used will be accumulated and billed with the regular service provided that it is furnished from the service connection which supplies regular service. In such cases, the customer shall pay the fixed charge for each meter installed.
3. Service under this rate is for general use in commercial, industrial, and governmental establishments, including any group of three or more dwelling units which are served through one meter and comply with the Electric Service Rules and Regulations of the Company governing resale. When farming and commercial or industrial operations are combined, the applicable rate shall be determined by the predominant use of service.
4. At the request of a customer, service will be furnished under this rate at the available primary voltage by special arrangement under which the customer will agree to furnish, own and maintain at his expense all apparatus and material necessary for proper utilization of service at such voltage. In such cases the service will be metered at the supply voltage and kilowatt hours registered will be reduced 3% and the measured demand will be reduced 2-1/2% for billing purposes.
5. Temporary service is available under this rate upon the payment in advance of the Company's estimated cost of providing and installing all facilities required especially for such service, plus the estimated cost of removing such facilities, less the estimated salvage value of the property removed. In no case shall the net payment by the customer be less than \$25.00.
6. This rate applies when the Company furnishes the entire electric service requirements of a customer. The Company will, however, furnish auxiliary service hereunder to a customer who operates his power plant. If the power plant is so operated that all or any portion of the customer's load can be served either from the power plant or from the Company's system, the customer shall contract for a demand mutually agreed upon, but in no case less than 5 kW. The customer's demand shall be metered, and his net monthly bill for auxiliary service shall not be less than \$2.50 per kW of the highest measured demand in the twelve-month period ending with the current month, or the minimum demand specified in the contract, whichever is the greater.
7. Customers who wish to operate electric generation equipment in parallel with the Company's system shall abide by the conditions of purchase for rate schedules Cgs Category 1, Cgs Category 2, Cgs Large, Cgs Biogas and CGS PV.
8. The Company shall not be required to provide service facilities except as specified in paragraph 6 for any customer which are substantially in excess of that required for the customer's regular use.
9. Energy furnished under this rate shall not be resold, except as provided in the Rules and Regulations of the Company.
10. Except as provided by contract entered into pursuant to paragraph 6 of these conditions, the Company shall not be required to provide service as standby for other types of energy or fuel.
11. A customer who regularly uses service for periods of less than one year may pay the monthly minimum charge during the months in which he does not require service or, upon his request, service will be disconnected and the customer will pay a disconnection and reconnection charge of \$25.00 if the Company's service facilities are not removed.

| Power Factor Demand Charge: per kW of Power Factor Demand | \$18.204   | \$17.907                     | \$12.184   |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

For Determination of Demand, see Sheet No. D-25.00.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) General primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the charge for 300 kW of measured on-peak demand plus the charge for 300 kW of customer maximum demand.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

| Power Factor Demand Charge: per kW of Power Factor Demand | \$18.204   | \$17.907                     | \$12.184   |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

For Determination of Demand, see Sheet No. D-25.00.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) General primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the charge for 300 kW of measured on-peak demand plus the charge for 300 kW of customer maximum demand.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

dated December 9, 2016  
in Case No. U-18061

**GENERAL PRIMARY SERVICE TIME-OF-USE RATE Cp1**  
**(Continued from Sheet No. D-16.00)**

**CONDITIONS OF DELIVERY**

1. The Company will furnish three-phase, 60 hertz power service at a primary voltage as specified by the Company, but in no case less than approximately 2,400 volts, at one point on the premises of the customer nearest the lines of the Company. The supply voltage will depend upon the location of the customer and the size and characteristics of his load. At the option of the Company, a customer receiving service under this rate at more than one voltage on the same premises may be billed on a conjunctive basis if the customer was required to change voltage due to the limitations of the Company's distribution system. If the customer elects to serve additional load at a higher voltage and the Company has distribution facilities at the existing voltage adequate to serve the additional load, then the Company shall bill the customer separately at each voltage.
2. Service under this rate is primarily for customers who use it in manufacturing and industrial operations. Any customer receiving service under this rate who requires lighting regulation shall furnish, install, operate and maintain the necessary regulating equipment at his expense.
3. The customer shall, at his expense, install all apparatus and materials necessary for the proper utilization of the power furnished by the Company. All such apparatus shall conform to the Company's rules and regulations pertaining to primary substation installation, and shall at all times be kept suitable for operation by the power furnished.
4. If the customer's off-peak demand exceeds the on-peak demand, to the extent that the installation of additional facilities are required, then the customer shall pay for such additional facilities.
5. Customers who wish to operate electric generation equipment in parallel with the Company's system shall abide by the conditions of purchase for rate schedules Cgs Category 1, Cgs Category 2, Cgs Large, Cgs Biogas and CGS-PV.
6. Should the customer, because of fire, strike, demonstrations, casualties, civil or military authority, insurrection or riot, the actions of the elements, or any other like causes beyond his control, be prevented from utilizing the power service contracted for, the Company will waive the monthly minimum demand charge for such period; provided, however, that the period of time of such suspension of use of power shall be added to the period of the contract; and further, provided that the customer notifies the Company in writing within six days of his inability to use said power service, specifying reasons therefore.
7. The Company shall use reasonable diligence in furnishing an uninterrupted and regular supply of power, but it shall not be liable for interruptions, deficiencies, or imperfections in electric service provided under these rates except to the extent of a prorated reduction of the demand charge provided for herein.
8. Service under this rate shall be furnished only in accordance with the Electric Service Rules and Regulations of the Company.
9. Except as provided by contract entered into pursuant to Paragraph 5 of these conditions, the Company shall not be required to provide service as standby for other types of energy or fuel.
10. Energy furnished under this rate shall not be resold, except as provided in the Electric Services Rules and Regulations of the Company.

For Determination of Demand, see sheet No. D-25.00.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) General primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year’s Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the applicable Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the charge for 700 kilowatts of measured on-peak demand, plus the charge for 700 kW of customer maximum demand.

LATE PAYMENT CHARGE

A one and one half percent (1.5%) per month late payment charge will be applied to outstanding charges past due.

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements power service at approximately 2,400 volts or higher for periods of five years with a minimum 15 minute integrated demand of 1,000 kilowatts of interruptible load. Customers are required to remain on the selected on-peak period for at least one year.

|   | \$18.204         | \$17.907                     | \$12.184         |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

For Determination of Demand, see sheet No. D-25.00.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) General primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year’s Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

MINIMUM CHARGE

The monthly minimum charge shall be the applicable Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the charge for 700 kilowatts of measured on-peak demand, plus the charge for 700 kW of customer maximum demand.

LATE PAYMENT CHARGE

A one and one half percent (1.5%) per month late payment charge will be applied to outstanding charges past due.

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE INTERRUPTIBLE RATE Cp2**  
**(Continued from Sheet No. D-27.00)**

**CONDITIONS OF DELIVERY**

1. General Primary – Time-of-Use, Rate Schedule No. Cp1, Conditions of Delivery apply.
2. A customer taking service under this rate must execute a contract with a provision which, absent notice, will automatically extend the contract for five years from each anniversary date.
3. Interruptible service under this rate may be refused if the Company believes the load to be interrupted will not provide adequate load reduction when the Company desires interruption. The Company will notify the customer of the Company's refusal to provide service under this rate and the Company will inform the customer of the customer's right to ask for a commission review of the Company's refusal of service.
4. The customer shall, at his expense, install all apparatus and materials necessary for the proper utilization of the power furnished by the Company. All such apparatus shall conform to the Company's rules and regulations pertaining to primary substation installation and shall at all times be kept suitable for operation by the power furnished. The customer's circuits are to be arranged so that none of the interruptible load can be transferred to service furnished under any other rate.
5. Service under this rate shall be subject to interruption at the sole discretion of the Company, but interruptions will not be made for system energy economy reasons. There will be no more than 150 hours of interruption in a calendar year. Brief periods of interruption (periods that are less than four hours' duration) should be regarded as having lasted four hours, for purposes of limiting the total annual hours to 150. Interruptions due to lightning, wind, and other causes other than intentional interruptions by the Company shall not be considered in determining the hours of interruption or frequency.
6. The customer shall pay thirty-five dollars (\$35) per kilowatt for the 15-minute maximum measured demand recorded during each period of interruption of service ordered by the Company. The Company may suspend service under this rate if the customer uses service during periods of interruption and thereafter serve the customer under the appropriate rate.
7. The customer shall pay in advance of construction all costs estimated by the Company for facilities to serve the interruptible load.
8. The Company shall not be liable for any damages sustained by customer because of interruptions, deficiencies, or imperfections of electric service provided under this rate.
9. Interruptible service shall not be used as standby for any other forms of energy or fuel.

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE CURTAILABLE RATE Cp3**

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements power service at approximately 2,400 volts or higher with a minimum of 500 kilowatts of curtailable load. If the curtailable load is on isolated and separately metered circuits, it will be treated as a separate service to the customer. Customers are required to remain on the selected on-peak period for at least one year.

| <u>RATES:</u> (for service at primary voltages)           | ≤4,160       | >4,160 to               | ≥69,000      |
|---|--------------|-------------------------|--------------|
| <u>Power Supply Charges:</u>                              | <u>volts</u> | <u>&lt;69,000 volts</u> | <u>volts</u> |
| Capacity Demand Charge: per kW of Measured On-peak Demand | \$16.610     | \$16.295                | \$15.971     |
| Curtailable Demand Credit: per kW per on-peak hr of use   | \$0.0199     | \$0.0195                | \$0.0191     |
| Non-Capacity Energy Charge: per kWh                       |              |                         |              |
| On-peak (b)   | \$0.05805    | \$0.05674               | \$0.05561    |
| Off-peak (c)  | \$0.03789    | \$0.03703               | \$0.03630    |

The curtailable credit per kilowatt of curtailable demand for the billing period shall be determined by application of the following formula:

$$(A * B) * \frac{C}{D} \quad \text{where}$$

- A = credit per kW of curtailable demand per on-peak hour of use
- B = actual on-peak hours-of-use, determined by dividing the on-peak kWh for the billing period by the sum of the measured on-peak demand and power factor demand.
- C = 255 hours
- D = on-peak hours in the billing period minus actual hours of curtailment in the billing period

Delivery Charges:

|   |            |                             |            |

Effective for service rendered on and after July 1, 2018

Issued under authority of the Michigan Public Service Commission dated May 30, 2018 in Case No. U-20110

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE CURTAILABLE RATE Cp3**

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements power service at approximately 2,400 volts or higher with a minimum of 500 kilowatts of curtailable load. If the curtailable load is on isolated and separately metered circuits, it will be treated as a separate service to the customer. Customers are required to remain on the selected on-peak period for at least one year.

|  |                  |                         |                  |
|--|------------------|-------------------------|------------------|
| <b>RATES:</b> (for service at primary voltages)                  | ≤4,160           | >4,160 to               | ≥69,000          |
| <u>Power Supply Charges:</u>                                     | <u>volts</u>     | <u>&lt;69,000 volts</u> | <u>volts</u>     |
| <b>Capacity Demand Charge:</b> per kW of Measured On-peak Demand |                  |                         |                  |
|  | <b>\$16.610</b>  | <b>\$16.295</b>         | <b>\$15.971</b>  |
| <b>Curtailable Demand Credit:</b> per kW per on-peak hr of use   |                  |                         |                  |
|  | \$0.0199         | \$0.0195                | \$0.0191         |
| <b>Non-Capacity Energy Charge:</b> per kWh                       |                  |                         |                  |
| On-peak (b)  | <b>\$0.05805</b> | <b>\$0.05674</b>        | <b>\$0.05561</b> |
| Off-peak (c)   | <b>\$0.03789</b> | <b>\$0.03703</b>        | <b>\$0.03630</b> |

The curtailable credit per kilowatt of curtailable demand for the billing period shall be determined by application of the following formula:

$$(A * B) * \frac{C}{D} \quad \text{where}$$

- A = credit per kW of curtailable demand per on-peak hour of use
- B = actual on-peak hours-of-use, determined by dividing the on-peak kWh for the billing period by the sum of the measured on-peak demand and power factor demand.
- C = 255 hours
- D = on-peak hours in the billing period minus actual hours of curtailment in the billing period

Delivery Charges:

|   |            |                             |            |
|---|------------|-----------------------------|------------|
| Facilities Charge: per day                                | \$20.21918 | \$20.21918                  | \$20.21918 |
| Demand Charge: per kW of Customer Maximum Demand          | \$4.313    | \$4.231 OR<br>\$0.200(a)    | \$0        |
| Distribution Charge: per kWh                              |            |                             |            |
| On-peak (b)   | \$0.01203  | \$0.01180OR<br>\$0.00124(a) | \$0        |
| Off-peak (c)  | \$0.01203  | \$0.01180OR<br>\$0.00124(a) | \$0        |
| Power Factor Demand Charge: per kW of Power Factor Demand | \$18.204   | \$17.907                    | \$12.184   |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) General Primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

Effective for service rendered on and after January 1, 2017

Issued under authority of the Michigan Public Service Commission dated December 9, 2016 in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE CURTAILABLE RATE Cp3**  
**(Continued from Sheet No. D-29.00)**

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the charge for 300 kilowatts of measured on-peak demand, plus the charge for 300 kW of customer maximum demand.

LATE PAYMENT CHARGE

A one and one half percent (1.5%) per month Late Payment Charge will be applied to outstanding charges past due.

DETERMINATIONS OF DEMAND

Measured Demands:

- (a) Measured demand shall be the average rate at which energy is used for a period of 15 consecutive minutes as ascertained by a watt-hour meter and an associated electronic recorder or other standard measuring device.
- (b) Measured on-peak demand shall be the maximum measured demand established during on-peak hours within for the billing period. Unless specified to the contrary in writing by six months prior written notice to customer, provided the on-peak period does not exceed twelve hours per day, on-peak hours shall be either from 8:00 a.m. to 8:00-p.m. or from 10:00 a.m. to 10:00 p.m., as selected by the customer, prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) Measured off-peak demand shall be the maximum demand within the billing period which is established during off-peak hours for the billing period. Off-peak hours are those hours not designated as on-peak hours.

Customer Maximum Demand:

Customer maximum demand shall be the maximum measured demand which occurs during either the on or off-peak period, in the current or preceding 11 billing periods.

Power Factor Demand:

The distribution demand charges are based on a standard power factor of 85 percent. The customer's monthly Power Factor Demand is determined as follows:

- (a) For Power Factors at 85 %:  
Power Factor Demand = 0
- (b) For Power Factors below 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.65) (0.85 - Peak Power Factor)]
- (c) For Power Factors above 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.50) (0.85 - Peak Power Factor)]

The peak power factor shall be calculated from the kilowatt-hours "A", as obtained from the watt-hour meter, and the use of lagging kilovolt-ampere reactive hours "B", as obtained from a ratcheted reactive component meter, which are used during the same 15 minute period in which the maximum measured demand occurs by the following formula:

$$\text{Peak Power factor} = A \text{ divided by square root of } (A^2 + B^2)$$

Contract Firm Demand

Customers served under this rate must enter into a contract that specifies a contract firm demand level. The customer may re-nominate a contract firm demand once during a calendar year subject to approval by the Company. ***The Company shall provide one hour notice of a curtailment; however, notification may be less than one hour during unmanageable capacity situations which require curtailment of loads to maintain system standards of operation. Upon notification by the Company of a capacity curtailment, the customer has one hour, or less, to curtail demand to their contract firm demand level and remain at or below their contract firm demand for the entire curtailment period. The customer shall not be required to curtail their demand for a curtailment period due to system energy economy reasons.***

dated August 11, 2021  
in Case No. U-21037

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE CURTAILABLE RATE Cp3**  
**(Continued from Sheet No. D-29.00)**

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy *Waste Reduction* Surcharge, plus the charge for 300 kilowatts of measured on-peak demand, plus the charge for 300 kW of customer maximum demand.

LATE PAYMENT CHARGE

A one and one half percent (1.5%) per month Late Payment Charge will be applied to outstanding charges past due.

DETERMINATIONS OF DEMAND

Measured Demands:

- (a) Measured demand shall be the average rate at which energy is used for a period of 15 consecutive minutes as ascertained by a watt-hour meter and an associated electronic recorder or other standard measuring device.
- (b) Measured on-peak demand shall be the maximum measured demand established during on-peak hours within for the billing period. Unless specified to the contrary in writing by six months prior written notice to customer, provided the on-peak period does not exceed twelve hours per day, on-peak hours shall be either from 8:00 a.m. to 8:00-p.m. or from 10:00 a.m. to 10:00 p.m., as selected by the customer, prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) Measured off-peak demand shall be the maximum demand within the billing period which is established during off-peak hours for the billing period. Off-peak hours are those hours not designated as on-peak hours.

Customer Maximum Demand:

Customer maximum demand shall be the maximum measured demand which occurs during either the on or off-peak period, in the current or preceding 11 billing periods.

Power Factor Demand:

The distribution demand charges are based on a standard power factor of 85 percent. The customer's monthly Power Factor Demand is determined as follows:

- (a) For Power Factors at 85 %:  
Power Factor Demand = 0
- (b) For Power Factors below 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.65) (0.85 - Peak Power Factor)]
- (c) For Power Factors above 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.50) (0.85 - Peak Power Factor)]

The peak power factor shall be calculated from the kilowatthours "A", as obtained from the watt-hour meter, and the use of lagging kilovolt-ampere reactive hours "B", as obtained from a ratcheted reactive component meter, which are used during the same 15 minute period in which the maximum measured demand occurs by the following formula:

$$\text{Peak Power factor} = A \text{ divided by square root of } (A^2 + B^2)$$

Contract Firm Demand

Customer served under this rate must enter into a contract that specifies a contract firm demand level and curtailable credit option. The customer may renominate a contract firm demand once during a calendar year subject to approval by the Company. Within an hour of being notified to curtail by the Company, the customer must curtail demand to the contract firm demand level and remain at or below the contract firm demand until the customer is notified that the curtailment period has ended, unless the customer has entered into a contract to buyout of curtailments for system energy economy reasons.

CANCELLED  
BY  
ORDER U-18266

REMOVED BY CEP

DATE 02-02-18

Effective for service rendered on and  
after January 1, 2017

Issued under authority of the  
Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS SERVICE CURTAILABLE RATE Cp3**  
**(Continued from Sheet No. D-31.00)**

CONDITIONS OF DELIVERY (Cont.)

7. Service under this rate shall be subject to curtailment at the sole discretion of the Company. The sum of capacity curtailments and system energy economy constraints will not exceed 300 hours of curtailment in any calendar year. The Company will limit the duration of any one curtailment to eight hours between the hours of 8:00 a.m. and 10:00 p.m. prevailing time. Brief period of curtailment (periods that are less than four hours duration) shall be regarded as having lasted four hours, for purposes of limiting the total annual hours to 300. Interruptions due to lightning, wind, and other physical causes other than intentional curtailment by the Company shall not be considered in determining the hours of curtailment.
8. Service under this rate shall be subject to: a) curtailments due to capacity constraints, during which the customer must curtail load or be charged a penalty, and b) system energy economy constraints, during which the customer may elect to either drop load or pay the additional charge for energy use.

**Capacity Curtailments:** The customer shall receive a one hour notice of capacity curtailments. The customer shall be charged a penalty for each occurrence in which the customer fails to curtail load to or below the contract firm demand level during the entire period of a capacity curtailment. During the twelve month trial period, the penalty shall be fifteen dollars (\$15) per kilowatt of maximum measured demand above the contract firm demand recorded during a capacity curtailment period, for up to two failures to curtail within said trial period. Beginning with the third failure to curtail during the trial period, and for all failures to curtail which occur after the expiration of the trial period, the penalty shall be thirty-five dollars (\$35) per kilowatt of maximum measured demand recorded during a capacity curtailment period which is above the customer's contract firm demand level. The Company may suspend service under this rate and thereafter serve the customer under the appropriate rate if the customer fails to curtail service twice in any consecutive twelve month period.

**System Energy Economy Constraints:** The customer shall receive one hour notice of system energy economy constraint which will include the projected system avoided costs for power plus 10% for the economy constraint period for all energy used above the contract firm demand level. An example of determination of the additional charge is shown below:

|   |          |
|---|----------|
| System Avoided Cost of Power Plus 10% per kWh | \$0.1200 |
| On-Peak Energy per kWh at Existing Rate       | \$0.0800 |
| Additional Charge per kWh                     | \$0.0400 |

9. Should the customer, because of fire, strike, demonstrations, casualties, civil or military authority, insurrection or riot, the actions of the elements, or any other like causes beyond his control, be prevented from utilizing the power service contracted for, the Company will waive Paragraph 3 of these Conditions of Delivery for such period; provided, however, that the period of time of such suspension of use of power shall be added to the period of the contract; and further, provided that the customer notifies the Company in writing within six days of his inability to use said power service, specifying reasons therefore.
10. The customer shall pay in advance of construction all costs estimated by the Company for facilities to serve the curtailable load.
11. The Company shall not be liable for any damages sustained by customer because of interruptions, deficiencies, or imperfections of electric service provided under this rate.
12. Curtailable service shall not be used as standby for any other forms of energy or fuel. Customers with their own generating equipment shall be required to separately meter such equipment or demonstrate the separation of curtailable loads from the generation

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE MANDATORY STANDBY RATE  
Cp4**

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements or retail access power service at approximately 2,400 volts or higher for periods of one year or more (see Conditions of Delivery No. 3) that have a generator that normally operates in parallel with the Company's system and serves load which will transfer from the customer's to the Company's system during planned and/or unplanned outages of the customer's generation. Standby service has limitations, more fully described in the Terms and Conditions section, when used in conjunction with curtailable or interruptible service at the same location.

RATES: (for service at primary voltages)

|  |                 |                            |                  |
|--|-----------------|----------------------------|------------------|
|  | ≤4,160<br>volts | >4,160 to<br>≤69,000 volts | ≥69,000<br>volts |
|--|-----------------|----------------------------|------------------|

Power Supply Charges: These charges are applicable to Full Requirements service.

|   |          |          |          |
|---|----------|----------|----------|
| Capacity Demand Charge: per kW of Billed Demand | \$16.610 | \$16.295 | \$15.971 |
| Standby Demand Charge: per kW                   | \$1.748  | \$1.715  | \$1.680  |

Standby Energy: In addition to the charges below, Standby Energy will be billed at the system avoided cost of power plus 10% per kWh, less the appropriate on or off-peak energy charge per kWh (including the Power Supply Recovery Factor), but not less than zero.

|                                     |           |           |           |

| Power Factor Demand Charge: per kW of Peak Power Factor Demand | \$18.204   | \$17.907                     | \$12.184   |

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

- (a) Charge for customer who takes service at 13,200 volts or greater, but less than 69,000 volts, directly from a company-owned substation transformer, and is served using no company-owned primary lines.
- (b) Customers shall select one of two on-peak periods which shall be either from 8:00 a.m. to 8:00 p.m. or from 10:00 a.m. to 10:00 p.m., as selected by the customer, prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) The off-peak period shall be those hours not designated as on-peak.

The customer's selection will remain in effect for at least one year and may be changed, at the customer's request, once a year, thereafter.

in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE MANDATORY STANDBY RATE  
Cp4**

**(Continued from Sheet No. D-33.00)**

MINIMUM CHARGE

The monthly minimum charge shall be the applicable Facilities Charge plus the charge for 300 kW of billed demand, plus the charge for 300 kW of customer maximum demand, plus the charge for Stand-by demand applied to the demand levels as set forth in the customer's contract for service.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the Cp4 rate schedule may contract for retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. ***Additionally, retail access customers shall pay the Power Supply Capacity Demand Charge above, not subject to Power Supply surcharges and credits or to the monthly billed demand minimum, if their Alternative Electric Supplier has not secured generation capacity for the customer.*** Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

CONDITIONS OF DELIVERY

See Sheet No. D-27.01. In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

DEFINITIONS FOR DETERMINING BILLED QUANTITIES

The demand charges, set forth above, for billed demand, reserved demand, and unreserved energy, will apply to the demands as determined in accordance with the following definitions and terms.

Measured Demand shall be the average rate of energy flow for a period of 15 consecutive minutes as ascertained by a watt-hour meter and an associated electronic recorder or other standard measuring device.

Generator Supplied Demand is the Measured Demand for each 15-minute period from the metering on the customer's generating equipment for which the customer has contracted for standby service.

Company Supplied Demand is the sum of the Measured Demand for each 15-minute period of all the customer's interconnections with the Company at one site compensated for service voltage differences.

Total Demand is the sum of on peak Generator Supplied Demand and Company Supplied Demand for each 15-minute period.

Maximum Total Demand is the highest value of Total Demand occurring during the current or preceding 11 billing periods.

Maximum Total On-peak Demand is the highest value of Total Demand occurring during the on-peak period during the billing periods.

Reserved Demand is the amount of capacity contracted for replacement of the customer's generation during outages. Such Reserve Demand may be renominated by the customer once every 12 months upon two months written notice to the Company.

Standby Demand equals the Reserved Demand for the month and is the same for each 15-minute period.

Effective for service rendered on and  
after January 1, 2017

Issued under authority of the  
Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE MANDATORY STANDBY RATE  
Cp4  
(Continued from Sheet No. D-34.00)**

Power Factor Demand:

The distribution demand charges are based on a standard power factor of 85 percent. The customer's monthly Power Factor Demand for each 15-minute period is determined as follows:

- (a) For Power Factors at 85 %:  
Power Factor Demand = 0
- (b) For Power Factors below 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.65) (0.85 - Peak Power Factor)]
- (c) For Power Factors above 85%:  
Power Factor Demand = [(Measured On-peak Demand) (.50) (0.85 - Peak Power Factor)]

The power factor shall be calculated from the kilowatthours "A", as obtained from the watthour meter, and the lagging kilovoltampere reactive hours "B", as obtained from a ratcheted reactive component meter, which are used during the same 15 minute period by the following formula:

$$\text{Peak power factor} = A \text{ divided by square root of } (A^2 + B^2)$$

Peak Power Factor Demand is the Power Factor Demand at the time of the Maximum Total On-Peak Demand.

CONDITIONS OF DELIVERY

1. General Primary – Time-of-Use, Rate Schedule No. Cp 1, Conditions of Delivery apply. Service will be provided to the customer at the same location under Cp 2 – Interruptible Service only when the customer's circuits are arranged so that none of the interruptible load can be transferred to the Company's system through service under this or any other rate. Service will be provided to the customer at the same location under Cp 3 – Curtailable Service only when the curtailable load is isolated through separate circuits or submetering. Additional service under Cp 2 and Cp 3 will be separately billed from standby service under the provisions of the applicable tariff. The customer shall pay in advance of construction all costs estimated by the Company for facilities to serve the curtailable or interruptible loads.
2. Subject to the written approval of the Company, the customer will be allowed to preschedule up to two maintenance outages per year (for a total of 10 on-peak days) at times when the Company's system is capable of supplying the standby demand on a firm basis. The customer shall request a maintenance period at least 90 days in advance. The Company will consider and try to supply maintenance power on less than 90 days customer request in extenuating circumstances.
3. A customer commencing service under this rate schedule must execute a contract with a provision which, absent notice, will automatically extend the contract for five years from each anniversary date. The contract will contain an identification of the customer's generator for which standby service on this rate is to be provided.
4. The customer shall, at his expense, install all apparatus and materials necessary for the proper utilization of the power furnished by the Company. All such apparatus shall conform to the Company's rules and regulations pertaining to primary substation installation and shall at all times be kept suitable for operation by the power furnished.
5. Should the customer, because of fire, strike, demonstrations, casualties, civil or military authority, insurrection or riot, the actions of the elements, or any other like causes beyond his control, be prevented from utilizing the power service contracted for, the Company will waive the minimum demand charges for such period; provided, however, that the period of time of such suspension of use of power shall be added to the period of the contract; and further, provided that the customer notifies the Company in writing within six days of his inability to use said power service, specifying reasons therefore.
6. The Company shall not be liable for any damages sustained by customer because of interruptions, deficiencies, or imperfections of electric service provided under this rate.

in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE SCHEDULE A**

AVAILABILITY

To CMP Holdings LLC d/b/a Verso Papers LLC at their 138/13.8 kilovolt substation in Quinnesec, Michigan.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, three-phase at 138,000 volts.

RATE

Power Supply Charges: These charges are applicable to Full Requirements service.

Capacity Demand Charge: \$22.136 per kW of billed demand  
Subject to a minimum monthly demand charge of 300 kW of billed demand.

Standby Demand Charge: \$0.919 per kW  
Non-Capacity Energy Charge: \$0.04686 per kWh On-peak  
\$0.03059 per kWh Off-peak

Additional Charge for Standby Energy:

In addition to the charges above, Standby Energy will be billed at the following rates:  
\$0.03000 per kWh On-peak  
\$0.02000 per kWh Off-peak

Curtailable Credit: per kW of Curtailable On-Peak Demand

Determined by application of the following formula where the credit per kW per on-peak hours of use equals \$0.01910:

$$(A*B)*\frac{C}{D} \text{ where}$$

- A = credit per kW per on-peak hour of use
- B = actual curtailable on-peak hours of use, determined by dividing the on-peak curtailable kWh for the billing period by the curtailable on-peak demand
- C = 255 hours
- D = on-peak hours in the billing period minus actual hours of curtailment in the billing period

Delivery Charges: These charges are applicable to Full Requirements and Retail Access service.

Demand Charge: \$0.196 per kW of Maximum Total demand  
Subject to a minimum monthly demand charge of 300 kW of Maximum Total Demand.

Power Factor Demand Charge: \$12.184 per kW of Peak Power Factor Demand  
Distribution Charge: \$0.00122 per kWh of on-peak and off-peak energy

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

For Determination of Demand, see Sheet No. D-36.00 – D-38.00

MINIMUM CHARGE

The monthly minimum charge shall be the Demand Charges, the Renewable Energy surcharge and the Energy Waste Reduction surcharge.

