Property Address Locator Instructions

Use these instructions to determine if the property in question is identified by HUD to be in an area of greatest need. The Foreclosure Risk Score must be 6 or greater.

1. Use the Property Locator to determine the Foreclosure Risk Score.
2. Open your web browser and enter the following URL: www.policymap.com/map.
3. In the address search field, type the complete property address and click Go.
4. Select the State & Local tab on the far right of the window.
5. Select HUD NSP Data Set (1).
6. Select Foreclosure Risk Score.
7. Match the color shade of the selected address area with Foreclosure Risk scale.
8. If the property is located in the 5 – 6 range, confirm the Foreclosure Risk Score eligibility by verifying the property census tract on the HUD list at http://www.michigan.gov/documents/mshda/MI120_LM-byriskscore_264414_7.xls.
