MICHIGAN DEPARTMENT OF STATE POLICE
Data as of August 27, 2008

2008 PRELIMINARY SEMI-ANNUAL CRIME STATISTICS
JANUARY - JUNE

Preliminary figures are derived using MICR (Michigan Incident Crime Reporting) crime statistics reported for the first six months of 2008 from agencies that have jurisdiction for a community with a population of 100,000 or more. Statistics from these agencies are used since they represent the majority of the population for Michigan. The violent crime and property crime totals for these agencies have decreased for the first 6 months of 2008 when compared to previous year's figures. The four offenses in the category of **violent crime** declined, in the aggregate, 12.5%; the three offenses in the category of **property crime** declined 6.8%. The number of reported arson offenses decreased 7.4%.

*The Motor Vehicle Theft category counts the total number of vehicles stolen. Victim crimes (murder, rape, and aggravated assault) count the number of victims. All other figures represent total number of offenses reported with no hierarchy as in the FBI's UCR method of reporting.

^A crime rate is calculated by dividing the number of reported crimes (violent, property, and arson) by the total population; the result is multiplied by 100,000.

Note: The FBI's 6 month Preliminary release data is as of November 17, 2008.