LATE PAYMENT CHARGE

A 1.5% per month Late Payment Charge will be applied to outstanding charges past due.

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE SCHEDULE A**  
**(Continued from Sheet No. D-36.00)**

**RETAIL ACCESS OPTION**

Customers who meet the availability requirements of the Schedule A rate schedule may contract for retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

**CONDITIONS OF DELIVERY**

See Sheet No. D-39.00 In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

**DEFINITIONS:**

**On-peak energy** is the energy in kilowatthours as ascertained by metering installed by the Company delivered during the on-peak period selected by the customer (8:00 a.m. to 8:00 p.m. or 10:00 a.m. to 10:00 p.m. prevailing time), Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

**Off-peak energy** is the energy in kilowatthours as ascertained by metering installed by the Company delivered during all hours other than on-peak hours.

**Measured Demand** is the average rate of energy flow for a period of 15 consecutive minutes as ascertained by a watt hour meter and an associated electronic recorder or other standard measuring device. The 15-minute periods are from the top of the hour to 0015, from 0015 to 0030, from 0030 to 0045, and from 0045 to 0000.

**Company Supplied Demand** is the sum of the Measured Demand for each 15-minute period of all the customer's interconnections with the Company at this site.

**Generator Supplied Demand** is the measured demand for each 15-minute period as ascertained by metering on the customer's generating equipment for which the customer has contracted for standby service.

**Total Demand** is the sum of Company Supplied Demand and Generator Supplied Demand for each 15-minute period.

**Maximum Total Demand** is the highest value of Total Demand occurring during the current or preceding 11 billing periods.

**Maximum Total On-peak Demand** is the highest value of Total Demand occurring during the on-peak period during the billing period.

**Reserved Demand** is the amount of capacity contracted for replacement of the customer's generation during outages. The customer may contract for a Reserved Demand amount which can change monthly, subject to a monthly minimum demand of 24 MW. The customer may request a monthly Reserved Demand amount lower than 24 MW if its operations change fundamentally, subject to written approval by the Company.

**Standby Demand** equals the Reserved Demand for the month and is the same for each 15-minute period.

**Billed Demand** is Maximum Total On-peak Demand less Standby Demand.

**Standby Energy** for each 15-minute period equals [Company Supplied Demand in that 15-minute period less Billed Demand] divided by 4, but not less than zero. Standby Energy is zero during Company approved, prescheduled maintenance periods.

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE SCHEDULE A**  
**(Continued from Sheet No. D-37.00)**

DEFINITIONS (Cont.):

Power Factor Demands

The demand charges herein are based on a power factor of 95 percent. Power Factor Demand shall be determined for each 15-minute period by one of the following formulas:

(a) For lagging power factors greater than or equal to 90%

Power Factor demand = 0

(b) For lagging power factors below 90%.

Power Factor demand = Company Supplied demand  $*/[(0.65)*(0.95 - \text{power factor})]$

(c) The customer may not operate with a leading power factor without permission from the Company.

The power factor shall be calculated from the kilowatt hours "A" as obtained from the watt hour meter and lagging/leading kilovolt-ampere reactive hours "B" as obtained from a ratcheted reactive component meter, which are used during the same 15 minute period by the following formula:

$$\text{Power Factor} = \text{"A"} \text{ divided by square root of } (\text{"A"}^2 + \text{"B"}^2)$$

Peak Power Factor Demand is the Power Factor Demand at the time of the Maximum Total On-Peak Demand.

Curtable Demand is the Measured Demand of the isolated and separately sub-metered load that the customer will reduce to zero during a curtailment period in each 15-minute period.

On-Peak Curtable kWh is the sum of the Curtable Demand in each 15-minute period during the on-peak period divided by 4.

Curtailment On-Peak Demand is the highest value of the Curtable Demand in any 15-minute period during the on-peak period.

Maintenance Period

Customer may annually preschedule a total of 14 days of maintenance, subject to written customer notification normally provided at least 45 days in advance and written Company approval normally provided 30 days in advance. Once during every five year period, the customer may schedule an additional 14 days for a total of up to 28 days for major maintenance, subject to written Company approval.

Curtailment Provisions

The isolated and separately submetered load that the customer will reduce to zero during a curtailment period under this rate shall be subject to curtailment at the sole discretion of the Company. The sum of capacity curtailments and system energy economy constraints will not exceed 300 hours of curtailment in any calendar year. The Company will limit the duration of any one curtailment to eight hours between the hours of 8:00 a.m. and 10:00 p.m. prevailing time. Brief periods of curtailment (periods that are less than four hours duration) shall be regarded as having lasted four hours, for purposes of limiting the total annual hours to 300. Interruptions due to lightning, wind, and other physical causes other than intentional curtailment by the Company shall not be considered in determining the hours of curtailment.

The isolated and separately sub-metered load that the customer will reduce to zero during a curtailment period under this rate shall be subject to: a) curtailments due to capacity constraints, during which the customer must curtail load or be charged a penalty, and b) system energy economy constraints, during which the customer may elect to either drop load or pay the additional charge for energy use.

Issued under authority of the  
Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**GENERAL PRIMARY FULL REQUIREMENTS OR RETAIL ACCESS SERVICE SCHEDULE A**  
**(Continued from Sheet No. D-38.00)**

**DEFINITIONS (Cont.):**

**Capacity Curtailments:** The customer shall receive a one hour notice of capacity curtailments. The customer shall be charged a penalty for each occurrence in which the customer fails to curtail its separately metered curtailable load during the entire period of a capacity curtailment. The penalty shall be thirty-five dollars (\$35) per kilowatt of the highest Curtailable Demand during the capacity curtailment period. The Company may suspend curtailable service under this rate and thereafter serve the curtailable load as firm load if the customer fails to curtail service twice in any consecutive twelve month period.

**System Energy Economy Constraints:** The customer shall receive a one hour notice of a system energy economy constraint which will include the projected system avoided costs for power plus 10% for the economy constraint period for all energy used by the isolated, separately metered curtailable load. An example of determination of the additional charge is shown below:

|          |  |
|----------|--|
| \$0.1200 | System Avoided Cost of Power Plus 10% per kWh  |
| \$0.0800 | On-peak Energy per kWh at Existing Rate (Sum of On-Peak Delivery and Energy Charges) |
| \$0.0400 | Additional Charge per kWh  |

The customer must notify the Company at least 30 days before the end of the calendar year if the customer does not want to continue under a curtailable buyout agreement for the subsequent twelve month period. Absent notification, the curtailable buyout agreement will be extended every year for a twelve month period.

**CONDITIONS OF DELIVERY**

1. The customer shall, at his expense, install all apparatus and materials necessary for the proper utilization of the power furnished by the Company. All such apparatus shall conform to the Electric Service Rules and Regulations of the Company pertaining to primary substation installation and shall at all times be kept suitable for operation by the power furnished. Any customer receiving service under this rate who requires lighting regulation shall furnish, install, operate and maintain the necessary regulating equipment at his expense.
2. The customers shall abide by the conditions of purchase for rate schedule Cgs1.
3. If the customer's off-peak demand exceeds the on-peak demand to the extent that the installation of additional facilities is required, then the customer shall pay for such additional facilities.
4. Should the customer, because of fire, strike, casualties, civil or military authority, insurrection or riot, the actions of the elements, or any other like causes beyond his control, be prevented from operating that equipment installed for the utilization of the power service contracted for, the Company will waive the monthly minimum demand charge for such period and such period will not be used in the computation of future monthly minimum demands; provided, however, that the period of time of such suspension of use of power shall be added to the period of the contract; and further, provided that the customer notifies the Company in writing within six days of his inability to use said power service, specifying reasons therefore.
5. The Company shall not be liable for any damages sustained by customer because of interruptions, deficiencies, or imperfections of electric service provided under this rate.
6. Service under this rate shall be furnished only in accordance with the Electric Service Rules and Regulations of the Company.
7. The Company shall not be obliged to maintain a service connection for standby or breakdown service under this rate beyond that contracted for under reserved demand.
8. Energy furnished under this rate shall not be resold, except as provided in the Electric Service Rules and Regulations of the Company.

**GENERAL PRIMARY FULL REQUIREMENTS AND RETAIL ACCESS SERVICE –  
 LARGE CURTAILABLE CONTRACT RATE CpLC**

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements power service at approximately 13.8 kilovolts or higher with a minimum of 50 megawatts of curtailable load. If the curtailable load is on isolated and separately metered circuits, it will be treated as a separate service to the Customer. Customers are required to remain on the selected on-peak period for at least one year.

| Off-Peak (c)   | \$0.03482                 | \$0.03408  |

- (a) Charge for Customer that takes service at 13,800 volts or greater, but less than 69,000 volts, directly from a Company-owned substation transformer, and is served using no Company-owned primary lines.
- (b) General Primary on-peak usage is the energy in kilowatt-hours delivered during the on-peak period selected by the Customer. The two on-peak periods available are: 8:00 a.m. to 8:00 p.m. and 10:00 a.m. to 10:00 p.m., prevailing time, Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.
- (c) General Primary off-peak usage is the energy in kilowatt-hours delivered during all hours other than on-peak hours.

For Determination of Demand, see Sheet Nos. D-40.00 – D-41.00.

Subject to Power Supply Cost Recovery Factor.

Power Supply and Distribution charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, plus the Demand Charge for Contract Demand. Contract Demand shall be no less than 50 megawatts.

LATE PAYMENT CHARGE

A 1.5% per month Late Payment Charge will be applied to outstanding charges past due.

**GENERAL PRIMARY FULL REQUIREMENTS AND RETAIL ACCESS SERVICE –  
 LARGE CURTAILABLE CONTRACT RATE CpLC**

AVAILABILITY

To customers contracting for three-phase 60 hertz full requirements power service at approximately 13.8 kilovolts or higher with a minimum of 50 megawatts of curtailable load. If the curtailable load is on isolated and separately metered circuits, it will be treated as a separate service to the Customer. Customers are required to remain on the selected on-peak period for at least one year.

**GENERAL PRIMARY FULL REQUIREMENTS AND RETAIL ACCESS SERVICE –  
LARGE CURTAILABLE CONTRACT RATE CpLC  
(Continued from Sheet No. D-40.00)**

Power Factor Demand:

Demand charges in this rate schedule are based on a standard power factor of 1.00. The power factor shall be calculated from the kilowatthours "A", as obtained from the watt-hour meter, and the kilovolt-ampere reactive hours "B", as obtained from a leading/lagging reactive component meter, which are used during the same 60 minute period in which the maximum measured on-peak demand occurs by the following formula:

Peak Power Factor = A divided by square root of (A<sup>2</sup> + B<sup>2</sup>)

- (a) For Power Factors between 98% leading and 90% lagging:  
Power Factor Demand = 0
- (b) For lagging Power Factors below 90%:  
Power Factor Demand = (Contract Demand) x (0.65) (1 - Peak Power Factor)
- (c) For leading Power Factors below 98%:  
Power Factor Demand = (Contract Demand) x (1 - Peak Power Factor)

OTHER DETERMINATIONS OF DEMAND:

1. Measured Demands:

- (a) Measured demand shall be the rate at which energy is used for a period of 60 consecutive minutes as ascertained by a watt-hour meter and an associated electronic recorder or other standard measuring device.
- (b) Measured on-peak demand shall be the maximum measured demand established during on-peak hours within the billing period.

2. Contract Demands

A Customer served under this rate schedule must enter into a contract that specifies a Contract Firm Demand level, and Contract Curtailable Demand level, each specified in kW. Seasonal variances between summer and non-summer demand nomination levels will be allowed for service under the CpLC tariff per terms and conditions in the service contract.

The Customer may, in its sole discretion, re-nominate its Contract Demand levels by providing written notice to the Company of its revised nominations at least 60 days prior to the contract anniversary date. Revised Contract Demand levels shall take effect on the contract anniversary date and shall remain in effect until the effective date of any subsequent Contract Demand re-nominations.

Within two hours of being notified to curtail by the Company, the Customer must curtail demand to the curtailment demand level specified by the Company, but no less than the Contract Firm Demand level, and remain at or below the curtailment demand level until the Customer is notified by the Company that the curtailment period has ended. The notice to curtail shall be confirmed in writing to the Customer's designee for receiving such notices and the Customer's designee shall acknowledge receipt of such notice, with the Customer's intent to comply with such notice, as soon as reasonably possible.

3. Curtailable Demand

Curtailable Demand is that portion of measured demand that exceeds the Contract Firm Demand. If Measured Demand is less than the contract Firm Demand level, Curtailable Demand = 0.

4. Customer Maximum Demand

Customer maximum demand shall be the maximum measured demand which occurs during either the on- or off-peak period, in the current or preceding 11 billing periods.

**GENERAL PRIMARY FULL REQUIREMENTS AND RETAIL ACCESS SERVICE –  
LARGE CURTAILABLE CONTRACT RATE CpLC  
(Continued from Sheet No. D-41.00)**

**CONDITIONS OF DELIVERY**

1. The Customer must execute an initial one year contract which specifies, among other terms of service, that the Customer will notify the Company at least 30 days before the contract ends as to whether the Customer will continue the curtailable service contract for a minimum of three more years or execute a new contract for service under the appropriate firm service rate. The curtailable service contract will contain a provision which, absent notice, will automatically extend the contract for three years from each anniversary date. At any time, the Customer may terminate the curtailable service contract before its expiration date without penalty. Further, nothing in this tariff prevents the Customer at any time from engaging in self generation or seeking service from an alternative electric supplier to serve all or a portion of its load. However, load removed from the service contract for the reasons of self-service or service from an AES will not be eligible for firm service under this tariff for the remainder of the contract term in place at the time such load is removed from the service contract.
2. If the Customer's curtailable demand is less than 50 MW for any three consecutive months, the Company may suspend service under this rate and thereafter serve the Customer under the appropriate rate.
3. For purposes of determining the Customer's eligibility for this rate, the Customer's curtailable demand will be the difference between the Customer's maximum measured demand during the last consecutive twelve month period and the Customer's proposed Contract Firm Demand.
4. The Customer shall, at its expense, install all apparatus and materials necessary for the measurement of the curtailment of load. The Customer's circuits are to be arranged so that none of the curtailable load can be transferred to service furnished under any other rate.
5. Service under this rate shall be subject to curtailment solely due to, and only to the extent of, capacity constraints which preclude the ability of the Company to meet system demands. The sum of capacity curtailment hours will not exceed 300 hours in any calendar year. Brief periods of curtailment (periods that are less than four hours in duration) shall be regarded as having lasted four hours, for purposes of limiting the total annual hours to 300. Interruptions due to lightning, wind and other physical causes, other than intentional curtailment by the Company, shall not be considered in determining the hours of curtailment. Within five (5) business days of each curtailment, the Company shall provide written notice, and supporting documentation, to the Customer and the Public Service Commission, identifying the cause of the curtailment.
6. The Customer shall be charged a penalty for each occurrence in which the Customer fails to curtail load during a period of curtailment. In the event of a full curtailment, the penalty shall be thirty-five dollars (\$35) per kilowatt of maximum measured demand recorded during the period of curtailment of service which is above the Customer's contract firm demand. In the event of a partial curtailment, the penalty shall be thirty-five dollars (\$35) per kilowatt of maximum measured demand recorded during the period of curtailment of service which is above the Company's requested curtailment level. The Company may suspend service under this rate if the Customer fails to curtail service twice in any consecutive twelve month period, and thereafter serve the Customer under the appropriate rate.
7. Should the Customer, because of fire, strike, lockout, demonstrations, environmental causes, regulatory constraints, casualties, civil or military authority, insurrection or riot, the actions of the elements, or any other like causes, be prevented from utilizing the power service as contracted, the Company will waive Paragraph 2 of these Conditions of Delivery for such period; provided, however, that the period of time of such suspension of use of power shall be added to the period of the contract; and further, provided that the Customer notifies the Company in writing within six days of the Customer's inability to use said power service, specifying reasons therefore. In no event shall the period of deferral last longer than two (2) months.

8. The Customer shall pay in advance of construction all costs estimated by the Company for facilities to serve the curtailable load.
9. The Company shall use reasonable diligence in furnishing an uninterrupted and regular supply of power, but it shall not be liable for interruptions, deficiencies, or imperfections of electric service provided under this rate except to the extent of a prorated reduction of the demand charge provided herein.
10. Customers with their own generating equipment shall be required to separately meter such equipment.

dated December 9, 2016  
in Case No. U-18061

**STANDARD STREET RATE Ms2**

AVAILABILITY

To municipalities and other government units contracting for standard high pressure sodium or metal halide lighting for illumination of public streets roadways and alleys by means of Company-owned street lighting facilities.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase at 120/240 volts.

RATE

Capacity Energy Charge per Lighting Unit all Lamp Sizes: \$0.03005 per all kWh

| Non-Capacity Monthly Charge per Lighting Unit | <u>Lamp Size</u> | <u>Amount</u>        |
|---|------------------|----------------------|
|   | 50 watt          | \$7.91 Sodium        |
|   | 70 watt          | \$9.68 Sodium        |
|   | 100 watt         | \$11.54 Sodium       |
|   | 150 watt         | \$13.70 Sodium       |
|   | 175 watt         | \$16.32 Metal Halide |
|   | 200 watt         | \$16.22 Sodium       |
|   | 250 watt         | \$18.64 Sodium       |
|   | 250 watt         | \$20.25 Metal Halide |
|   | 400 watt         | \$25.26 Sodium       |
|   | 400 watt         | \$25.86 Metal Halide |

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the monthly charge per lighting unit and the Energy Waste Reduction Surcharge.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will furnish, install, own and operate a standard high pressure sodium or metal halide street lighting unit, and will supply all electrical energy and normal maintenance for the operation of the unit. The standard street lighting unit shall consist of a cobra head fixture on an arm mounted on an existing Company-owned wood pole, with a control device wired for operation. This rate requires use of existing Company-owned poles and available overhead 120 volt service where the Company has such facilities along streets, alleys and highways. Where additional primary and/or secondary facilities are required, the customer shall pay, in advance, material and installation cost of such additional facilities.
2. When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install / remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with the construction standards of the Company and any other codes the Company determines to be applicable.
3. Underground service is available under this rate for new installations, where the customer pays the estimated cost of furnishing underground service.

**STANDARD STREET RATE Ms2**  
**(Continued from Sheet No. D-44.00)**

CONDITIONS OF DELIVERY (Cont.)

4. Lamps will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise providing dusk-to-dawn operation of approximately 4200 hours per year. Nonstandard, seasonal, temporary or part-night service is not available under this rate. The Company will initiate a first response to replace inoperative lamps and otherwise maintain luminaires during regular daytime work hours within 72 hours after notification by the Customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which lamps were out of service.
6. The Company will, at the Customer's expense, modify, replace, transfer, relocate or temporarily remove and reinstall any properly operating poles or fixtures contracted for under this rate as requested in writing by the customer or as required by a governing authority.
7. The lighting agreement shall become effective on the date service is connected, and shall continue in force until terminated upon 30 days prior written notice given by either of the parties to the other. The Company may remove any and/or all lighting facilities upon termination.
8. If the Customer or governing authority terminates service or requests the permanent removal of any Company-owned street lighting facilities within 60 months of installation, the Customer shall pay the lesser of the estimated labor charges for installation and removal of the equipment, or the remaining balance of monthly fees to satisfy the 60 month period. Permanent removal of pole mounted street lighting facilities more than 60 months after installation shall be at no cost to the Customer.
9. Subject to Company approval, the Company will allow municipal customers to make temporary attachments of Christmas lighting and/or decorations on the Company-owned light poles. The Customer must execute an annual agreement for such attachments, and must meet all conditions thereof. Estimated energy consumption will be billed under the current CG1 energy rate. Time and material charges for installation, removal or associated maintenance may also apply.
10. Electric service will not be furnished hereunder for breakdown or standby purposes where another source of power is available for the Customer. Energy furnished under this rate shall not be used for purposes other than those specified hereunder and shall not be resold.
11. In the event of abnormal or excessive maintenance due to frequent vandalism or other causes, not related to the quality of material or workmanship, the Customer shall reimburse the Company for all associated costs.
12. Where the Company has secondary voltage in the area and it is not necessary to install a transformer or extend secondary lines more than one hundred and fifty feet, the Company will connect Customer-owned flasher signal lamps and bill on a flat monthly rate according to the following schedule:

|                    |                           |              |   |
|--------------------|---------------------------|--------------|---|
| <u>Per Flasher</u> | <u>Installed Capacity</u> |              |   |
| <u>Capacity</u>    | <u>Non-Capacity</u>       | <u>Total</u> |   |
| <b>\$1.13</b>      | <b>\$2.76</b>             | \$3.89       | 75 watts or less                                    |
| <b>\$1.73</b>      | <b>\$4.25</b>             | \$5.98       | Greater than 75 watts up to and including 150 watts |

If the Company must install a transformer or extend lines more than one hundred and fifty feet or if the installed capacity exceeds 150 watts, the flasher signals will be billed on the general secondary rate applicable in the area served.
13. Customer shall indemnify and hold harmless the Company, from and against any and all liability for injuries or damages to persons or property arising or resulting from (a) any interruption or modification of service requested or caused by the Customer; or (b) any lighting, requested by Customer or third party, which does not conform to the Illuminating Engineering Society (IES) Recommended Practices.

**NON-STANDARD STREET AND AREA LIGHTING, COMPANY-OWNED RATE Ms3**

AVAILABILITY

To all customers contracting for nonstandard lighting service by means of Company-owned and maintained non-standard street lighting and related facilities. The availability of Option B – facilities charge is limited to customers who have paid, in full, the estimated installed cost of lighting and related facilities.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase at 120/240 volts.

RATE

Facilities Charge:

- Option A: Monthly facilities charge of one point nine percent (1.9%) of the estimated installed cost of the lighting and related facilities.
- Option B: One time charge equal to the estimated installed cost of the lighting and related facilities, paid prior to installation of facilities, and monthly facilities charge of one-half of one percent (0.5%) of the estimated installed cost of the lighting and related facilities.

Monthly Charge Options A and B:

Capacity Energy Charge per Lighting Unit all Lamp Sizes: \$0.03005 per all kWhs

Non-Capacity Monthly Charge per Non-Standard Lighting Unit:

| <u>Lamp Size</u> | <u>Amount</u> |
|------------------|---------------|
| 50 watt          | \$2.18        |
| 70 watt          | \$3.20        |
| 100 watt         | \$4.96        |
| 150 watt         | \$7.03        |
| 175 watt         | \$7.96        |
| 200 watt         | \$9.31        |
| 250 watt         | \$11.58       |
| 400 watt         | \$17.89       |
| 1000 watt        | \$41.67       |

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the monthly charge per lighting unit and the Energy Waste Reduction Surcharge.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will furnish, install, own and operate a complete nonstandard lighting unit and will supply all electric energy and normal maintenance for the operation of the unit. A lighting unit may consist of a pole and/or luminaire with a bracket, lamp and control device wired for operation. The unit may be fed overhead or underground. Where additional primary and/or secondary facilities are required, the Customer shall pay the full cost of installation.
2. When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install / remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with the construction standards of the Company and any other codes the Company determines to be applicable.

**NON-STANDARD STREET AND AREA LIGHTING, COMPANY-OWNED RATE Ms3**

AVAILABILITY

To all customers contracting for nonstandard lighting service by means of Company-owned and maintained non-standard street lighting and related facilities. The availability of Option B – facilities charge is limited to customers who have paid, in full, the estimated installed cost of lighting and related facilities.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase at 120/240 volts.

RATE

Facilities Charge:

- Option A: Monthly facilities charge of one point nine percent (1.9%) of the estimated installed cost of the lighting and related facilities.
- Option B: One time charge equal to the estimated installed cost of the lighting and related facilities, paid prior to installation of facilities, and monthly facilities charge of one-half of one percent (0.5%) of the estimated installed cost of the lighting and related facilities.

Monthly Charge Options A and B:

*Capacity Energy Charge per Lighting Unit all Lamp Sizes: \$0.03005 per all kWhs*

*Non-Capacity Monthly Charge per Non-Standard Lighting Unit:*

| <u>Lamp Size</u> | <u>Amount</u>  |
|------------------|----------------|
| 50 watt          | <b>\$2.18</b>  |
| 70 watt          | <b>\$3.20</b>  |
| 100 watt         | <b>\$4.96</b>  |
| 150 watt         | <b>\$7.03</b>  |
| 175 watt         | <b>\$7.96</b>  |
| 200 watt         | <b>\$9.31</b>  |
| 250 watt         | <b>\$11.58</b> |
| 400 watt         | <b>\$17.89</b> |
| 1000 watt        | <b>\$41.67</b> |

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM CHARGE

The monthly minimum charge shall be the monthly charge per lighting unit and the Energy Waste Reduction Surcharge.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will furnish, install, own and operate a complete nonstandard lighting unit and will supply all electric energy and normal maintenance for the operation of the unit. A lighting unit may consist of a pole and/or luminaire with a bracket, lamp and control device wired for operation. The unit may be fed overhead or underground. Where additional primary and/or secondary facilities are required, the Customer shall pay the full cost of installation.
2. When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install / remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with the construction standards of the Company and any other codes the Company determines to be applicable.

**NON-STANDARD STREET AND AREA LIGHTING, COMPANY-OWNED RATE Ms3**  
**(Continued From Sheet No. D-46.00)**

CONDITIONS OF DELIVERY (Cont.)

3. Lamps will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise, providing dusk-to-dawn operation of approximately 4,200 hours per year. Part-night, temporary or seasonal service is not available under this rate.
4. The Company will initiate a first response to replace inoperative lamps and otherwise maintain luminaires during regular daytime work hours within 72 hours after notification by the Customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which lamps are out of service.
5. The Company will, at Customer's expense, modify, replace, relocate, change the position or temporarily remove and reinstall any properly operating Company-owned poles or fixtures contracted for under this rate as requested in writing by the Customer or as required by a governing authority. Replacement of lighting units and their major components after 20 years of service is at the discretion of the Company. Replacement may require a new lighting contract/agreement between the Company and Customer.
6. The lighting agreement shall become effective on the date service is connected, and shall continue in force until terminated upon 30 days' prior written notice given by either of the parties to the other. The Company may remove any and/or all lighting facilities upon termination.
7. If a Customer served under Option A or a governing authority terminates service or requests the removal of any Company-owned non standard lighting facilities, the Customer shall reimburse the Company for the unamortized balance of the estimated installed cost of facilities plus removal costs, less estimated salvage, of the facilities removed because of such termination or request for removal.
8. If a Customer served under Option B or a governing authority terminates service or requests the removal of any Company-owned non standard lighting facilities, the Customer shall reimburse the Company for the removal costs less estimated salvage, if greater than zero, of the facilities removed because of such termination or request for removal.
9. Customer shall indemnify and hold harmless the Company from and against any and all liability for injuries or damage to persons or property arising or resulting from (a) any interruption or modification of service requested or caused by the Customer; or (b) any lighting, requested by Customer or third party, which does not conform to the Illuminated Engineering Society (IES) Recommended Practices.
10. Subject to Company approval, the Company will allow municipal Customers to make temporary attachments of Christmas lighting and / or decorations on Company-owned light poles. The Customer must execute an annual agreement for such attachments and must meet all conditions thereof. Estimated energy consumption will be billed under the current Cg1 energy rate. Time and material charges for installation, removal or associated maintenance may also apply.
11. Electric service will not be furnished hereunder for breakdown or standby purposes where another source of power is available to the Customer. Energy furnished under this rate shall not be used for purposes other than those specified hereunder and shall not be resold.
12. In the event of abnormal or excessive maintenance due to frequent vandalism or other causes, not related to the quality of material or workmanship, the Customer shall reimburse the Company for all associated costs.

\*Not available

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

The monthly minimum charge shall be the monthly charge per lighting unit and the Energy Waste Reduction Surcharge.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

- The Company will furnish, install, own and operate a standard high pressure sodium or metal halide area or flood lighting unit and will supply all electric energy and normal maintenance for the operation of the unit. The standard lighting unit will consist of an open bottom or cobra head area light fixture on a 2 to 6 foot arm or directional floodlight on a 2 foot arm, mounted on an existing Company-owned wood pole, with a control device wired for operation. This rate requires use of existing Company-owned wood poles and available overhead 120 volt service. Where additional primary and/or secondary facilities are required, the Customer shall pay the full cost of installation.
- New poles required solely for the attachment of lighting fixtures are not available under this rate. Poles and circuit being provided by the Company prior to 9-16-02 will continue to be provided for monthly charge of \$2.58 for each pole and \$2.54 for each span of circuit installed.
- When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install / remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with the construction standards of the Company and any other codes the Company determines to be applicable.

\*Not available

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM CHARGE

The monthly minimum charge shall be the monthly charge per lighting unit and the Energy **Waste Reduction** Surcharge.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. The Company will furnish, install, own and operate a standard high pressure sodium or metal halide area or flood lighting unit and will supply all electric energy and normal maintenance for the operation of the unit. The standard lighting unit will consist of an open bottom or cobra head area light fixture on a 2 to 6 foot arm or directional floodlight on a 2 foot arm, mounted on an existing Company-owned wood pole, with a control device wired for operation. This rate requires use of existing Company-owned wood poles and available overhead 120 volt service. Where additional primary and/or secondary facilities are required, the Customer shall pay the full cost of installation.
2. New poles required solely for the attachment of lighting fixtures are not available under this rate. Poles and circuit being provided by the Company prior to 9-16-02 will continue to be provided for monthly charge of \$2.58 for each pole and \$2.54 for each span of circuit installed.
3. When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install / remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with the construction standards of the Company and any other codes the Company determines to be applicable.

