

List of Consultants Meeting Federal Qualifications for Archaeologists, Historians and/or Architectural Historians

Contact: Katie Kolokithas, Survey and Information Coordinator

Phone: 517-241-6062

Email: kolokithask1@michigan.gov

The Michigan State Historic Preservation Office does not permit or license consultants. The individuals in this list have provided documentation to the state historic preservation office that they meet the minimum federal professional qualifications set forth in 36 CFR Part 61. **Inclusion in this list does NOT constitute endorsement by the State Historic Preservation Office or the Michigan State Housing Development Authority, nor does it guarantee that any work product carried out by persons on the list will necessarily meet federal and state requirements.** Before engaging the services of any consultant, it is always advisable to contact references named by the consultant -- especially those people for whom a consultant has worked. Inquiring about the nature of the project and the quality and timeliness of the work performed may provide an indication of a consultant's ability to successfully complete your project.

Contact us to submit qualifications for listing or with any updates to this list. Consultants may list a maximum of two contact persons and two office locations. The list is updated twice annually (January and June). This list is alphabetized by company/institution.

The list is divided into two main sections and several subsections.

1. Archaeological Consultants

- a. Archaeological Consultants who have provided their credentials to the State Archaeologist and were found to meet or exceed the federal professional qualifications as stated in "Archaeology and Historic Preservation: Secretary of the Interior's Standards and Guidelines", Federal Register 48(190), September 29, 1983. Those who submitted additional qualifications as specifically prehistoric or historic archaeologists have this listed with their names. This list is alphabetized by company/institution.
- b. Maritime Specialists (Note that there are currently no federal qualifications for a specialization in underwater archaeology above and beyond those cited above).
- c. Background Research Services: These consultants provide background research services, including archival and state file checks. These individuals are not required to meet federal qualifications for archaeology.

2. Historians and/or Architectural Historians

- a. Historian/Architectural History Consultants who have provided their credentials to the SHPO and were found to meet or exceed the federal qualifications as stated in "Archaeology and Historic Preservation: Secretary of the Interior's Standards and Guidelines", Federal Register 48(190), September 29, 1983.
