

STATEWIDE RECORDS MANAGEMENT SECTION

Coding Age

Victims and Offenders

- Use the numerical two digit value for their age. (enter "09" for age 9)
- Use "99" if the victim or offender is 99 years of age or older
- Use "00" if the age is "unknown"

Arrests

- You MUST enter a value for the arrestee's age.
- If you do not know the age of the arrestee, you must estimate the age and update the correct age at a later date.

NOTE:

Many vendors universally use code "99" to mean unknown. Contact your Uniform Crime Reporting representative and vendor if code "99" has been programmed as "unknown age" in your records. The correct Michigan Incident Crime Reporting code for an "unknown age" is code "00".