**STANDARD AREA LIGHTING SERVICE RATE GL1**

AVAILABILITY

To all classes of customers contracting for standard area lighting service whenever service can be provided from existing 120-volt, Company-owned facilities. Rate is not available for lighting public streets, alleys, or highways. The Company will no longer install new or additional poles under this rate. Installations which require new poles shall be served under the Ms-3 rate.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase at 120 volts.

**STANDARD AREA LIGHTING SERVICE RATE GL1**  
**(Continued from Sheet No. D-48.00)**

CONDITIONS OF DELIVERY (Cont.)

4. Lamps will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise providing dusk-to-dawn operation of approximately 4,200 hours per year. Non-standard, seasonal, temporary or part-night service is not available under this rate.
5. The Company will initiate a first response to replace inoperative lamps and otherwise maintain luminaries during regular daytime work hours within 72 hours after notification by the Customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which lamps were out of service.
6. In the event of abnormal or excessive maintenance due to frequent vandalism or other causes, not related to the quality of material or workmanship, the Customer shall reimburse the Company for all associated costs.
7. The Company will, at Customer's expense, modify, replace, relocate or change the position of any properly operating fixtures or poles contracted for under this rate as requested in writing by the Customer. The Company will, at the Company's expense, modify, replace, relocate or change the position of a fixture or pole contracted for under this rate at the end of the contract term and upon receipt of a new 60 month contract for the new installation.
8. The initial term of the contract for lights under this rate is 60 months commencing on the date service is connected. After expiration of the initial term, the contract shall continue in force until terminated upon thirty (30) days prior written notice given by either of the parties to the other.
9. If Customer terminates service or requests removal of any Company-owned area lighting facilities before expiration of a 60-month period after installation, Customer shall pay the lesser of the estimated labor charges for installation and removal of the equipment, or the remaining balance of monthly fees to satisfy the 60 month period. If Customer vacates premises within 60 months after installation and the transfer of monthly lighting charges to a successor Customer is pending, the Company may elect to terminate service at no additional cost to the customer.
10. Customer shall indemnify and hold harmless the Company, from and against any and all liability for injuries or damages to persons or property arising or resulting from (a) any interruption or modification of service requested or caused by the Customer; or (b) any lighting, requested by Customer or third party, which does not conform to the Illuminating Engineering Society (IES) Recommended Practices.

**LED STREET LIGHTING SERVICE RATE LED1**

AVAILABILITY

To all municipal or governmental customers contracting for LED (light emitting diode) street lighting service by means of Company-owned and maintained lighting facilities subject to the availability of Company approved materials and completion of required engineering. This tariff is available until June 30, 2014.

RATE

Facilities Charge:

One time charge equal to the estimated installed cost of the lighting and related facilities, paid prior to installation of facilities, and monthly facilities charge of one half of one percent (0.5 %) of the estimated installed cost of all lighting and related facilities.

Energy Charge:

| <u>Capacity</u> | <u>Non-Capacity</u> | <u>Total</u>      |
|-----------------|---------------------|-------------------|
| \$0.01719       | \$0.08062           | \$0.09781 per kWh |

The kWh usage to be billed shall be calculated by multiplying the rated input wattage of the original fixture and related accessory equipment by 350 hours.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. Upon completion of a signed Agreement and payment, the Company will furnish, install, own and operate a complete LED lighting unit and will supply all electric energy and normal maintenance for the operation of the unit. A lighting unit may include an LED fixture, bracket, control, and monitoring device. This rate requires use of existing Company-owned wood poles and available 120-volt service. Where additional primary and/or secondary facilities are required, the Customer shall pay the full cost of installation.
2. The Company will initiate a first response to maintain lighting units within 72 hours of notification by the Customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which luminaires are out of service, and no adjustments will be made to the Facilities Charge or energy consumption as a result of component or unit replacement. After a period of 10 years from installation, normal maintenance shall continue but replacement of the fixture or major fixture components are at Customer discretion and require reimbursement of expenses and a new or revised Agreement.
3. In the event of abnormal or excessive maintenance due to frequent vandalism or other causes not related to the quality of material or workmanship, the Customer shall reimburse the Company for all associated costs. The Company shall be responsible for tree trimming only within those work zones which are restricted to qualified utility workers.
4. Luminaires will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise, providing dusk-to-dawn operation approximately 4,200 hours per year.
5. The Company will, at Customer's expense, modify, replace, relocate, change the position, or temporarily remove and reinstall any properly operating Company-owned poles or fixtures contracted for under this rate as requested in writing by the Customer or as required by a governing authority.

\*Not all fixture classes may be available.

\*\*Initial Term under this rate is 84 billed months.

\*\*\*Prior to installation of facilities, the customer shall pay the total estimated installed cost of all Non-Standard lighting related facilities.

*Energy Charge (per month, per light fixture):*

The Company uses the kWh usage brackets below to determine the appropriate per light fixture monthly charge. To determine the kWh usage bracket for each light fixture, the Company will multiply 103% of the rated input wattage of the original light fixture and related accessory equipment by the estimated average monthly burn hours and round to the nearest whole number.

| Monthly |        | Monthly |         | Monthly |         |
|---------|--------|---------|---------|---------|---------|
| kWh     | Charge | kWh     | Charge  | kWh     | Charge  |
| 0-3     | \$0.48 | 40-42   | \$6.77  | 79-81   | \$13.05 |
| 4-6     | \$0.97 | 43-45   | \$7.25  | 82-84   | \$13.53 |
| 7-9     | \$1.45 | 46-48   | \$7.73  | 85-87   | \$14.01 |
| 10-12   | \$1.93 | 49-51   | \$8.22  | 88-90   | \$14.50 |
| 13-15   | \$2.42 | 52-54   | \$8.70  | 91-93   | \$14.98 |
| 16-18   | \$2.90 | 55-57   | \$9.18  | 94-96   | \$15.46 |
| 19-21   | \$3.38 | 58-60   | \$9.67  | 97-99   | \$15.95 |
| 22-24   | \$3.87 | 61-63   | \$10.15 | 100-102 | \$16.43 |
| 25-27   | \$4.35 | 64-66   | \$10.63 | 103-105 | \$16.91 |
| 28-30   | \$4.83 | 67-69   | \$11.12 | 106-108 | \$17.40 |
| 31-33   | \$5.32 | 70-72   | \$11.60 | 109-111 | \$17.88 |
| 34-36   | \$5.80 | 73-75   | \$12.08 | 112-114 | \$18.36 |
| 37-39   | \$6.28 | 76-78   | \$12.57 | 115-117 | \$18.85 |

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.01.

To determine the total kWh usage subject to the PSCR, Energy Waste Reduction Surcharge, and the Tax Cuts and Jobs Act of 2017 Credit each month, the Company will add together the maximum kWhs of each light fixture's associated usage bracket. The maximum kWhs for each bracket are shown in the Energy Charge section above.

Source Charge, LED: \$1.00 per month, per light fixture

**LATE PAYMENT CHARGE**

A 1.5% per month late payment charge will be applied to outstanding charges past due.

**LED STREET LIGHTING SERVICE RATE LED1**  
**(Continued from Sheet No. D-50.00)**

CONDITIONS OF DELIVERY (Cont.):

6. If the Customer, or a governing authority, terminates service or requests the permanent removal of any Company-owned LED lighting facilities within 10 years of installation, the Customer shall reimburse the Company for the lesser of the estimated labor charges for removal of the equipment, or the remaining balance of Facilities Charges to satisfy the 10 year period. Permanent removal of pole mounted lighting facilities more than 10 years after installation shall be at no cost to the Customer.
7. When necessary, the Customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install/remove lighting facilities on public or private property without expense to the Company. The Customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the Customer is responsible for damages. All installations shall be in accordance with Company construction standards and any other codes the Company determines to be applicable.
8. Part-night, temporary or seasonal service is not available under this rate unless metered, and the Facilities Charge shall continue until unit is permanently disconnected by Company.
9. Subject to Company approval, the Company will allow municipal Customers to make attachments of temporary Christmas lighting and/or decorations on Company-owned light poles. The Customer must execute an annual agreement for such attachments and must meet all conditions thereof. Estimated energy consumption will be billed under the current Cg1 energy rate. Time and material charges for installation removal or associated maintenance may also apply.
10. Electric service will not be furnished hereunder for breakdown for standby purposes where another source of power is available to the Customer. Energy furnished under this rate shall not be used for purposes other than those specified hereunder and shall not be resold.
11. Customer shall indemnify and hold harmless the Company, from and against any and all liability for injuries or damages to persons or property arising or resulting from (a) any interruption or modification of service requested or caused by the Customer; or (b) any lighting, requested by Customer or third party, which does not conform to the Illuminating Engineering Society (IES) Recommended Practices.
12. The lighting agreement shall continue in force until terminated upon 30 days' prior written notice given by either of the parties to the other. The Company may remove any and/or all lighting facilities upon termination.

**LED STREET LIGHTING SERVICE RATE LED1  
(Continued from Sheet No. D-51.00)**

CONDITIONS OF DELIVERY

1. Upon completion of a signed Agreement and payment of the Installation Charge, **or at customer's option, payment of the installation and removal costs pursuant to Condition of Delivery No. 16**, the Company shall furnish, install, own and operate a complete LED lighting unit and will supply all electric energy and normal maintenance, as defined below, for the operation of the unit. A Standard LED lighting unit shall include an LED-source luminaire on a 2 to 6 foot arm, mounted on an existing Company-owned wood pole, with a control device wired for operation. A Non-Standard LED lighting unit may include a lighting-only pole, LED luminaire, mounting bracket, and control device wired for operation. Light Fixture Class is designated on the installation Agreement, and does not change. Where additional primary, secondary, and/or lighting facilities are required or requested for the lighting unit, the customer shall pay the full cost of installation.
2. New poles required solely for Standard lighting are not available under this rate. Area lighting poles and circuit being provided by the Company prior to September 16, 2002, will continue to be provided for a monthly facilities charge of \$2.58 for each pole and \$2.54 for each span of circuit installed.
3. Upon customer request and completion of a signed Agreement, the Company will replace or convert an existing Standard High Intensity Discharge (HID) fixture with a Company-approved LED unit. The customer shall pay removal charges for the existing fixture, if required under the current Agreement, and the appropriate Installation Charge for the LED fixture in advance. **The customer may, at their option, choose to pay for replacement or conversion in accordance with Condition of Delivery No. 16.** If replacement is performed in conjunction with other unrelated lighting service at that pole (e.g. lamp or fixture replacement), the Installation Charge may be reduced at the discretion of the Company. The new LED unit shall be considered a new installation and subject to the Conditions and Rates of this tariff.
4. Upon customer request and completion of a signed Agreement, the Company will replace or convert an existing Non-Standard HID fixture with a Company-approved LED unit. The customer shall pay the full cost of replacement or conversion prior to installation. **The customer may, at their option, choose to pay for replacement or conversion in accordance with Condition of Delivery No. 16.** If replacement is performed in conjunction with other unrelated lighting service at that pole (e.g. lamp or fixture replacement), the cost of replacement may be reduced at the discretion of the Company. The entire LED lighting unit shall become subject to the Conditions and Rates of this tariff, though non-replaced components shall retain their original in-service date for warranty purposes.
5. The Initial Term of the Agreement for lights under this rate is 84 billed months, with billing effective as of service connection. After the Initial Term is satisfied, the Agreement shall continue in force until terminated upon thirty (30) days prior written notice given by either of the parties to the other. The Company may remove any and/or all lighting facilities upon termination.
6. The Company will initiate a first response to maintain lighting units within 72 hours of notification by the customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which luminaires are out of service, and no adjustments will be made to monthly charges as a result of component or unit replacement.
7. Normal maintenance for lighting fixtures including failure analysis, repair and replacement shall be performed by the Company until the facilities are removed. Non-Standard poles and secondary facilities are warranted for 15 years from installation, after which replacement or customer requested repainting or refinishing is at the discretion of the Company and may be at customer expense. Replacement equipment shall have reasonably equivalent performance and appearance to original equipment, as determined by the Company.

**CONDITIONS OF DELIVERY**

1. *Upon completion of a signed Agreement and payment of the Installation Charge, the Company shall furnish, install, own and operate a complete LED lighting unit and will supply all electric energy and normal maintenance, as defined below, for the operation of the unit. A Standard LED lighting unit shall include an LED-source luminaire on a 2 to 6 foot arm, mounted on an existing Company-owned wood pole, with a control device wired for operation. A Non-Standard LED lighting unit may include a lighting-only pole, LED luminaire, mounting bracket, and control device wired for operation. Light Fixture Class is designated on the installation Agreement, and does not change. Where additional primary, secondary, and/or lighting facilities are required or requested for the lighting unit, the customer shall pay the full cost of installation.*
2. *New poles required solely for Standard lighting are not available under this rate. Area lighting poles and circuit being provided by the Company prior to September 16, 2002, will continue to be provided for a monthly facilities charge of \$2.58 for each pole and \$2.54 for each span of circuit installed.*
3. *Upon customer request and completion of a signed Agreement, the Company will replace or convert an existing Standard High Intensity Discharge (HID) fixture with a Company-approved LED unit. The customer shall pay removal charges for the existing fixture, if required under the current Agreement, and the appropriate Installation Charge for the LED fixture in advance. If replacement is performed in conjunction with other unrelated lighting service at that pole (e.g. lamp or fixture replacement), the Installation Charge may be reduced at the discretion of the Company. The new LED unit shall be considered a new installation and subject to the Conditions and Rates of this tariff.*
4. *Upon customer request and completion of a signed Agreement, the Company will replace or convert an existing Non-Standard HID fixture with a Company-approved LED unit. The customer shall pay the full cost of replacement or conversion prior to installation. If replacement is performed in conjunction with other unrelated lighting service at that pole (e.g. lamp or fixture replacement), the cost of replacement may be reduced at the discretion of the Company. The entire LED lighting unit shall become subject to the Conditions and Rates of this tariff, though non-replaced components shall retain their original in-service date for warranty purposes.*
5. *The Initial Term of the Agreement for lights under this rate is 84 billed months, with billing effective as of service connection. After the Initial Term is satisfied, the Agreement shall continue in force until terminated upon thirty (30) days prior written notice given by either of the parties to the other. The Company may remove any and/or all lighting facilities upon termination.*
6. *The Company will initiate a first response to maintain lighting units within 72 hours of notification by the customer. Conditions may require repeat visits to complete repairs. No credit will be allowed for periods during which luminaires are out of service, and no adjustments will be made to monthly charges as a result of component or unit replacement.*
7. *Normal maintenance for lighting fixtures including failure analysis, repair and replacement shall be performed by the Company until the facilities are removed. Non-Standard poles and secondary facilities are warranted for 15 years from installation, after which replacement or customer requested repainting or refinishing is at the discretion of the Company and may be at customer expense. Replacement equipment shall have reasonably equivalent performance and appearance to original equipment, as determined by the Company.*
8. *In the event of abnormal or excessive maintenance due to frequent vandalism or other external or natural causes not related to the quality of material or workmanship, the customer shall reimburse the Company for all associated costs. The Company shall only be responsible for tree trimming within those work zones which are restricted to qualified utility workers.*

in Case No. U-18437

**LED STREET LIGHTING SERVICE RATE LED1**  
**(Continued from Sheet No. D-51.01)**

CONDITIONS OF DELIVERY (cont.)

8. In the event of abnormal or excessive maintenance due to frequent vandalism or other external or natural causes not related to the quality of material or workmanship, the customer shall reimburse the Company for all associated costs. The Company shall only be responsible for tree trimming within those work zones which are restricted to qualified utility workers.
9. Unless alternate controls are negotiated, luminaires will automatically be switched on approximately 30 minutes after sunset and off 30 minutes before sunrise, providing dusk-to-dawn operation approximately 4,200 hours per year, or an estimated average of 350 hours per month. Temporary or seasonal service is not available under this rate. Monthly charges shall continue until the unit is permanently disconnected by the Company.
10. The Company will, at customer's expense, modify, replace, relocate, change the position, or temporarily remove and reinstall any properly operating Company-owned poles or light fixtures contracted for under this rate as requested in writing by the customer or as required by a governing authority. After satisfaction of the Initial Term and execution of a new Agreement the Company may, at the Company's expense, modify, replace, relocate or change the position of a Standard light fixture contracted for under this rate.
11. If the customer, or a governing authority, terminates service or requests the permanent removal of any Company-owned LED lighting facilities prior to satisfaction of the Initial Term, the customer shall reimburse the Company in an amount equal to the Early Removal Multiplier x the remaining months to satisfy the Initial Term. The Company may elect to forego these charges in the case of a pending transfer of monthly charges to a successor account. Permanent removal of lighting facilities after the Initial Term shall be at no cost to the customer.
12. When necessary, the customer shall grant or obtain permissions, easements, ordinance satisfaction, and/or permits to the Company to install/remove lighting facilities on public or private property without expense to the Company. The customer is responsible for marking all privately owned underground facilities. If such facilities are not marked correctly and are subsequently damaged, the customer is responsible for damages. All installations shall be in accordance with Company construction standards and any other codes the Company determines to be applicable.
13. Subject to Company approval, the Company may allow municipal customers to make attachments of temporary holiday lighting and/or decorations on Company-owned light poles. The customer must execute an annual agreement for such attachments and must meet all conditions thereof. Estimated energy consumption will be billed under the current CG1 energy rate. Time and material charges for installation, removal, transfer or associated maintenance may also apply.
14. Energy furnished under this rate shall not be used for purposes other than those specified hereunder and shall not be resold.
15. Customer shall indemnify and hold harmless the Company, from and against any and all liability for injuries or damages to persons or property arising or resulting from (a) any interruption or modification of service requested or caused by the customer, third party or act of God; or (b) any lighting design support provided by the Company including, but not limited to, the Customer's reliance on or implementation of any recommendations or conclusions by the Company related to lighting design.

**SECONDARY SERVICE FOR MUNICIPAL DEFENSE SIREN SERVICE RATE Mgl**

AVAILABILITY

To incorporated municipalities for the periodic operation of defense sirens.

RATE

| <u>Capacity</u>     | <u>Non-Capacity</u> | <u>Total</u>  |
|---------------------|---------------------|---|
| <b><i>\$.86</i></b> | <b><i>\$.12</i></b> | \$2.98 per year or any part of a year for each 2 horsepower or fraction thereof for each siren installed. |

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM ANNUAL CHARGE:

The annual charge per siren plus the Energy Waste Reduction Surcharge for each month of the year or any part of a year.

LATE PAYMENT CHARGE

A 1.5% per month late payment charge will be applied to outstanding charges past due.

CONDITIONS OF DELIVERY

1. Bills will be rendered in the fourth quarter of each year, for each municipality, for service rendered in the aggregate during the calendar year.
2. The municipality shall furnish and install all sirens, including the labor and materials required for approved service connections to the nearest Company distribution line.
3. Where additional equipment or extension of lines is necessary on the part of the Company, the municipality shall pay the Company its cost of making such extension.
4. The Company will make the connection and disconnection with its distribution lines.
5. Loads other than sirens shall not be connected to the siren circuit.
6. The municipality shall furnish the Company with a map indicating the location of sirens to be operated, and shall give adequate notice of the discontinuance or addition of any sirens.
7. Service may be terminated at any time by the municipality or on six months' notice by the Company.

**CUSTOMER GENERATING SYSTEMS – NET METERING PROGRAM  
20kW OR LESS RATE - CGS Category 1**

AVAILABILITY

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's peak load for the preceding calendar year allocated to include no more than 0.5% for customers generating 20kW or less. Upon enrolling in the Net Metering Program, customers shall be eligible to continue participation for a minimum period of ten years. A participating customer may terminate participation in the Company's Net Metering Program at any time for any reason.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 Hertz, single-phase or three-phase at any Company standard voltage available at the customer-owned generating system site.

CUSTOMER ELIGIBILITY

To be eligible to participate in the Net Metering Program, customers must generate a portion or all of their own retail electricity requirements using a renewable energy resource. A renewable energy resource comes from the sun or from thermal inertia of the earth and minimizes the output of toxic material in the conversion of the energy and includes, but is not limited to, all of the following:

- a. Biomass
- b. Solar and solar thermal energy
- c. Wind energy
- d. Kinetic energy of moving water, including the following:
  - i. Waves, tides or currents
  - ii. Water released through a dam
- e. Geothermal energy
- f. Municipal solid waste
- g. Landfill gas produced by municipal solid waste.

Eligible customers must be Full Requirements Service customers under either Residential, General Secondary or General Primary services. A customer using biomass blended with fossil fuel as a renewable energy source must submit proof to the Company substantiating the percentage of the fossil fuel blend either by (1) separately metering the fossil fuel, or (2) providing other documentation that will allow the Company to correctly apply a generation credit to the output associated with the customer's renewable fuel only.

The generation equipment must be located on the customer's premises, serving only the customer's premises and must be intended primarily to offset a portion or all of the customer's requirements for electricity. At the customer's option, the generation capacity shall be determined by one of the following methods:

- (i) Aggregate nameplate capacity of the generator(s).
- (ii) An estimate of the expected annual kWh output of the generator(s).

Customers shall not be allowed to switch their generation back and forth between two or more rate schedules to circumvent the intent of rate design. At the customer's option, the customer's annual electricity needs shall be determined by one of the following methods: (1) the customer's annual energy usage, measured in kWh, during the previous 12 month period; (2) for a customer with metered demand data available, the maximum integrated hourly demand measured in kW during the previous 12 month period; or (3) in cases where no data, incomplete data, or incorrect data for the customer's past annual energy usage is available, or where the customer is making changes on-site that will affect the customer's future total annual energy usage, the Company and the customer shall mutually agree on a method to determine the customer's future annual energy usage.

in Case No. U-18061

**CUSTOMER GENERATING SYSTEMS – NET METERING PROGRAM**  
**20kW OR LESS RATE - CGS Category 1**  
**(Continued from Sheet No. D-53.00)**

CUSTOMER ELIGIBILITY (Cont.)

The requirements for interconnecting a generator with the Company's facilities are contained in the Michigan Public Service Commission's Electric Interconnection and Net Metering Standards Rules (R 460.601a-460.656) and the Company's Michigan Electric Utility Generator Interconnection Requirements, copies of which will be provided to customers upon request. Customers shall be provided a copy of the Company's Generator Interconnection Application and Net Metering Application and shall be required to complete both applications and submit them with all applicable application fees for review and approval prior to interconnection of their generators to the Company's facilities. The Company's interconnection application fee is \$75 and net metering application fee is \$25. All requirements of the MPSC's Electric Interconnection and Net Metering Standards and the Company's Net Metering Program must be met prior to commencing Net Metering service.

A customer who is enrolled in the Net Metering Program will continue to take electric service under the Company's applicable service tariff.

METERING

The Company may determine the customer's net usage using the customer's existing meter if it is capable of reverse registration or may, at the Company's expense, install a single meter with separate registers measuring power flow in each direction. If the Company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If the customer's meter is not capable of reverse registration and if meter upgrades or modifications are required, the Company shall provide a meter or meters capable of measuring the flow of energy in both directions to the customer at cost. Only the incremental cost above that for meter(s) provided by the Company to similarly situated non-generating customers shall be paid by the eligible customer. A generator meter will be supplied to the customer, at the customer's request, at cost.

RATE

Monthly Charges:

Customers enrolled in the Net Metering Program with a system capable of generating 20 kW or less qualify for true net metering billings or credits under the program. The customer shall pay the Distribution Charges and Power Supply Charges associated with the standard service tariff applicable to the customer when the customer's monthly net usage results in a net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer shall be credited for the energy provided to the Company at full retail rate from the applicable service tariff.

Standby charges shall not be applied to customers with systems capable of generating 20 kW or less.

For customers who qualify for true net metering under the Net Metering Program, the credit for any excess generation, as determined by each month's meter reading, shall be credited against the following month's bill. Any credit carried forward to the following month that is not used up that month shall be carried forward for use in subsequent billing periods. If a customer terminates service with the Company while having a net metering credit amount on the customer's account, the Company shall refund the remaining credit amount to the customer following a final reading by the Company of the customer's net meter.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

Customers enrolled in the Net Metering Program with a system capable of generating 20 kW or less qualify for true net metering billings or credits under the program. The customer shall pay the Distribution Charges and Power Supply Charges associated with the standard service tariff applicable to the customer when the customer's monthly net usage results in a net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer shall be credited for the energy provided to the Company at full retail rate from the applicable service tariff.

Standby charges shall not be applied to customers with systems capable of generating 20 kW or less.

For customers who qualify for true net metering under the Net Metering Program, the credit for any excess generation, as determined by each month's meter reading, shall be credited against the following month's bill. Any credit carried forward to the following month that is not used up that month shall be carried forward for use in subsequent billing periods. If a customer terminates service with the Company while having a net metering credit amount on the customer's account, the Company shall refund the remaining credit amount to the customer following a final reading by the Company of the customer's net meter.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

Issued under authority of the  
Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**CUSTOMER GENERATING SYSTEMS – MODIFIED NET METERING PROGRAM  
OVER 20kW-150kW – RATE CGS Category 2**

AVAILABILITY

Available to retail customers taking full requirements service with renewable electric generation facilities that are interconnected with the Company's power supply and rated at greater than 20 kW and not more than 150 kW, where customer's delivery offsets retail electric power supply at the same site. If a customer has more than one electric generator, the generator's rating(s) shall be summed and the sum may not exceed 150 kW.

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's previous year's peak demand measured in kW for the Company's retail load, allocated to include no more than 0.25% for customers generating at greater than 20 kW and not more than 150 kW.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 Hertz, single-phase (with Company approval) or three-phase at any Company standard voltage available at the customer-owned generating system site.

RATE

Distribution Charges:

A customer enrolled in the Modified Net Metering Program shall pay the Distribution Charges at the Company's standard service tariff applicable to the customer for the customer's total consumption of energy from the Company.

Power Supply Charges:

A customer enrolled in the Modified Net Metering Program shall pay the Power Supply Charges associated with the Company's standard service tariff applicable to the customer.

Energy Charges:

Charges that are related to a \$/kWh charge will be charged when the customer's net usage results in a monthly net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer's \$/kWh charges shall be credited based on the Excess Generation rate below.

Demand Charges:

The customer shall pay the demand charge associated with the Company's standard service tariff applicable to the customer for the customer's total consumption of energy from the Company.

Excess Generation:

Excess generation shall be credited at the customer's applicable standard tariff's power supply service energy charges (\$/kWh). The credit shall appear on the customer's next bill. Any credit not used to offset current charges shall be carried forward for use in subsequent billing periods.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

The Company may determine the customer's usage using the customer's existing meter if it has separate registers measuring power flow in each direction. If the Company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If the customer's meter is not capable of measuring power flow in both directions, and if meter upgrades or modifications are required, the Company shall provide a meter or meters capable of measuring the flow of energy in both directions to the customer at cost. Only the incremental cost above that for meter(s) provided by the Company to similarly situated non-generating customers shall be paid by the eligible customer. Generator meters will be provided by the Company. The cost of the generator meter shall be considered a cost of operating the Net Metering Program.

**CUSTOMER GENERATING SYSTEMS OVER 150 kW RATE CGS Large**

AVAILABILITY

To customers owning generating systems, with an aggregate rating in excess of 150 kW, who desire to sell electric energy to the Company. For the purposes of this schedule, "customer" is defined as the person or corporate entity who desires to sell electric energy to the Company. **Customers are not required to take electric service deliveries from the Company. This rate schedule is closed to new accounts and to new customers.** The Company may deny availability of this rate if the Company finds that the customer causes fluctuations on the distribution system so as to impair general reliability of service.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 Hertz, single-phase (with Company approval) or three-phase at any Company standard voltage available at the customer-owned generating system site.

RATE

Facilities Charge:

Non-demand metered customers \$0.04110 per day  
Demand metered customers \$0.11507 per day

| <u>Payment per kWh</u>     | <u>Less than 601 Volts</u> | <u>601 Volts to &lt;69kV</u> | <u>69kV and above</u> |
|----------------------------|----------------------------|------------------------------|-----------------------|
| During on-peak period (a)  | \$0.04220                  | \$0.04392                    | \$0.04447             |
| During off-peak period (b) | \$0.02754                  | \$0.02866                    | \$0.02902             |

- (a) The on-peak period payment will apply to those kWhs delivered to the Company during the time period specified in the customer's time-of-use rate schedule that corresponds to the customer's class of service applicable when the customer buys from the Company.

The on-peaks periods occur Monday through Friday, excluding those days designated as legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

- (b) The off-peak period payment will apply to those kWhs delivered to the Company during all hours other than on-peak hours.

Customers not served on a time-of-use rate schedule or not purchasing energy from the Company will be assigned a peak period of 9am to 9pm.

MINIMUM CHARGE: The monthly minimum charge is the facilities charge.

CONDITIONS OF PURCHASE

1. A customer operating electric generating equipment shall not connect it in parallel with the Company's electric system unless the customer has entered into a standard Distributed Generation Interconnection Agreement with the Company and the customer has provided, at customer's expense, protective and synchronizing equipment satisfactory to the Company.
2. The customer must comply with the various applicable national, state and local electrical codes, rules and regulations; the electric service rules and regulations of the Company; and the requirements of the Michigan Public Service Commission Electric Interconnection Standards R 460.481 through R 460.489. The Company may request proof of such compliance prior to initiation of service. Proof of such compliance consists of a municipal inspection certificate, or in locations where there is not municipal inspection, an affidavit furnished by the contractor or other person doing the work.

**CUSTOMER GENERATING SYSTEMS OVER 150 kW RATE CGS Large**  
**(Continued from Sheet No. D-59.00)**

CONDITIONS OF PURCHASE (Cont.):

13. The customer may contract for supplementary, standby and maintenance electric service from the Company under the rate schedule corresponding to the customer's class of service. General primary and general secondary customers who contract for supplementary, standby and maintenance electric service will be served under the auxiliary service provisions of their respective Conditions of Delivery.
  
14. For billing periods during which no energy was sold to the Company by a customer on Rate Schedule CGS1 and the customer's bill would reflect only the facilities charge, the billing of such charge may be deferred until the next billing period during which energy is sold. If six consecutive billing periods pass during which no energy is sold to the Company by the customer on Rate Schedule CGS1, or if such customer terminates service under this rate schedule, the Company may bill the customer for the deferred facilities charges.

**PARALLEL GENERATION-PURCHASE PG-2M-STANDARD OFFER**

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 550 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 150 KW or less have the option of selling energy to the Company under this PG-2M tariff, or the CGS Category 1 tariff or the CGS Category 2 tariff.

- (1) *QFs with generation design capacity at or below 150 kW shall be eligible to receive compensation based on the Company's full avoided cost rates including capacity and energy, regardless of the Company's capacity need as determined and approved by the Commission in its Order in Case No. U-21081.*
- (2) *QFs with generation design capacity between 150 kW and 550 kW shall be eligible to receive compensation for energy at the Company's avoided energy cost rate as outlined below. The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems with a design capacity above 150 kW.*

MONTHLY RATES

Facilities Charge

Residential, Non-Demand Secondary customers, and customers not taking electric service deliveries from the Company with customer owned generation capacity of less than 100 kW: Cg1 single or three phase facilities charge  
 Demand Customers and customers not taking electric service deliveries from the Company with customer owned generation capacity equal to or greater than 100 kW: Cg3 facilities charge

Charges for Deliveries from Company

Deliveries from the Company to the customer shall be billed in accordance with the standard applicable rate schedules of the Company.

Avoided Energy Cost Rate for Deliveries to Company

*For all energy supplied by the customer to the Company, the customer shall receive an energy payment equal to the kilowatt-hours supplied to the Company multiplied by the following energy rate:*

| <u>Year</u> | <u>Energy Rate</u><br>\$/kWh |
|-------------|------------------------------|
| 2021        | \$0.02718                    |
| 2022        | <b>\$0.06439</b>             |
| 2023        | <b>\$0.06567</b>             |

Effective for service rendered on and after May 12, 2022

Issued under authority of the  
 Michigan Public Service Commission  
 Dated May 12, 2022  
 in Case No. U-21081

**PARALLEL GENERATION-PURCHASE PG-2M-STANDARD OFFER**

**AVAILABILITY**

*To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 550 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 150 KW or less have the option of selling energy to the Company under this PG-2M tariff, or the CGS Category 1 tariff or the CGS Category 2 tariff.*

**MONTHLY RATES**

**Facilities Charge**

*Residential, Non-Demand Secondary customers, and customers not taking electric service deliveries from the Company with customer owned generation capacity of less than 100 kW: Cg1 single or three phase facilities charge  
Demand Customers and customers not taking electric service deliveries from the Company with customer owned generation capacity equal to or greater than 100 kW: Cg3 facilities charge*

**Charges for Deliveries from Company**

*Deliveries from the Company to the customer shall be billed in accordance with the standard applicable rate schedules of the Company.*

**Energy Credit Deliveries to Company**

**On-peak Energy Credit**

*January 1, 2019 through December 31, 2019: \$.02612 per kWh on-peak  
January 1, 2020 through December 31, 2020: \$.02664 per kWh on-peak  
January 1, 2021 through December 31, 2021: \$.02718 per kWh on-peak  
January 1, 2022 through December 31, 2022: \$.02772 per kWh on-peak  
January 1, 2023 through December 31, 2023: \$.02827 per kWh on-peak  
January 1, 2024 through December 31, 2024: \$.02884 per kWh on-peak  
January 1, 2025 through December 31, 2025: \$.02942 per kWh on-peak  
January 1, 2026 through December 31, 2026: \$.03000 per kWh on-peak*

*Customers shall receive the applicable on-peak energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the on-peak energy credit shall equal the average of the on-peak Day Ahead Locational Marginal Prices ("DA LMP") at the MIUP.WEPM load zone node. The rates shall be reset annually on January 1 of each year based on the hourly average on-peak DA LMP at the MIUP.WEPM load zone node of the most recently completed November 1 to October 31 period.*

**Off-peak Energy Credit**

*January 1, 2019 through December 31, 2019: \$.02612 per kWh off-peak  
January 1, 2020 through December 31, 2020: \$.02664 per kWh off-peak  
January 1, 2021 through December 31, 2021: \$.02718 per kWh off-peak  
January 1, 2022 through December 31, 2022: \$.02772 per kWh off-peak  
January 1, 2023 through December 31, 2023: \$.02827 per kWh off-peak  
January 1, 2024 through December 31, 2024: \$.02884 per kWh off-peak  
January 1, 2025 through December 31, 2025: \$.02942 per kWh off-peak  
January 1, 2026 through December 31, 2026: \$.03000 per kWh off-peak*

| Filed DBR                             |

Effective for service rendered on and after January 1, 2019

Issued under authority of the  
Michigan Public Service Commission  
Dated December 20, 2018  
in Case Nos. U-18095 and 18096

**PARALLEL GENERATION-PURCHASE PG-2M-STANDARD OFFER**  
**(Continued from Sheet No. D-60.01)**

Avoided Energy Cost Rate for Deliveries to Company (cont.)

shall equal the average of the off-peak DA LMP at the MIUP.WEPM load zone node. The rates shall be reset annually on January 1 of each year based on the hourly average DA LMP at the MIUP.WEPM load zone node of the most recently completed November 1 to October 31 period.

Capacity Payment

QFs with generation design capacity at or below 150 kW shall receive a capacity payment reflecting the most recent Midcontinent Independent System Operator (“MISO”) capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current on-peak rate until May 31, **2025** will be **\$0.00237/kWh**. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses. The energy and capacity values will be multiplied by these adjustment factors:

|   |         |
|---|---------|
| Customers served on a residential rate schedule   | 1.06343 |
| Customers served on a secondary rate schedule   | 1.05529 |
| Customers served on a primary rate (low & med voltage) schedule   | 1.02031 |
| Customers served on a primary rate schedule or special contract (high voltage)                            | 1.00000 |
| Generator only customers metered at a secondary voltage less than 4,160 volts                             | 1.05529 |
| Generator only customers metered at a primary voltage less than or equal to 4,160 volts                   | 1.02031 |
| Generator only customers metered at a primary voltage greater than 4,160 volts and less than 69,000 volts | 1.02031 |
| Generator only customers metered at a primary voltage greater than or equal to 69,000 volts               | 1.00000 |

Line loss savings will be evaluated on a case by case basis.

ON-PEAK and OFF-PEAK HOURS

The on-peak and off-peak time periods will correspond to the tariffed rate schedule under which the customer purchases energy from the Company. Customers not purchasing energy from the Company will be assigned a peak period of 8 am to 8 pm.

HOLIDAYS

The days of the year which are considered holidays are: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

MINIMUM CHARGE

The monthly minimum charge shall be the facilities charge.

| Filed by: DW                          |

Effective for service rendered on and after June 1, 2021

Issued under authority of the  
Michigan Public Service Commission  
Dated December 20, 2018  
in Case Nos. U-18095 and 18096

**PARALLEL GENERATION-PURCHASE PG-2M-STANDARD OFFER**  
**(Continued from Sheet No. D-60.01)**

MONTHLY RATES (cont.)

Off-peak Energy Credit (cont.)

Customers shall receive the applicable off-peak energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the off-peak energy credit shall equal the average of the off-peak DA LMP at the MIUP.WEPM load zone node. The rates shall be reset annually on January 1 of each year based on the hourly average off-peak DA LMP at the MIUP.WEPM load zone node of the most recently completed November 1 to October 31 period.

Capacity Payment

A capacity credit shall be paid reflecting the most recent Midcontinent Independent System Operator (“MISO”) capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current on-peak rate until May 31, 2021 will be *\$0.00059/kWh*. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses. The energy and capacity values will be divided by these adjustment factors:

|   |         |
|---|---------|
| Customers served on a residential rate schedule   | 1.06343 |
| Customers served on a secondary rate schedule   | 1.05529 |
| Customers served on a primary rate (low & med voltage) schedule   | 1.02031 |
| Customers served on a primary rate schedule or special contract (high voltage)                            | 1.00000 |
| Generator only customers metered at a secondary voltage less than 4,160 volts                             | 1.05529 |
| Generator only customers metered at a primary voltage less than or equal to 4,160 volts                   | 1.02031 |
| Generator only customers metered at a primary voltage greater than 4,160 volts and less than 69,000 volts | 1.02031 |
| Generator only customers metered at a primary voltage greater than or equal to 69,000 volts               | 1.00000 |

Line loss savings will be evaluated on a case by case basis.

ON-PEAK and OFF-PEAK HOURS

The on-peak and off-peak time periods will correspond to the tariffed rate schedule under which the customer purchases energy from the Company. Customers not purchasing energy from the Company will be assigned a peak period of 8 am to 8 pm.

HOLIDAYS

The days of the year which are considered holidays are: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

MINIMUM CHARGE

The monthly minimum charge shall be the facilities charge.

Effective for service rendered on and after January 1, 2019

Issued under authority of the  
Michigan Public Service Commission  
Dated December 20, 2018  
in Case Nos. U-18095 and 18096

**PARALLEL GENERATION-PURCHASE PG-3M**

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 550 kW or less have the option of selling energy to the Company under this PG-3M tariff or PG-2M tariff. *The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems eligible for this tariff.*

MONTHLY RATES

Facilities Charge

Residential, Non-Demand Secondary customers, and customers not taking electric service deliveries from the Company with customer owned generation capacity of less than 100 kW: Cg1 single or three phase facilities charge  
 Demand Customers and customers not taking electric service deliveries from the Company with customer owned generation capacity equal to or greater than 100 kW: Cg3 facilities charge

Avoided Energy Cost Rate

*For all energy supplied by the customer to the Company, the customer shall receive an energy payment equal to the kilowatt-hours supplied to the Company multiplied by the following energy rate:*

| <i>Year</i> | <i>Energy Rate<br/>\$/kWh</i> |
|-------------|-------------------------------|
| 2021        | \$0.02718                     |
| 2022        | <b>\$0.06439</b>              |
| 2023        | <b>\$0.06567</b>              |
| 2024        | <b>\$0.06699</b>              |
| 2025        | <b>\$0.06834</b>              |
| 2026        | <b>\$0.06969</b>              |
| <b>2027</b> | <b>\$0.07108</b>              |
| <b>2028</b> | <b>\$0.07252</b>              |
| <b>2029</b> | <b>\$0.07396</b>              |

Customers shall receive the applicable energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the Customer will be compensated at the **DA** LMP at MIUP.WEPM load zone node expressed in \$/kWh for every hour.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the energy factors and capacity payments to reflect system losses. The energy and capacity values will be **multiplied** by these adjustment factors:

|   |         |

January 1, 2025 through December 31, 2025: \$.02942 per all kWhs  
January 1, 2026 through December 31, 2026: \$.03000 per all kWhs

Customers shall receive the applicable energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the Customer will be compensated at the Day Ahead LMP at MIUP.WEPM load zone node expressed in \$/kWh for every hour.

Capacity Payment

A capacity credit shall be paid reflecting the most recent Midcontinent Independent System Operator ("MISO") capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current all kWhs rate until May 31, 2021 will be **\$.00021/kWh**. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the energy factors and capacity payments to reflect system losses. The energy and capacity values will be divided by these adjustment factors:

|   |         |
|---|---------|
| Customers served on a residential rate schedule | 1.06343 |
| Customers served on a secondary rate schedule   | 1.05529 |

in Case Nos. U-18095 and 18096

**PARALLEL GENERATION-PURCHASE PG-3M**

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 550 kW or less have the option of selling energy to the Company under this PG-3M tariff or PG-2M tariff.

MONTHLY RATES

Facilities Charge

Residential, Non-Demand Secondary customers, and customers not taking electric service deliveries from the Company with customer owned generation capacity of less than 100 kW: Cg1 single or three phase facilities charge  
Demand Customers and customers not taking electric service deliveries from the Company with customer owned generation capacity equal to or greater than 100 kW: Cg3 facilities charge

Energy Credit

January 1, 2019 through December 31, 2019: \$.02612 per all kWhs  
January 1, 2020 through December 31, 2020: \$.02664 per all kWhs  
January 1, 2021 through December 31, 2021: \$.02718 per all kWhs  
January 1, 2022 through December 31, 2022: \$.02772 per all kWhs  
January 1, 2023 through December 31, 2023: \$.02827 per all kWhs  
January 1, 2024 through December 31, 2024: \$.02884 per all kWhs  
January 1, 2025 through December 31, 2025: \$.02942 per all kWhs  
January 1, 2026 through December 31, 2026: \$.03000 per all kWhs

Customers shall receive the applicable energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the Customer will be compensated at the Day Ahead LMP at MIUP.WEPM load zone node expressed in \$/kWh for every hour.

Capacity Payment

A capacity credit shall be paid reflecting the most recent Midcontinent Independent System Operator ("MISO") capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current all kWhs rate until May 31, 2020 will be **\$.00012/kWh**. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

**PARALLEL GENERATION-PURCHASE PG-3M**  
(Continued from Sheet No. D-60.04)

**Distribution Loss Factors (cont.)**

|   |         |
|---|---------|
| Customers served on a primary rate (low & med voltage) schedule   | 1.02031 |
| Customers served on a primary rate schedule or special contract (high voltage)                            | 1.00000 |
| Generator only customers metered at a secondary voltage less than 4,160 volts                             | 1.05529 |
| Generator only customers metered at a primary voltage less than or equal to 4,160 volts                   | 1.02031 |
| Generator only customers metered at a primary voltage greater than 4,160 volts and less than 69,000 volts | 1.02031 |
| Generator only customers metered at a primary voltage greater than or equal to 69,000 volts               | 1.00000 |

Line loss savings will be evaluated on a case by case basis.

**MINIMUM CHARGE**

The monthly minimum charge shall be the facilities charge.

**PRO-RATION OF DEMAND COST FOR AUTHORIZED MAINTENANCE**

For customers billed on rates with demand charges, the demand charges other than "Customer Demand" shall be prorated if the maintenance schedule of the customer owned generation facility has been approved in advance in writing by the Company. Said pro-ration shall be based on the number of authorized days of scheduled maintenance. The customer shall pay the demand rate for the higher than normal demands due to the generation outage only for the days of authorized maintenance.

**SPECIAL RULES**

1. The Company shall install appropriate metering facilities to record all flows of energy necessary to bill the customer in accordance with the charges and credits of this rate schedule.
2. The customer shall furnish, install, and wire the necessary service entrance equipment, meter sockets, meter enclosure cabinets, or meter connection cabinets that may be required by the Company to properly meter usage and sales to the Company.
3. The requirements for interconnecting a generator with the Company's facilities are contained in the Michigan Public Service Commission's Electric Interconnection Standards Rules ([R460.481-460.489](#)) and the Company's Michigan Utility Generator Interconnection Requirements, copies of which will be provided to customers upon request. All requirements must be met prior to commencing service.

**PARALLEL GENERATION-PURCHASE PG-4M**

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 20,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten or fifteen year service agreement with the Company. Customers with generation capacity of 5,000 KW or less have the option of selling energy to the Company under this PG-4M tariff or the PG-3M tariff. ***The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems eligible for this tariff.***

NEGOTIATED RATES

Parallel generation customers have the right to request negotiated buy back rates. The following are the required procedure guidelines:

1. Except as allowed by Paragraph 3 below, the Company must respond to the customer owned generating system within 30 days of the initial receipt of the customer owned generating system written proposal, and within 30 days of receipt of any subsequent customer owned generating system written proposal;
2. The Company's rejection of the customer owned generating system written proposal must be accompanied by a counter offer relating to the specific subject matter of the customer owned generating system written proposal; and
3. If the Company is unable to respond to the customer owned generating system written proposal within 30 days it shall inform the customer owned generating system of:
  - a. Specific information needed to evaluate the customer owned generating system proposal.
  - b. The precise difficulty encountered in evaluating the customer owned generating system written proposal.
  - c. The estimated date that it will respond to the customer owned generating system written proposal.
4. The commission may become involved in the Company negotiations upon showing by either the Company or the customer owned generating system that a reasonable conclusion cannot be reached under the above guidelines. The commission may provide a waiver to the guidelines and order new negotiation requirements so that a reasonable conclusion can be reached.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags.

SPECIAL RULES

1. The Company shall install appropriate metering facilities to record all flows of energy necessary to bill the customer in accordance with the charges and credits of this rate schedule.
2. The customer shall furnish, install, and wire the necessary service entrance equipment, meter sockets, meter enclosure cabinets, or meter connection cabinets that may be required by the Company to properly meter usage and sales to the Company.
3. The requirements for interconnecting a generator with the Company's facilities are contained in the Michigan Public Service Commission's Electric Interconnection Standards Rules ([R460.481- 460.489](#)) and the Company's Michigan Utility Generator Interconnection Requirements, copies of which will be provided to customers upon request. All requirements must be met prior to commencing service.

Michigan Public Service Commission  
Dated December 20, 2018  
in Case Nos. U-18095 and 18096

**CUSTOMER GENERATING SYSTEMS – METHANE DIGESTORS - CGS Biogas**

AVAILABILITY

Available to retail customers taking full requirements service with renewable electric generation facilities that are interconnected with the Company's power supply and rated at greater than 150 kW and not more than 550 kW, where customer's delivery offsets retail electric power supply at the same site. If a customer has more than one electric generator, the generator's rating(s) shall be summed and the sum may not exceed 550 kW.

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's previous year's peak demand measured in kW for the Company's retail load, allocated to include no more than 0.25% for customers generating at greater than 150 kW and not more than 550 kW.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 Hertz, single-phase (with Company approval) or three-phase at any Company standard voltage available at the customer-owned generating system site.

RATE

Distribution Charges:

A customer enrolled in this program shall pay the Distribution Charges at the Company's standard service tariff applicable to the customer for the customer's imputed consumption. Imputed consumption is the sum of the metered on-site generation and the net of the bidirectional flow of power across the customer interconnection during the billing period.

Power Supply Charges:

A customer enrolled in this program shall pay the Power Supply Charges associated with the Company's standard service tariff applicable to the customer.

Energy Charges:

Charges that are related to a \$/kWh charge will be charged when the customer's net usage results in a monthly net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer's \$/kWh charges shall be credited based on the Excess Generation rate below.

Demand Charges:

The customer shall pay the demand charges (\$/kW) associated with the Company's standard service tariff applicable to the customer for the customer's imputed consumption. Imputed consumption is the sum of the metered on-site generation and the net of the bidirectional flow of power across the customer interconnection during the billing period.

Excess Generation:

Excess generation shall be credited at the customer's applicable standard tariff's power supply service energy charges (\$/kWh). The credit shall appear on the customer's next bill. Any credit not used to offset current charges shall be carried forward for use in subsequent billing periods.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

Metering:

The Company will utilize a meter or meters capable of measuring the flow of energy in both directions and generator output. If the Company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If meter upgrades or modifications are required, the customer shall pay the costs incurred.

in Case No. U-18061

**CUSTOMER GENERATING SYSTEMS – METHANE DIGESTORS - CGS Biogas**  
**(Continued from Sheet No. D-63.00)**

Costs and Fees:

The Company's Modified Net Metering Program has the following fees and costs:

|                                     |  |
|-------------------------------------|--|
| Application fee:                    | \$25   |
| Interconnection application fee:    | \$75   |
| Engineering Review:                 | \$0  |
| Distribution Study:                 | Actual Costs or Maximum Approved by the Commission |
| Distribution Upgrades:              | Actual Costs or Maximum Approved by the Commission |
| Company Testing and Inspection fee: | \$0  |
| All Interconnection Costs:          | Actual Costs or Maximum Approved by the Commission |

CONDITIONS OF PURCHASE

1. A renewable energy resource consisting of one or more methane digesters with an aggregate name plate capacity between 150 kW and 550 kW located on the customer's premises and metered at a single point of contact.
2. The generation equipment must be located on the customer's premises, serving only the customer's premises and must be intended primarily to offset a portion or all of the customer's requirements for electricity.
3. At the customer's option, the customer's electric needs shall be determined by one of the following methods:
  - a. The customer's annual energy usage, measured in kWh, during the previous 12-month period.
  - b. When metered demand is available, the maximum integrated hourly demand measured in kW during the previous 12-month period.
  - c. In instances where complete and correct data is not available or where the customer is making changes on-site that will affect total usage, the Company and the customer shall mutually agree on a method to determine the customer's electric needs.
4. At the customer's option, the generation capacity shall be determined by one of the following methods:
  - a. Aggregate nameplate capacity of the generator(s).
  - b. An estimate of the expected annual kWh output of the generator(s).

Customers shall not be allowed to switch their generation back and forth between two or more rate schedules to circumvent the intent of the rate design.

5. A customer using biomass blended with fossil-fuel as a renewable energy source must submit proof to the Company substantiating the percentage of the fossil fuel blend either by (1) separately metering the fossil fuel, or (2) providing other documentation that will allow the Company to correctly apply a generation credit to the output associated with the customer's renewable fuel only.
6. If a customer has more than one generator, the generator's ratings shall be summed. This sum shall be greater than 150 kW and not more than 550 kW.
7. The customer is required to provide the Company with a capacity rating in kW of the generating unit and a projected monthly and annual kWh output of the generating unit when completing the Company's Net Metering Application.
8. The requirements for interconnecting a generator with the Company's facilities are contained in the Michigan Public Service Commission's Electric Interconnection and Net Metering Standards Rules ([R 460.601a-460.656](#)) and the Company's Michigan Utility Generator Interconnection Requirements, copies of which will be provided to customers upon request. All requirements must be met prior to commencing service.

**EXPERIMENTAL RENEWABLE ENERGY RIDER ERER 1**

AVAILABILITY

Available to customers currently taking service under the Rg1, Rg2, Cg1, Cg2, and Cg5 rate schedules who pay a premium on their usage for the Company to obtain energy from generating sources that are fueled by renewable resources for 25%, 50%, or 100% of their usage.

RATE

In addition to the customer's normal charges as indicated in the rate schedule under which the customer is served, there will be an adder per kWh based on the level of participation selected by the customer as follows:

|                             |                  |
|-----------------------------|------------------|
| Energy for Tomorrow™ - 25%  | \$.00755 per kWh |
| Energy for Tomorrow™ - 50%  | \$.01510 per kWh |
| Energy for Tomorrow™ - 100% | \$.03020 per kWh |

CONDITIONS OF DELIVERY

- 1. Customers may terminate service under this rider at any time. The change will become effective with the customer's next billing cycle following the customer's termination request to the Company.*
2. In addition to the rate above, all rates and conditions of delivery of the respective rate schedule under which the customer is currently served are applicable.

**EXPERIMENTAL RENEWABLE ENERGY RIDER ERER 2**

AVAILABILITY

Available to customers currently taking service under rate schedules Cg3, Cp1, and Ms1 who nominate to pay a premium on a block of their usage to allow for the purchase of a block of energy generated by renewable resources.

RATE

In addition to the customer's normal charges as indicated in the rate schedule under which the customer is served, there will be an adder of \$.03020 per kWh, based on the block of renewable energy purchased, which is applied to the lesser of the kWh consumed or the kWh nominated for renewable energy.

CONDITIONS OF DELIVERY

1. The customer will sign an individual customer contract which will initially obligate the customer to purchase up to the customer nominated block of renewable energy each billing period for one year. Thereafter, the contract will automatically renew for the next year unless terminated by either the Company or the customer 30 days prior to the expiration date. The customer may, at any time, increase the size of the block of renewable energy nominated.
2. If the amount of renewable energy nominated is more than the amount of energy consumed in a given billing period, the customer will pay the renewable energy premium only on the amount of energy consumed in that given billing period.
3. The size of the block of renewable energy nominated is completely at the discretion of the customer. There is no minimum or maximum block size of renewable energy that can be nominated.
4. In addition to the rate and conditions of delivery noted above, all rates and conditions of delivery of the respective rate schedule under which the customer is currently served are applicable.

**SUPPLY DEFAULT SERVICE RATE Ds1**

AVAILABILITY AND PRIOR NOTICE REQUIREMENTS

To customers in all areas served. This service is available, on a best-efforts basis to a customer greater than or equal to 4 MW Maximum Demand returning from supply from an AES (Alternative Electric Supplier) for a transition period of up to 12 months. This service applies to customers taking retail access service under the following Rates: Cg 3, Cp 1, Cp 4, Schedule A, and Cp LC. The Company is not required to build or purchase new capacity or interrupt firm customers to provide service under this schedule.

HOURS OF SERVICE: Twenty-four.

CONDITIONS FOR MANDATORY DEFAULT SERVICE

The Company will, on a best-efforts basis, provide power supply service to the customer. The customer is obligated to pay the Company for all costs associated with the Company providing the customer with Default Service.

RATES

Delivery Charges:

The delivery charges shall be the delivery charge of the retail access rate that the customer would qualify for, if applying as a new customer.

Power Supply Charges:

The price for each hour of usage under this schedule shall be the greater of:

1. The charge for power supply service under the Company's corresponding full requirements service rate for the customer, or
2. The customer's proportional share of 110% of the Company's cost of obtaining supply for default service customers including losses and any applicable charges.

Subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM CHARGE

The monthly minimum charge shall be the minimum charge of the retail access rate that the customer would qualify for, if applying as a new customer.

PAYMENT: This rate is net.

LATE PAYMENT CHARGE

The late payment charge is 1.5%, not compounded, of the portion of the bill, net of taxes, that is delinquent. The late payment charge shall not apply to customers participating in the winter protection plan described in R 460.101-460.169.

CONDITIONS OF DELIVERY

1. The conditions of delivery shall be the conditions of delivery of the retail access rate that the customer would qualify for, if applying as a new customer.
2. Customers taking service under this rate schedule are also subject to the Terms and Conditions contained in the Retail Access Service Tariff rate schedule RAS-1.

**EXPERIMENTAL RENEWABLE ENERGY (SOLAR PV) DISTRIBUTED GENERATION RATE CGS PV**

AVAILABILITY

For the purposes of this schedule, Company is defined as Upper Michigan Energy Resources Corporation and Customer is defined as a person or business who wishes to sell electricity generated using solar photovoltaics (PV) to the Company.

This rate schedule is available to Customers participating in one of the Company’s Energy For Tomorrow programs (rate schedules ERER1, ERER2 or ERER3). Eligible PV generating equipment must be rated for an aggregate generation capacity of not less than 1.5 kW and not more than 15 kW. This experimental tariff offering is limited to 75 kW of total generation capacity.

Eligible Customers may enroll in this experimental tariff offering for a period ending 09-30-11 by entering into a 10-year contract with the Company. Customers will execute and submit an interconnection agreement and meet all criteria in the Conditions of Purchase section of this tariff rider.

The terms and conditions of this rider may be modified before the expiration date, subject to approval by the Michigan Public Service Commission.

RATE

Facilities Charge

No separate Facilities Charge for Customers selling electricity to the Company under this rate schedule. The Customer will pay the normal monthly facilities charge applicable to the rate schedule under which the Customer is served when the Customer is a purchaser of electric service from the Company.

Energy Rate

The Company will purchase power from the Customer at the following RATE \$0.225 per kWh.

The Customer will receive a monthly credit for the energy sold to the Company at the above rate and will receive at check whenever any net accumulated amount exceeds \$100.00.

Meter Charge

A second meter is required to measure the solar PV generating output of the Customer. The applicable second meter charge is: \$0.03288 per day

Minimum Charge

The monthly minimum charge is the meter charge.

CONDITIONS OF PURCHASE

1. This tariff is limited to Energy for Tomorrow Customers. The level of participation in the Energy for Tomorrow program shall be at least as great as the anticipated annual PV output as mutually agreed upon by the Company and the Customer. See the Energy for Tomorrow rate schedules for additional detail.
2. This experimental tariff has a limited enrollment period ending 09-30-11. Customers with a signed contract may remain on the rate schedule for a term of 10 years from the date of their enrollment.
3. The Company will have title to all of the associated renewable attributes produced by the generation. Renewable attributes include any and all local, state, federal, and/or international renewable resource credits, emissions credits and any other environmentally related credits that are, or in the future will be, recognized by any governmental authority and attributed to the production of energy from renewable power.
4. The Customer must comply with the various applicable national, state and local electrical codes, rules and regulations; the electric service rules and regulations of the Company. The Company may request proof of such compliance prior to initiation of service. Proof of such compliance consists of a municipal inspection certificate or in locations where there is no municipal inspection, an affidavit furnished by the contractor or other person doing the work.

**TRANSMISSION SUBSTATION SERVICE – METERED - TssM**

AVAILABILITY

To customers contracting for secondary transmission substation electrical service for one year or more. This transmission substation service is sometimes referred to as Auxiliary Power.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges:

The General Secondary Rate Schedule Cg1 charges shall apply.

Delivery Charges:

The General Secondary Rate Schedule Cg1 facilities charges shall apply.

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

For regular service the monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge, if applicable. For auxiliary service the monthly minimum charge shall be as provided in conditions of delivery. See paragraph 6, Conditions of Delivery, Sheet D-22.00.

LATE PAYMENT CHARGE: A 1.5% per month late charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the TssM rate schedule may contract for secondary retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Additionally, retail access customers shall pay the Capacity Power Supply Charge in Rate Schedule Cg1, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer. There is a \$2.79452 per day charge for an interval demand meter or service connection if applicable. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

CONDITIONS OF DELIVERY

See Sheet No. D-22.00. In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

To customers contracting for secondary transmission substation electrical service for one year or more. This transmission substation service is sometimes referred to as Auxiliary Power.

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges:

The General Secondary Rate Schedule Cg1 charges shall apply.

Delivery Charges:

The General Secondary Rate Schedule Cg1 facilities charges shall apply.

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to D-7.00.

MINIMUM CHARGE

For regular service the monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge, if applicable. For auxiliary service the monthly minimum charge shall be as provided in conditions of delivery. See paragraph 6, Conditions of Delivery, Sheet D-22.00.

LATE PAYMENT CHARGE: A 1.5% per month late charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the TssM rate schedule may contract for secondary retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. ***Additionally, retail access customers shall pay the Capacity Power Supply Charge in Rate Schedule Cg1, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer.*** There is a \$2.79452 per day charge for an interval demand meter or service connection if applicable. Customers taking retail access service are also subject to the Terms and Conditions contained in the Retail Access Service tariff rate schedule RAS-1, Section E.

CONDITIONS OF DELIVERY

See Sheet No. D-22.00. In addition to the Conditions of Delivery noted, retail access service customers are also subject to the Terms and Conditions contained in the Retail Access Service tariff, Section E.

**TRANSMISSION SUBSTATION SERVICE – UNMETERED - TssU**

AVAILABILITY

To customers contracting for secondary transmission substation electrical service for one year or more. This transmission substation service is sometimes referred to as Auxiliary Power.

Availability of service under this tariff is further limited to customers where metered service is not readily available and cannot be practically or economically metered at each individual service location, as determined by the Company based on current metering specifications.

(See Conditions of Delivery section of this tariff for more detail on metering requirements.)

HOURS OF SERVICE: Twenty-four.

CHARACTER OF SERVICE

Alternating current, 60 hertz, single-phase, three-phase, or combination single and three-phase service.

RATE

Power Supply Charges:

The General Secondary Rate Schedule Cg1 charges shall apply.

Delivery Charges: These charges are applicable to Full Requirements and Retail Access service.

Facilities Charge: per day per standard meter or service connection  
\$0.12000

Power Supply and Delivery Charges are subject to the surcharges and credits shown on Sheet Nos. D-3.00 to **D-7.01**.

MINIMUM CHARGE

For regular service the monthly minimum charge shall be the Facilities Charge, the Renewable Energy Surcharge, the Energy Waste Reduction Surcharge, and the Excess Meter Charge, if applicable. For auxiliary service the monthly minimum charge shall be as provided in conditions of delivery, paragraph 6, Sheet D-22.00.

LATE PAYMENT CHARGE: A 1.5% per month late charge will be applied to outstanding charges past due.

RETAIL ACCESS OPTION

Customers who meet the availability requirements of the TssU rate schedule may contract for secondary retail access service. Retail access customers shall pay the above applicable Delivery Charges, Minimum Charge, and Late Payment Charge. Additionally, retail access customers shall pay the Capacity Power Supply Charge in Rate Schedule Cg1, not subject to Power Supply surcharges and credits, if their Alternative Electric Supplier has not secured generation capacity for the customer. **SECTION D – Wpsc Rate Zone  
Rate Schedules**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**SECTION D – WPSC RATE ZONE  
 RATE SCHEDULES**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

 Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Michigan Public Service Commission Dated February 8, 2024 in Case No. U-21431

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Rate Schedules**

D1. POWER SUPPLY COST RECOVERY

PSCRM

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21431

**SECTION D – WPSC RATE ZONE  
 RATE SCHEDULES**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2023 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated July 27, 2023  
in Case No. U-21265

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Adjusted Maximum Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The Maximum PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kWh for each full .01 mill per kWh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kWh rounded to the nearest .01 mills per kWh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the Adjusted Maximum PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for the 2023 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21265

**SECTION D – Wpsc Rate Zone  
 RATE SCHEDULES**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

the 2023 Plan year

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-21265

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kWh shall equal the total projected net power costs in that month divided by that month's net system kWh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2022 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 14, 2022 and July 27, 2022  
in Case No. U-21056

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for the 2022 Plan year

Issued under authority of the Michigan Public Service Commission dated April 14, 2022 in Case No. U-21056

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|
| <u>Class of Service</u> | <u>Schedule No.</u>           |
| Residential             | Rg-1M, RG-OTOUM               |
| Commercial & Industrial | Cg-1M, Cg-3M, Cg-OTOUM, Cp-1M |
| Other                   | Mp-1M                         |

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for the 2021 Plan year  
Issued under authority of the Michigan Public Service Commission Dated March 19, 2021 in Case No. U-20808

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2021 Plan year  
Issued under authority of the  
Michigan Public Service Commission  
Dated March 19, 2021  
in Case No. U-20808

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2021 Plan year

Issued under authority of the  
Section 6j(9) of 1982 PA304  
For self-implementing  
in Case No. U-20808

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

Effective for bills rendered for the 2020 Plan year

Issued under authority of the Michigan Public Service Commission dated April 15, 2020 in Case No. U-20533

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

**1. PSCR FACTORS**

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

Effective for bills rendered for  
the 2020 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 15, 2020  
in Case No. U-20533

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|
| <u>Class of Service</u> | <u>Schedule No.</u>           |
| Residential             | Rg-1M, RG-OTOUM               |
| Commercial & Industrial | Cg-1M, Cg-3M, Cg-OTOUM, Cp-1M |
| Other                   | Mp-1M                         |

Effective for bills rendered for  
the 2020 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 15, 2020  
in Case No. U-20533

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

For self-implementing  
in Case No. U-20533

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

Filed DBR

Effective for bills rendered for the 2019 Plan year

Issued under authority of the Michigan Public Service Commission dated March 21, 2019 in Case No. U-20227

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

 Filed DBR

Effective for bills rendered for  
 the 2019 Plan year  
 Issued under authority of the  
 Michigan Public Service Commission  
 dated March 21, 2019  
 in Case No. U-20227

**SECTION D – Wpsc RATE ZONE  
 RATE SCHEDULES**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

in Case No. U-20227

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

For self-implementing  
in Case No. U-20227

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2018 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 18, 2018  
in Case No. U-18408

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2018 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 18, 2018  
in Case No. U-18408

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
 the 2018 Plan year

Issued under authority of the  
 Section 6j(9) of 1982 PA304  
 For self-implementing  
 in Case No. U-18408

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

**SECTION D – Wpsc Rate Zone  
Rate Schedules**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

Effective for bills rendered for  
the 2017 Plan year

Issued under authority of the  
Michigan Public Service Commission  
dated April 13, 2017  
in Case No. U-18149

**SECTION D – WPSC RATE ZONE  
RATE SCHEDULES**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |
|-------------------------|-------------------------------|
| <u>Class of Service</u> | <u>Schedule No.</u>           |
| Residential             | Rg-1M, RG-OTOUM               |
| Commercial & Industrial | Cg-1M, Cg-3M, Cg-OTOUM, Cp-1M |
| Other                   | Mp-1M                         |

RATE SCHEDULES**

**D1. POWER SUPPLY COST RECOVERY**

**PSCRM**

1. PSCR FACTORS

All rates for metered electric Power Supply service shall include an amount up to the Power Supply Cost Recovery Factor (the PSCR Factor) for the specified billing period as set forth below. The PSCR Factor for the period covered shall consist of an increase or decrease of .010276 mills per kwh for each full .01 mill per kwh increase or decrease in power supply costs above or below a base cost of 39.43 mills per kwh rounded to the nearest .01 mills per kwh. The projected power supply and transmission service costs per kwh shall equal the total projected net power costs in that month divided by that month's net system kwh requirements. MPSC Order dated April 23, 2015 in Case No. U-17669 established the PSCR base and loss factor effective for service on and after the beginning of the first business month following April 23, 2015, on a bill rendered basis.

An amount not exceeding the PSCR Factor for each month shall be placed into effect in the first billing cycle of that monthly billing period and shall continue in effect until the first billing cycle of a subsequent month for which a subsequent PSCR Factor becomes operative. This procedure shall apply to the following rate schedules:

|                         |                               |

*(Continued from Sheet No. D-100.00)*

ADJUSTED MAXIMUM PSCR FACTORS

The Maximum PSCR Factor is subject to adjustment. The Adjusted Maximum PSCR Factor is calculated based upon changes to the PSCR Plan’s forecasted NYMEX Price for the specified billing period as set forth in the table below. The Adjusted Maximum PSCR Factors are the maximum PSCR Factors the Company may charge. The actual PSCR factor charged in any month may be less than the Adjusted Maximum PSCR Factor.

No less than fifteen days before the beginning of each month, the Company shall file with the Michigan Public Service Commission a worksheet reflective of the calculation below and an updated tariff sheet reflecting the adjustment.

ADJUSTMENT MECHANISM (SAMPLE)

|   |           |
|---|-----------|
| Base PSCR Factor from Plan (WPS Rate Zone) \$/MWh           | \$11.86   |
| Jan-Dec NYMEX Average Forecast \$/Dth (X)                   | \$3.70    |
| Jan-Dec NYMEX Average from Plan \$/Dth (X <sub>plan</sub> ) | \$3.80    |
| Difference  | (\$0.10)  |
| Adjusted Maximum PSCR Factor \$/kWh                         | \$0.01186 |

| \$1.50                                    | \$1.75                         | \$0.01461  | \$4.00                                    | \$4.25               | \$0.02066  |
| \$1.75                                    | \$2.00                         | \$0.01512  | \$4.25                                    | \$4.50               | \$0.02138  |
| \$2.00                                    | \$2.25                         | \$0.01565  | \$4.50                                    | \$4.75               | \$0.02214  |
| \$2.25                                    | \$2.50                         | \$0.01621  | \$4.75                                    | \$5.00               | \$0.02292  |
|   |                                |  |   | >\$5.00              | \$0.02373  |

DEFINITIONS:

NYMEX Increase = (X – X<sub>plan</sub>)

X = the average NYMEX price (\$/Dth) for the remaining months of the PSCR plan year averaged over the first five trading days of the month prior to implementation of the proposed PSCR factor.

X<sub>plan</sub> = NYMEX average price for the remaining months of the PSCR plan as incorporated into the current year PSCR Plan.

**DEFINITIONS:**

NYMEX Increase = (X – X<sub>plan</sub>)

X = the average NYMEX price (\$/Dth) for the remaining months of the PSCR plan year averaged over the first five trading days of the month prior to implementation of the proposed PSCR factor.

X<sub>plan</sub> = NYMEX average price for the remaining months of the PSCR plan as incorporated into the current year PSCR Plan.

Effective for bills rendered for the 2024 Plan year

Issued under authority of the Section 6j(9) of 1982 PA304 For self-implementing in Case No. U-21431

**POWER SUPPLY COST RECOVERY**  
*(Continued from Sheet No. D-100.00)*

**ADJUSTED MAXIMUM PSCR FACTORS**

*The Maximum PSCR Factor is subject to adjustment. The Adjusted Maximum PSCR Factor is calculated based upon changes to the PSCR Plan's forecasted NYMEX price for the specified billing period as set forth in the table below. The Adjusted Maximum PSCR Factors are the maximum PSCR Factors the Company may charge. The actual PSCR factor charged in any month may be less than the Adjusted Maximum PSCR Factor.*

*No less than fifteen days before the beginning of each month, the Company shall file with the Michigan Public Service Commission a worksheet reflective of the calculation below and an updated tariff sheet reflecting the adjustment.*

**ADJUSTMENT MECHANISM (SAMPLE)**

|   |           |
|---|-----------|
| Base PSCR Factor from Plan (WPSC Rate Zone) \$/MWh          | \$27.84   |
| Jan-Dec NYMEX Average Forecast \$/Dth (X)                   | \$5.50    |
| Jan-Dec NYMEX Average from Plan \$/Dth (X <sub>plan</sub> ) | \$5.00    |
| Difference  | \$0.50    |
| Adjusted Maximum PSCR Factor \$/kWh                         | \$0.02984 |

2. MONTHLY REPORTS

Not more than 45 days following the last day of each billing month in which a PSCR Factor has been applied to customers' bills, the company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the company and the cost of power supply.

Should the company apply lesser factors than those above, or if the factors are later revised pursuant to commission orders or 1982 PA 304, the company will notify the commission if necessary and file a revision of the above list.

3. ANNUAL RECONCILIATION

All fuel cost and purchased and net interchanged power revenues received by the company, whether included in base rates or collected pursuant to a power supply cost recovery clause, shall be subject to annual reconciliation with the cost of fuel and purchased and net interchanged power. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j (12) to (18) of 1939 PA 3, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any fuel and purchased power cost adjustment clause in existence during the period being reconciled. The initial power supply cost reconciliation shall cover the period commencing with the billing month of January, 1984, and ending in the billing month of December, 1984.

Should the company apply lesser factors than those above, or if the factors are later revised pursuant to commission orders or 1982 PA 304, the company will notify the commission if necessary and file a revision of the above list.

3. ANNUAL RECONCILIATION

All fuel cost and purchased and net interchanged power revenues received by the company, whether included in base rates or collected pursuant to a power supply cost recovery clause, shall be subject to annual reconciliation with the cost of fuel and purchased and net interchanged power. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j (12) to (18) of 1939 PA 3, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any fuel and purchased power cost adjustment clause in existence during the period being reconciled. The initial power supply cost reconciliation shall cover the period commencing with the billing month of January, 1984, and ending in the billing month of December, 1984.

2. MONTHLY REPORTS

Not more than 45 days following the last day of each billing month in which a PSCR Factor has been applied to customers' bills, the company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the company and the cost of power supply.

Should the company apply lesser factors than those above, or if the factors are later revised pursuant to commission orders or 1982 PA 304, the company will notify the commission if necessary and file a revision of the above list.

3. ANNUAL RECONCILIATION

All fuel cost and purchased and net interchanged power revenues received by the company, whether included in base rates or collected pursuant to a power supply cost recovery clause, shall be subject to annual reconciliation with the cost of fuel and purchased and net interchanged power. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j (12) to (18) of 1939 PA 3, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any fuel and purchased power cost adjustment clause in existence during the period being reconciled. The initial power supply cost reconciliation shall cover the period commencing with the billing month of January, 1984, and ending in the billing month of December, 1984.

2. MONTHLY REPORTS

Not more than 45 days following the last day of each billing month in which a PSCR Factor has been applied to customers' bills, the company shall file with the commission a detailed statement for that month of the revenues recorded pursuant to the PSCR Factor and the allowance for cost of power supply included in the base rates established in the latest commission order for the company and the cost of power supply.

Should the company apply lesser factors than those above, or if the factors are later revised pursuant to commission orders or 1982 PA 304, the company will notify the commission if necessary and file a revision of the above list.

3. ANNUAL RECONCILIATION

All fuel cost and purchased and net interchanged power revenues received by the company, whether included in base rates or collected pursuant to a power supply cost recovery clause, shall be subject to annual reconciliation with the cost of fuel and purchased and net interchanged power. Such annual reconciliations shall be conducted in accordance with the reconciliation procedures described in section 6j (12) to (18) of 1939 PA 3, as amended, including the provisions for refunds, additional charges, deferral and recovery, and shall include consideration by the commission of the reasonableness and prudence of expenditures charged pursuant to any fuel and purchased power cost adjustment clause in existence during the period being reconciled. The initial power supply cost reconciliation shall cover the period commencing with the billing month of January, 1984, and ending in the billing month of December, 1984.

**D2. RESIDENTIAL SERVICE**

**Rg-1M**

AVAILABILITY

This schedule is available for single-phase service to residential customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule, unless the customer's Alternative Electric Supplier has not secured generation capacity for the customer, then that customer shall be responsible for the Capacity Power Supply charge under this rate schedule. Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

**(Continued from Sheet No. D-105.00)**

**RG-OTOU-1M**

SPECIAL TERMS AND PROVISIONS

1. This rate schedule will apply for a minimum of one year from the date consumption under this tariff is initiated.
2. A customer must remain on a selected pricing period option for a minimum period of one year from the date consumption under this tariff is initiated or from the date a pricing period option change becomes effective.
3. Any customer choosing to be served on this rate schedule thereby waives all rights to any billing adjustments arising from a claim that the bill for the customer's service would be cheaper on any alternative rate schedule for any period of time.
4. The meter must be located outside or in a location that is readily accessible by Company personnel during normal working hours.

POWER SUPPLY COST RECOVERY CLAUSE See Schedule PSCR, starting on Sheet D-100.00.

in Case No. U-18061

**D2. RESIDENTIAL SERVICE – DIRECT CONTROL RIDER**

**Rg-DCM**

**EFFECTIVE IN:** All territory served when there is adequate signal strength for implementing load control.

AVAILABILITY

This service is available to residential customers with central air conditioners and/or electric water heaters. The above appliances may be electrically cycled or disconnected *at the sole discretion of* the company in accordance with the rules of this rider.

Availability may be denied where in the judgment of the company installation of load control equipment is impractical.

Availability is subject to the ability of the company to obtain and install the required load control equipment.

Availability will normally be denied for the control of electric water heaters where a separate controller is required for the water heater and the company or another utility supplies natural gas service to the customer.

A customer shall not simultaneously be receiving credits for water heater control under this rider and taking service under Controlled service for water heaters under Rg-OTOU-1M Optional Time-of-Use.

Customers taking Power Supply Service under rate schedule RAST are not eligible for this service.

MONTHLY RATE

In addition to receiving the billing credits for direct load control stated below, customers are responsible for all applicable charges and clauses of the appropriate residential service rate schedule.

MONTHLY CREDIT - AIR CONDITIONERS (AC) AND WATER HEATERS (WH)

| <u>Control Option</u> | <u>Control Type</u>       |             |
|-----------------------|---------------------------|-------------|
| 1                     | AC Cycling                | \$0.00/Mo.* |
| 2                     | AC 100% Load Shed/Cycling | \$8.00/Mo.* |
| 3                     | WH 100% Load Shed/Cycling | \$3.00/Mo.  |

\*Credit only during calendar months of June, July, August and September.

SEASONAL BILLING

Air Conditioners

Winter seasonal customers billed for November through April shall not be eligible for monthly credits for the direct control of central air conditioners.

Water Heating

The monthly credit for seasonal water heating customers shall only be applied in those months when a customer charge is billed under the rate schedule under which the customer receives service. This would normally be the six month seasonal billing period.

CONTROL OPTIONS: The customer shall select at least one of the following control options:

Option 1 - Air Conditioner Cycling: The central air conditioner may be electrically cycled from 5 to 20 minutes "off" out of every 30 minutes for normally no more than 100 "off" hours per calendar year. The degree of cycling will depend on the situation.

Option 2 - Air Conditioner 100% Load Shed: The central air conditioner may be electrically disconnected for a maximum of 8 hours per day at the Company's sole discretion. The central air conditioner will normally be electrically disconnected for no more than 50 hours per calendar year.

**D2. RESIDENTIAL SERVICE – DIRECT CONTROL RIDER**  
**(Continued from Sheet No. D-107.00)**

**Rg-DCM**

CONTROL OPTIONS (Cont.):

Option 3 - Water Heater 100% Load Shed: The water heater may be electrically disconnected for a maximum of 8 hours per day at the Company's sole discretion. The water heater will normally be electrically disconnected for no more than 100 hours per calendar year.

TESTING

*At the sole discretion of the company, equipment may be electrically disconnected for a maximum of one hour per day.*

DEFINITIONS

Load Shedding - Complete interruption of designated load for the duration of the interruption.

Cycling - 50% interruption, in alternating on/off cycles, of designated load for the duration of the interruption.

Normal service interruptions are not included in the determination of the above hours of control in a calendar year.

TERMS AND CONDITIONS

1. If a customer decides to terminate control or change to another control option, the company will endeavor to implement the change as soon as practical.
2. Prior to the installation of load control devices, the company may inspect the customer's electrical equipment to insure good repair and working condition, but the company shall not be responsible for the repair or maintenance of the electrical equipment.
3. The company will install, own, and maintain the load management devices controlling the customer's air conditioner and/or water heater. ***No notice is provided prior to the company cycling or disconnecting the customer's air conditioner and/or water heater.*** The customer must allow the company reasonable access to install, maintain, inspect, test and remove load control devices. Inability of the company to gain access to the load management device to perform any of the above activities for a period exceeding 30 days may, at the company's option, result in discontinuance of monthly billing credits under this rate schedule until such time as the company is able to gain the required access. ***If, due to the customer's actions, the air conditioner and/or water heater cannot be cycled or disconnected, the penalty will be \$3.50 per kilowatt-hour for all energy recorded during those periods when the customer's air conditioner and/or water heater should have been cycled or disconnected plus the customer's share of actual costs and penalties assessed to the utility by MISO, ATC, and other regulatory bodies.***

SPECIAL RULES

Air Conditioners

1. Multiple central air conditioning units serving the same residence must all be installed with load control devices to qualify for service under this rate schedule.
2. The load control device will control the air conditioning compressor. The furnace air circulating fan will not be controlled.

Water Heaters

1. Multiple water heating units serving the same residence must all be installed with load control devices to qualify for service under this rate schedule.
2. The electrical circuit to the water heater shall be limited to no more than 30 amps.

Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**D3. SMALL COMMERCIAL & INDUSTRIAL SERVICE**

**Cg-1M**

AVAILABILITY

This schedule is available to small commercial and industrial customers where neither of the following have been exceeded for three consecutive months and also exceeded for at least one month in each succeeding rolling 12-month period:

1. Total demand of 100 kW; or.
2. Total monthly energy consumption of 12,500 kWh.

Customers taking service on the Cg-1M rate as of the effective date of the Commission Order in Case No. U-13688, that qualify for CP-1M by exceeding 100 KW of demand or 25,000 kwh for three consecutive months prior to September 1, 2004, have the option to remain on the applicable energy only rate. These customers will be subject to the following customer charges:\$255.00/month or \$8.3836/day for year-round customer charge or a \$510/month or \$16.7671/day seasonal customer charge.

This schedule is available to customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule, ***unless the customer's Alternative Electric Supplier has not secured generation capacity for the customer, then that customer shall be responsible for the Capacity Power Supply charge under this rate schedule.*** Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

MONTHLY RATE

Distribution Service

Fixed Charge

| <u>Daily</u> | <u>Monthly</u> |                      |
|--------------|----------------|----------------------|
| \$0.8219     | \$25.00        | Year-Round Customers |
| \$1.6438     | \$50.00        | Seasonal Customers   |

Energy Charge

All kWh: \$0.02000/kWh

Power Supply Service (Optional)

| <u>Energy Charge</u> | <u>Capacity</u>  | <u>Non-Capacity</u> | <u>Total</u>  |
|----------------------|------------------|---------------------|---------------|
| All kWh:             | <b>\$0.02583</b> | <b>\$0.07047</b>    | \$0.09630/kWh |

For new customers the company may, at its discretion, waive the three month qualification period when, in the company's judgment, the customer would obviously meet the qualification criteria. Within 12 months, the company shall inform the customer in writing that failure of the customer to meet the qualification criteria after a waiver is granted will result in:

1. The customer being immediately placed on the appropriate rate schedule, and
2. Backbilling to reflect the appropriate rate schedule from the date the waiver was originally effective.

MINIMUM CHARGE

For the regular rate, the minimum charge is the fixed charge plus the energy waste reduction charge.

**Cg-1M**

AVAILABILITY

This schedule is available to small commercial and industrial customers where neither of the following have been exceeded for three consecutive months and also exceeded for at least one month in each succeeding rolling 12-month period:

1. Total demand of 100 kW; or.
2. Total monthly energy consumption of 12,500 kWh.

Customers taking service on the Cg-1M rate as of the effective date of the Commission Order in Case No. U-13688, that qualify for CP-1M by exceeding 100 KW of demand or 25,000 kwh for three consecutive months prior to September 1, 2004, have the option to remain on the applicable energy only rate. These customers will be subject to the following customer charges:\$255.00/month or \$8.3836/day for year-round customer charge or a \$510/month or \$16.7671/day seasonal customer charge.

This schedule is available to customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule. Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

MONTHLY RATE

Distribution Service

Fixed Charge

| <u>Daily</u> | <u>Monthly</u> |                      |
|--------------|----------------|----------------------|
| \$0.8219     | \$25.00        | Year-Round Customers |
| \$1.6438     | \$50.00        | Seasonal Customers   |

Energy Charge

All kWh: \$0.02000/kWh

Power Supply Service (Optional)

Energy Charge

All kWh: \$0.09630/kWh

For new customers the company may, at its discretion, waive the three month qualification period when, in the company's judgment, the customer would obviously meet the qualification criteria. Within 12 months, the company shall inform the customer in writing that failure of the customer to meet the qualification criteria after a waiver is granted will result in:

1. The customer being immediately placed on the appropriate rate schedule, and
2. Backbilling to reflect the appropriate rate schedule from the date the waiver was originally effective.

MINIMUM CHARGE

For the regular rate, the minimum charge is the fixed charge plus the energy *waste reduction* charge.

**D3. SMALL COMMERCIAL & INDUSTRIAL SERVICE**

**Cg-3M**

AVAILABILITY

This schedule is available to small commercial and industrial customers where:

1. Total monthly energy consumption has exceeded 12,500 kWh for three consecutive months and, after qualifying at least once in succeeding rolling 12 month periods; or
2. Does not meet the availability criteria for the Cg-1M or Cp-1M rate schedules.

Customers taking service on the Cg-1M rate as of the effective date of the Commission Order in Case U-13688, that qualify for CP-1M by exceeding 100 KW of demand or 25,000 kWh for three consecutive months prior to September 1, 2004, have the option to remain on the applicable energy only rate. These customers will be subject to the following customer charges: \$255.00/month or \$8.3836/day for year-round customer charge or a \$510/month or \$16.7671/day seasonal customer charge.

This schedule is available to customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule, ***unless the customer's Alternative Electric Supplier has not secured generation capacity for the customer, then that customer shall be responsible for the Capacity Power Supply charge under this rate schedule.*** Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

Energy Charge

All kWh: \$0.01181/kWh

Power Supply Service (Optional)

Energy Charge

All kWh: \$0.09454 /kWh

For new customers the company may, at its discretion, waive the three month qualification period when, in the company's judgment, the customer would obviously meet the qualification criteria. Within 12 months, the company shall inform the customer in writing that failure of the customer to meet the qualification criteria after a waiver is granted will result in:

1. The customer being immediately placed on the appropriate rate schedule, and
2. Backbilling to reflect the appropriate rate schedule from the date the waiver was originally effective.

MINIMUM CHARGE

The minimum charge is the fixed charge plus the energy optimization charge.

**D3. SMALL COMM & IND SERVICE – OPTIONAL TIME-OF-USE**

**Cg-OTOU-1M**

AVAILABILITY

This schedule is available upon written request on a voluntary basis for service to small commercial and industrial customers who qualify for rate Schedules Cg-1M, Cg-2M, Cg-3M, or Cg-4M. Optional Power Supply Service is available only to Customers not taking power supply service under rate schedule RAST and not required to receive service under rate schedule PSDS.

Customers taking service on the Cg-OTOU-1M rate as of the effective date of the Commission Order in Case No. U-13688, that qualify for CP-1M by exceeding 100 KW of demand or 25,000 kwh for three consecutive months prior to September 1, 2004, have the option to remain on the applicable energy only rate. These customers will be subject to the following customer charges:\$255.00/month or \$8.3836/day for year-round customer charge or a \$510/month or \$16.7671/day seasonal customer charge.

This schedule is available to customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule, *unless the customer's Alternative Electric Supplier has not secured generation capacity for the customer, then that customer shall be responsible for the Capacity Power Supply charge under this rate schedule.* Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

MONTHLY RATE

MINIMUM CHARGE

The monthly minimum charge is the fixed charge plus the energy waste reduction charge.

SPECIAL TERMS AND PROVISIONS

1. This rate schedule will apply for a minimum of one year from the date consumption under this tariff is initiated.
2. A customer must remain on a selected pricing period option for a minimum period of one year from the date consumption under this tariff is initiated or from the date a pricing period option change becomes effective.
3. Any customer choosing to be served on this rate schedule thereby waives all rights to any billing adjustments arising from a claim that the bill for the customer's service would be cheaper on any alternative rate schedule for any period of time.
4. The meter must be located outside or in a location that is readily accessible by Company personnel during normal working hours.

SPECIAL TERMS AND PROVISIONS

1. This rate schedule will apply for a minimum of one year from the date consumption under this tariff is initiated.
2. A customer must remain on a selected pricing period option for a minimum period of one year from the date consumption under this tariff is initiated or from the date a pricing period option change becomes effective.
3. Any customer choosing to be served on this rate schedule thereby waives all rights to any billing adjustments arising from a claim that the bill for the customer's service would be cheaper on any alternative rate schedule for any period of time.
4. The meter must be located outside or in a location that is readily accessible by Company personnel during normal working hours.

**D3. SMALL COMMERCIAL & INDUSTRIAL SERVICE – DIRECT CONTROL RIDER Cg-DCM**

**EFFECTIVE IN:** All territory served when there is adequate signal strength for implementing load control.

AVAILABILITY

This service is available to small commercial and industrial customers with central air conditioners and/or electric water heaters. The above appliances may be electrically cycled or disconnected *at the sole discretion of* the company in accordance with the rules of this rider.

Availability may be denied where in the judgment of the company installation of load control equipment is impractical.

Availability is subject to the ability of the company to obtain and install the required load control equipment.

Availability will normally be denied for the control of electric water heaters:

1. for electric water heaters with less than 40 gallons of capacity, or
2. where:
  - a. a separate controller is required for the water heater; and,
  - b. the company or another utility supplies natural gas service to the customer.

A customer shall not simultaneously be receiving credits for water heater control under this rider and taking service under-controlled service for water heaters under Schedule Cg-OTOU, Optional Time-of-Use.

Customers taking Power Supply Service under rate schedule RAST are not eligible for this service.

MONTHLY RATE

In addition to receiving the billing credits for direct load control stated below, customers are responsible for all applicable charges and clauses of the appropriate small commercial and industrial service rate schedule.

MONTHLY CREDIT - AIR CONDITIONERS (AC) AND WATER HEATERS (WH)

| Control       |                           |             |
|---------------|---------------------------|-------------|
| <u>Option</u> | <u>Control Type</u>       |             |
| 1             | AC Cycling                | \$0.00/Mo.* |
| 2             | AC 100% Load Shed/Cycling | \$8.00/Mo.* |
| 3             | WH 100% Load Shed/Cycling | \$3.00/Mo.  |

\*Credit only during calendar months of June, July, August and September.

SEASONAL BILLING

Air Conditioners

Winter seasonal customers billed for November through April shall not be eligible for monthly credits for the direct control of central air conditioners.

WATER HEATING

The monthly credit for seasonal water heating customers shall only be applied in those months when a customer charge is billed under the rate schedule under which the customer receives service. This would normally be the six month seasonal billing period.

CONTROL OPTIONS

Customers may be controlled during any calendar month. The customer shall select at least one of the following control options:

Option 1 - Air Conditioner Cycling: The central air conditioner may be electrically cycled from 5 to 20 minutes "off" out of every 30 minutes for normally no more than 100 "off" hours per calendar year. The degree of cycling will depend on the situation.

**D3. SMALL COMMERCIAL & INDUSTRIAL SERVICE – DIRECT CONTROL RIDER Cg-DCM**

**EFFECTIVE IN:** All territory served when there is adequate signal strength for implementing load control.

**AVAILABILITY**

This service is available to small commercial and industrial customers with central air conditioners and/or electric water heaters. The above appliances may be electrically cycled or disconnected by the company in accordance with the rules of this rider.

Availability may be denied where in the judgment of the company installation of load control equipment is impractical.

Availability is subject to the ability of the company to obtain and install the required load control equipment.

Availability will normally be denied for the control of electric water heaters:

1. for electric water heaters with less than 40 gallons of capacity, or
2. where:
  - a. a separate controller is required for the water heater; and,
  - b. the company or another utility supplies natural gas service to the customer.

A customer shall not simultaneously be receiving credits for water heater control under this rider and taking service under-controlled service for water heaters under Schedule Cg-OTOU, Optional Time-of-Use.

Customers taking Power Supply Service under rate schedule RAST are not eligible for this service.

**MONTHLY RATE**

In addition to receiving the billing credits for direct load control stated below, customers are responsible for all applicable charges and clauses of the appropriate small commercial and industrial service rate schedule.

**MONTHLY CREDIT - AIR CONDITIONERS (AC) AND WATER HEATERS (WH)**

| Control Option | Control Type              |             |
|----------------|---------------------------|-------------|
| 1              | AC Cycling                | \$0.00/Mo.* |
| 2              | AC 100% Load Shed/Cycling | \$8.00/Mo.* |
| 3              | WH 100% Load Shed/Cycling | \$3.00/Mo.  |

\*Credit only during calendar months of June, July, August and September.

**SEASONAL BILLING**

**Air Conditioners**

Winter seasonal customers billed for November through April shall not be eligible for monthly credits for the direct control of central air conditioners.

**WATER HEATING**

The monthly credit for seasonal water heating customers shall only be applied in those months when a customer charge is billed under the rate schedule under which the customer receives service. This would normally be the six month seasonal billing period.

**CONTROL OPTIONS**

Customers may be controlled during any calendar month. The customer shall select at least one of the following control options:

**Option 1 - Air Conditioner Cycling:** The central air conditioner may be electrically cycled from 5 to 20 minutes "off" out of every 30 minutes for normally no more than 100 "off" hours per calendar year. The degree of cycling will depend on the situation.

**D3. SMALL COMMERCIAL & INDUSTRIAL SERVICE – DIRECT CONTROL RIDER Cg-DCM**  
**(Continued on Sheet No. D-117.00)**

CONTROL OPTIONS (Cont.)

Option 2 - Air Conditioner 100% Load Shed: The central air conditioner may be electrically disconnected a maximum of 8 hours per day at the Company's sole discretion. The central air conditioner will normally be electrically disconnected for no more than 50 hours per calendar year.

Option 3 - Water Heater 100% Load Shed: The water heater may be electrically disconnected for a maximum of 8 hours per day at the Company's sole discretion.

TESTING

*At the sole discretion of the company,* equipment may be electrically disconnected for a maximum of one hour per day. The water heater will normally be electrically disconnected for no more than 100 hours per calendar year.

DEFINITIONS

Load Shedding - Complete interruption of designated load for the duration of the interruption.

Cycling - 50% interruption, in alternating on/off cycles, of designated load for the duration of the interruption.

Normal service interruptions are not included in the determination of the above hours of control in a calendar year.

TERMS AND CONDITIONS

1. If a customer decides to terminate control or change to another control option, the company will endeavor to implement the change as soon as practical.
2. Prior to the installation of load control devices, the company may inspect the customer's electrical equipment to insure good repair and working condition, but the company shall not be responsible for the repair or maintenance of the electrical equipment.
3. The company will install, own, and maintain the load management devices controlling the customer's air conditioner and/or water heater. ***No notice is provided prior to the company cycling or disconnecting the customer's air conditioner and/or water heater.*** The customer must allow the company reasonable access to install, maintain, inspect, test and remove load control devices. Inability of the company to gain access to the load management device to perform any of the above activities for a period exceeding 30 days may, at the company's option, result in discontinuance of monthly billing credits under this rate schedule until such time as the company is able to gain the required access. ***If, due to the customer's actions, the air conditioner and/or water heater cannot be cycled or disconnected, the penalty will be \$3.50 per kilowatt-hour for all energy recorded during those periods when the customer's air conditioner and/or water heater should have been cycled or disconnected plus the customer's share of actual costs and penalties assessed to the utility by MISO, ATC, and other regulatory bodies.***

SPECIAL RULES

Air Conditioners

1. Multiple central air conditioning units serving the same business must all be installed with load control devices to qualify for service under this rate schedule.
2. The load control device will control the air conditioning compressor. The furnace air circulating fan will not be controlled.

Water Heaters

1. Multiple water heating units serving the same business must all be installed with load control devices to qualify for service under this rate schedule.
2. The electrical circuit to the water heater shall be limited to no more than 30 amps.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE**

**Cp-1M**

EFFECTIVE IN: All territory served.

AVAILABILITY

This schedule is applicable to customers whose monthly demand is equal to or greater than 100 kW or 25,000 kWh/month for three consecutive months and others taking standby service. This schedule is also available to small commercial and industrial customers who contract for service under the Cp-12M Interruptible Rider. This service is not available for customers required to take service under the Power Supply Default Service. Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule, *unless the customer's Alternative Electric Supplier has not secured generation capacity for the customer, then that customer shall be responsible for the Capacity Power Supply charges under this rate schedule.* Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

The transmission rates are available to customers that take service directly from a company-owned substation (i.e. Company owns no distribution facilities downstream of substation). For customers that meet this condition, a monthly charge of \$0.49/kVA of installed substation transformer capacity as determined by the company shall apply.

Issued under authority of the Michigan Public Service Commission dated November 30, 2017 in Case No. U-18253

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE**

**Cp-1M**

**EFFECTIVE IN:** All territory served.

**AVAILABILITY**

This schedule is applicable to customers whose monthly demand is equal to or greater than 100 kW or 25,000 kWh/month for three consecutive months and others taking standby service. This schedule is also available to small commercial and industrial customers who contract for service under the Cp-12M Interruptible Rider. This service is not available for customers required to take service under the Power Supply Default Service. Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule. Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

The transmission rates are available to customers that take service directly from a company-owned substation (i.e. Company owns no distribution facilities downstream of substation). For customers that meet this condition, a monthly charge of \$0.49/kVA of installed substation transformer capacity as determined by the company shall apply.

| <u>Energy Charge (Contd.)</u>  | <u>Secondary</u> | <u>Primary</u> | <u>Transmission</u> |
|--|------------------|----------------|---------------------|
| 2. <u>Off-Peak</u>   |                  |                |                     |
| a. <u>Winter (Oct-May):</u> \$/kWh<br>10:00 PM to 6:00 AM; Monday through Friday, all day Saturday, Sunday, and holidays | \$0.03350        | \$0.03253      | \$0.03212           |
| b. <u>Summer (Jun-Sep):</u> \$/kWh<br>11:00 PM to 7:00 AM; Monday through Friday, all day Saturday, Sunday, and holidays | \$0.03350        | \$0.03253      | \$0.03212           |

Note: For a 10:00 PM change between on peak and off peak time periods in the Winter months, on peak consumption will be recorded through 10:00 PM. Off Peak consumption will begin at 10:00:01 PM as recorded by the meter.

MINIMUM CHARGE

The monthly minimum charge is the fixed charge, the demand charges, and the energy waste reduction charge.

POWER SUPPLY COST RECOVERY CLAUSE:

See Schedule PSCR.

PRIMARY & TRANSMISSION CHARGES

The customer shall provide a support for the company to terminate the primary conductors and install other required equipment. Customer owned substation equipment shall be operated and maintained by the customer. The support and substation equipment is subject to the company's inspection and approval.

ENERGY WASTE REDUCTION

See Schedule EWR starting on Sheet D-156.00

The above listed voltages are phase-to-ground for wye-connected company systems and phase-to-phase for delta-connected company systems.

RATE REALIGNMENT ADJUSTMENT

See Schedule RRA starting on Sheet D-157.00.

TAX CUTS AND JOBS ACT OF 2017

See Schedule TCJA starting on Sheet D-158.00.

STANDBY SERVICE

Where service is made available to loads which can be served by a source of power other than the company's (excluding emergency standby maintained in the event of failure of company's supply), billing shall be at the above rate, but the monthly minimum demand charge (total of customer charge, on-peak demand charge, and substation transformer capacity charge) for standby service shall be not less than the following per kW of contracted demand:

- Cp Secondary: \$3.50
- Cp Primary: \$2.75
- Cp Transmission: \$2.00

This standby service clause assumes that standby customers shall schedule normal maintenance of the customer-owned source of power during periods of the year that are satisfactory to the company. Accordingly, customers shall advise the company of planned maintenance with as much advance notice as possible. These waivers are granted on a conditional basis. The company will rescind the waiver of increased demand during times of emergency interruptions. The company shall confirm in writing the maintenance schedule that is satisfactory to both parties.

The portion of the on-peak demand shall be billed on a prorated basis on a \$/kW/day basis as shown below.

 Filed DBR

Effective for service rendered on and after June 1, 2018  
 Issued under authority of the Michigan Public Service Commission dated November 30, 2017 in Case No. U-18253

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE**  
**(Continued from Sheet No. D-119.00)**

**Cp-1M**

**MINIMUM CHARGE**

The monthly minimum charge is the fixed charge, the demand charges, and the energy waste reduction charge.

**POWER SUPPLY COST RECOVERY CLAUSE:**

See Schedule PSCR.

**PRIMARY & TRANSMISSION CHARGES**

The customer shall provide a support for the company to terminate the primary conductors and install other required equipment. Customer owned substation equipment shall be operated and maintained by the customer. The support and substation equipment is subject to the company's inspection and approval.

**ENERGY WASTE REDUCTION**

See Schedule EWR starting on Sheet D-156.00

The above listed voltages are phase-to-ground for wye-connected company systems and phase-to-phase for delta-connected company systems.

**RATE REALIGNMENT ADJUSTMENT**

See Schedule RRA starting on Sheet D-157.00.

**STANDBY SERVICE**

Where service is made available to loads which can be served by a source of power other than the company's (excluding emergency standby maintained in the event of failure of company's supply), billing shall be at the above rate, but the monthly minimum demand charge (total of customer charge, on-peak demand charge, and substation transformer capacity charge) for standby service shall be not less than the following per kW of contracted demand:

Cp Secondary: \$3.50  
Cp Primary: \$2.75  
Cp Transmission: \$2.00

This standby service clause assumes that standby customers shall schedule normal maintenance of the customer-owned source of power during periods of the year that are satisfactory to the company. Accordingly, customers shall advise the company of planned maintenance with as much advance notice as possible. These waivers are granted on a conditional basis. The company will rescind the waiver of increased demand during times of emergency interruptions. The company shall confirm in writing the maintenance schedule that is satisfactory to both parties.

The portion of the on-peak demand shall be billed on a prorated basis on a \$/kW/day basis as shown below.

**Pro-ration Formula - Firm Load:**

On-Peak Demand Charge \* 12 months / No. of annual peak days \* No. of waiver days

**Pro-ration Formula - Interruptible Load:**

Variable Interruptible Demand Charge \* 12 months / No. of annual peak days \* No. of waiver days

These billing benefits shall only apply to the unusual portion of the customer's monthly demand. All demands except that portion of the peak load demand resulting from a company-approved maintenance schedule shall be billed as standard normal demand in accordance with all other sections of this rate schedule. The above clause shall not apply to customer-owned generation served under the Standby Service clause of this rate schedule and/or Maintenance Rate of the Pg-2 rate schedule because customers served under these clauses have similar provisions within their clauses. If the highest demand in any month exceeds the contract demand, the minimum demand charge shall thereafter be based on the highest actual demand. The company may install suitable devices to limit the actual demand to the contract demand

**(Continued from Sheet No. D-119.00)**

**Cp-1M**

MINIMUM CHARGE

The monthly minimum charge is the fixed charge, the demand charges, and the energy *waste reduction* charge.

POWER SUPPLY COST RECOVERY CLAUSE:

See Schedule PSCR.

PRIMARY & TRANSMISSION CHARGES

The customer shall provide a support for the company to terminate the primary conductors and install other required equipment. Customer owned substation equipment shall be operated and maintained by the customer. The support and substation equipment is subject to the company's inspection and approval.

ENERGY WASTE REDUCTION

See Schedule *EWR* starting on Sheet D-156.00

The above listed voltages are phase-to-ground for wye-connected company systems and phase-to-phase for delta-connected company systems.

STANDBY SERVICE

Where service is made available to loads which can be served by a source of power other than the company's (excluding emergency standby maintained in the event of failure of company's supply), billing shall be at the above rate, but the monthly minimum demand charge (total of customer charge, on-peak demand charge, and substation transformer capacity charge) for standby service shall be not less than the following per kW of contracted demand:

- Cp Secondary: \$3.50
- Cp Primary: \$2.75
- Cp Transmission: \$2.00

This standby service clause assumes that standby customers shall schedule normal maintenance of the customer-owned source of power during periods of the year that are satisfactory to the company. Accordingly, customers shall advise the company of planned maintenance with as much advance notice as possible. These waivers are granted on a conditional basis. The company will rescind the waiver of increased demand during times of emergency interruptions. The company shall confirm in writing the maintenance schedule that is satisfactory to both parties.

The portion of the on-peak demand shall be billed on a prorated basis on a \$/kW/day basis as shown below.

Pro-ration Formula - Firm Load:

On-Peak Demand Charge \* 12 months / No. of annual peak days \* No. of waiver days

Pro-ration Formula - Interruptible Load:

Variable Interruptible Demand Charge \* 12 months / No. of annual peak days \* No. of waiver days

These billing benefits shall only apply to the unusual portion of the customer's monthly demand. All demands except that portion of the peak load demand resulting from a company-approved maintenance schedule shall be billed as standard normal demand in accordance with all other sections of this rate schedule. The above clause shall not apply to customer-owned generation served under the Standby Service clause of this rate schedule and/or Maintenance Rate of the Pg-2 rate schedule because customers served under these clauses have similar provisions within their clauses. If the highest demand in any month exceeds the contract demand, the minimum demand charge shall thereafter be based on the highest actual demand. The company may install suitable devices to limit the actual demand to the contract demand and may limit size of standby load to be served under this rate to the available system capacity at the customer's location.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE** **Cp-1M**  
(Continued from Sheet No. D-120.00)

STANDBY SERVICE (Contd.)

Pro-ration Formula - Interruptible Load:

Variable Interruptible Demand Charge \* 12 months / No. of annual peak days \* No. of waiver days

These billing benefits shall only apply to the unusual portion of the customer's monthly demand. All demands except that portion of the peak load demand resulting from a company-approved maintenance schedule shall be billed as standard normal demand in accordance with all other sections of this rate schedule. The above clause shall not apply to customer-owned generation served under the Standby Service clause of this rate schedule and/or Maintenance Rate of the Pg-2 rate schedule because customers served under these clauses have similar provisions within their clauses. If the highest demand in any month exceeds the contract demand, the minimum demand charge shall thereafter be based on the highest actual demand. The company may install suitable devices to limit the actual demand to the contract demand and may limit size of standby load to be served under this rate to the available system capacity at the customer's location.

REACTIVE LOAD

The customer shall keep his lagging reactive load at a level that does not exceed his Kw demand and shall not operate with a leading reactive load.

SHORT TERM SERVICE

Short term and temporary service is available to customers requiring service for less than annual periods.

1. a) For holiday/decorative lighting see Schedule Ls-1M,  
b) For special events see Schedule RIIIM, Temporary Service  
c) For construction see Schedule RIIIM, Temporary Service
2. Standard proration rules shall apply to the initial and final billing periods.
3. At the expiration of any month, the customer may cancel his contract for service under these provisions and may contract for one year or more under the standard rate applicable to his service.

VARIATION OF DEMAND

Variation of customer load shall be limited to time changing demand levels which are within system standards of operation as established by the company. Failure to take service in a manner which meets these standards may result in discontinuation of service.

TERM OF CONTRACT

Minimum period of one year except that for new or additional loads of 5,000kW or more, a term of not less than five years will be required.

DETERMINATION OF DEMAND

The customer demand in kilowatts shall be the highest single 15 minute integrated load observed or recorded during the current or preceding 11 months. For new Cp-1M customers, this demand provision applies on and after the date of transfer to this rate schedule.

The on-peak billing demand in kilowatts shall be the highest single 15 minute integrated load observed or recorded during each respective time period in the month, provided that no billing demand shall be less than 60% of the highest billing demand of the preceding 11 months.

Unusual on-peak billing demands approved by advance authority from the company shall be billed but will not be considered in the determination of the 60% ratchet. Customer requests for unusual demands shall be made in advance with as much allowance as possible. The advance authorization from the company shall be confirmed in writing.

HOLIDAYS

The days of the year which are considered holidays are: New Year's Day, Good Friday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Friday After Thanksgiving, Day Before Christmas, Christmas Day, Day Before New Year's Day.

ESTIMATION PROCEDURE

In the event of loss of data for calculation of one or more billing parameters, the company shall forecast on the basis of historic billing parameters to obtain an estimate of current month's billing parameters. This estimate shall be subject to modification or replacement based on known and quantifiable operating conditions of the current month.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**

**EFFECTIVE IN:** All territory served.

**AVAILABILITY**

This schedule is available to both small and large commercial and industrial customers taking service under the Cp-1M rate schedule with a minimum interruptible demand of 200 kW\* who contract for service in accordance with the provisions of this rider.

Customers taking Power Supply Service under rate schedule RAST are not eligible for this service.

\* The actual interruptible demand shall equal or exceed 200 kW for a minimum of 8 monthly billing periods during each annual billing cycle ending with the December meter reading. A customer's contract will be terminated effective with the issuance of the December bill for failure to meet this annual requirement. To re-qualify for service under this rider, a customer must meet the 8 month requirement or prove to the company's satisfaction that an interruptible load of 200 kW can be attained on a regular basis.

**MONTHLY RATE**

Demand Charge

Contracted Notice Period: 1 hour  
 Maximum Contracted Hours of Interruption (Annual): 600

|   | <u>Secondary</u>     | <u>Primary</u>       | <u>Transmission</u>  |
|---|----------------------|----------------------|----------------------|
| <u>Distribution Service:</u>                              |                      |                      |                      |
| Charge Per kW of Maximum Interruptible Demand (2):        |                      |                      |                      |
| Summer/Winter   | \$1.14/\$1.14        | \$1.14/\$1.14        | \$1.14/\$1.14        |
| <u>Power Supply Service (Optional):</u>                   |                      |                      |                      |
| Charge Per kW of Maximum Interruptible Demand (2):        |                      |                      |                      |
| Summer/Winter   | <b>\$7.65/\$7.65</b> | <b>\$7.36/\$7.36</b> | <b>\$7.19/\$7.19</b> |
| <u>Credit Per kW of Maximum Interruptible Demand (2):</u> |                      |                      |                      |
| Summer/Winter   | \$5.25/\$5.25        | \$5.25/\$5.25        | \$5.25/\$5.25        |

1. This applies to all types of interruptions in any calendar year. See paragraphs 6, 7, and 8 of "Rules and Procedures."
2. The credit shall be subtracted from the Peak Load System Demand Charge of the Cp-1M rate schedule for determining the charge per kW to be applied to the customer's monthly maximum interruptible demand.

The customer shall contract for a minimum term of five years.

The company may at any time during a calendar year offer to customers the option of receiving an additional demand credit of \$0.40 per kW per interruption for any interruption which causes the maximum contracted hours of annual interruption to be exceeded. This additional demand credit will only apply in months where such an interruption actually occurs.

In addition to the following specifications of the system demand charge, interruptible customers shall be responsible for all applicable charges and clauses of the Cp-1M rate schedule.

| <u>Power Supply Service (Optional):</u>                   |                  |                |                     |
| Charge Per kW of Maximum Interruptible Demand (2):        |                  |                |                     |
| Summer/Winter   | \$6.17/\$6.17    | \$5.92/\$5.92  | \$5.77/\$5.77       |
| <u>Credit Per kW of Maximum Interruptible Demand (2):</u> |                  |                |                     |
| Summer/Winter   | \$5.25/\$5.25    | \$5.25/\$5.25  | \$5.25/\$5.25       |

1. This applies to all types of interruptions in any calendar year. See paragraphs 6, 7, and 8 of "Rules and Procedures."
2. The credit shall be subtracted from the Peak Load System Demand Charge of the Cp-1M rate schedule for determining the charge per kW to be applied to the customer's monthly maximum interruptible demand.

The customer shall contract for a minimum term of five years.

The company may at any time during a calendar year offer to customers the option of receiving an additional demand credit of \$0.40 per kW per interruption for any interruption which causes the maximum contracted hours of annual interruption to be exceeded. This additional demand credit will only apply in months where such an interruption actually occurs.

In addition to the following specifications of the system demand charge, interruptible customers shall be responsible for all applicable charges and clauses of the Cp-1M rate schedule.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**  
**(Continued from Sheet No. D-122.00)**

**RULES AND PROCEDURES**

**1. Contracted Demand Nominations**

Customer shall contract for a given amount of firm and interruptible demand.

**a. Variable Interruptible Demand**

The contracted firm demand shall be billed as the system demand at the appropriate system demand charge. Any excess monthly demands above the firm demand shall be considered as variable interruptible demand.

**b. Nomination Revisions:** Demand nominations shall be revised at least annually on or before April 15th to cover the first succeeding calendar year and before September 15<sup>th</sup> to cover the second through the fifth succeeding calendar years. Said revision shall delete data for expired demand nominations and add additional nominations to cover a complete 60 month period. On any revision the renomination of any demands for any year shown in a previous nomination or revision of a previous nomination is permitted; provided however, that said revision cannot include any of the following except as allowed in paragraph 1.f., unless otherwise approved by the company:

- a decrease in firm demand; or
- a decrease in variable interruptible demand in conjunction with a comparable increase in firm demand;

The company shall approve all requests for increases in firm demand, subject to the conditions of paragraph 9.

Should a customer fail to supply a revised demand nomination for the next year on or before April 15th, the customer's demand nomination on file with the Company for the next year shall be used for both billing and interruptible compliance verification.

Should a customer fail to supply revised nominations for years 2-5 on or before September 15th, nominations previously made for years 2-4 will be used and the year 4 nomination will be used for the new year 5 nomination.

**c. Termination of Contract:** Unless mutually agreed otherwise by the parties, the contract shall be in effect for a minimum initial term of five years, and from year to year thereafter unless the company or the customer shall, at least 48 months before the end of such period or any one year period thereafter, serve upon the other party a written notice of election to terminate service at the end of such designated period.

Customers have the option, upon proper written notice as set forth below and subject to the availability of sufficient capacity resources, to terminate contract(s) entered into under this Interruptible Rider offered by the company and return load serviced under this rider to firm service. The customer can terminate a contract at no cost if the market price for short term capacity to service the load being transferred to firm service is less than the interruptible credit in the tariff under which the customer's interruptible load is being service. If such cost of replacement capacity exceeds the interruptible credit, the customer can terminate this rider by paying, up-front, the product of the difference in the two costs for the number of months remaining under customer's interruptible contract times the customer's highest on-peak billed interruptible demand during the most recent 12 month period. Any customer which has a dispute with the Company pertaining to the cost of replacement capacity has the right to appeal this dispute to the Public Service Commission.

Customers must notify company of their intention to terminate any contract entered into under an Interruptible Rider two months prior to the termination effective date. Termination with less than two months notification will be permitted, but will be subject to a one-time penalty equal to the penalty in \$/kW for non-interruption in the appropriate interruptible rider times the highest on-peak billed interruptible demand(s) during the most recent 12 month period.

Michigan Public Service Commission  
dated December 9, 2016  
in Case No. U-18061

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**  
**(Continued from Sheet No. D-125.00)**

RULES AND PROCEDURES (Cont.)

2. Notification

The company shall endeavor to provide notice of interruption with as much lead time as possible. Notice to interrupt will be by a signal to designated equipment of the customer or, at the discretion of the company, through some designated verbal means. Under normal circumstances, a minimum of one hour will be given before each interruption. This is subject to change due to unmanageable capacity situations which could require interruption of loads to maintain system standards of operations.

Management of Interruptible Hours

1. After 100 hours of the combination of emergency or economic interruption, the Company reserves the right to increase the EITP to manage the annual interruptible hours.
2. If the total hours of requested interruption equals the maximum contracted hours of interruption during any calendar year, the customer's interruptible load will have the same characteristics of firm system customer load for the balance of the calendar year.
3. The company will equalize the hours of interruption on an annual basis for all customers taking service under this interruptible rider to the extent reasonably practical.

Settlement Agreements

Customer's will be billed the most current market price available at the time of billing. If billing occurs before the seven day market settlement, 20% will be added to the market price. If billing occurs after the seven-day settlement, 10% will be added to the market price. Adjustments will be made to previous billings after 105 day settlements have been made with the market authority. If adjustments are within a maximum of 5% or \$100, no adjustments will be made.

b. Emergency Interruptions

1. Occurrence

Emergency Interruptions may occur when the Company, the Transmission Operator or the Reliability Authority feel the distribution, transmission equipment, or supply to firm customers is in jeopardy.

2. Notification

The company shall endeavor to provide notice of interruption with as much lead time as possible. Notice to interrupt will be by a signal to designated equipment of the customer or, at the discretion of the company, through some designated verbal means. Under normal circumstances, a minimum of one hour will be given before each interruption. This is subject to change due to unmanageable capacity situations which could require interruption of loads to maintain system standards of operations.

3. Penalty Billing

When notified of an interruption, the customer shall reduce load to the contracted firm demand nomination or less. Each declaration of an interruption shall be considered an occurrence.

Penalty Procedure

Failure to reduce load to the firm nomination as explained above when notified for an emergency interruption shall result in the customer being penalty billed for the demand difference between the maximum load (or minimum generation) on line during the interruption and the specified load (or generation) levels above. The demand difference will be billed the higher of:

1. Highest demand in non-compliance times the applicable annual credits times 110%. Or,
2. The additional power supply costs incurred by the Company to provide the kWh to the customer in excess of their firm nomination.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**  
**(Continued from Sheet No. D-127.00)**

RULES AND PROCEDURES (Cont.)

- a. Michigan Cp-I2 interruptible customers shall constitute a separate block due to differences between the Wisconsin and Michigan tariffs. Wholesale interruptible customers shall constitute a second block. The Wisconsin customers shall be divided into three blocks as determined by the Company.

All interruptible load of an individual customers' account that is at the same geographic location shall be in the same block. A customer shall not be permitted to separate the interruptible load of an account into separate blocks.

- b. The company shall interrupt the appropriate amount of load per the following amount of load reduction (emergency interruption) or amount of high cost power required to supply the interruptible customers (capacity):

|                    |              |
|--------------------|--------------|
| 25 - 60 MW         | One block    |
| 61 - 110 Mw        | Two blocks   |
| 111 - 160 Mw       | Three blocks |
| 161 Mw and greater | All blocks   |

Due to the relatively small size of the block containing the Michigan customers, this group will be counted as a full block in the above determination but will be managed as required and permitted per the Michigan tariff. This is subject to change should the amount of load in the group of Michigan customers increase or due to Michigan tariff modifications.

- c. The determination of the blocks to be interrupted shall be based upon the number of hours interrupted in the calendar year. The block with the least amount of hours shall be the first block interrupted. If two blocks have the same amount of hours, the order shall be in the order of the alphabet. There is no distinction between emergency and capacity related interruptions nor for different levels of economic buy out levels.
- d. Changing of the type of interruption (emergency to capacity and vice versa) or buy out level shall not cause the block of customers to change.
- e. For times when multiple blocks have been interrupted and conditions warrant ending an interruption for one or more blocks, the company shall end interruptions in the manner of the last block interrupted is the first block to have the interruption ended. An exception is for the FERC customers, who shall be the last block to have capacity interruption end to prevent oscillating operational difficulties.
- f. Demand Swaps. - An interruptible customer that obtained more interruptible load from a customer in another block would be subject to partial interruptions for only one block. For example, a customer in group B transfers 10 Mw of interruptible load to a customer in the group C, the customer that accepted more interruptible load shall only be required to interrupt for times when group C is interrupted.
- g. New Wisconsin retail customers would be added to the block of Wisconsin retail customers with the lowest amount of interruptible load.
- h. Customers shall generally not be allowed to switch blocks to prevent gaming resulting in circumvention of rate design. The company shall review requests for a block switch with the Commission.

(Continued on Sheet No. D-129.00)

Issued December 21, 2016  
T. T. Eidukas  
Vice-President,  
Milwaukee, Wisconsin

Effective for service rendered on and after January 1, 2017

Issued under authority of the Michigan Public Service Commission dated December 9, 2016 in Case No. U-18061

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**  
**(Continued from Sheet No. D-128.00)**

RULES AND PROCEDURES (Cont.)

Partial Interruptions due to Regional Reliability Issues

The Company may select individual or groups of customers to interrupt to keep the generation and transmission system operating reliably in the event of the loss of a major transmission line or generating station affecting the transmission system operation. Customers would be selected based on characteristics that impact the generation and transmission reliability, such as amount of load, point of interconnection with the transmission system, and the amount of benefit of interrupting of a customer to the transmission system reliability. The Company will take into consideration any hours of interruption incurred by customers due to the above paragraph in the Company's efforts to equalize the total annual hours of interruption related to all causes.

7. Minimum Demand Credit

If the interruptible demand credit is reduced to an annual monthly average of \$3.00 per Kw or less, the customer has the right within 60 days of said change to immediately terminate interruptible service, subject to the conditions of paragraph 11.

8. Audits

An interruptible compliance audit shall not be performed by the company if the customer experienced an actual interruption excluding buyouts that was successfully implemented and recorded within the last six months. The interruptible compliance audits shall normally not be required more often than once a year during summer months and once at or near each winter peak load period. The necessity of an actual interruption or acceptance of other means of verifying ability to interrupt shall be under the sole control of the company. It is the intent of the company that the duration of interruptions for audit purposes will not be extended beyond the time necessary to satisfy the conditions of the audit. Penalty billing will apply if an actual interruption for audit purposes is not successfully completed.

9. Firm Service Requests

Upon notice of cancellation or reduction of interruptible service, the company will endeavor to supply the interruptible load on a firm basis at that date or as soon thereafter as reasonably possible. A notice of cancellation shall be treated as a request for firm service, unless specified otherwise by the customer, as of the date of cancellation. Requests for increases in firm demand shall be treated as requests for firm service as of the requested date. Such requests shall take precedence over any subsequent request for firm service by any customer or potential customer that is not specifically reflected in the most current revision of the company's long range capacity plan. It is further agreed that any portion of the interruptible demand that cannot be served as firm demand, and is still desired by the customer, shall continue to be considered and billed as interruptible demand in accordance with this clause until that load obtains firm status.

10. Contracts

Customers desiring interruptible service shall be required to sign individual customer contracts. Customer contracts shall have a minimum term of five years with a four-year cancellation notice. Customers desiring the commencement of interruptible service at the start of or during a calendar year shall be required to sign a contract prior to April 15th of the preceding year, unless otherwise approved by the company. Normally customers that are both new and unanticipated may contract for service at any time.

**D4. LARGE COMMERCIAL & INDUSTRIAL SERVICE – INTERRUPTIBLE RIDER Cp-I**  
**(Continued from Sheet No. D-129.00)**

RULES AND PROCEDURES (Cont.)

11. Interruption Force Majeure

Each customer shall, in accordance with accepted industry practices, operate and maintain equipment and procedures necessary to fulfill the interruptible obligations of this rate schedule and associated contract(s). However, no customer shall be considered to be in default with respect to failure to accomplish required load interruptions hereunder and shall not be liable to the company for the penalties for failure to interrupt hereunder, if prevented from actually and with reasonable safety accomplishing the interruption due to acts of God, wars, blockades, insurrections, riots, explosions, fires, floods, lightning, wind, sabotage or by any other similar or dissimilar cause beyond the reasonable control of the customer. In the event that a customer is unable to fulfill any interruption obligations hereunder by reason of such cause or causes, the customer shall use due diligence to remove such inability with reasonable dispatch. This paragraph does not apply to an inability to interrupt due to shortages, or lack of availability, of alternative fuels or the failure of or lack of access to alternative energy or power sources, or due to failure of the customer's equipment for reasons other than the above specifically excluding from force majeure fires, explosions or other such accidents that originate within the customer's facility.

12. Interruptible Management Service

During times of interruption (either emergency or capacity), customers may elect to manage the electric loads of multiple facilities for billing and compliance purposes. Customers will be required to sign a service agreement identifying the meters to be combined.

TERMS AND CONDITIONS:

- a. This provision shall not in any manner reduce the amount of interruptible load the customer in total has contracted for or is obligated to interrupt.
- b. Customers shall be responsible for any necessary communication between facilities to manage the electric loads of the facilities to be combined.
- c. Only meters and accounts of the customer and its corporate affiliates taking service under the company's Cp-I2 service are eligible for combination under this Rider. For purposes of this Rider, a "corporate affiliate" of the customer shall mean any wholly-owned subsidiaries of the customer and, if the customer is a wholly-owned subsidiary, the customer's corporate parent and any other wholly-owned subsidiaries of the corporate parent.
- d. All accounts to be combined subject to this provision are required to be paid up to date. Accounts with past due balances shall be excluded unless otherwise agreed to by the company. The company also reserves the right to deny this Interruptible Management Service to customers that are deemed to be attempting to avoid payments or circumventing rate design.
- e. Customers will not be compensated for customer-owned generation that is interconnected with the Company's power supply system on this tariff.
- f. All other terms and conditions of the applicable Cp tariffs apply.

Issued under authority of the  
Michigan Public Service Commission  
dated April 23, 2015  
in Case No. U-17669

**D6. MUNICIPAL POWER-SEWAGE DISPOSAL & WATER PUMPING**

**Mp-1M**

EFFECTIVE IN All territory served.

AVAILABILITY

This schedule is available for operation of sewage disposal systems and water pumping systems. This schedule is available to customers who are not required to take service under the Power Supply Default Service (PSDS). Customers taking service under the Retail Access Service Tariff (RAST) shall be responsible for the Distribution Charges but not the Power Supply Charges under this rate schedule. Customers that purchase power supply service from the Company shall be subject to both the Distribution and Power Supply charges contained in this rate schedule.

MONTHLY RATE

Distribution Service

Customer Charge

| <u>Daily</u> | <u>Monthly</u> |
|--------------|----------------|
| \$1.6438     | \$50.00        |

Energy Charge

|          |           |
|----------|-----------|
| All kWh: | \$0.01471 |
|----------|-----------|

Power Supply Service (Optional)

Energy Charge

|          |           |
|----------|-----------|
| All kWh: | \$0.08720 |
|----------|-----------|

MINIMUM CHARGE

The monthly minimum charge is the fixed charge plus the energy *waste reduction* charge.

POWER SUPPLY COST RECOVERY CLAUSE

See Schedule PSCR.

SPECIAL RULES

1. Each metering point shall be billed as a separate customer.
2. The entire energy requirements for each meter point shall be supplied by the company, except such energy that the customer may generate from sewage gas and such power that the customer may supply in case of failure of the service supplied by the company.

ENERGY WASTE REDUCTION: See Schedule *EWR* starting on Sheet No. D-156.00

| Directional-Flood   | Metal Halide     | 110,000       | 1,000        | \$45.63                  | \$42.50               |

\*Capacity Energy Charge for all Lamps: \$0.02294/kWh (For customers taking service under the Retail Access Service Tariff (RAST) only if their Alternative Electric Supplier has not secured generation capacity for the customer.)

The above charges are for lighting standard facilities on existing company-owned distribution poles. The company will own and install the standard facilities.

If the non-standard facilities shown below are requested, the customer has the option to pay the charges upfront or pay the monthly charges shown below. These charges are in addition to the monthly rates shown above.

| <u>Non-Standard Facilities</u>          | <u>Monthly Charge</u> |
|---|-----------------------|
| Galvanized Mast Arm in excess of 6 feet | \$0.14 / ft           |
| Additional Wood Pole (30', 35' or 40')* | \$3.09 / pole         |
| Span of Conductor                       | \$1.44 / span         |

\* The additional wood pole charges shall apply to fixtures that cannot be attached to an existing company pole. Street lights installed for governmental authorities under the Ms-1M rate schedule prior to April 1, 2015, are exempt from the exclusive use wood pole charges.

RATE REALIGNMENT ADJUSTMENT

See Schedule RRA starting on Sheet D-157.00.

TAX CUTS AND JOBS ACT OF 2017

See Schedule TCJA starting on Sheet D-158.00.

ORNAMENTAL FACILITIES

The Company offers specific Company-owned ornamental lighting facilities that are available to all customers under a special contract.

The customer is obligated to make a special facilities payment upon installation of the facilities equal to:

- a. the "cost difference" between the cost of the ornamental facilities and cost of the standard lighting facilities, and
- b. a payment in advance for maintenance equal to 24% of the "cost difference" payment above for ornamental facilities.

| Area-Power Bracket  | Sodium Vapor     | 9,000         | 100          | <b>\$10.30</b>  |
| Area-Power Bracket  | Sodium Vapor     | 14,000        | 150          | <b>\$13.78</b>  |
| Directional-Flood   | Sodium Vapor     | 27,000        | 250          | <b>\$21.06</b>  |
| Directional-Flood   | Sodium Vapor     | 45,000        | 400          | <b>\$25.20</b>  |
| Directional-Flood   | Metal Halide     | 36,000        | 400          | <b>\$25.19</b>  |
| Directional-Flood   | Metal Halide     | 110,000       | 1,000        | <b>\$45.63</b>  |

The above charges are for lighting standard facilities on existing company-owned distribution poles. The company will own and install the standard facilities.

If the non-standard facilities shown below are requested, the customer has the option to pay the charges upfront or pay the monthly charges shown below. These charges are in addition to the monthly rates shown above.

| <u>Non-Standard Facilities</u>          | <u>Monthly Charge</u> |
|---|-----------------------|
| Galvanized Mast Arm in excess of 6 feet | <b>\$0.14 / ft</b>    |
| Additional Wood Pole (30', 35' or 40')* | <b>\$3.09 / pole</b>  |
| Span of Conductor                       | <b>\$1.44 / span</b>  |

\* The additional wood pole charges shall apply to fixtures that cannot be attached to an existing company pole. Street lights installed for governmental authorities under the Ms-1M rate schedule prior to April 1, 2015, are exempt from the exclusive use wood pole charges.

ORNAMENTAL FACILITIES

The Company offers specific Company-owned ornamental lighting facilities that are available to all customers under a special contract.

The customer is obligated to make a special facilities payment upon installation of the facilities equal to:

- a. the "cost difference" between the cost of the ornamental facilities and cost of the standard lighting facilities, and
- b. a payment in advance for maintenance equal to 24% of the "cost difference" payment above for ornamental facilities.

If for any reason a lighting system must be replaced or renovated after the end of the contract, the customer shall be responsible for all associated charges. Replacement or renovation of lighting units and their major components after the contract period is at the discretion of the Company and may require a new lighting contract/agreement between the Company and the customer.

If at any time a customer requests a replacement or maintenance by the Company of an ornamental lighting facility for aesthetic reasons, the customer will be required to pay time and materials for the work. If the item in question falls under the manufacturer's warranty the Company will work with the customer and the manufacturer to receive the replacement item. The Company will however charge for labor and any other materials needed for replacement. The Company reserves the right to determine if replacement or maintenance will be done.

ORNAMENTAL FACILITIES (cont.)

If at any time a customer requests a replacement or maintenance by the Company of an ornamental lighting facility for aesthetic reasons, the customer will be required to pay time and materials for the work. If the item in question falls under the manufacturer's warranty the Company will work with the customer and the manufacturer to receive the replacement item. The Company will however charge for labor and any other materials needed for replacement. The Company reserves the right to determine if replacement or maintenance will be done.

TERMS AND PROVISIONS

Company Owned–Standard or Ornamental Overhead Lighting Systems within the terms of the applicable contract.

1) Service Rules

- a) Standard lighting facilities shall be defined as a cobrahead, power bracket or flood lighting fixture complete with lamp, control device and 6-foot galvanized mast arm.
- b) The Company shall own, operate, and maintain the entire lighting system, including circuits and lighting fixtures.
- c) The Company will be responsible for all future group replacement of lighting systems. The decision to replace lighting equipment will be at the sole discretion of the Company and will take into consideration good utility operating practice and the desires of the customer.
- d) Upon request and at the expense of the customer, the Company will relocate any fixture or change the position of any lamp.
- e) If the customer terminates service or requests the removal of any Company-owned lighting facilities during the contract period, the customer shall be responsible for the lesser of the cost of removal or the remaining monthly charges.
- f) Additional Service rules listed on Sheet D-135.00.
- g) LED Lighting - The decision to replace existing sodium vapor or metal halide lamps with LED lighting equipment will be at the sole discretion of the Company and will take into consideration good utility operating practice and the desires of the customer.

2) Extension Of Service

Lighting facilities will be extended upon request by the proper authorities, subject to the provisions of the Company's electric extension rules.

TERMS AND PROVISIONS

Customer Owned Lighting Systems

1. Service Rules

- a) The customer shall own the system, including switching equipment and the connecting cable to the Company's system.
- b) Systems must be of a design and in a condition satisfactory to the Company.
- c) Replacement of customer owned equipment, otherwise called out in the maintenance section, shall be at the expense of the customer.
- d) The system may be served by either multiple or series type circuits as agreed upon between the customer and the Company.
- e) The customer must make the Company aware of any changes the customer makes to poles and fixtures after initial installation. This includes but is not limited to changes in location and wattage.
- f) Additional Service rules listed on Sheet D-135.00.

2. Extension Of Service

Additional lights will be served at any location designated under the same rates, terms, and conditions, provided the additional units are not more expensive for the Company to operate and maintain.

3. Maintenance

- a) The following items are considered normal maintenance of customer owned ornamental lighting and will be replaced or maintained at Company expense within the contract:

\*The wattages and lumens listed under the LED lamps are wattages and lumens of sodium vapor lamps to which the LED lamps are considered equivalent. Actual wattages and lumens of LED lamps may vary.

RATE REALIGNMENT ADJUSTMENT

See Schedule RRA starting on Sheet D-157.00.

TERMS AND PROVISIONS

Customer Owned Lighting Systems

1. Service Rules

- a) The customer shall own the system, including switching equipment and the connecting cable to the Company's system.
- b) Systems must be of a design and in a condition satisfactory to the Company.
- c) Replacement of customer owned equipment, otherwise called out in the maintenance section, shall be at the expense of the customer.
- d) The system may be served by either multiple or series type circuits as agreed upon between the customer and the Company.
- e) The customer must make the Company aware of any changes the customer makes to poles and fixtures after initial installation. This includes but is not limited to changes in location and wattage.
- f) Additional Service rules listed on Sheet D-135.00.

2. Extension Of Service

Additional lights will be served at any location designated under the same rates, terms, and conditions, provided the additional units are not more expensive for the Company to operate and maintain.

3. Maintenance

- a) The following items are considered normal maintenance of customer owned ornamental lighting and will be replaced or maintained at Company expense within the contract:
  - i.) Underground and/or overhead cables: All breaks or open circuits except those caused by accidents, improper installation, foreign digging operations or deterioration due to aging and/or absorption of moisture. Deterioration due to aging is to be determined by the Company.
  - ii.) Ballasts, luminaires, photo electric controls, lamps, refractors and relays that the company normally stocks for standard systems. The customer shall be responsible for any repairs (including parts and labor) of equipment after the expiration of the contract.
  - iii.) The acquisition of repair and maintenance items and the cost of items which the Company does not consider standard facilities shall be the responsibility of the customer. The labor to replace this failed equipment is included in the monthly rates.

3. Maintenance (Cont.)
- iii.) The acquisition of repair and maintenance items and the cost of items which the Company does not consider standard facilities shall be the responsibility of the customer. The labor to replace this failed equipment is included in the monthly rates.
  - b) All other maintenance, replacement or repair costs other than those listed shall be the responsibility of the customer.
  - c) On customer owned lighting, damage claims shall be billed to the customer. It is the customer's responsibility to collect from the party who was responsible for the damage.

TERMS AND PROVISIONS - Common

Customer-Owned and Company-Owned  
Standard or Ornamental Overhead Lighting Systems

1. Payment Of Bills  
Payment For Service Shall Be Made Monthly Shall Be Due And Payable No Later Than The Due Date Shown On Each Bill.
2. Service Rules
- a. All lights will be turned on at approximately fifteen minutes after sunset and off at approximately thirty minutes before sunrise.
  - b. The Company will replace burned out lamps and otherwise maintain the equipment within 72 hours after being notified by the customer, provided such service can be performed during regular daytime working hours. No credit will be allowed for periods during which lamps are out of service.
  - c. Individual streetlight locations with vandalism records will be reported to the local authorities and the customer informed that they will be required to pay for labor costs of replacements due to future vandalism at that location.  
Or  
Individual locations with vandalism records will be reported to the customer, and the customer is given the option of:
    - 1) Continuing service with the provision that future replacements due to continued vandalism at that location will be at the customer's expense,
    - 2) Continuing service but at a different location, or,
    - 3) Discontinuing service at that location.
  - d. For times a customer requests the Company to remove, relocate or change lamps, the customer and Company may mutually agree in writing to a schedule reflecting the requested changes in the customer billing. The Company will have the sole discretion in determining when the actual necessary field work is completed which will not impact the customer's billing.
3. Term Of Contract  
Contracts will be effective for a period of three years subject to automatic renewal periods of one year each. The contract may be terminated at the end of any yearly period upon 90 days written notice by either party.
4. Short Term Service Holiday/Decorative Lighting  
Subject to Company approval, the Company will allow municipal customers to make temporary attachments of holiday lighting and/or decorations on Company-owned or customer-owned light poles. The customers must execute an annual agreement for such attachments, and must meet all conditions thereof. Estimated energy consumptions will be billed under the current Cg-1M energy rate. Time and material charges for installation, removal or associated maintenance may also apply.
5. Energy Waste Reduction

AVAILABILITY

Available to customers taking service from the Company under the eligible rate schedules listed below that desire to purchase energy generated by renewable resources. The Company will initially begin billing customers that sign up for this service upon the Company having secured adequate renewable generation supply and completed necessary billing system modifications.

Eligible Rate Schedules

|            |            |
|------------|------------|
| Rg-1M      | Cg OTOU-1M |
| Rg OTOU-1M | Cp-1M      |
| Cg-1M      | Ls-1M      |
| Cg-3M      | Mp-1M      |

Note: Customers on the seasonal billing option are not eligible.

RATE

\$2.40 / 100 kWh Renewable Energy Block

Note: Charge for Renewable Energy Block represents a premium in addition to the applicable energy charges contained in the tariff the customer takes service under. Customer will continue to be billed all applicable energy charges under the applicable rate schedule.

TERMS & CONDITIONS

1. *Customers may terminate service under this rider at any time. The change will become effective with the customer's next billing cycle following the customer's termination request to the Company.*
2. In addition to the rate above, all rates and conditions of delivery of the respective rate schedule under which the customer is currently served under are applicable.
3. Customers may sign up for this voluntary program via written form, web site/internet, over the phone, or other means acceptable to the Company. No contract is required and customers can terminate via the same communication methods used for sign-up.
4. The Company retains the right to either require a contract for customers purchasing 100 blocks/month or limit participation to 100 blocks/month per customer.
5. In the event the customer uses less energy in a month than the cumulative total of the blocks of energy purchased under the Naturewise program, the customer is still responsible for payment for the blocks of renewable energy purchased.
6. Company retains the right to deny service to or terminate service under this tariff to customers in arrears with the Company.
7. Service under this tariff will normally commence upon the customer's meter reading date. Fractional and partial months shall be prorated in the same manner as Customer Charges.
8. Service under this tariff provides for the generation or purchase of renewable generation into the Company's control area system and not actual delivery to customers taking service under this tariff. The reconciliation of Renewable Generation supply and the total amount of KWh purchased by customers under this tariff shall be done on an annual basis.

**D8. NATUREWISE**

**NAT**

EFFECTIVE IN All territory served.

AVAILABILITY

Available to customers taking service from the Company under the eligible rate schedules listed below that desire to purchase energy generated by renewable resources. The Company will initially begin billing customers that sign up for this service upon the Company having secured adequate renewable generation supply and completed necessary billing system modifications.

Eligible Rate Schedules

|            |            |
|------------|------------|
| Rg-1M      | Cg OTOU-1M |
| Rg OTOU-1M | Cp-1M      |
| Cg-1M      | Ls-1M      |
| Cg-3M      | Mp-1M      |

Note: Customers on the seasonal billing option are not eligible.

RATE

\$2.40 / 100 kWh Renewable Energy Block

Note: Charge for Renewable Energy Block represents a premium in addition to the applicable energy charges contained in the tariff the customer takes service under. Customer will continue to be billed all applicable energy charges under the applicable rate schedule.

TERMS & CONDITIONS

1. In addition to the rate above, all rates and conditions of delivery of the respective rate schedule under which the customer is currently served under are applicable.
2. Customers may sign up for this voluntary program via written form, web site/internet, over the phone, or other means acceptable to the Company. No contract is required and customers can terminate via the same communication methods used for sign-up.
3. The Company retains the right to either require a contract for customers purchasing 100 blocks/month or limit participation to 100 blocks/month per customer.
4. In the event the customer uses less energy in a month than the cumulative total of the blocks of energy purchased under the Naturewise program, the customer is still responsible for payment for the blocks of renewable energy purchased.
5. Company retains the right to deny service to or terminate service under this tariff to customers in arrears with the Company.
6. Service under this tariff will normally commence upon the customer's meter reading date. Fractional and partial months shall be prorated in the same manner as Customer Charges.
7. Service under this tariff provides for the generation or purchase of renewable generation into the Company's control area system and not actual delivery to customers taking service under this tariff. The reconciliation of Renewable Generation supply and the total amount of KWh purchased by customers under this tariff shall be done on an annual basis.
8. Renewable Generation supply can be obtained by the purchase, use or redemption of renewable credits or tags from renewable generation resources. Renewable generation resources shall include wind, solar, landfill gas, Ag waste digestors, bark, wood, and other wood waste fired generation. Other Renewable generation resources may also be utilized with approval of the MPSC.

in Case No. U-18061

**D9. PARALLEL GENERATION-NET METERING PROGRAM**

**PG-1M**

EFFECTIVE IN: All territory served.

AVAILABILITY

Available to retail customers taking full requirements service with renewable electric generation facilities that are interconnected with the Company's power supply and rated at 20 kW and less, where customer's delivery offsets retail electric consumption at the same site. If a customer has more than one electric generator, the generator's rating(s) shall be summed and the sum may not exceed 20 kW.

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's previous year's peak demand measured in kW for the Company's retail load, allocated to include no more than 0.5% for customers generating 20 kW or less. The remaining 0.5% is allocated to customers generating more than 20 KW.

The Company's Net Metering Program application fee is \$25.

MONTHLY RATES

Distribution Charges:

A customer enrolled in the Net Metering Program shall pay the Distribution Charges associated with the Company's standard service tariff applicable to the customer when the customer's net usage results in a net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer shall be credited based on the Excess Generation rate below.

Power Supply Charges:

A customer enrolled in the Net Metering Program shall pay the Power Supply Charges associated with the Company's standard service tariff applicable to the customer when the customer's net usage results in a net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer shall be credited based on the Excess Generation rate below.

Excess Generation:

Excess generation shall be credited at the customer's applicable standard tariff's full retail rate (distribution service plus power supply service). The credit shall appear on the customer's next bill. Any credit not used to offset current charges shall be carried forward for use in subsequent billing periods.

METERING

The Company may determine the customer's net usage using the customer's existing meter if it is capable of reverse registration or may, at the Company's expense, install a single meter with separate registers measuring power flow in each direction. If the company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If the customer's meter is not capable of reverse registration and if meter upgrades or modifications are required, the Company shall provide a meter or meters capable of measuring the flow of energy in both directions to the customer at cost. Only the incremental cost above that for meter(s) provided by the Company to similarly situated non-generating customers shall be paid by the eligible customer. Generator meters will be supplied to the customer, at the customer's request, at cost.

**D9. PARALLEL GENERATION-NET METERING PROGRAM**  
**(Continued from Sheet No. D-138.00)**

**PG-1M**

TERMS AND CONDITIONS

1. A renewable energy resource comes from the sun or from thermal inertia of the earth and minimizes the output of toxic material in the conversion of the energy and includes, but is not limited to, all of the following:
  - a. Biomass
  - b. Solar and solar thermal energy
  - c. Wind energy
  - d. Kinetic energy of moving water, including the following:
    - i. Waves, tides or currents
    - ii. Water released through a dam
  - e. Geothermal energy
  - f. Municipal solid waste
  - g. Landfill gas produced by municipal solid waste.
2. The generation equipment must be located on the customer's premises, serving only the customer's premises and must be intended primarily to offset a portion or all of the customer's requirements for electricity.
3. At the customer's option, the customer's electric needs shall be determined by one of the following methods:
  - a. The customer's annual energy usage, measured in kWh, during the previous 12-month period.
  - b. When metered demand is available, the maximum integrated hourly demand measured in kW during the previous 12-month period.
  - c. In instances where complete and correct data is not available or where the customer is making changes on-site that will affect total usage, the Company and the customer shall mutually agree on a method to determine the customer's electric needs.
4. At the customer's option, the generation capacity shall be determined by one of the following methods:
  - a. Aggregate nameplate capacity of the generator(s).
  - b. An estimate of the expected annual kWh output of the generator(s).

Customer's shall not be allowed to switch their generation back and forth between two or more rate schedules to circumvent the intent of the rate design.

5. A customer using biomass blended with fossil-fuel as their renewable energy source must submit proof to the Company substantiating the percentage of the fossil fuel blend either by (1) separately metering the fossil fuel, or (2) providing other documentation that will allow the Company to correctly apply a generation credit to the output associated with the customer's renewable fuel only.
6. If a customer has more than one generator, the generator's ratings shall be summed. This sum shall be at 20 kW or less.
7. The customer is required to provide the Company with a capacity rating in kW of the generating unit and a projected monthly and annual kilowatt-hour output of the generating unit when completing the Company's Net Metering Application.
8. The requirements for interconnecting a generator with the Company's facilities are contained in the Michigan Public Service Commission's Electric Interconnection and Net Metering Standards Rules ([R460.601a – 460.656](#)) and the Company's Michigan Utility Generator Interconnection Requirements, copies of which will be provided to customers upon request. All requirements must be met prior to commencing service.

**D9. PARALLEL GENERATION – MODIFIED NET METERING PROGRAM**

**PG-1AM**

EFFECTIVE IN: All territory served.

AVAILABILITY

Available to retail customers taking full requirements service with renewable electric generation facilities that are interconnected with the Company's power supply and rated at greater than 20 kW and not more than 150 kW, where customer's delivery offsets retail electric power supply at the same site. If a customer has more than one electric generator, the generator's rating(s) shall be summed and the sum may not exceed 150 kW.

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's previous year's peak demand measured in kW for the Company's retail load, allocated to include no more than 0.25% for customers generating at greater than 20 kW and not more than 150 kW.

MONTHLY RATES

Distribution Charges:

A customer enrolled in the Modified Net Metering Program shall pay the Distribution Charges at the Company's standard service tariff applicable to the customer for the customer's total consumption of energy from the Company to the customer.

Power Supply Charges:

A customer enrolled in the Modified Net Metering Program shall pay the Power Supply Charges associated with the Company's standard service tariff applicable to the customer.

Energy Charges:

Charges that are related to a \$/kWh charge will be charged when the customer's net usage results in a monthly net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer's \$/kWh charges shall be credited based on the Excess Generation rate below.

Demand Charges:

The customer shall pay the demand charge associated with the Company's standard service tariff applicable to the customer for the customer's total consumption of energy from the Company to the customer.

Excess Generation:

Excess generation shall be credited at the customer's applicable standard tariff's power supply service energy charges (\$/kWh). The credit shall appear on the customer's next bill. Any credit not used to offset current charges shall be carried forward for use in subsequent billing periods.

METERING

The Company may determine the customer's usage using the customer's existing meter if it has separate registers measuring power flow in each direction. If the company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If the customer's meter is not capable of measuring power flow in both directions, and if meter upgrades or modifications are required, the Company shall provide a meter or meters capable of measuring the flow of energy in both directions to the customer at cost. Only the incremental cost above that for meter(s) provided by the Company to similarly situated non-generating customers shall be paid by the eligible customer. Generator meters will be provided by the Company. The cost of the generator meter shall be considered a cost of operating the net metering program.

Costs And Fees

The Company's Modified Net Metering Program has the following fees and costs:

|                                  |  |
|----------------------------------|--|
| Application fee:                 | \$25   |

**D9. PARALLEL GENERATION – METHANE DIGESTERS**

**PG-1BM**

EFFECTIVE IN: All territory served.

AVAILABILITY

Available to retail customers taking full requirements service with methane digester facilities that are interconnected with the Company's power supply and rated at greater than 150 kW and not more than 550 kW, where customer's delivery offsets retail electric power supply at the same site. If a customer has more than one electric generator, the generator's rating(s) shall be summed and the sum may not exceed 550 kW.

The Company's Net Metering Program is available on a first come, first served basis until the nameplate capacity of all participating generators is equal to the maximum program limit of 1% of the Company's previous year's peak demand measured in kW for the Company's retail load, allocated to include no more than 0.25% for customers generating at greater than 150 kW and not more than 550 kW.

MONTHLY RATES

Distribution Charges

A customer enrolled in this program shall pay the Distribution Charges at the Company's standard service tariff applicable to the customer for the customer's imputed customer consumption. Imputed customer consumption is the sum of the metered on-site generation and the net of the bidirectional flow of power across the customer interconnection during the billing period.

Power Supply Charges

A customer enrolled in this program shall pay the Power Supply Charges associated with the Company's standard service tariff applicable to the customer.

Energy Charges

Charges that are related to a \$/kWh charge will be charged when the customer's net usage results in a monthly net flow of energy from the Company to the customer. When the customer's monthly net usage results in a net flow of energy from the customer to the Company, the customer's \$/kWh charges shall be credited based on the Excess Generation rate below.

Demand Charges

The customer shall pay the demand charges (\$/KW) associated with the Company's standard service tariff applicable to the customer for the customer's imputed customer consumption. Imputed customer consumption is the sum of the metered on-site generation and the net of the bidirectional flow of power across the customer interconnection during the billing period.

Excess Generation

Excess generation shall be credited at the customer's applicable standard tariff's power supply service energy charges (\$/kWh). The credit shall appear on the customer's next bill. Any credit not used to offset current charges shall be carried forward for use in subsequent billing periods.

METERING

The Company will utilize a meter or meters capable of measuring the flow of energy in both directions and generator output. If the company uses the customer's existing meter, the Company shall test and calibrate the meter to assure accuracy in both directions. If meter upgrades or modifications are required, the customer shall pay the costs incurred.

Costs And Fees

The Company's Modified Net Metering Program has the following fees and costs:

|                                     |  |
|-------------------------------------|--|

**D9. PARALLEL GENERATION-PURCHASE BY WPSC-STANDARD OFFER**

**PG-2M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 550 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 30 KW or less have the option of selling energy to the Company under this PG-2M tariff or the PG-1M tariff.

- (1) *QFs with generation design capacity at or below 150 kW shall be eligible to receive compensation based on the Company's full avoided cost rates including capacity and energy, regardless of the Company's capacity need as determined and approved by the Commission in its Order in Case No. U-21081.*
- (2) *QFs with generation design capacity between 150 kW and 550 kW shall be eligible to receive compensation for energy at the Company's avoided energy cost rate as outlined below. The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems with a design capacity above 150 kW.*

MONTHLY RATES

Customer Charge: \$12.00/Month      \$0.3945/Day

Charges for Deliveries from Company

Deliveries from the Company to the customer shall be billed in accordance with the standard applicable rate schedules of the Company.

Avoided Energy Cost Rate for Deliveries to Company

*For all energy supplied by the customer to the Company, the customer shall receive an energy payment equal to the kilowatt-hours supplied to the Company multiplied by the following energy rate:*

| <u>Year</u> | <u>Energy Rate</u><br><u>\$/kWh</u> |
|-------------|-------------------------------------|
| 2021        | \$0.02718                           |
| 2022        | <b>\$0.06439</b>                    |

 in Case No. U-21081

**D9. PARALLEL GENERATION-PURCHASE BY WPSC-STANDARD OFFER**

**PG-2M**

**EFFECTIVE IN:** All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 550 KW or less, and desiring to sell electrical energy to the Company. *Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company.* Customers with generation capacity of 30 KW or less have the option of selling energy to the Company under this PG-2M tariff or the PG-1M tariff.

MONTHLY RATES

Customer Charge: \$12.00/Month      \$0.3945/Day

Charges for Deliveries from Company

Deliveries from the Company to the customer shall be billed in accordance with the standard applicable rate schedules of the Company.

Energy Credit Deliveries to Company

On-peak Energy Credit

- January 1, 2019 through December 31, 2019: \$.02612 per kWh on-peak
- January 1, 2020 through December 31, 2020: \$.02664 per kWh on-peak
- January 1, 2021 through December 31, 2021: \$.02718 per kWh on-peak
- January 1, 2022 through December 31, 2022: \$.02772 per kWh on-peak
- January 1, 2023 through December 31, 2023: \$.02827 per kWh on-peak
- January 1, 2024 through December 31, 2024: \$.02884 per kWh on-peak
- January 1, 2025 through December 31, 2025: \$.02942 per kWh on-peak
- January 1, 2026 through December 31, 2026: \$.03000 per kWh on-peak

*Customers shall receive the applicable on-peak energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the on-peak energy credit shall equal the average of the on-peak Day Ahead Locational Marginal Prices ("DA LMP") at the WPS.WPSM load zone node. The rates shall be reset annually on January 1 of each year based on the hourly average on-peak DA LMP at the WPS.WPSM load zone node of the most recently completed November 1 to October 31 period.*

Off-peak Energy Credit

- January 1, 2019 through December 31, 2019: \$.02612 per kWh off-peak
- January 1, 2020 through December 31, 2020: \$.02664 per kWh off-peak
- January 1, 2021 through December 31, 2021: \$.02718 per kWh off-peak
- January 1, 2022 through December 31, 2022: \$.02772 per kWh off-peak
- January 1, 2023 through December 31, 2023: \$.02827 per kWh off-peak
- January 1, 2024 through December 31, 2024: \$.02884 per kWh off-peak
- January 1, 2025 through December 31, 2025: \$.02942 per kWh off-peak
- January 1, 2026 through December 31, 2026: \$.03000 per kWh off-peak

*Customers shall receive the applicable off-peak energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the off-peak energy credit shall equal the average of the off-peak DA LMP at the WPS.WPSM load zone node. The rates shall be reset annually on January 1 of each year based on the hourly average off-peak DA LMP at the WPS.WPSM load zone node of the most recently completed November 1 to October 31 period.*

**D9. PARALLEL GENERATION-PURCHASE BY WPSC**  
**EFFECTIVE IN:** All territory served.

**PG-2M**

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 2,000 KW or less, and desiring to sell electrical energy to the Company. Customers with generation capacity of 30 KW or less have the option of selling energy to the Company under this Pg-2M tariff or the Pg-1M tariff.

MONTHLY RATES

Customer Charge: \$12.00/Month      \$0.3945/Day

Charges for Deliveries from Company

Deliveries from the Company to the customer shall be billed in accordance with the standard applicable rate schedules of the Company.

Energy Credit Deliveries to Company

On-peak Energy Charge : For 2007 rates, the on-peak energy charge shall equal the average of the on-peak Day Ahead Locational Marginal Prices ("DA LMP") at the WPS.WPSM load zone node for calendar year 2006. The rates shall be reset annually on January 1 of each year based on the hourly average on-peak DA LMP at the WPS.WPSM load zone node of the most recently completed November 1 to October 31 period. The on-peak energy charge for **2019** is **\$0.03730/kWh**.

Off-peak Energy Charge : For 2007 rates, the off-peak energy charge shall equal the average of the off-peak DA LMP at the WPS.WPSM load zone node for calendar year 2006. The rates shall be reset annually on January 1 of each year based on the hourly average off-peak DA LMP at the WPS.WPSM load zone node of the most recently completed November 1 to October 31 period. The off-peak energy charge for **2019** is **\$0.02691/kWh**.

Capacity Payment

Should the Midwest Independent Transmission System Operator ("MISO") implement a capacity market, a capacity credit shall be implemented reflecting the MISO capacity market methodology. Once the MISO capacity market is operational, Customers with Interruptible Service will not receive any additional capacity charge credit.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |
|--|--------|
| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |
| Customers metered at a primary voltage of 4,160 volts - 50,000 volts:  | 1.0096 |
| Customers metered at a secondary voltage of less than 4,160 volts:     | 0.9885 |

ON-PEAK HOURS

Winter (calendar months of October through May): 7:00 AM to 10:00 PM; Monday through Friday (except holidays).

Summer (calendar months of June through September): 7:00 AM to 11:00 PM; Monday through Friday (except holidays).

OFF-PEAK HOURS

All hours not listed as on-peak hours.

**D9. PARALLEL GENERATION-PURCHASE BY WPSC-STANDARD OFFER**  
**(Continued from Sheet No. D-143.00)**

**PG-2M**

MONTHLY RATES (cont.)

Capacity Payment

QFs with generation design capacity at or below 150 kW shall receive a capacity payment reflecting the most recent Midcontinent Independent System Operator (“MISO”) capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current on-peak rate until May 31, 2025 will be **\$0.00179/kWh**. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |

| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |
| Customers metered at a primary voltage of 4,160 volts - 50,000 volts:  | 1.0096 |
| Customers metered at a secondary voltage of less than 4,160 volts:     | 0.9885 |

Line loss savings will be evaluated on a case by case basis.

ON-PEAK HOURS

Winter (calendar months of October through May): 7:00 AM to 10:00 PM; Monday through Friday (except holidays).

Summer (calendar months of June through September): 7:00 AM to 11:00 PM; Monday through Friday (except holidays).

OFF-PEAK HOURS

All hours not listed as on-peak hours

HOLIDAYS

The days of the year which are considered holidays are: New Year's Day, Good Friday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Friday After Thanksgiving, Day Before Christmas, Christmas Day, and the Day Before New Year's Day.

MINIMUM CHARGE

The monthly minimum charge shall be the customer charge.

PRO-RATION OF DEMAND COST FOR AUTHORIZED MAINTENANCE

For customers billed on rates with demand charges, the demand charges other than "Customer Demand" shall be prorated if the maintenance schedule of the customer owned generation facility has been approved in advance in writing by the Company. Said pro-ration shall be based on the number of authorized days of scheduled maintenance. The customer shall pay the demand rate for the higher than normal demands due to the generation outage only for the days of authorized maintenance.

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |
|--|--------|
| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |
| Customers metered at a primary voltage of 4,160 volts - 50,000 volts:  | 1.0096 |
| Customers metered at a secondary voltage of less than 4,160 volts:     | 0.9885 |

Line loss savings will be evaluated on a case by case basis.

ON-PEAK HOURS

Winter (calendar months of October through May): 7:00 AM to 10:00 PM; Monday through Friday (except holidays).

Summer (calendar months of June through September): 7:00 AM to 11:00 PM; Monday through Friday (except holidays).

OFF-PEAK HOURS

All hours not listed as on-peak hours

HOLIDAYS

The days of the year which are considered holidays are: New Year's Day, Good Friday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Friday After Thanksgiving, Day Before Christmas, Christmas Day, and the Day Before New Year's Day.

MINIMUM CHARGE

The monthly minimum charge shall be the customer charge.

PRO-RATION OF DEMAND COST FOR AUTHORIZED MAINTENANCE

For customers billed on rates with demand charges, the demand charges other than "Customer Demand" shall be prorated if the maintenance schedule of the customer owned generation facility has been approved in writing by the Company. Said pro-ration shall be based on the number of authorized days of scheduled maintenance. The customer shall pay the demand rate for the higher than normal demands due to the generation outage only for the days of authorized maintenance.

MONTHLY RATES (cont.)

Capacity Payment

A capacity credit shall be paid reflecting the most recent Midcontinent Independent System Operator (“MISO”) capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current on-peak rate until May 31, 2023 will be \$.02209/kWh. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |
|--|--------|
| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |

**D9. PARALLEL GENERATION-PURCHASE BY WPSC**

**PG-3M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 550 kW or less have the option of selling energy to the Company under this PG-3M tariff or PG-2M tariff. *The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems with a design capacity above 150 kW.*

MONTHLY RATES

Customer Charge: \$12.00/Month    \$0.3945/Day

Avoided Energy Cost Rate

*For all energy supplied by the customer to the Company, the customer shall receive an energy payment equal to the kilowatt-hours supplied to the Company multiplied by the following energy rate:*

| <i>Year</i> | <i>Energy Rate<br/>\$/kWh</i> |
|-------------|-------------------------------|
| 2021        | \$0.02718                     |

| <b>2027</b> | <b>\$0.07108</b>              |
| <b>2028</b> | <b>\$0.07252</b>              |
| <b>2029</b> | <b>\$0.07396</b>              |

Customers shall receive the applicable energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the Customer will be compensated at the **DA** LMP at WPS.WPSM load zone node expressed in \$/kWh for every hour.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the energy factors and capacity payments to reflect system losses:

- Customers metered at a transmission voltage of 50,000 volts or higher: 1.0000
- Customers metered at a primary voltage of 4,160 volts - 50,000 volts: 1.0096
- Customers metered at a secondary voltage of less than 4,160 volts: 0.9885

Line loss savings will be evaluated on a case by case basis.

Issued under authority of the  
 Michigan Public Service Commission  
 Dated May 12, 2022  
 in Case No. U-21081

**D9. PARALLEL GENERATION-PURCHASE BY WSPC**

**PG-3M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten, fifteen or twenty year service agreement with the Company. Customers with generation capacity of 550 kW or less have the option of selling energy to the Company under this PG-3M tariff or PG-2M tariff.

MONTHLY RATES

Customer Charge: \$12.00/Month    \$0.3945/Day

Energy Credit

- January 1, 2019 through December 31, 2019: \$.02612 per all kWhs
- January 1, 2020 through December 31, 2020: \$.02664 per all kWhs
- January 1, 2021 through December 31, 2021: \$.02718 per all kWhs
- January 1, 2022 through December 31, 2022: \$.02772 per all kWhs
- January 1, 2023 through December 31, 2023: \$.02827 per all kWhs
- January 1, 2024 through December 31, 2024: \$.02884 per all kWhs
- January 1, 2025 through December 31, 2025: \$.02942 per all kWhs
- January 1, 2026 through December 31, 2026: \$.03000 per all kWhs

Customers shall receive the applicable energy credit shown above for their initial five years (60 months) of service under this tariff, thereafter, the Customer will be compensated at the Day Ahead LMP at WPS.WPSM load zone node expressed in \$/kWh for every hour.

Capacity Payment

A capacity credit shall be paid reflecting the most recent Midcontinent Independent System Operator ("MISO") capacity auction market result in the relevant Local Resource Zone if the customer generation capacity can be counted as capacity in the MISO Capacity Auction (Resource Adequacy) market. The capacity price will be updated each June 1 to reflect the most recent year-round auction clearing price in MISO. The current all kWhs rate until May 31, **2023** will be **\$.00986/kWh**. If the MISO capacity auction deviates from its current annual format, the applicable capacity price will be calculated from the most recently cleared capacity seasons spanning a 12 month period.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors

The following factors shall be applied to the energy factors and capacity payments to reflect system losses:

- Customers metered at a transmission voltage of 50,000 volts or higher: 1.0000
- Customers metered at a primary voltage of 4,160 volts - 50,000 volts: 1.0096
- Customers metered at a secondary voltage of less than 4,160 volts: 0.9885

Line loss savings will be evaluated on a case by case basis.

**D9. PARALLEL GENERATION-PURCHASE BY WPSC**

**PG-3M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers with generation capacity of 2,000 kW or less have the option of selling energy to the Company under this Pg-3M tariff or Pg-2M tariff.

MONTHLY RATES

Customer Charge: \$12.00/Month      \$0.3945/Day

Energy Charge

The Customer will be compensated at the Day Ahead LMP at WPS.WPSM load zone node expressed in \$/kWh for every hour.

Capacity Payment

Should the Midwest Independent Transmission System Operator ("MISO") implement a capacity market, a capacity credit shall be implemented reflecting the MISO capacity market methodology. Once the MISO capacity market is operational, Customers with Interruptible Service will not receive any additional capacity charge credit.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors: The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |
|--|--------|
| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |
| Customers metered at a primary voltage of 4,160 volts - 50,000 volts:  | 1.0096 |
| Customers metered at a secondary voltage of less than 4,160 volts:     | 0.9885 |

MINIMUM CHARGE

The monthly minimum charge shall be the fixed charge plus the energy *waste reduction* charge.

PRO-RATION OF DEMAND COST FOR AUTHORIZED MAINTENANCE

For customers billed on rates with demand charges, the demand charges other than "Customer Demand" shall be prorated if the maintenance schedule of the customer owned generation facility has been approved in advance in writing by the Company. Said pro-ration shall be based on the number of authorized days of scheduled maintenance. The customer shall pay the demand rate for the higher than normal demands due to the generation outage only for the days of authorized maintenance.

SPECIAL RULES

1. The Company shall install appropriate metering facilities to record all flows of energy necessary to bill the customer in accordance with the charges and credits of this rate schedule.
2. The customer shall furnish, install, and wire the necessary service entrance equipment, meter sockets, meter enclosure cabinets, or meter connection cabinets that may be required by the Company to properly meter usage and sales to the Company.

| Filed CEP                             |

Effective for service rendered on and after January 1, 2018

Issued under authority of the Michigan Public Service Commission dated December 20, 2017 in Case No. U-18266

**D9. PARALLEL GENERATION-PURCHASE BY WPSC**

**PG-3M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 5,000 KW or less, and desiring to sell electrical energy to the Company. Customers with generation capacity of 2,000 kW or less have the option of selling energy to the Company under this Pg-3M tariff or Pg-2M tariff.

MONTHLY RATES

Customer Charge: \$12.00/Month      \$0.3945/Day

Energy Charge

The Customer will be compensated at the Day Ahead LMP at WPS.WPSM load zone node expressed in \$/kWh for every hour.

Capacity Payment

Should the Midwest Independent Transmission System Operator ("MISO") implement a capacity market, a capacity credit shall be implemented reflecting the MISO capacity market methodology. Once the MISO capacity market is operational, Customers with Interruptible Service will not receive any additional capacity charge credit.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags. Premiums are to be set when the contract is signed and will not change during the contract period.

Distribution Loss Factors: The following factors shall be applied to the on-peak and off-peak energy factors and capacity payments to reflect system losses:

|  |        |
|--|--------|
| Customers metered at a transmission voltage of 50,000 volts or higher: | 1.0000 |
| Customers metered at a primary voltage of 4,160 volts - 50,000 volts:  | 1.0096 |
| Customers metered at a secondary voltage of less than 4,160 volts:     | 0.9885 |

MINIMUM CHARGE

The monthly minimum charge shall be the fixed charge plus the energy optimization charge.

PRO-RATION OF DEMAND COST FOR AUTHORIZED MAINTENANCE

For customers billed on rates with demand charges, the demand charges other than "Customer Demand" shall be prorated if the maintenance schedule of the customer owned generation facility has been approved in advance in writing by the Company. Said pro-ration shall be based on the number of authorized days of scheduled maintenance. The customer shall pay the demand rate for the higher than normal demands due to the generation outage only for the days of authorized maintenance.

SPECIAL RULES

1. The Company shall install appropriate metering facilities to record all flows of energy necessary to bill the customer in accordance with the charges and credits of this rate schedule.
2. The customer shall furnish, install, and wire the necessary service entrance equipment, meter sockets, meter enclosure cabinets, or meter connection cabinets that may be required by the Company to properly meter usage and sales to the Company.

**D9. PARALLEL GENERATION-PURCHASE BY WPSC**

**PG-4M**

EFFECTIVE IN: All territory served.

AVAILABILITY

To customers contracting for electric service who satisfy the requirements of "qualifying facility" status under Part 292 of the Federal Energy Regulatory Commission's regulations under the Public Utility Regulatory Policies Act of 1978, generating electrical energy with total customer owned generating capacity of 20,000 KW or less, and desiring to sell electrical energy to the Company. Customers are not required to take electric service deliveries from the Company. Customers shall enter into a five, ten or fifteen year service agreement with the Company. Customers with generation capacity of 5,000 KW or less have the option of selling energy to the Company under this PG-4M tariff or the PG-3M tariff. ***The Commission's Order in Case No. U-21081 determined that the Company did not have a capacity need; therefore, no capacity payment will be payable to systems eligible for this tariff.***

NEGOTIATED RATES

Parallel generation customers have the right to request negotiated buy back rates. The following are the required procedure guidelines:

1. Except as allowed by Paragraph 3 below, the Company must respond to the customer owned generating system within 30 days of the initial receipt of the customer owned generating system written proposal, and within 30 days of receipt of any subsequent customer owned generating system written proposal;
2. The Company's rejection of the customer owned generating system written proposal must be accompanied by a counter offer relating to the specific subject matter of the customer owned generating system written proposal; and
3. If the Company is unable to respond to the customer owned generating system written proposal within 30 days it shall inform the customer owned generating system of:
  - a. Specific information needed to evaluate the customer owned generating system proposal.
  - b. The precise difficulty encountered in evaluating the customer owned generating system written proposal.
  - c. The estimated date that it will respond to the customer owned generating system written proposal.
4. The commission may become involved in the Company negotiations upon showing by either the Company or the customer owned generating system that a reasonable conclusion cannot be reached under the above guidelines. The commission may provide a waiver to the guidelines and order new negotiation requirements so that a reasonable conclusion can be reached.

Renewable Premium

At the Company's sole discretion, a premium to be paid on a per kWh basis may be applied to generators that generate a renewable credit that is transferred to the Company. Customers retain the right to refuse a renewable premium and keep the renewable credits or tags.

SPECIAL RULES

1. The Company shall install appropriate metering facilities to record all flows of energy necessary to bill the customer in accordance with the charges and credits of this rate schedule.
2. The customer shall furnish, install, and wire the necessary service entrance equipment, meter sockets, meter enclosure cabinets, or meter connection cabinets that may be required by the Company to properly meter usage and sales to the Company.
3. **(Continued from Sheet No. D-149.00)**

PARALLEL GENERATION RULES (Cont.)

10. The owner of the generating facility shall be responsible for providing protection for the owner's installed equipment and for adhering to all applicable national, state and local codes. The design and configuration of certain generating equipment such as that utilizing line-commutated inverters sometimes requires an isolation transformer as part of the generating installation for safety and for protection of the generating facilities.
11. The owner of a generating facility interconnected or proposed to be interconnected with the company system may appeal to the commission should any requirement of the company service rules filed in accordance with the provisions of PSC 113.70 be considered to be excessive or unreasonable. Such appeal will be reviewed and the customer notified of the commission's determination.
12. The company will notify telephone utility and cable television firms in the area when it knows that customer-owned generating facility is to be interconnected with its system. This notification shall be as early as practicable to permit coordinated analysis and testing in advance of interconnection, if considered necessary by the electric or telephone utility or cable television firm.
13. The owner of the generating facility shall be required to pay all interconnection costs, including any metering transformers, incurred by the company. Said costs, including financing costs, shall be paid by the owner within two years of the installation date of the interconnection facilities.
14. The owner of the generating facility shall be required to have liability insurance on the generating facility of at least \$100,000 or be able to prove financial responsibility.
15. Electric service to a customer owned electric generation installation may be disconnected for failure to comply with these parallel generation rules.

**D12. TRAILER PARK SERVICE (CLOSED)**

**PSDS**

(Continued from Sheet No. D-154.00)

EFFECTIVE IN All territory served.

AVAILABILITY

This schedule is available to the operator of any trailer park where such service was being billed under this schedule as of 4-15-66 and has been billed at the same location under this schedule continuously since that date but is not available to operators of groups of cottages or cabins or to motor courts or motels where the nature, number, and size of electric energy consuming devices are under the ownership or nominal control of the operator.

RATE

The standard rate applicable to the type of service taken and effective in the area where such service is rendered.

CONDITIONS

Trailer park operators will take and pay for all service through a single company-owned meter and will furnish the distribution system necessary to bring service to each trailer lot. Such distribution system will be so operated and maintained by the operator as to cause no interference with service to other customers of the company.

The trailer park operator may include electric service as an incident to rent for trailer space without specific charge therefore, or he may submeter it through his own meters and rebill it to the tenants. If submetering is practiced, the operator will furnish electric service to his tenants at rates not exceeding the company's rate for residential electric service effective in the territory in which the trailer park is located.

**D12. ENERGY WASTE REDUCTION (EWR)**

**EWR**

ENERGY WASTE REDUCTION SURCHARGE

This surcharge permits, pursuant to Section 91(4) of 2008 PA 295, as amended by 2016 PA 342, the adjustment of distribution rates, via the application of an Energy Waste Reduction (EWR) Surcharge, to allow recovery of the energy waste reduction alternative compliance payment made by the Company in compliance with Section 91(1) of 2008 PA 295, as amended by 2016 PA 342.

All customer bills subject to the provisions of this tariff, including any bills rendered under special contract, shall be adjusted by the Energy Waste Reduction (EWR) Surcharge per kWh or Customer as follows:

| <u>RATE SCHEDULE</u> | <u>EWR Rate, per kWh</u> | + | <u>Distribution Energy Charge, per kWh</u> | = | <u>TOTAL Distribution Energy per kWh</u> |

in Case No. U-20880

**D12. ENERGY WASTE REDUCTION (EWR)**

**EWR**

**ENERGY WASTE REDUCTION SURCHARGE**

This surcharge permits, pursuant to Section 91(4) of 2008 PA 295, as amended by 2016 PA 342, the adjustment of distribution rates, via the application of an Energy Waste Reduction (EWR) Surcharge, to allow recovery of the energy waste reduction alternative compliance payment made by the Company in compliance with Section 91(1) of 2008 PA 295, as amended by 2016 PA 342.

All customer bills subject to the provisions of this tariff, including any bills rendered under special contract, shall be adjusted by the Energy Waste Reduction (EWR) Surcharge per kWh or Customer as follows:

| <u>RATE SCHEDULE</u> | <u>EWR Rate, per kWh</u> | + | <u>Distribution Energy Charge, per kWh</u> | = | <u>TOTAL Distribution Energy per kWh</u> |
|----------------------|--------------------------|---|--|---|--|
| Rg-1M                | 0.00270                  | + | <b>0.03433</b>                             | = | <b>0.03703</b>                           |
| RG-OTOU-1M: on-peak  | 0.00270                  | + | <b>0.05704</b>                             | = | <b>0.05974</b>                           |
| RG-OTOU-1M: off-peak | 0.00270                  | + | <b>0.01426</b>                             | = | <b>0.01696</b>                           |

**D12. ENERGY WASTE REDUCTION (EWR)**

**EWR**

ENERGY WASTE REDUCTION SURCHARGE

This surcharge permits, pursuant to Section 91(4) of 2008 PA 295, as amended by 2016 PA 342, the adjustment of distribution rates, via the application of an Energy Waste Reduction Surcharge, to allow recovery of the energy waste reduction alternative compliance payment made by the Company in compliance with Section 91(1) of 2008 PA 295, as amended by 2016 PA 342.

All customer bills subject to the provisions of this tariff, including any bills rendered under special contract, shall be adjusted by the Energy Waste Reduction Surcharge per kWh or Customer as follows:

| <u>Tariff</u> | <u>Energy Charges</u> |
|---------------|-----------------------|
| Rg-1M         | \$0.0022 /kWh         |
| RG-OTOU-1M    | \$0.0022 /kWh         |

Effective for service rendered on and after June 1, 2022

Issued under authority of the Michigan Public Service Commission dated May 12, 2022 in Case No. U-20880

**D13. RATE REALIGNMENT ADJUSTMENT (RRA)**

**RRA**

The Rate Realignment Adjustment (RRA) permits, pursuant to MCL 460.11(6), the adjustment of rates to move rates to cost of service.

For customers that purchase power supply service from the Company, the RRA per kWh below is applicable. Customers taking service under the Retail Access Service Tariff (RAST) are not subject to the RRA.

RATE REALIGNMENT ADJUSTMENT

| <u>Rate Schedule</u> | <u>\$/kWh</u>      |
|----------------------|--------------------|
| Rg-1M                | \$0.01185          |

dated April 23, 2015  
in Case No. U-17669

**D13. RATE REALIGNMENT ADJUSTMENT (RRA)**

**RRA**

The Rate Realignment Adjustment (RRA) permits, pursuant to MCL 460.11(6), the adjustment of rates to move rates to cost of service.

For customers that purchase power supply service from the Company, the RRA per kWh below is applicable. Customers taking service under the Retail Access Service Tariff (RAST) are not subject to the RRA.

Issued under authority of the Michigan Public Service Commission dated May 30, 2018 in Case No. U-20110

**RETAIL ACCESS SERVICE RAS-1**  
**(Continued from Sheet No. E-6.00)**

2.6 Return to Full Requirements Service (Continued)

- 2.6.6 In the event that a Customer is slammed by an AES from Full Requirements Service and desires to return to Full Requirements Service, the Company will waive the notice period not to exceed twelve months. The Company's Default Service does not apply to such Customers.
- 2.6.7 In the event a Customer is returned to Company service after being dropped by the AES or due to the bankruptcy of the AES, or upon the AES's complete withdrawal from the market, the Customer will be served under the Company's Default Service tariff. The Customer may return to Full Requirements Service under the provisions of 2.6.1 to 2.6.3 above.

2.7 Billing and Payment

- 2.7.1 The Company will bill the Customer for Retail Access Service as outlined in section 3.3 of this tariff.
- 2.7.2 The Customer shall pay the Company the amount billed by the Company on or before a due date established by Customer billing rules approved by the Commission in accordance with the Commission's consumer standards and billing practices, R 460.101-460.169, as amended, for residential customers, and R 460.3901-460.3908, as amended, for non-residential customers.
- 2.7.3 Where incorrect billing results from a calculation error discovered by either the Company, the AES or the Customer, the error will be corrected and revised bills for the Customer and the AES will be calculated and settled on the next billing period after the error is discovered. Billing errors discovered by the Company shall be adjusted as provided for in the residential and commercial and industrial billing rules.

2.8 Disconnection of Service

- 2.8.1 The Company is the only Person allowed to physically shut off service to a Customer.
- 2.8.2 Disconnection of service to a Customer for nonpayment of the Company's bill or for any violation of the Company's tariffs shall be in accordance with applicable Commission rules and Company tariffs. The Company will provide notice to the AES of the date/time of actual disconnection. The Company shall not be liable for any losses to the AES due to disconnection.

2.9 Customer Protections

- 2.9.1 The maximum early termination fee for residential contracts of one year or less shall not exceed \$50. The maximum early termination fee for residential contracts of longer than one year shall not exceed \$100.
- 2.9.2 It is the AES's responsibility to have a current valid contract with the customer at all times. Any contract that is not signed by the customer or Legally Authorized Person shall be considered null and void. Only the customer account holder or Legally Authorized Person shall be permitted to sign a contract. An AES and its agent shall make reasonable inquiries to confirm that the individual signing the contract is a Legally Authorized Person. For each customer, an AES must be able to demonstrate that a customer has made a knowing selection of the AES by at least one of the following verification records:
- i. An original signature from the customer account holder or Legally Authorized Person
  - ii. Independent third party verification with an audio recording of the entire verification call
  - iii. An e-mail address if signed up through the Internet.

The Commission or its Staff may request a reasonable number of records from an AES to verify compliance with this customer verification provision and, in addition, may request records for any customer due to a dispute.
